The Power of Dreams

#### Honda Australia Pty. Ltd. ACN 004 759 611 ABN 66 004 759 611 95 Sharps Road, Tullamarine, Victoria, 3043. Freecall 1800 804 954 honda.com.au/cars

The specifications and major features listed herein are accurate as at the date of printing (February 09/09 YM). However, Honda Australia Pty. Ltd. reserve the right to change or modify specifications and major features at any time without prior notice. Due to ordering, shipping and freight factors, some colour and model availabilities may vary from time to time. Check with your Honda Dealer for current information on availability. Automatic transmission available for an extra cost. Only Genuine Honda Accessories are made to fit Honda vehicles. For a Genuine Honda Accessory brochure contact your Honda Dealer or Honda Australia on 1800 804 954. The fuel consumption figures quoted in this brochure are based on ADR81/02 test results. You may experience different results depending on driving conditions and the condition of the vehicle. Honda warranties apply where due care is exercised by the owner and the vehicle is maintained in accordance with the vehicle's owners manual. Please refer to Honda's warranty documentation for exclusions and conditions. Honda Australia Pty. Ltd. recommends careful examination of all official Honda warranty documentation before purchasing. This brochure is printed on glives 80, 80% post consumer fibre and 20% totally chlorine-free pulp. It is FSC certified mixed source paper which ensures that all virgin pulp is derived from well managed forests and is manufactured by an ISO 14001 certified mill. VTi-S model shown on cover.

### [Our Dream]

To create the *ultimate* small car, with a **big heart**.

Whoever said the small things in life make the biggest difference might well have been talking about the Honda Jazz. From her hidden compartments to her attractive grille, every little feature has an endearing quality all of its own. So you'll fall in love with her, piece by piece.

The Jazz GLi, GLi-SP, VTi and VTi-S are smoother and sexier. She's a whole lot sportier too, with enhanced aerodynamics, sharper lines, a wider stance and superior rear suspension. VTi-S Jazz also comes with sexy alloy wheels and front and rear sports bumpers. But just because she's

small, it doesn't mean she lacks power. On the contrary, Jazz is a lot more powerful than you'd think, with a choice of two athletic yet remarkably fuel efficient engines. With fuel consumption of just 5.8 litres per 100 km\*, you get the maximum amount of power out of your fuel, or as we say you'll "drive every drop". And it's all thanks to her amazing i-VTEC engine.

Now, here's where we get down to the nitty-gritty. Her 1.3 litre i-VTEC engine delivers 73kW of power, while her 1.5 litre i-VTEC engine delivers 88kW, making her among the most powerful in her class. She also features a leading edge 5-speed automatic or 5-speed manual transmission and her sporty new paddleshift on the VTi-S puts the pleasure of shifting gears at your fingertips. So what does all this mean to you? Well, just jump in and take a ride. She's smooth, unbelievably agile and so trim and taut she makes parking a breeze and every tight turn an absolute joy. Along with her larger mirrors, she now features a slimmer pillar which gives you a great view of the road, as well as retractable rear headrests for greater visibility out the back.

\*The fuel consumption figures quoted are based on ADR81/02 test results for Jazz GLi with manual transmission.

It's no surprise she's Japan Car of the Year, her second claim to this title.

Just shut the door, get comfortable and make sure to leave all those annoying worries outside, because that's the one thing Jazz doesn't have room for. Now, take a look around. Her quality fabrics and finishes, a stunning dash, cushioned front and rear seats (which your behind will

definitely thank her for) and, of course, wider windows that reveal more of the outside world are enough to make you feel a tad spoilt. Another thing that strikes you about her interior, is the space. How can she hide so much room in that tiny figure of hers?

And even when it comes to unloading all your stuff,
Jazz's rear doors open to an 80° angle to make things
oh-so much easier. So all that's left to do now is relax,
plug in your MP3 player and put on a little music. Maybe
something contemporary or classical perhaps – hey it could

even be country music for all it matters. After all, this is one place where you can just be yourself. And you've got to admit, there's no better way to start and end the day.

What do you do when you've planned a quick weekend getaway with friends, and they show up with way too much luggage? Well, to be honest, you can't really make a fuss; after all you've probably done the exact same thing. Relax. You can just put everything in the back of Jazz, she won't mind whatsoever. And the best thing is, everyone will still be completely comfortable, no matter how long

the journey. So provided that no one decides to play any of those annoying road trip games, you can be pretty sure that you're in for a good time.

The ride is smooth, quiet and very comfy. And it's all thanks to Jazz's well designed body. Her solid structure helps eliminate noise and vibration without increasing her overall weight. Now that's something every girl loves to hear. There is one thing though – with all that room and numerous compartments within her cabin, you may need to try to remember where you've stashed your things, especially that skinny soy latté because Jazz comes with ten cup holders. And no, that's not a misprint. Her double glovebox is sure to come in handy, and so is her instant

little Jazz actually drinks. It's the small details like these that make life so much easier, and Jazz is just full of them.

# All the magic of Magic Seats.

With one swift action, Jazz's seats will shift and fold to your every command, allowing you to arrange her interior to suit your needs. She even gives you three different modes to choose from.

In Tall mode, raise her back seat cushions to fit four large suitcases or perhaps a tall shrub sitting upright. In Utility mode, fully collapse her rear seats to make space for your bicycle or just about anything else. And in Long mode, recline her front and rear seat to create a space long enough to fit a surfboard. If you're not into surfing, try a pair of skis. Or maybe hockey is more your thing. Well, anyway you get the point.

Utility mode
With the back seats
down, you'll have all
the room in the world.

**Tall mode**Raise her back seat
cushions to fit taller objects.

Long mode
Recline the left seats
to fit long, wide objects

Long mode

Recline the right seat

to fit long, thin objects

Secret Storage Case
You can hide anything
and everything from everyone.

This is where Jazz gets serious. When it comes to protecting you and your friends (and anyone else within the cabin for that matter), Jazz is full of ingenious safety features to help avoid collisions and minimise any injuries where an accident becomes unavoidable. Her driver and front passenger SRS airbags, Anti-lock Braking System (ABS) with

Electronic Brake-force Distribution (EBD) and front seatbelt pretensioners provide excellent protection, kind of like your very own personal bodyguard, which is exactly what you'd expect from any Honda vehicle. There are front, side and curtain airbags on the VTi, VTi-S and GLi-SP. The GLi-SP is also equipped with a multi information display

and seatbelt reminder for all passengers, which are standard on the 1.5 litre models. Jazz also uses Honda's advanced G-Force Control (G-Con) technology. She creates a G-Con cage that cocoons everyone inside, while her collapsible body sections absorb the impact of a collision, helping to prevent it from reaching the cabin. Honda is always looking

for ways to help keep pedestrians safer as well, and Jazz does just that. Jazz has an unobstructed area between her bonnet and engine, and is fitted with bonnet hinges that compress upon impact and energy-absorbing wiper pivots that all contribute to pedestrian safety. See, we told you she takes safety seriously.

# You'll always be well looked after.

As if having your very own Jazz wasn't enough, you'll also have access to personalised online services through our exclusive HondaONE website. This secure site gives you all the important information you never knew where to find, like up-to-date service history, vehicle records, maintenance tips and personalised service reminders.

To keep Jazz looking good, feeling great and to help maintain her value, make sure you have her serviced regularly (after all, a girl needs to pamper herself every now and then). And in return, everyone at our Honda Dealerships who take good care of every Jazz, promise to constantly update their knowledge and build on their factory training to help keep you driving every drop.

We even stock a comprehensive supply of Genuine Honda Parts and Accessories. This means no-one else can service and tune your Jazz like we do. Honda also offers a three year/100,000km warranty, because we have all the faith in the world that your Jazz will perform at her best (in fact, we offer the same warranty with every Honda vehicle).

You'll also receive a six year rust perforation warranty. And to keep you up-to-date with all the latest news from Honda, you'll also receive *Honda. The Magazine* over a five year period. All this is just our way of making sure that you'll be as happy with Jazz in the years to come as you were on that very first day you spotted her in the showroom and decided to take her home.

### What if our technology was more... alive?

ASIMO, the World's Most Advanced Humanoid Robot, was born from a dream to create a robot that could benefit people in everyday life. His name stands for Advanced Step in Innovative MObility, a title he's definitely worthy of. Currently ASIMO's capabilities include: running at 6 km/h, walking on uneven surfaces, turning smoothly, climbing stairs, pushing a cart, receiving and delivering trays and he can even dance a little boogie if the occasion calls for it. Our dream is that one day, everyone will have an ASIMO of their own to help around the home or office.

# What if we tested our new technologies in the most extreme conditions possible?

At Honda we have always believed that racing is fundamental to our development. It's the ultimate testing ground and regardless of whether we win or lose, the same question is always asked – how can we improve performance? And you can be sure that for every improvement made on the track, there is an equal improvement made to every Honda vehicle that hits the road.

## What if we had our own solar cell production company?

solar cell production. Honda's unique C.I.G.S. solar cell produces the highest level of conversion efficiency in the thin film category and only requires half the energy to manufacture, so it's more environmentally friendly throughout its entire life. Why does a vehicle company produce solar cells? Purely so we know that we are doing everything possible to help prevent global warming.

## What if a plane had its engines mounted on top of the wing?

Well, it would be original and it would be called the HondaJet. Secondly, the engines would have to be in a special position on the wing we call 'The Sweet Spot'. That would then result in less drag at high speeds, 30% better fuel economy and because there is no need for structural engine mounts on the fuselage, 30% more cabin space.

### What if there was a car that only emitted water?

Obviously the world would be a better place and the good news is, such a car already exists: The Honda FCX Clarity. It works by converting hydrogen into electricity, which leaves you with only one emission, H2O. And in 2008, this totally new fuel-cell vehicle went into production.
