

This Brochure is prepared by Daimler AG and it predominantly reflects the capabilities and performance of vehicles sold in Europe. Some characteristics, capabilities, performance features and optional extras (e.g. towing systems) may not be available or may not apply in Australia or under Australian conditions. The information in this Brochure is therefore indicative, illustrative and provided only for guidance and should not be relied on. To obtain current and accurate information on a vehicle and any options applicable to Australia, contact your local authorised Mercedes-Benz dealer.

Mercedes-Benz

# The C-Class

Saloon and Estate

Mercedes-Benz

ngly rational: live for today and think of tomorrow. The beguiling form of the C-Class –  
then calm it down again: up to ten assistance systems, innovative telematics generatio  
s, elegant trims. A revolution of inner values. The C-Class Estate: as attractive as it is i  
the style. A defining generation: individual and spontaneous. Its purpose is to serve.  
s, which can protect you every step of the way. With the optional COMAND Online sys  
emphasis on freedom. Wilful disobedience: adrenaline for driving pleasure. True perfec  
a more mature appearance. Wheels which sharpen the side profile. A fine chrome ha  
ve details wherever you look. The C-Class Estate can be a lounge: with plenty of space  
vage space, a payload of up to 540 kilograms and, as an option, the intelligent EASY-PA  
s it all: a dashboard trimmed in wood or aluminium, for example, a steering wheel in n  
in every detail. **A class ahead.** The C-Class: it knows exactly where it comes from and v  
ration with its own rules. You can have it all. But with enjoyment comes responsibility

**Saloon.** The C-Class goes its own way simply because it can. Confident and captivating in appearance with a powerful, masculine exterior. Seductive and appealing in character thanks to a fresh, stylish interior and intelligent details such as the optional PARKTRONIC, incl. Parking Guidance, and Becker® MAP PILOT systems. Thrilling in essence courtesy of options such as the Dynamic Handling package and 4MATIC. And that's not all: up to ten assistance systems available as optional extras, efficient engines and rich details with a piano-lacquer-look finish. The C-Class: a class ahead.

At a glance | from page 4    Insight | from page 30

**Estate.** The C-Class Estate: proof that practicality can go hand in hand with excitement. Exciting thanks to a provocative front section with distinctive features, dynamic headlamps and a powerful bumper. Reassuring courtesy of optionally available safety features and assistance systems normally the reserve of the luxury class, which always keep an eye on the driver and the road. Spacious on account of plenty of room for easy loading. Future-compatible by virtue of the outstanding efficiency provided by spirited engines with BlueEFFICIENCY. But, above all, an interior with an intelligently designed dashboard and visible luxury. The C-Class Estate races ahead: a class ahead.

**Impressive in every detail:** dimensions, paintwork and technical data

Facts & colours | from page 98

They say nothing's perfect.  
We beg to differ

The C-Class knows exactly where it comes from and where it wants to go. Its aspiration is to lead, its path onwards and upwards. Incorporating outstanding technology, design and materials. A whole generation with its own rules.

A blurred city street at night. On the left, the rear side of a silver car is visible. The road is dark with white crosswalk lines. In the background, tall buildings are lit up, and there are streaks of light from other vehicles. A pedestrian crossing sign is visible on the right side of the road.

## Outclasses even the stiffest of opposition

You can have it all. But with enjoyment comes responsibility. Agile on the one hand thanks to the AGILITY CONTROL suspension with selective damping and the optional Dynamic Handling package. Responsible-minded on the other thanks to BlueEFFICIENCY and direct injection. Uncompromisingly rational: live for today and think of tomorrow. → Page 36-41, 44, 45

A close-up, low-angle shot of the front of a dark blue Mercedes-Benz C-Class car. The car is in motion, as indicated by the blurred background and the motion blur on the license plate. The license plate reads 'S C 2525'. The Mercedes-Benz logo is visible on the hood and the grille. The car's headlights and grille are prominent features.

## As impressive inside as it is outside

The beguiling form of the C-Class – with its powerful and provocative front section – sets the heart racing. The comfort and convenience features then calm it down again: up to ten assistance systems, innovative telematics generation, optional climatized seats. With style wherever you look: a clearly laid-out dashboard, high-quality surfaces, elegant trims. A revolution of inner values.

## Brilliant looks by day. Brilliant lighting by night

The expressive lines of the C-Class catch the eye and invite you to discover the rest of the vehicle. But there are other, hidden, highlights, too: in the dark, the Intelligent Light System with its six intelligent lighting functions helps to make night driving safer. → Page 46

# Never accept less. Except when it comes to emissions

Save fuel, reduce emissions: be it the ECO start/stop function or the enhanced aerodynamics, BlueEFFICIENCY shows the way ahead. Without compromising on performance, dynamism or sportiness. Here less really does mean more. → Page 36, 37

What lies beneath the pristine surface?  
More pristine surfaces

Just let your heart  
and mind rule together

The C-Class Estate: as attractive as it is intelligent. In a highly desirable form with all the functionality you could wish for. Here there is space to match the style. A defining generation: individual and spontaneous. → Page 58–61

Comfort has never been  
more exciting

Its purpose is to serve. Its true nature to seduce. The C-Class Estate achieves this with the optional Driving Assistance package Plus, which can protect you every step of the way. With the optional COMAND Online system, which makes every driver a decision maker. And with an impressive load capacity, which places great emphasis on freedom. Wilful disobedience: adrenaline for driving pleasure.

True perfection: nothing needs to be added or taken away. The C-Class Estate leads by example. With enhanced stature and a more mature appearance. Wheels which sharpen the side profile. A fine chrome handle which comes as standard. And LED tail lights which first draw you in and then cast their spell. Impressive details wherever you look.

**First impressions count.  
And so do lasting ones**

## Size is also a matter of inner values

The C-Class Estate can be a lounge: with plenty of space, kneeroom and shoulder room for up to five people. And it can be a load carrier: with up to 1500 litres of stowage space, a payload of up to 540 kilograms and, as an option, the intelligent EASY-PACK load compartment management system. Spaciousness is one of its trump cards. → Page 58-61

## Even the inside can be a best side

Always appropriate and in the proper style. The C-Class Estate has it all: a dashboard trimmed in wood or aluminium, for example, a steering wheel in nappa leather, and a high-resolution colour display in the instrument cluster. Indulging the senses: immaculate in every detail.

## Inspiration from high above

A classic, pale yellow manor house on the shore of Lake Como with a sign bearing the name “Villa Salazar”. What looks like an aristocratic retreat actually houses the Mercedes-Benz Advanced Design Studio – speciality interior design. Around 20 designers, modellers and engineers have been working here since 1998, leaving no stone unturned in their quest to make future Mercedes models as comfortable and enjoyable as possible for the driver and passengers. It is the perfect environment for our aesthetes: the Como – Milan – Turin triangle is the hub of

the Italian fashion and leather industry, where haute couture meets traditional craftsmanship. For the creative teams, this means exciting experiments with new forms, materials and finishes – and new ideas. And if they need inspiration, they can just look above and around them, as the villa’s ceilings and walls are painted with lavish, baroque frescos. The resulting designs – such as the interior of the C-Class – are timelessly elegant and comfortable, with every last detail perfectly conceived.

## BlueEFFICIENCY – fast forward to tomorrow

We are quicker at getting environmentally friendly future technologies to where they matter most: on the road. As the inventor of the motor car, Mercedes-Benz has a special responsibility – one we have undertaken with all our might for many years. With the exception of the G-Class and R-Class, all of our 4, 6 and 8-cylinder models now include BlueEFFICIENCY measures that help to reduce your impact on the environment significantly – without compromising on safety, comfort or driving pleasure.

Our BlueEFFICIENCY concept comprises innovations for efficient mobility as well as optimised processes all the way along the value chain. They involve different approaches, but they all have a common goal: to make your individual mobility as sustainable as possible.

**The BlueEFFICIENCY measures – the Mercedes-Benz efficiency package.** A comprehensive set of vehicle enhancements saves fuel and eases the burden on the environment. Each model combines the most efficient engine with the very latest aerodynamic and energy-management measures. These include intelligently controlled ancillaries, low rolling resistance tyres, lightweight components and the ECO start/stop function that is available for most models. The BlueDIRECT V6 and V8 petrol engines featured in many model series deliver more power while cutting consumption by up to 25%. The new BlueEFFICIENCY Edition badge is reserved for the most economical models in selected ranges. These vehicles employ special measures to save weight, reduce air resistance or optimise the drivetrain, for example, and thereby achieve even lower fuel consumption and CO<sub>2</sub> figures.

**BlueTEC – the clean diesel.** Mercedes-Benz has brought to market BlueTEC technology for diesel engines based on common-rail direct injection (CDI). A modular emission-control system makes BlueTEC an exceptionally clean diesel technology, as not only does it remove up to 95% of

the particulate matter from the exhaust gases, it also reduces nitrogen oxides by up to 90%. What remains is mainly water, nitrogen and the satisfying feeling of helping to ease the burden on the environment.

**HYBRID – combustion engine and electric motor intelligently combined.** A well-coordinated team can achieve more, as hybrid technology certainly proves. The electric motor supports the engine during the journey – for example with a boost effect for more powerful acceleration – or it acts as a generator, recuperating energy during braking

The A 180 CDI BlueEFFICIENCY<sup>1</sup> is systematically designed for fuel economy, making it the Mercedes-Benz with the lowest fuel consumption

<sup>1</sup> A-Class A 180 CDI BlueEFFICIENCY with 6-speed manual transmission – fuel consumption combined: 4.0–3.8l/100 km; CO<sub>2</sub> emissions combined: 105–98 g/km

in order to charge the battery (regenerative braking). The latest-generation hybrid drive system is capable of all-electric operation for up to one kilometre at a maximum speed of 35 km/h and also allows efficient, emission-free coasting at speeds below 160 km/h by shutting off the engine on the overrun and disengaging the drive system. With the E 300 BlueTEC HYBRID<sup>2</sup> we now also offer the unique driving experience that comes with a hybrid in a premium-class diesel model – without any loss of spaciousness. At the same time, this vehicle is also the most economical luxury-segment model in the world and

The E 300 BlueTEC HYBRID<sup>2</sup> is the first ever premium-class diesel hybrid and the world's most economical luxury-segment model

cuts CO<sub>2</sub> emissions by a further 15% compared to the already low-emission E 250 CDI BlueEFFICIENCY. Perfect teamwork, you might say.

#### **Innovative drive systems that break new ground.**

In mid-2013, our electric drive technology will be moving into the fast lane with the arrival of the SLS AMG Coupé Electric Drive<sup>3</sup>, which takes electric driving into a whole new dimension. This super sports car equipped with four synchronous electric motors is our second production-ready electric car and boasts stunning performance figures.

The SLS AMG Coupé Electric Drive<sup>3</sup> allows locally emission-free driving with a battery-powered electric motor

Its 551 kW and 1000 Nm make it the most powerful AMG high-performance model ever, yet it produces no local emissions. Another innovative alternative, the hydrogen drive, has also taken to the road at Mercedes-Benz with a small-scale series of B-Class models that use a fuel cell to generate power for the electric motor. As the leader in this field, we are continuing the systematic development of this technology and are expanding the network of hydrogen filling stations with our partners. Finally, the F 125<sup>!</sup> represents the future of zero-emission motoring in the luxury class.

But that's not all: under the banner "Design for Environment", we look at a vehicle's entire lifecycle and work hard to preserve the environment, all the way from the planning stage through to recycling. The same applies to the building and running of new plants. In addition, we are involved in the development of alternative fuels and carry out research in the field of bionics. In short, BlueEFFICIENCY is good news for both you and the environment.

Further information about our comprehensive measures can be found at: [www.mercedes-benz.com/blueefficiency](http://www.mercedes-benz.com/blueefficiency)

<sup>2</sup> E-Class E 300 BlueTEC HYBRID Saloon: the vehicle complies with the Euro 5 emissions standard. Fuel consumption – urban: 4.3–4.2l/100 km, extra-urban: 4.3–4.2l/100 km, combined: 4.3–4.2l/100 km; CO<sub>2</sub> emissions combined: 112–109 g/km

<sup>3</sup> SLS AMG Coupé Electric Drive – CO<sub>2</sub> emissions combined in g/km: 0; electrical consumption combined in kWh/100 km: 26.8 The figures shown were obtained in accordance with the prescribed measuring process (Directive [EC] 715/2007 in the currently applicable version).

The figures are not based on an individual model and do not constitute part of the product offer; they are provided solely for purposes of comparison between different vehicle models

## Diesel engines

**Clean, powerful and economical: the C-Class also signals the launch of the latest Mercedes-Benz diesel technology. The powerful and quiet engines impress with their low emission and fuel-consumption figures**

**4-cylinder in-line engines.** The 4-cylinder diesel unit with a choice of four power outputs displays a high level of sophistication: it offers impressively rich torque and instantaneous response, even at low revs. What's more, the diesel engines consume less fuel, have low emissions and are both quiet and powerful.

The C 250 CDI BlueEFFICIENCY posts an excellent set of output, torque and fuel-consumption figures

This is made possible by a wealth of highly effective technologies. Fourth-generation common-rail diesel technology impresses by virtue of an injection pressure increased to up to 2000 bar, optimised combustion chambers and extremely precise injectors. Higher ignition pressure and the optimised turbocharger make for high torque in every engine speed range, while the requisite refinement comes courtesy of two Lanchester balancer shafts. Optimised alternator management ensures consistent use of the engine's coasting phases, thus allowing recuperation of kinetic energy. Meanwhile the radiator shutter reduces the aerodynamic drag when the engines require only moderate cooling.

The current engine generation delivers impressive output and high torque as well as reduced fuel consumption and CO<sub>2</sub> emissions. The reductions in consumption and emissions we have achieved with the C 220 CDI BlueEFFICIENCY Edition are particularly significant.

**V6 engines.** The C 350 CDI BlueEFFICIENCY also places the emphasis on efficiency. In its latest guise, the updated and consumption-optimised V6 diesel engine develops 195 kW (265 hp), making it the most powerful diesel drive system with common-rail technology in the C-Class. Precise and fast injectors, a high injection pressure of up to 1600 bar, and an optimised turbocharger combine to produce an immense peak torque of 620 Nm – all of which adds up to effortlessly superior pulling power in all driving situations. In combination with 4MATIC all-wheel drive, the 6-cylinder diesel engine in the C-Class is also available as the C 300 CDI 4MATIC BlueEFFICIENCY, developing 170 kW (231 hp) and peak torque of 540 Nm. For all their performance potential, both 6-cylinder diesel engines of course still meet the requirements of the Euro 5 emission standard.

**Further efficiency measures.** The ECO start/stop function automatically turns off the engine when waiting at traffic lights or in a tailback and is available on most models (with the exception of the C 300 CDI 4MATIC BlueEFFICIENCY). The ECO display that is additionally available for many models provides feedback about the efficiency of the driving style, which can then be adapted accordingly in order to reduce fuel consumption.

The ECO display provides feedback about the efficiency of the driving style

The 4-cylinder diesel engine is available with a choice of four outputs (C 220 CDI BlueEFFICIENCY shown here)

## Petrol engines

**Mercedes-Benz offers a wide range of environmentally compatible engines. Intelligent technologies reduce fuel consumption, while CO<sub>2</sub> emissions are lower than ever for a Mercedes-Benz C-Class**

**4-cylinder in-line engines.** The 4-cylinder unit of the C 180 BlueEFFICIENCY, with a displacement of 1.6 litres, direct petrol injection, variable valve timing and a turbo-charger offers outstanding torque and power, not to mention appropriately low fuel consumption and emissions. This is made possible by direct injection, at a pressure of up to 200 bar, which ensures optimum preparation of the fuel-air mixture. The engine management system optimises the valve timing of the piezo injectors with multi-hole valves. The air flow paths have also been designed to offer as little resistance as possible and the weight of the engine has been reduced through measures such as the use of aluminium for the crankcase and the adoption of a hollow-cast crankshaft.

What's more, BlueEFFICIENCY measures and other enhancements reduce fuel consumption. The range of optimisation measures includes on-demand control of engine ancillaries or, for example, the electromechanical steering of the C 180 BlueEFFICIENCY. This only requires energy during the actual process of steering – without any compromises in terms of steering comfort.

The 4-cylinder petrol engines come with a choice of three power outputs:

- C 180 BlueEFFICIENCY developing 115 kW (156 hp) and a peak torque of 250 Nm
- C 200 BlueEFFICIENCY developing 135 kW (184 hp) and a peak torque of 270 Nm
- C 250 BlueEFFICIENCY developing 150 kW (204 hp) and a peak torque of 310 Nm

All engines are exceptionally quiet and meet strict fuel consumption and emission requirements (Euro 5).

**V6 engine.** Up to 31% lower fuel consumption than the predecessor model and correspondingly lower CO<sub>2</sub> emissions yet enhanced dynamics – a neat way of summing up the C 350 BlueEFFICIENCY. These advantages are primarily down to the direct petrol injection from Mercedes-Benz, which operates using spray-guided combustion and high-pressure injection by means of piezo injectors. Maximum output is 225 kW (306 hp), while the peak torque of 370 Nm is available between 3500 and 5250 rpm. In addition to the

modified combustion process, further factors which help to reduce fuel consumption include an innovative air and exhaust system, controlled ancillaries, intelligent alternator management and consistently applied lightweight-design principles. Outstanding refinement is another of the V6 engine's hallmark traits. The C 350 BlueEFFICIENCY Saloon is also available with 4MATIC all-wheel drive.

**Further efficiency measures.** All models are fitted as standard with the ECO start/stop function (with the exception of the C 300 CDI 4MATIC BlueEFFICIENCY), which automatically turns off the engine when waiting at traffic lights or in a tailback. The ECO display that is additionally available for many models provides feedback about the efficiency of the driving style, which can then be adapted accordingly in order to reduce fuel consumption.

The 4-cylinder engines feature direct petrol injection, variable valve timing and a turbocharger (C 250 BlueEFFICIENCY shown here)

The C 350 BlueEFFICIENCY offers the ideal combination of harmonious power delivery, driving enjoyment and energy efficiency

## Transmissions

Whether it be a manual gearshift or an automatic, an economical or a sporty driving style – the transmissions for the C-Class have been optimised in line with the model in which they are installed. Plus they are intuitive and ergonomic to use

**6-speed manual transmission.** The 4-cylinder engines (with the exception of the C 250 BlueEFFICIENCY and models with 4MATIC all-wheel drive) are paired with a 6-speed manual transmission – with the ECO start/stop function as standard – which offers impressively short, precise shift travel and whose gear spacing is optimally matched to the rear axle ratio. A display on the instrument cluster indicates recommended gear changes to further encourage a highly economical driving style.

**7G-TRONIC PLUS.** The 7G-TRONIC PLUS is fitted as standard in all 6-cylinder models, in the all-wheel drive variants and in the C 250 BlueEFFICIENCY. This automatic transmission makes use of a torque converter to ensure dynamic response, longevity, reduced noise levels and significantly lower fuel consumption.

The latter is also thanks to the inclusion as standard of the ECO start/stop function (except in the C 300 CDI 4MATIC BlueEFFICIENCY), which turns off the engine

temporarily when the car is stopped at traffic lights or in a tailback. Furthermore, the seven forward gears in the 7G-TRONIC PLUS ensure an ideally adapted engine speed at all times, short shift times and smooth shifts. Driving enjoyment is likewise enhanced: the car delivers even better acceleration and provides even more pulling power. And when changing down, gears can be skipped for fast in-gear acceleration.

7G-TRONIC PLUS: one of over 18 million automatic transmissions produced in a period spanning more than 50 years

## Chassis & suspension

4MATIC permanent all-wheel drive provides impressive traction as well as enhanced driving stability. The AGILITY CONTROL suspension with selective damping system really comes into its own on the road, offering a high level of comfort as well as impressive agility

**4MATIC all-wheel drive** (optional). As 4MATIC is always active, it responds almost instantaneously in poor weather conditions such as rain, black ice or snow. 4MATIC is assisted by the Electronic Stability Program ESP® and the electronic traction system 4ETS. The latter enables controlled braking of spinning wheels and, as a consequence, increases the drive torque at the wheels offering good

traction, improving the amount of power to be planted on the road when moving off and when accelerating, especially on poor road surfaces. 4MATIC makes conventional differential locks superfluous: the automatic braking pulses make it easier to move off on slippery ground as well as enhancing stability during critical manoeuvres. A further advantage of the system is the fact that it is hardly

any heavier than the rear-wheel drive version on account of the compact design, intelligent choice of materials and high level of efficiency. 4MATIC is only available in conjunction with the 7G-TRONIC PLUS automatic transmission.

The electronic traction system 4ETS automatically sends the drive torque to the wheels offering sufficient traction

**AGILITY CONTROL suspension** (standard). The AGILITY CONTROL suspension with selective damping system combines agility and ride comfort, as the shock absorbers adjust automatically to suit the current driving situation. The enhanced damping and vehicle stability are especially beneficial on poor road surfaces.

Agility with a high level of comfort - the AGILITY CONTROL suspension adjusts the shock absorbers automatically

**Sports suspension** (optional, standard in conjunction with AMG Sports package and AMG Sports package Plus). The AGILITY CONTROL sports suspension with firmer settings and a body lowered by 15 mm is available as an optional extra. The springs and dampers are stiffer than those used by the standard-fit AGILITY CONTROL suspension, thus reducing body roll and enhancing driving stability. The speed sensitive sports steering's more direct ratio complements the suspension by transferring the steering movements to the road even more spontaneously.

**Dynamic Handling package** (optional). With the optionally available Dynamic Handling package, a touch of the Sport button is all it takes to switch the relevant systems from regular comfort mode to sports mode. Damping becomes noticeably firmer, and the engine responds far more directly to accelerator pedal movements. At the same time the automatic transmission's shift program changes to a more aggressively responsive mode, ensuring optimum acceleration figures. The speed-sensitive sports steering conveys a direct, sporty steering feel in both driving modes.

## Integral safety concept

The vision of accident-free driving impels us. With our integral safety concept we are coming closer to achieving this goal – this is a holistic approach which can increase safety in every situation

As the inventor of the car we feel that we have a special responsibility for road safety. This is why we are the first car manufacturer to have developed an integral safety concept which seamlessly blends measures to enhance active and passive safety. The holistic approach is subdivided into four phases and offers safety solutions for every situation. It includes systems for safe driving which help to avoid risks by warning you and coming to your aid in good time. Our unique PRE-SAFE® system kicks in in the event of danger and activates preventive measures for occupant protection. If a collision should still occur in spite of all the preventive measures, further technologies ensure protection as needed. We have also borne in mind the time immediately following an accident and developed solutions which can help prevent worse and facilitate rapid help.

A selection of these technologies for the “Safe driving”, “In the event of danger”, “In an accident” and “After an accident” phases is presented on the pages which follow.

**Safe driving: ATTENTION ASSIST** (included with the optional luxury multifunction steering wheel). This drowsiness detection system can be especially useful on long trips. Between 80 and 180 km/h, ATTENTION ASSIST warns the driver as soon as it detects typical signs of drowsiness or inattention. All thanks to sensors that can analyse driving behaviour and detect any changes in it.

**Safe driving: Lane Tracking package** (optional). Lane Keeping Assist detects the markings on the road. If the car leaves its lane unintentionally, the system can warn the driver by making the steering wheel vibrate gently. Blind Spot Assist uses two radar sensors to monitor the poorly visible area directly alongside and behind the car – the blind spot. If the system detects the danger of an impending collision with a vehicle when changing lanes, it warns the driver by a signal in the exterior mirror. Lane Keeping Assist and Blind Spot Assist are also available separately as individual options.

**Safe driving: Intelligent Light System** (optional). The system has six functions: country mode, motorway mode, enhanced fog lamps, cornering light function, active light function and Adaptive Highbeam Assist. The latter provides the best possible low-beam headlamp range: the low-beam headlamp range can be constantly adjusted to provide optimum performance for the prevailing traffic conditions. When no other road traffic is detected, main beam is enabled.

The Adaptive Highbeam Assist detects other road users with their lights on and ensures the greatest possible range of vision

The headlamps can be dimmed automatically as soon as an oncoming vehicle with its lights on is detected. The LED daytime running lamps enhance perceptual safety during the daytime.

**Safe driving: Driving Assistance package Plus** (optional). The package comprises a series of separate intelligent technologies: Active Lane Keeping Assist vibrates the steering wheel gently to warn a driver who unintentionally

Active Lane Keeping Assist can make the steering wheel vibrate if the vehicle drifts unintentionally across lane markings

leaves the recognised, marked lane. If the driver fails to react, a lane-correcting brake actuation can occur. Active Blind Spot Assist ensures increased safety when changing lanes. Two radar sensors observe the area which the driver cannot see well in the exterior mirrors – the “blind spot”. If the driver activates the indicator and the assistance system detects a vehicle in the danger zone, a warning triangle flashes in the exterior mirror and an acoustic alert is sounded. If the driver still starts to turn the steering

Active Blind Spot Assist monitors the difficult-to-see areas to the left and right of the car

wheel, targeted brake actuation on one side of the vehicle warns against the possible danger and can thus prevent a collision. DISTRONIC PLUS proximity control uses radar to help the driver maintain a preset distance between the car and the vehicle in front, making the driver’s job easier in either moving or stop-and-go traffic. The Driving Assistance package Plus is rounded off with Brake Assist BAS PLUS and PRE-SAFE® Brake – for a reassuring sense of safety on every trip.

DISTRONIC PLUS can support drivers in automatically keeping their vehicle at a safe distance from the vehicle in front

**In the event of danger: PRE-SAFE® Brake and BAS PLUS** (both part of the optional Driving Assistance package Plus). PRE-SAFE® Brake first provides the driver with visual and acoustic warnings if the risk of a collision is detected. In this phase, BAS PLUS determines the brake pressure required to avoid a collision. If the braking force applied by the driver is insufficient, BAS PLUS increases the braking pressure automatically so as to make optimum use of the remaining distance available whilst also giving the driver behind a better chance of avoiding a rear-end collision. If the Mercedes driver fails to respond to the signal, PRE-SAFE® Brake initiates autonomous partial braking, giving them a haptic warning. The PRE-SAFE® system simultaneously triggers protective measures for a possible collision. If there is still no response from the driver, autonomous emergency braking can be initiated, meaning that the severity of the impact and therefore the consequences of the accident can be reduced significantly.

**In the event of danger: PRE-SAFE® system** (optional). This anticipatory occupant protection system is able to detect certain critical driving situations in advance and activate preventive measures. Depending on the driving situation and the vehicle's scope of equipment, the system can then tauten the front seat belts and close any open side windows or the sliding roof, so as to ensure that the seat belts and airbags function to full effect in the event of impact. When the optional multicontour seats are fitted, air cushions can be activated in a matter of seconds to hold the occupants in place on the front seats. With the separately available Memory package, the front passenger seat can additionally be moved to a position offering greater protection in accident conditions.

If the accident is avoided, the seat belts will be relaxed again and the system will return to standby mode.

**In an accident: NECK-PRO head restraints** (standard). The crash-responsive NECK-PRO head restraints can help to reduce the risk of whiplash injury by moving forwards and upwards to support the heads of the front occupants at an earlier stage in the event of a rear impact.

PRE-SAFE® can initiate preventive measures to provide better protection for the occupants in a hazardous situation

**In an accident: restraint systems** (standard). Mercedes-Benz optimises interaction between the 3-point seat belts, belt tensioners, belt force limiters and airbags to minimise injuries. Up to nine airbags are installed to protect the occupants: front airbags, which can deploy in two stages depending on the predicted impact severity, as well as sidebags and windowbags. The kneebag can further reduce the forces exerted on the driver during an accident. Sidebags for the rear seats are also available as an option. If the airbag control unit detects an accident, the seat belts are tightened automatically almost instantly to

The seven standard airbags are among the restraint systems that can help to mitigate the consequences of accidents

hold the occupants firmly in their seats. The belt force limiter, on the other hand, slackens the belt according to the particular situation so that not too much force is exerted on the occupant's rib cage.

**After an accident: Mercedes-Benz emergency call system** (part of COMAND Online).

The system can send an automatic emergency call via an operational telephone connected to the vehicle as soon as the restraint system detects an accident. At the same time GPS positioning data and other information on the vehicle are transmitted to the Mercedes-Benz emergency call centre. A voice connection is then established. The emergency call system can also be triggered manually.

**Measures after an accident.** In order to reduce consequential damage and, where necessary, to support the rescue of the occupants, Mercedes-Benz has developed further measures. These include the automatic engine cut-off or the activation of the hazard warning lamps and interior emergency illumination. The central locking also opens automatically, and crash joints between the door and the wing make it easier to open the doors after a front impact. In addition Mercedes-Benz makes Guidelines for Rescue Services available; helpers all over the world can download them from the internet in various languages at [www.mercedes-benz.de/rettungsleitfaden](http://www.mercedes-benz.de/rettungsleitfaden). As you can see, at Mercedes-Benz consideration has been given to safety in every situation.

## Multimedia systems

The C-Class offers a full range of entertainment systems, from the Audio 20 and the optional Audio 20 system with Becker® MAP PILOT to the optional COMAND Online multimedia system

COMAND Online is a combination of audio and navigation systems as well as telephone and internet functions. All of the main settings can also be programmed using the LINGUATRONIC voice-operated control system

**COMAND Online** (optional). The multimedia system boasts a high-resolution 17.8 cm colour display. The system's functions include a radio, speed-sensitive volume control, the MUSIC REGISTER with a 10 GB hard disc and hard-disc navigation. What's more, for 3 years from the initial registration it also includes free updates for European map data. The best in entertainment comes courtesy of the DVD drive which plays CDs and MP3 content as well as video and audio DVDs. The online function with an integral web browser facilitates access to the internet plus various mobile services from Mercedes-Benz via an internet-capable mobile phone. It is therefore possible to browse the internet when the vehicle is stationary, and to use various apps such as weather, Google Street View, Facebook or the parking space search while on the move. A USB and an Aux-in socket, a slot for SD memory cards and a Bluetooth® interface enable connections to external data carriers and a mobile phone. The system is operated via a Controller that can be used intuitively and also via the buttons on the multifunction steering wheel. LINGUATRONIC makes it possible to control the system by voice entry.

**Audio 20 CD** (standard). The Audio 20 system combines the key functions of a fully-fledged entertainment system: radio, CD player, MP3 player, Aux-in socket, USB and Bluetooth® interfaces. Following the introduction of the innovative telematics generation, the screen diagonal was increased to 14.7 cm. Optional extras also include a 6-disc CD changer and the universal Media Interface.

The colour display in the centre console shows all the information – such as the available radio stations – from the entertainment system

**Harman Kardon® Logic 7® surround sound system** (optional). Equipped with 12 loudspeakers, including a woofer, and a 9-channel DSP sound amplifier, this optionally available Dolby Digital 5.1 system has an output of 450 watts, giving you first-class acoustics in all seats when combined with the COMAND Online system. 3D surround sound and speed-sensitive volume control ensure constant listening pleasure.

12 loudspeakers and 450 watts for the ultimate listening experience: the Harman Kardon® Logic 7® surround sound system

**Becker® MAP PILOT** (option). The Becker® MAP PILOT has everything you look for in a fully featured navigation system. Fully integral, it can be operated via the central control and also the display of the Audio 20 CD. What's more, it can be individualised by downloading current map data and additional functions. A cradle for the control unit in the glove compartment allows the system to be used flexibly and to be removed from the vehicle.

The extensive functions provided by the Becker® MAP PILOT are indicated on the Audio 20 CD display and the instrument cluster

## Assistance systems

The C-Class has always been a car in which convenience has played a major role. And thanks to convenience-enhancing assistance systems such as **Speed Limit Assist**, **Parking Guidance** and the reversing camera, it more than lives up to this reputation

Speed Limit Assist can even indicate temporary speed limits

**Speed Limit Assist** (included with the optional COMAND Online system). Speed Limit Assist can detect speed-limit signs and display them as symbols on the instrument cluster and in COMAND Online on the navigation screen. They remain displayed there until the speed restriction is lifted or changed. To this end, a windscreen-mounted camera monitors the area in front of the car on a permanent basis. The camera can filter out round traffic signs, be they speed-limit signs at the side of the road or on a gantry above the road. To detect the signs, the system also draws on the data stored in the navigation system's digital map, thus also enabling it to take account of the vehicle entering or leaving urban areas. Speed Limit Assist is especially helpful on routes with variable speed limits or road works.

**Reversing camera** (option). The reversing camera with wide-angle lens monitors the area directly behind the car and sends the images to the COMAND display. It is activated when reverse gear is engaged, thus enhancing safety when reversing into a parking space. The reversing camera is only available in conjunction with COMAND Online.

The reversing camera provides additional assistance when reversing into a parking space

**PARKTRONIC, incl. Parking Guidance** (optional). PARKTRONIC can warn the driver automatically if space in front of or behind the car becomes tight when parking or manoeuvring. The system operates on the echo sounder principle. Sensors on the front and rear bumpers emit ultrasound signals which are then reflected by other vehicles or obstacles. A microcomputer calculates the current distance and informs the driver by means

The display in the instrument cluster gives you a clear picture of what is happening at all times when parking

of displays in the instrument cluster and acoustic signals. Parking damage can therefore be prevented.

Parking Guidance can help the driver when looking for a parking space and also when parking: ultrasonic sensors in the side front bumper can measure the length of parking spaces parallel to the car automatically if the car drives past at a speed of 35 km/h or less. Parking Guidance starts once a suitable space has been found and reverse gear has been engaged. It provides the driver with visual and acoustic instructions via the instrument cluster regarding the correct steering angle as well as the turn-in and turn-back points. If the car is not straight after the first reversing move, the system also helps the driver make the necessary further manoeuvres.

## Climate control

An ideal interior climate is paramount when it comes to ensuring a high level of driver-fitness safety. This is why the climate control system for the C-Class is exceptionally versatile and can be adjusted to meet the needs of each individual occupant

The THERMOTRONIC automatic climate control system operates extremely effectively without producing draughts. It is easy to use, fast to respond and quiet. The control wheels have been ergonomically designed and finished with a silver-chrome surface for the C-Class

**THERMOTRONIC** (optional). The THERMOTRONIC 3-zone luxury automatic climate control system allows the driver, front passenger and rear passengers each to set the temperature using their own controls. A booster blower beneath the centre console ensures the ideal temperature in the rear. What's more, the automatic mode can be adapted to meet individual needs at the push of a button. There are three climate styles to select from: DIFFUSE, MEDIUM or FOCUS.

**THERMATIC** (standard). The THERMATIC automatic climate control system can control the temperature and ventilation for the driver and front passenger automatically. A solar sensor on the windscreen can record the intensity and direction of the sun's rays, for example. Further standard features include air recirculation, a cooled glove compartment and a combination filter which filters out particulate matter. There are two additional air outlets for the rear compartment on the rear end of the centre console.

**Rear climate control** (included with THERMOTRONIC automatic climate control system). The optional THERMOTRONIC automatic climate control system includes controls for the passengers in the rear seats: the airflow speed, airflow direction and temperature can be easily controlled at the push of a button, thus enhancing climate comfort for the rear occupants.

THERMATIC operates on the basis of sensor information including data for interior and exterior temperature as well as air humidity

The desired temperature and airflow can be set precisely using the separate controls in the rear

## Seats

Seats that meet an exceptionally wide range of requirements in terms of seating comfort, ergonomic design and safety have been developed for the C-Class

**Seats.** The seats in the C-Class are good news for the front and rear passengers, as they are exceptionally comfortable and provide plenty of legroom and shoulder room. The standard-fit driver's seat is partially power-adjustable and features manually adjustable lumbar support. Full power adjustment for the driver's seat is available as an optional extra. Line-specific colour concepts, designs and fluting add attractive visual touches. The AVANTGARDE line is available with upholstery in the colour shade cappuccino or fine sahara beige, while the standard version impresses with the combination black/blue. Further optional extras include 1/3 : 2/3 split-folding rear seats (standard for the estate).

**Climatised seats for driver and front passenger** (optional). The airflow for the climatised seats has been configured to ensure a well-balanced seat climate. There is a choice of three-stage seat heating and active ventilation for cooling the seats. The output of the climatised seats is reduced automatically after certain periods.

The ventilation and heating for the climatised seats can be adjusted separately

**Memory package** (optional). The front seats are available with full power adjustment as an optional extra. The switches for this are clearly arranged in the doors. If the Memory package is ordered, three position settings can be stored for the driver's seat, steering column and mirrors. Both front seats also feature 4-way lumbar support.

The Memory package remembers up to three positions for the driver's seat, steering column and exterior mirrors

# Space

The C-Class Estate combines luxury and sportiness with generous interior space

Fully folding down the rear seats allows a load compartment capacity of some 1500 litres with a practically flat load area

**Load compartment.** The dimensions of the C-Class Estate – length 4.61 metres, width 1.77 metres and height 1.46 metres – form the basis for its load compartment. There's plenty of space for up to five people in the estate – with even the rear seats offering passengers generous kneeroom. Fully folding down the rear bench seat gives stowage space of up to 1500 litres with a practically flat load area. The rear seats can be folded extremely easily in the ratio 1/3 : 2/3. The C-Class Estate sets another benchmark when it comes to payload, as it is capable of carrying up to 540 kilograms with ease. A stainless-steel cover on the load compartment sill helps prevent bumper and load compartment scratches or other damage when loading and unloading the car.

**Load compartment cover** (standard). A combined load compartment cover and net is positioned in the C-pillar area. The load compartment cover, colour-coded to match the interior appointments, shields luggage from the sun and prying eyes. To divide off the load compartment and protect the occupants in the event of sudden braking manoeuvres, the safety net can be attached between the B-pillars or the C-pillars, depending on the size of the load being carried. Further features in the load compartment enable items to be stowed tidily, e.g. two nets integrated in the side panelling for the practical stowage of smaller items, two retractable bag hooks, four load retainers and a 12-volt socket providing an additional power supply in the load compartment.

The rear bench seat can be split 2/3 with just one hand to give a versatile stowage space

The load compartment cover shields the contents of the luggage compartment from the sun's rays and from prying eyes

## Load compartment management

The C-Class Estate has plenty of stowage space. Intelligent solutions are required to enable it to be used efficiently – such as the EASY-PACK load compartment management system

The load compartment rails in the EASY-PACK load-securing kit can help to secure the load

**EASY-PACK load-securing kit** (optional). The EASY-PACK load-securing kit consists of two load compartment rails, which are secured to the load compartment floor on the left and right and are used to hold load-securing elements. The telescopic bar included in the package allows the load compartment to be divided flexibly into different zones or bulky items to be secured. Bulky or round items can be secured to the load compartment sides using the retractable load-restraining belt. The four mounting elements also supplied and four load retainers already fitted as standard allow flexible use and easy handling for securing a wide range of luggage and cargo.

**Self-levelling suspension** (optional). The self-levelling rear suspension keeps the rear of the car at the specified level, even when the car is laden, and therefore has a positive effect on driving stability and driving safety – especially when towing a trailer. Another benefit for the occupants is a consistently high level of suspension comfort when the car is loaded within the permissible axle load limits.

**EASY-PACK tailgate** (optional). The EASY-PACK tailgate can be operated electro-mechanically for convenience. It can be opened at the push of a button from the driver's seat, at the tailgate or by using the ignition key. It can be closed again using a switch on the tailgate. In this case, it can also be stopped in a lower position. Furthermore, the tailgate can be made to open only as far as the roof edge by adjusting the setting on the instrument cluster. Independently of this, the tailgate can also be opened and closed manually using the release handle on the tailgate.

You can also open and close the EASY-PACK tailgate in a low position at the push of a button

## C 63 AMG exterior

The expressive exterior of the C 63 AMG reflects its inner values perfectly: this high-performance vehicle developing 336 kW (457 hp) features an AMG front and rear apron, side sill panels, and flared front wings. The powerful look includes features such as the unique AMG LED daytime running lamps, the front apron with a high-gloss black cross-strut, the radiator grille with a chrome louvre and the unique AMG bonnet with powerdomes. → [www.mercedes-amg.com](http://www.mercedes-amg.com)

### Exterior

AMG 5-twin-spoke light-alloy wheels, painted titanium grey with a high-sheen finish, with 235/40 R 18 front tyres and 255/35 R 18 rear tyres

AMG bodystyling, consisting of front apron with side air outlets, side sill panels and diffuser-style rear apron

AMG high-performance braking system with 360 x 36 mm front brake discs and 330 x 26 mm rear brake discs

AMG spoiler lip on the boot lid (saloon)

AMG sports exhaust system with two chromed twin tailpipes

AMG-specific LED daytime running lamps

Distinctive, flared front wings with "6.3 AMG" lettering

Tail lights with LED technology

Unique AMG bonnet with powerdomes

Unique AMG front apron with cross strut in high-gloss black

Unique AMG radiator grille with a single chromed louvre

## C 63 AMG interior

Inside, too, the C 63 AMG impresses with sporty touches throughout. At its heart is the AMG tube-design instrument cluster with colour display, AMG Start-up indicator and three-spoke AMG performance steering wheel trimmed in nappa leather and featuring perforations in the grip area, silver-coloured aluminium shift paddles and flattened top and bottom sections. Exclusive, ergonomic AMG sports seats in ARTICO man-made leather/black DINAMICA microfibre (optionally available in single- or two-tone designo leather) ensure a high level of seating comfort. A black headlining, dark longitudinal-grain aluminium trim and brushed stainless-steel AMG door sill panels and AMG sports pedals complete the dynamic ambience.

## C 63 AMG technology

The AMG 6.3-litre V8 engine and the AMG SPEEDSHIFT MCT 7-speed sports transmission offer an emotive driving feel and driving dynamics at the highest level. Yet when it comes to choosing a sporty or comfort-oriented driving style, the driver always has the final say in the sports saloon → [www.mercedes-amg.com](http://www.mercedes-amg.com)

**AMG 6.3-litre V8 engine.** A high-revving naturally aspirated engine with thoroughbred motor-racing technology: the vertical arrangement of the intake and exhaust ducts as well as the magnesium variable-intake manifold with two integral throttle valves ensure optimum charging of the eight cylinders. Further high-tech features include variable camshaft adjustment, the four-valve-per-cylinder design, the stiff aluminium crankcase and the low-friction TWAS (twin-wire-arc-spraying) coating used for the cylinder walls. The V8 powerplant develops 336 kW (457 hp) at 6800 rpm, delivering impressive pulling power and a torque of up to 600 Nm at 5000 rpm. Ideal ingredients for powerful acceleration in every engine speed range, as the driver has over 500 Nm on tap between 2000 and 6250 rpm. The AMG Performance package boosts the output by 22 kW (30 hp) to 358 kW (487 hp), enabling the car to accelerate from 0 to 100 km/h in an impressive 4.3 s (4.4 s for the estate).

**AMG sports suspension.** The specially tuned AMG sports suspension delivers excitement thanks to increased agility, enhanced lateral acceleration potential and improved overall ride comfort. Together with the AMG 5-twin-spoke light-alloy wheels with 235/40 R 18 front tyres and 255/35 R 18 rear tyres, the specific three-link front suspension with a wider track, the AMG speed-sensitive sports steering and the three-stage ESP<sup>®</sup>, it ensures superlative driving dynamics and thrilling driving enjoyment. The AMG speed-sensitive sports steering has an even more direct ratio and therefore offers greater steering precision at high cornering speeds. The AMG sport suspension's stiff springs and gas-pressure shock absorbers ensure optimum road feel and minimise body movements. The AMG sports suspension therefore combines driving dynamics at the highest level with hallmark Mercedes long-distance comfort – and thus displays the characteristic attributes of a true AMG. The Electronic Stability Program ESP<sup>®</sup> has been specially adapted in line with the high level of driving dynamics, as it allows the driver to select the level of assistance provided by the dynamic handling control system by choosing one of three different control settings: ON, OFF and SPORT-HANDLING MODE. The activated setting is shown on the AMG instrument cluster's

central display. The AMG high-performance braking system featuring large, internally ventilated and perforated brake discs ensures good levels of deceleration and fade resistance. Not to mention perfect brake control and short stopping distances. An AMG performance suspension is available as a further option. A sportier configuration of springs and dampers allows the suspension to respond even faster and more directly, so that it meets even the most demanding expectations in terms of driving dynamics.

### AMG SPEEDSHIFT MCT 7-speed sports transmission.

Equipped with AMG aluminium steering-wheel gearshift paddles, four modes and a Race Start function, the 7-speed automatic transmission delivers enhanced driving dynamics, higher efficiency and up to 10 percent lower fuel consumption than the predecessor model. The Race Start function allows the driver to call up the maximum acceleration potential with optimum traction. The “S” (Sport), “S+” (Sport Plus), “C” (Comfort) and “M” (Manual) modes each have different gear-change characteristics and speeds: gear changes in “S” and “S+” modes are around 20 and 40 percent quicker than in “C” mode respectively – while in “M” mode gear changes take just 100 milliseconds, making them some 50 percent faster. A push of a button activates the desired driving mode: distinctly sporty or more comfort-oriented. There is also an automatic double-declutching function when downshifting, which provides an emotive sound experience as well as reducing power-off effects. This function has a positive effect when braking on the approach to bends in particular.

The AMG SPEEDSHIFT MCT 7-speed sports transmission offers customised modes for maximum driving pleasure

Motor-racing technology gives the AMG 6.3-litre V8 engine maximum agility

## AMG Performance Studio

The AMG Performance Studio offers a range of options for further enhancing the dynamic aspects of the C 63 AMG. A prime example of this is the AMG Performance package, which boosts the output by 22 kW (30 hp) to 358 kW (487 hp) and also includes a variable intake manifold painted in titanium grey, the AMG high-performance compound brake system with compound front brake discs, red-painted brake callipers, the AMG carbon-fibre spoiler lip on the boot lid and the AMG performance steering wheel in nappa leather/DINAMICA microfibre.

Fans of motorsport and technology will appreciate one special highlight of the AMG Performance Media system in particular: the system displays data specific to the vehicle and route information, which can also be evaluated. There is no other system in this form on the market. What's more, the range of additional options includes an AMG rear-axle locking differential and three further AMG light-alloy wheel designs.

The AMG Driver's package allows an electronically governed top speed of 280 km/h and includes participation in driving training at the AMG Driving Academy. What's more, the AMG Performance Studio can meet customer requests for personalised vehicles as well as special one-off models.

## Standard equipment

When it comes to standard equipment, the C-Class impresses with an array of key comfort- and safety-related features. Not to mention high-quality visual attributes such as LED tail lights, a chromed radiator grille and a harmonious interior.

### Exterior

7-spoke light-alloy wheels with 195/60 R 16 tyres (not for estate) or 205/55 R 16 tyres (depending on engine version)

Beltline trim strip in matt black

Bumpers and side trim in vehicle colour

LED tail lights

Louvre radiator, chromed, star on bonnet

Roof rails in black (estate only)

### Interior

Black backplate

Brighton fabric upholstery

Door openers with silver-chrome surface

High-gloss black piano-lacquer-look trim

Multifunction steering wheel and shift/selector lever in nappa leather

Seat design with large panels and horizontal seamlines

The upholstery is available in Brighton fabric as standard or ARTICO man-made leather as an option. There are also four upholstery colours to choose from (two in the case of ARTICO man-made leather), with the same upholstery being used for the inside of the doors in each case. The remainder of the interior is in elegant black, while the trim has a fine piano-lacquer-look finish.

## AMG Sports package

The dynamic appeal of the C-Class becomes even more pronounced with the optional AMG Sports package. The exciting and distinctive AMG bodystyling consists of the front apron, side sill panels and rear apron. AMG light-alloy wheels featuring 5-twin-spoke styling, a high-sheen finish and mixed-size tyres (front 225/45 R 17 and rear 245/40 R 17) as well as a sports suspension lowered by 15 millimetres complete the sporty look.

---

### Exterior

AMG 5-twin-spoke light-alloy wheels with a high-sheen finish, with 225/45 R 17 front tyres and 245/40 R 17 rear tyres

AMG bodystyling, comprising front apron, side sill panels and rear apron

Fog lamps and LED daytime running lamps, double-round design with chrome surround

Lowered sports suspension

Perforated front brake discs, brake callipers with "Mercedes-Benz" lettering

Polished stainless-steel exhaust tailpipe trim

Speed-sensitive sports steering

---

A true AMG when it comes to inner values, too: exciting features which catch the eye immediately include front sports seats, a 3-spoke multifunction sports steering wheel in nappa leather with a flattened bottom section and gearshift paddles (when fitted in conjunction with an automatic transmission), and an aluminium-look shift/selector lever with a leather gaiter. The look of the instrument cluster is based on the tube-type design found in the C 63 AMG. Brushed stainless-steel sports pedals, black floor mats with "AMG" lettering and a black headlining are further highlights of the sporty interior.

## AMG Sports package Plus

The dynamic lines of the C-Class reveal their full expressive potential with the AMG Sports package Plus. This brings out the sporty essence of the model by applying the inimitable AMG treatment in numerous areas. In specific terms this means: AMG bodystyling with front and rear aprons as well as side sill panels, an AMG spoiler lip in the vehicle colour on the boot lid of the saloon and exclusive AMG 7-twin-spoke light-alloy wheels. The systematic application of the AMG treatment also extends to the details: perforated front brake discs, brake callipers with “Mercedes-Benz” lettering and polished stainless-steel tailpipe trims. But it is not just the vehicle’s looks that are enhanced. The speed-sensitive sports steering and sports suspension ensure that the driving dynamics deliver all that the appearance promises.

---

### Exterior

---

AMG 7-twin-spoke light-alloy wheels, painted high-gloss black with a high-shine finish

---

AMG bodystyling comprising front apron, side sill panels and rear apron

---

AMG spoiler lip on the boot lid

---

Brake callipers with “Mercedes-Benz” lettering, perforated front brake discs

---

Lowered sports suspension

---

Speed-sensitive sports steering

---

Tailpipe trim in polished stainless steel

---

The sporty theme continues inside the vehicle: red topstitching on the sports seats and red designo seat belts are complemented by silver-effect shift paddles on the 3-spoke multifunction sports steering wheel. Aluminium trim as well as black floor mats with “AMG” lettering and a red surround complete the interior, as do the brushed stainless-steel sports pedals. Together, these features add a distinctly sporty dimension to every trip – even the daily commute.

---

#### Interior

---

3-spoke multifunction sports steering wheel with flattened bottom section and twelve buttons, in nappa leather with red contrasting topstitching, perforated in the grip area

---

AMG floor mats in black with red surround

---

Armrest in the centre console, door centre panels and selector lever gaiter with contrasting red topstitching

---

#### ATTENTION ASSIST

---

Brushed stainless-steel sports pedals with rubber studs (including foot-operated parking brake)

---

Dark longitudinal-grain aluminium trim

---

designo seat belts in red (can be deselected in favour of black seat belts)

---

Headlining in black

---

Instrument cluster with 11.4 cm high-resolution colour display

---

Sports seats for driver and front passenger

---

Steering-wheel gearshift paddles in silver (only with automatic transmission)

---

Upholstery in ARTICO man-made leather/DINAMICA microfibre in black

---

## designo

The designo range allows you to design the C-Class to an even higher standard and to your own taste → [www.mercedes-benz.com/designo](http://www.mercedes-benz.com/designo)

The exclusive designo two-tone leather appointments are available in several combinations – designo porcelain/black, designo sand/black or designo classic red/black – for both the saloon and the estate. In addition to the seats in the characteristic two-tone design, the armrests in the doors as well as in the centre console are finished in designo black leather. The door centre panels are trimmed in the appropriate designo colour. Rounding off these appointments is a headlining in black fabric. An optional two-tone designo steering wheel offers the perfect complement to this exclusive designo interior.

The high-quality designo interior can be further enhanced by adding the extended appointments in designo black leather, including the upper section of the dashboard and the beltlines on the doors. Furthermore, an AMG carbon fibre/piano-lacquer-look trim in high-gloss black is available as an optional extra. In addition, the interior of the C 63 AMG comes with the option of exclusive designo single-tone leather upholstery in black, sand, porcelain or classic red, giving discerning customers further options for making the car even more individual and exclusive.

## Style package

The Style package further emphasises the sporty and individual interior style of the C-Class

The Style package comprises a number of high-quality, harmoniously combined details. The upholstery in perforated black ARTICO man-made leather with contrasting porcelain-coloured topstitching catches the eye straight away, while the 3-spoke multifunction sports steering wheel with twelve buttons is trimmed in leather with a two-tone

look, the lower section being finished in porcelain-coloured leather. The surface is perforated so that it is even easier to grip. This style is consistently matched by the trim, which is also in porcelain colour but with a piano lacquer look. The armrests, the door panelling, the shift/selecter lever gaiter and the centre console are accentuated by

contrasting topstitching in porcelain colour, while the floor mats have a porcelain-coloured piping edge.

Handcrafted perfection: the Style package individualises the interior of the C-Class

All the details add up to an impressive whole: the trim is in a shining porcelain piano-lacquer look

Gearshift gaiter with porcelain-coloured contrasting topstitching

## Wheels

7-spoke light-alloy wheels with 195/60 R 16 tyres (Code R20)<sup>1</sup> or 205/55 R 16 tyres (Code R75)<sup>2</sup>

5-twin-spoke light-alloy wheels with 225/45 R 17 tyres (standard for AVANTGARDE models, Code 44R)

7-spoke light-alloy wheels with 225/45 R 17 front tyres and 245/40 R 17 rear tyres, painted high-gloss black and with a high-sheen finish (optional, Code 74R)

5-twin-spoke light-alloy wheels with 225/40 R 18 front tyres and 255/35 R 18 rear tyres (optional, Code R70)

7-twin-spoke light-alloy wheels with 205/55 R 16 tyres (Code R27)<sup>3</sup> or 225/45 R 17 tyres (Code 26R)<sup>4</sup>

5-twin-spoke light-alloy wheels with 225/45 R 17 front tyres and 245/40 R 17 rear tyres (optional, Code R95)

Multi-spoke light-alloy wheels with 225/45 R 17 front tyres and 245/40 R 17 rear tyres (optional, Code 56R)

AMG 5-twin-spoke light-alloy wheels with 225/45 R 17 front tyres and 245/40 R 17 rear tyres, with a high-sheen finish (part of the optional AMG Sports package, not for C 63 AMG, Code 784)

7-spoke AMG light-alloy wheels with 225/40 R 18 front and 255/35 R 18 rear tyres, painted high-gloss black and with a high-sheen finish (standard for AMG Sports package Plus, Code 760)

5-twin-spoke AMG light-alloy wheels with 225/40 R 18 front tyres and 255/35 R 18 rear tyres, with a high-sheen finish (optional, not for C 63 AMG, Code 786)

5-spoke AMG light-alloy wheels with 235/40 R 18 front tyres and 255/35 R 18 rear tyres, painted in titanium grey with a high-sheen finish (optional for C 63 AMG, Code 790)

Multi-spoke AMG light-alloy wheels with 235/35 R 19 front tyres and 255/30 R 19 rear tyres, painted matt black with rim flange in high-sheen finish (optional for C 63 AMG, Code 797)

7-spoke AMG light-alloy wheels with 225/40 R 18 front tyres and 255/35 R 18 rear tyres, with a high-sheen finish (optional, not for C 63 AMG, Code 782)

AMG 5-twin-spoke light-alloy wheels with 235/40 R 18 front tyres and 255/35 R 18 rear tyres, painted in titanium grey with a high-sheen finish (standard for C 63 AMG, Code 795)

Multi-spoke AMG light-alloy wheels with 235/35 R 19 front tyres and 255/30 R 19 rear tyres, painted in titanium grey with a high-sheen finish (optional for C 63 AMG, Code 788)

5-spoke light-alloy wheels<sup>5</sup> with 225/40 R 18 front tyres and 255/35 R 18 rear tyres, painted in himalayas grey (accessory, Code 22R, not in conjunction with AMG Sports package and C 63 AMG)

<sup>5</sup> Light-alloy wheels from the genuine accessories range are supplied without tyres

Surf the web, watch movies, listen to music: iPad® rear integration Plus delivers entertainment on the move

## Genuine accessories

A Mercedes-Benz is more than just a car. It can be a travel companion, an office, a living space. And this diversity is reflected in the Mercedes-Benz accessories range → [www.mercedes-benz-accessories.com](http://www.mercedes-benz-accessories.com)

The convenient iPad® rear integration Plus is a docking station that allows the tablet computer to be integrated into the rear of the C-Class and its battery charged at the same time. All the entertainment content stored on the iPad® can be used while travelling. And if the car is also equipped with the InCar Hotspot, even an iPad® not equipped with UMTS has full internet access.

Discover the full range of light-alloy wheels available in the genuine accessories range. Elegant or sporty, distinctive or dynamic – they allow you to give the C-Class the perfect finishing touch to reflect your tastes. For example with the

"Proserpina" 5-spoke light-alloy wheels with 225/45 R 17 tyres at the front and 245/40 R 17 tyres at the rear. Further wheels available on request

"Proserpina" light-alloy wheels for tyre sizes 225/45 R 17 (front) and 245/40 R 17 (rear).

The KIDFIX child seat is ideal for children aged between around 3½ and 12 years (15 to 36 kg). The raised seat and height-adjustable backrest can provide optimum side impact protection.

One particularly important aspect is the correct transport of bulky objects such as bicycles, skis or large items of luggage. There is a range of safe and flexible rack systems available for such tasks. The basic carrier bars developed

The KIDFIX child seat provides an exceptional level of safety for younger passengers

specifically for the C-Class can be combined with a number of different roof-rack systems such as the ski and snow-board rack, the bicycle rack or the Mercedes-Benz roof boxes, which hold around 330 or 450 litres and can be opened on both sides.

Please consult our special brochures or your Mercedes-Benz dealer for further details on the extensive range of genuine accessories.

The roof box is an elegant solution for stowing all manner of sports or leisure equipment from diving gear to snowboards

## Services

**MercedesCard.** As a VISA credit card, this is an internationally accepted means of payment that can offer you a host of additional benefits, such as the Mercedes-Benz insurance package or other exclusive insurance products. There's also the Mercedes-Benz magazine to inspire you with its fascinating features and reports. Further details are available from your Mercedes-Benz dealer.

**Mercedes-Benz Financial Services.** Mercedes-Benz stands for quality, innovation and safety – and the same applies to Mercedes-Benz Financial Services. Our innovative leasing and financing products are tailored to your financial needs and means, making it easy for you to secure the keys to your dream car. Once you are on the road, our insurance products offer you comprehensive protection on every trip. Finally, our service products ensure that your car is always in tip-top condition while keeping costs transparent and easily manageable. For a detailed quotation, please contact your authorised Mercedes-Benz dealer, who will be pleased to go through the latest financial services and terms and conditions with you.

**Mercedes-Benz mobility.** Your new car comes complete with the promise of feeling safe on the road. But if you should ever need assistance, Mercedes-Benz Service24h is there to help. Just call the freephone service hotline on 00800 1 777 7777<sup>1</sup>. The integrated telematics service, Mercedes-Benz Contact<sup>2</sup>, is even more convenient: a touch of a button is all it takes to contact the Mercedes-Benz customer centre. If you wish, relevant vehicle and position-related data are transmitted at the same time, thereby allowing the centre to react quickly and provide rapid on-site assistance. Also standard with your new car at no extra charge is the Mercedes-Benz Mobilo<sup>3</sup> mobility package. Whether you have lost your key, had a breakdown which cannot be repaired immediately or suffered damage to the vehicle due to an accident or vandalism, Mobilo helps you reach your destination – anywhere in Europe. Whatever is holding you up, you will soon be able to resume your journey.

**Mercedes-Benz Museum.** Discover what has been moving the world for over 125 years, and embark on a fascinating journey through automotive history in the Mercedes-Benz Museum. More than 1500 exhibits covering an area of 16,500 square metres chart the unique heritage and innovative flair of the inventor of the motor car. From the very

first model through to the very latest, you will find one legendary car after another awaiting you. The museum is a spectacular sight in its own right too, thanks to an architecture that breaks away from traditional concepts and creates an unprecedented sense of space. Welcome to the Mercedes-Benz Museum – a world of innovation. [www.mercedes-benz-classic.com/museum](http://www.mercedes-benz-classic.com/museum)

**Test drive.** The unique feeling of driving a Mercedes cannot be put into words – you have to experience it for yourself. Take a test drive and find out first hand how it feels to drive your dream car. Please contact your nearest Mercedes-Benz dealer for details.

<sup>1</sup> Alternative: +49 69 95 30 72 77 <sup>2</sup> Requires a factory-fitted radio, connected to an operational mobile phone. The only charge incurred is the cost of the mobile phone call to the landline network <sup>3</sup> Once the mobility guarantee has expired (four years), Mobilo can be extended to provide cover in the event of breakdown and insurance claims one year at a time for a maximum of 30 years, provided that regular maintenance is carried out by your Mercedes-Benz service partner

**Interactive Owner's Manual and Mercedes-Benz Guides.**

The website also offers an interactive tour, enabling you to acquaint yourself with your dream car. You can view key functions in detail, gain an insight into the car's inner workings or look at the benefits of each model. For further details, go to [www.mercedes-benz.de/owners-manual](http://www.mercedes-benz.de/owners-manual). The "Mercedes-Benz Guides" app lets you explore the highlights of the individual models both online and offline. The app is available free of charge from the Apple® iTunes® Store (iOS) as well as the Google Play store (Android).

**Mobile internet.** The entire world of Mercedes-Benz can be accessed at any time with your web-capable mobile device - including specially adapted content for both smartphones and tablets. As well as an overview of all the passenger car models, there are insights into the entire brand world along with a wealth of entertainment offers and direct links to our range of services at [www.mercedes-benz.com](http://www.mercedes-benz.com)

**Mercedes-Benz service contracts.** Vehicle-specific service contracts allow you to arrange individual cover for your Mercedes: for a small monthly premium, the Excellent service contract covers all service jobs including maintenance, wear and repairs for up to five years. Simply present your service card and you will be safe from any unwelcome financial surprises - and you can relax in the knowledge that your Mercedes will stay on top form for a long time to come. The Advance service contract provides a warranty extension, so you will be protected against unexpected repair costs even after the manufacturer's warranty or the Excellent service contract has expired - for up to ten years.

**Accident repairs.** Should the worst happen and you find yourself in need of repairs, with the Mercedes-Benz accident repair service you will receive the best possible assistance for your vehicle and ensure that its high-quality safety features are properly maintained. Whether you need paint, body or glass repair work carried out, the highly trained specialists at your Mercedes-Benz service partner will repair your Mercedes-Benz and get you quickly back on the road again. Further information is available from your authorised Mercedes-Benz dealer.

## Paintwork

The paint system developed by Mercedes-Benz includes one of the best clearcoats on the automotive market and is a key factor behind the car's excellent value retention. The secret lies in the exceptionally dense molecular structure, which makes both the metallic and the non-metallic clearcoats more resistant and produces a longer-lasting and visibly more intensive shine.

### Non-metallic paints (standard)

- 040 black
- 149 polar white
- 590 fire opal

### Metallic paints (option)

- 183 magnetite black
- 197 obsidian black
- 526 dolomite brown
- 755 tenorite grey
- 775 iridium silver
- 792 palladium silver
- 890 cavansite blue
- 988 diamond silver

### Special paint (option)

- 799 diamond white metallic BRIGHT

**Take-back of end-of-life vehicles.** You can return your C-Class to us for environment-friendly disposal in accordance with the European Union (EU) End-Of-Life Vehicle Directive. But that day lies a long way off.

A network of vehicle take-back depots and dismantlers has been established to make it as easy as possible for you to return your vehicle. You can leave it at any of these points free of charge and, by doing so, make an important contribution to completing the recycling process and conserving resources.

For further information about the recycling and disposal of end-of-life vehicles, and the take-back conditions, please visit the national Mercedes-Benz website.

**Please note:** changes may have been made to the product since this brochure went to press (20.07.2012). The manufacturer reserves the right to make changes to the design, form, colour and specification during the delivery period, provided these changes, while taking into account the interests of the vendor, can be deemed reasonable with respect to the purchaser. Where the vendor or the manufacturer uses symbols or numbers to describe an order or the subject of an order, no rights may be derived solely from these. The illustrations may show accessories and items of optional equipment which are not part of standard specification. Colours may differ slightly from those shown in the brochure, owing to the limitations of the printing process. This brochure is distributed internationally. It provides a general indication of the range of models, features, optional extras and colours available in various countries. Some of the models, features, optional extras and colours shown may not be available in your country or may only be available in a different specification. Additionally some models, features, optional extras and colours may only be available in combination with others. For current and more specific information in relation to the range of models, features, optional extras and colours available in your country, and their pricing, you should contact your nearest authorised Mercedes-Benz Passenger Car Dealer.
