## THE BEAUTIFULLY ENGINEERED C5

With its sleek lines, the Citroën C5 not only boasts distinctive style – it is also a quantum leap forward in control, comfort, safety and sheer driving pleasure.

Start the engine in the Citroën C5. Notice anything? You barely feel any vibrations from the two powerful HDi Turbo diesel engines. That's because the engine vibrations are countered by computer-controlled pneumatic engine mounts. Virtually every function of the C5 is monitored and controlled by three digital computer networks.

The task of some of that computing power is to control the suspension. The C5 uses a system called Hydractive III+. Based on the world famous Citroën invention of Hydropneumatic suspension, it

can alter both the height and firmness, overcoming the usual compromise between ride-comfort and handling. At speed, the car automatically lowers for increased stability and improved fuel consumption. On rough roads it automatically raises for increased clearance and comfort. Its self-levelling feature guarantees a constant ride height, regardless of the load or number of passengers. Even the bi-xenon headlights\* are digitally controlled. Not only do the headlights make adjustments to compensate for irregularities in the road surface they adapt themselves to the direction of travel. This ensures a clear view of the road at all times. Indicate a turn at night and in addition to the

headlights turning in the direction of travel, kerb lamps\* also come on to light the way.

Like the Citroën C6 which has one of the highest ever combined EuroNCAP scores, the C5 offers an outstanding level of safety and has a 5-star EuroNCAP rating#. Its wide array of sensors lets the C5 adjust suspension, braking and engine functions to get you out of trouble before you're even aware you're in it.

The C5 offers a range of state-of-the-art features that lift style, comfort, and performance to a new level. It's no wonder the new C5 is being hailed as Europe's new Superpower.

\* Standard feature across all 'Exclusive' models only.  
# EuroNCAP Adult Occupant Protection Rating.

## A SMOOTH SILHOUETTE MATCHED TO PURE AND **FLUID LINES**

Whether in the form of the distinguished Saloon or the sleek Tourer, the Citroën C5 is above all ... a Citroën. Faithful to the brand history of innovation and distinctive styling, the C5 is instantly striking, both on the inside and out. From the elegant, energetic lines of the Saloon to the flowing curves of the Tourer, the C5 strikes a stunning balance between refined style and sporty exuberance. It's a car that is built to turn heads as quickly as it turns corners.

From any angle, the new C5 inspires awe and desire. With the muscular wheel arches and a concave rear window, its road presence is impossible to ignore. The trademark chrome chevrons in the grille combined with the flowing lines of the sculptured body and roofline reinforce its bold personality and pure sophistication.

## OPTIMAL COMFORT

Something strange happens when you sit inside the Citroën C5 – you feel excited and relaxed, all at once. That's because the Citroën C5 is characterised by both quality and excellent levels of comfort for all, in particular, the driver. Nothing sums up this unique experience better than the luxurious leather seats, which are ergonomically sculpted for maximum comfort in all driving conditions. Heated, electric front seats which can be effortlessly adjusted to your preferred position, and a driver's seat with massage function\* – in terms of comfort, what more could you ask for?

For the ultimate in driving comfort, relax with a back massage. This function\* is available for the driver's seat and gently massages the lower back when activated by the simple push of a button. The front seats are also equipped with variable heating.\*

The front seats are fully electrically adjustable allowing all drivers to find their ideal driving position. Adjustments can be made for reach, height, seat incline, backrest incline, lumbar support, and the angle of the upper backrest. Furthermore, the welcome function of the driver's seat allows easier access to the cabin. On unlocking the vehicle, the seat will automatically retract by 50mm to allow for easy access. Once the ignition is turned on, the seat returns itself to the memorised position.

The comfort models are fitted with a sporty interior trim that blends soft French leather with refined fabrics.

The exclusive models are fitted with a luxurious full leather trim.

\* Driver's seat massage function and heated front seats are available on 'Exclusive' models.

## UNCOMPROMISED WELL-BEING

The roomy interior and the tangible quality of materials and trim used on the dash, steering wheel and door panels, create a welcome ambience. Height adjustable head restraints, central armrests, and plenty of leg room, ensure an optimal drive environment for all. A wide rear bench with a slightly reclined seatback position offers ample space and comfort for rear-seat passengers too. With two sports/leather trim and full leather

trim upholstery colours to choose from, you can customise the interior to your own style. Special care has been given to the selection of the materials used within the cabin as well as to the finishing of every element. The materials used are soft and tactile. The sleek and flowing design of the door panels combine form with function. Integrated armrests and handles feature as well as door pockets.

## INTERNAL SERENITY

Drive comfort is at the heart of the Citroën C5 and it has numerous advanced soundproofing features to wrap you in your own haven of tranquillity. This serene environment has been achieved by the utilisation of acoustic windscreen glass, triple sealing of the doors, additional soundproofing of the wheel arches, and high levels of soundproofing throughout the cabin. With the C5's insulation innovations you can truly escape from the noise of the outside world.

The Citroën C5 is equipped with automatic climate control air-conditioning. In the rear as well as the front, the air vents are fully adjustable. In the front, the driver and the passenger side has access to individual temperature and airflow controls. A soft diffusion system creates a continuous blanket of air within the cabin for complete thermal comfort. The glove box is also cooled via vents from the air-conditioning.

An air quality sensor constantly monitors the air entering the cabin. As soon as the level of pollutants reaches a certain level, for example in city traffic, it isolates the cabin by automatically activating the air recirculation function.

Optional panoramic glass roof shown is available on the C5 Tourer at additional cost.

## PRECISION DRIVING

At the wheel of your Citroën C5, it's all about intuitive control. Designed to anticipate your expectations, the C5 offers unparalleled levels of driving pleasure, safety and comfort. Every second, on-board computers and sensors are making millions of calculations and adjustments to your driving conditions – all for your maximum safety, comfort and fuel efficiency. All you have to do is sit back and enjoy the drive.

The optional NaviDrive\* communications system is matched to a large 7" colour screen. The system combines all audio functions, radio, CD and MP3. With a 30Gb hard drive, of which 10Gb is reserved for an MP3 jukebox function, integrated telephone and GPS satellite navigation with integrated Australian road mapping with both visual and audible guidance.

The design of the driver information display combines elegance with innovation. The analogue dials are permanently backlit while the needles rotate around the outside of the dials allowing large information screens to be placed inside bringing all driver information to a central area straight in front of the driver. This reinforces the feeling of being centred in a cockpit that is totally focussed around driving pleasure and control.

The driver's seat memory function allows two individual drivers to program their preferences into the car. Not only is it possible to set electric seating adjustments, you can also set the positioning of the rear-view mirrors and their preferred climate control settings.

\*Optional feature available on 'Exclusive' models at an additional cost.

## ADVANCED SIMPLICITY

The state-of-the-art cockpit is driver-focused with a host of exciting functions. The steering wheel is equipped with a fixed-centred control hub. Needless to say, it doesn't only turn the wheels, it turns your car into a high-tech tool, all of which is adjustable with the soft touch of a button. From activating the speed limiter and cruise control to changing songs or the content of the central information display, you have everything you need, right at your fingertips.

In sharp bends or at intersections, the Static or Dynamic AFS (Adaptive Front-lighting System) headlamps illuminate in the desired direction for greater visibility and increased

safety. The Static AFS on Comfort models allows illumination of up to 75 degrees using an angled static lamp. The Dynamic AFS on Exclusive models allows illumination of up to 105 degrees using directional lamps linked to the steering and directional indicators. This system is combined with Bi-Xenon dual function, Bi-Directional headlights for excellent visibility. Both Dynamic AFS and Bi-Xenon dual function Bi-Directional headlights are standard on 'exclusive' models.

You'll also find parking a breeze thanks to the front and rear electronic park assistance. Sensors at the front and rear of the car detect

objects within a close range and warn the driver with the audible and visual directional alert feature. Rear electronic park assistance is available as standard on all models, and front and rear electronic park assistance is available on 'Exclusive' models.

In conjunction with the Hydractive III+ suspension and the electric parking brake, the Hill Start Assist function is also available as standard. When the brake pedal is released on a slope, this function automatically holds the vehicle in place for up to 2 seconds. This allows the driver time to move to the accelerator without the car rolling.

V6 HDi

## REMARKABLE PERFORMANCE

To deliver a clean and efficient driving experience is at the heart of the Citroën brand. Designed to the highest environmental and fuel efficiency standards, it's no wonder Citroën has been named as one of the leading car makers in Europe with the lowest average emissions across its entire range.

The C5's engine range has been renewed and expanded to include 2 new diesel engines. Not only do they offer new levels of performance and fuel economy, they also meet the tough new Euro V emissions standard which means lower emissions and the ability to maintain them for longer.

The new C5 ensures minimal CO<sub>2</sub> levels by cutting pollutant emissions with its electronically controlled high-pressure direct injection diesel engines. The C5 is equipped with the very latest diesel technology with a choice of a 2.0L or a 3.0L HDi Turbo Diesel. Both engines are equipped with a diesel particle filter system which eliminates particle emissions.

### The new 2.0L Diesel Engine

The new 2.0 litre HDi engine is a truly new power unit with a new, stiffer block, a new cylinder head that enables the engine to breathe more efficiently (13 per cent more air admitted to the engine), new pistons and combustion chambers to work with the new 200 bar high pressure injection system, a new and more powerful turbocharger, new engine management system, new levels of noise, vibration and harshness reduction and longer service intervals for the particulate filter. These changes enable the new 2.0 litre engine to offer more than a 5 percent increase in torque, a 20 percent power lift from 100 to 120 kW, while engine noise is a cut by 1 dB. Meanwhile, CO<sub>2</sub> emissions drop by an average of 6.3 percent across the C5 range. The new engine has a dramatic effect on performance, and improved combined fuel consumption to 6.8 L/100 km for the saloon and reduced CO<sub>2</sub> emissions.

### The new 3.0L Diesel Engine

The new 3.0 litre engine lifts power to a new level thanks to its enlarged and strengthened cylinder block, upgraded piston cooling, and a new larger capacity twin variable geometry turbocharger. These variable displacement turbochargers are designed to enhance torque production and mean that at low engine speed the turbochargers can respond quickly in the manner of a smaller turbocharger, while at high speeds they can pump the high volumes of air required by altering the angle of their vanes.

The new Citroën V6 HDi engine is fitted with a third generation particulate filter that is both highly effective and is self cleaning, which can either occur naturally if the use of the engine is suitable or the engine management system can clean the particulate filter by raising its temperature to 450 degrees.

The new 3.0L V6 engine does not so much have a torque curve as a torque table top. From 1600 rpm to 3500 rpm, the torque curve is actually perfectly flat at the maximum torque of 450 Nm. With the new 3.0 litre V6 under the bonnet. Combined fuel consumption also improves to 7.4 L/100 km for both the saloon and tourer.

## PROTECTIVE FORCE

Accident avoidance is the key to passenger safety. From the comfort of the driver's seat to reduce fatigue, to the various and lengthy list of active and passive safety equipment, the entire design process of the new Citroën C5 has been focused around safety. The driving position benefits not just from the usual collection of airbags, but also a driver's knee airbag and a retractable steering column for total on-road control. Citroën C5 is also equipped with a vast array of electronic driving aids: ABS, EBD, EBA and ESP with ASR traction control. The new C5 is equipped with: ABS, to avoid the wheels locking under braking; EBD, which evenly distributes braking force between all wheels; EBA, to reduce

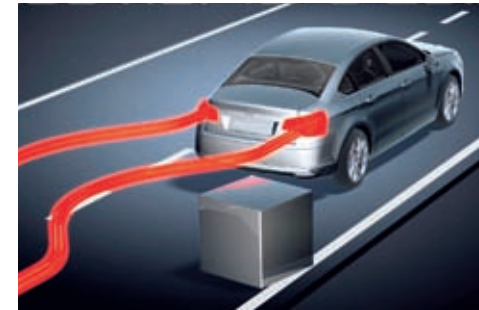

stopping distances under emergency braking; and ESP, which maintains vehicle stability in steering manoeuvres. ESP also comes with ASR traction control which improves traction and can help the driver maintain control even if the limit of adhesion is inadvertently reached while cornering.

The new C5 can be equipped with up to 9 airbags for total passenger protection. Driver, passenger, front lateral, front and rear roof, and knee airbags are standard. Lateral rear airbags are standard on 'exclusive' models. While passenger protection is the key focus of the new C5, vehicle protection has also been of importance. All models feature remote central locking as well as

deadlocks where the vehicle automatically locks while in motion and automatically relocks after 30 seconds if no doors are opened.

Tyre pressure is an important element of driving safety. Tyre pressure sensors constantly monitor the pressure of all tyres and alerts the driver via audible and visible warnings should any change in tyre pressure be detected. This feature is standard on 'exclusive' models.

Enhancing both safety and comfort, the electronic park brake engages and disengages automatically. It is linked to the engine torque on application to ensure it is always engaged with the required strength to hold the vehicle.

## ROOM FOR MORE

The dynamic and fluid outline of Citroën C5 Tourer™ masks excellent load capacity and a useable, well-shaped load space. A motorised Tailgate\* is also available allowing the boot to be opened at the touch of a button. A load volume of 505 litres under the load cover is easily accessible through a wide-opening tailgate and this leads to interior dimensions of 1115mm wide and 851mm high. The load cover rolls out to cover the full length of the boot, protecting belongings from unwanted attention while the vehicle is parked. A boot net can be positioned in many different ways within the load area using the various load hooks and can prevent loads from sliding around the boot while the vehicle is moving.

Thanks to the Hydractive III+ suspension, the load sill is height adjustable on the new C5 Tourer allowing the load height to be raised or lowered by up to 6cm. This automatically returns to the normal level once the vehicle moves away or by using the control switches in the cabin. A useful removable torch is also situated in the boot of the C5 Tourer, doubling up as a boot light, the torch can be removed when required. For even greater load space, the rear seats fold in a 2/3, 1/3 split allowing longer, larger items to be carried as required. Stylish roof bars also feature for additional carrying capacity.

\*Standard feature on 'exclusive' models.

## FOR YOUR PEACE OF MIND

Every new Citroën vehicle is covered by a 3 year / 100,000 km manufacturer's warranty, a 12 year corrosion warranty and a 3 year paint warranty.

Whilst Citroën vehicles are engineered for maximum reliability, there is always the possibility of something going wrong due to circumstances beyond your control. In the event your Citroën is immobilised, Citroën Roadside Assist will help you continue your journey with the minimum of inconvenience to you and your passengers. This Citroën Roadside Assist service supports you and your Citroën for the period of your manufacturer's warranty, no matter what time of the day it is.

To find out more information on our range of products, current offers, prices and specifications, or to find your nearest Citroën dealer, please visit [www.citroen.com.au](http://www.citroen.com.au) or call our Customer Enquiries line on 1800 804 747.

# WHEELS, COLOURS AND UPHOLSTERIES

Citroën C5 is available in a choice of 8 exterior colours including metallic and pearlescent shades, all chosen to reflect the refined, elegant nature of the new C5. A range of steel and alloy wheels are also available for an individual look.

Two interior trim types are available for the Citroën C5 range: Either Full Leather or Sport Leather/Cloth Trim upholstery in a choice of Matinal Beige\* or Mistral Black.

\*Matinal Beige in Sport Leather/Cloth Trim upholstery is available by special order only.

Baltique 17" Alloy

Atlantique 18" Alloy

Adriatique 19" Alloy

## CITROËN – AUSTRALIA'S LONGEST CONTINUALLY IMPORTED CAR BRAND

Citroën, one of the world's most distinctive brands, has long been recognised for sophisticated design and intelligent engineering. Citroën is part of the PSA Group which is Europe's second largest manufacturer of cars and the leading manufacturer of light commercial vehicles. The entire Citroën range is designed for the well-being and comfort of customers.

Citroën takes pride in being a responsible car manufacturer. Today, Citroën is renowned for being highly awarded innovators in the field of automotive safety and is also highly recognised for its efficient and clean driveline technology.

When it comes to safety, Citroën, with the C6 model, has one of the highest ever combined EuroNCAP scores with 100 points in the EuroNCAP safety tests. This same vehicle was also one of the first cars ever to achieve maximum ratings for both pedestrian safety and adult occupant protection, making it one of the safest cars on the market.

In 2007, the European Federation for Transport (independent organisation) revealed that the PSA Group is the carmaker with the lowest average emissions across its entire range. This confirmed the PSA Group's environmental leadership in Europe for the second year running. In 2007, the Group sold 1,000,000 vehicles emitting less than 140g/km of

CO<sub>2</sub>, of which 750,000 were under 130g/km. In the less than 130g/km CO<sub>2</sub> segment in Europe, the Group's market share exceeded 26%.

More than any other carmaker, Citroën can lay proud claim to a story that is also the history of the 20th century. To illustrate this fact, the DS took third place in the Car of the Century competition held in Las Vegas in December 1999. The history of the Marque is underpinned by strong, enduring values. Each vehicle and each object bears witness to the way in which Citroën has grasped these values, giving them life and substance. Our past is fundamental, enabling us to understand the present and, above all, to prepare for the future.

Since 1923, Citroën has delivered a unique driving experience of quality and comfort to Australian drivers. Industry defining innovation, advanced safety and environment technology, combined with a unique design has made Citroën the wise and stylish choice for thousands of Australians. In Australia, the Citroën passenger car line-up ranges from small, small to medium cars, people movers, all the way through to our luxurious C5 and C6 models. In addition to this there are two commercial vehicles, the Berlingo and Dispatch. For more information visit [www.citroen.com.au](http://www.citroen.com.au) or call 1800 804 747.
