MODELS.

	Transmission	Cylinder / Capacity cm ³	Power / Torque	Combined fuel consumption l/100km	Acceleration 0-100km
Petrol Models					
M5	7-speed M double clutch with Drivelogic	8-cylinder 4,395	423 kW 680 Nm	9.9	4.2 sec

BMW recommends the use of RON 95 super unleaded petrol. Unleaded 91 RON and higher with a maximum ethanol content of 10% (E10) may also be used. Output and fuel consumption figures apply to RON98 fuel. All engines meet the EU5 emissions standard. Fuel consumption is determined in accordance with the ECE driving cycle (93/116/EU), which consists of approximately one third urban traffic and two thirds extra-urban driving (based on the distance covered). CO₂ emissions are measured in addition to fuel consumption. Optional equipment (e.g. wider tyres) can have a significant impact on fuel consumption.
