

ALL-NEW **MUSTANG**

Go Further

Prepare for takeoff

Taking inspiration from classic airplane cockpits, Mustang strikes a balance between analog dials and digital feedback. The steering wheel just feels right in your hands, for a dynamic driving experience.

Overseas model shown.

The Mustang consumer brochure contains images and specifications of the overseas Mustang model. Some specification differences between the Australian and overseas model may exist. Fastback model shown in Race Red. Convertible model shown in Magnetic Grey.

Head turning and heart pounding

Mustang's full-throttle power is designed to deliver pure exhilaration and its sleek body style designed to get you noticed.

Convertible model: top closed

Convertible model: top open

Fastback or Convertible?

The Mustang offers both Fastback and Convertible body styles. Now you decide.

Talks the talk

This is not technology for technology's sake. SYNC™ 2 with voice control lets you talk to friends, play music, change climate and use the Sat Nav system without taking your hands off the wheel.

Power Players

There's a thrilling 5.0-litre V8 engine option available, but the real news is how we've unleashed Mustang-level performance from Ford's highly efficient 2.3L EcoBoost engine.

The Design

You can't miss it! The bold styling, HID headlamps with signature LED lighting and the famous tri-bar LED taillamps are instantly recognizable as a Mustang.

The Tech

Whether it's the rain sensing wipers, satellite navigation, rear view camera or push button start, every feature Mustang offers enhances your driving experience.

Exhilarating driving dynamics

The thrill you get behind the wheel of a Mustang is a given, but the new design incorporates 19" wheels, selectable driver modes and fully independent rear suspension for the first time.

Stand out from the pack

| Interesting how quickly want becomes need. |
