

CITROËN C3 ARRIVES IN AUSTRALIA

The Citroën C3 has arrived in Australia, with the French car maker's all-new small car making its debut in showrooms just in time for Christmas with an entry level price of \$19,990 plus statutory and on road charges and the top version boasts the largest windscreen ever seen on a small car!

"The Citroën C3 transformed the Australian perception of Citroën," explains Miles Williams, General Manager of Citroën Australia. "It brought to our market for the first time small Citroëns which, although they have played a major role in the European car market for most of Citroën's history, had not been seen here. The arrival of the C3 brought a whole generation of young car buyers to Citroën for the first time, as well as a considerable number of female buyers. The new C3 will expand and develop its role of introducing the benefits of Citroën ownership to young car buyers, but, at the same time, with its sophisticated styling and performance, it will also be attractive to people wishing to downsize their car without any loss of style, comfort and driving pleasure."

The new Citroën C3 is a smart, sophisticated, low emissions and unique 5-door small car, designed for modern transport needs, both in the city and on the open road.

Boasting contemporary and dynamic styling, a sleek profile, refined quality throughout and an optional massive panoramic 'Zenith' windscreen, this is a car that sets a new benchmark in the small car segment - and is a bold reinvention of its popular predecessor, which sold more than two million examples worldwide.

"The unique Zenith windscreen, which is standard on the top versions, provides a unique driving experience and makes every journey special," says Mr Williams. "Much more than just a larger area of glass, it is also technically advanced, letting in light in differing amounts at different angles and stopping heat and UV rays. It is another example of Citroën's advanced technical know-how producing a solution and a better car."

With a focus on four main areas - **STYLE, QUALITY, SPACE** and **EFFICIENT PERFORMANCE** - Citroën's design team have created one of the most appealing and rewarding models to own in its class.

In addition, thanks to the availability of the unique panoramic Zenith windscreen, new C3 provides something extra - a totally new motoring sensation. Just one of the stand-out design features of this new car, the vast and flowing glass area is a quintessential application of Citroën's 'Créative Technologie', a feat of vehicle engineering and an unparalleled offering in the small car market.

Not only one of the most compact models in the small car sector (9 cm shorter than 207 and Clio), the new C3 also offers one of the most spacious cabin environments and a class-leading 300-litres of boot space. The new C3's intelligent architecture optimises internal volumes and provides generous amounts of room for all occupants - ensuring exceptional driver and passenger comfort.

On the road, new C3 combines refined performance with a smooth ride and nimble handling. The designers' focus on the control of weight and optimising aerodynamics means the new C3 is one of Citroën's most CO₂-efficient models.

To further promote money-saving greener driving, most versions feature a Gear Efficiency Indicator (GEI), which alerts the driver at the optimum moment to change gear - helping them to minimise fuel consumption.

Designed with the latest technology to suit 21st century driving requirements, new C3 is available with Bluetooth® and USB connectivity for portable media players as standard on the Exclusive versions and optional on other variants. The new C3 also benefits from a six-speaker audio system, with the availability of a new eight-speaker Hi-Fi system for concert theatre-like sound quality.

The range of available engines meets every requirement. New C3 offers a choice of two petrol power-plants – one of which was co-developed with BMW – plus Citroën's critically acclaimed HDi turbo diesel. With combined cycle fuel economy of as little as 6.1 l/km for petrol models, and from 4.3 l/km on the Turbo Diesel version and a remarkable open road figure of just 3.7 l/100 km for the Turbo Diesel, the new Citroën C3 offers a combination of stylish and economical motoring. The all important carbon dioxide rating is from as little as 110 g/km.

As with any new Citroën model, safety is assured. The new C3 features an array of active and passive safety equipment, which includes a reinforced body structure and ESP, ABS with EBD, up to six airbags, EBA as standard, as well as the availability of cruise control with speed limiter on four out of five variants.

The new C3 will be offered in Citroën's three core trim levels – **VT**, **VTR+** and **Exclusive** – offering an extensive range of variants.

Prices start at \$19,990 plus statutory charges and on road costs for the Citroen C3 VT, while the VTR+ costs \$23,490 with the combination of a petrol engine and an automatic gearbox or \$23,990 for the turbo diesel and manual drivetrain. Topping the range is the C3 Exclusive with the petrol engine/automatic gearbox priced at \$25,990 and the turbo diesel/manual gearbox at \$26,490, with all prices exclusive of statutory charges and on road costs.

"The stylish, grown-up, yet fun C3 is impossible to confuse with any other car," says Miles Williams. "Retaining the exuberant charm and friendly personality of its predecessor, the new C3 represents a bold, contemporary, dynamically rewarding and fresh approach to the compact family vehicle, and provides a unique offering with that sensational panoramic Zenith windscreen."

In these exciting times for Citroën, new models such as C3 clearly show the confidence of the brand. This new car illustrates our determination to exceed expectations, to do away with convention and to provide practical benefits through the use of Créative Technologie."

The New Citroen C3 in detail

MARKETPLACE

The new C3 falls into the popular and growing small car, where its predecessor sold more than two million examples worldwide. It will appeal to drivers looking for an enjoyable and rewarding ownership experience. New C3 meets the demand for a practical and economical vehicle that also delivers style, distinction, durability and safety.

Offering space, functionality and a refined interior – plus the unique panoramic Zenith windscreen standard on the Exclusive – new C3 has a stand-out personality that will successfully differentiate it from the competition. New C3 will appeal to a wide range of customers who want their vehicle to be individual and not just another face in the crowd.

A vehicle for all ages, the new C3 will be desirable to young families and single professionals looking for a car with a sense of fun, driving pleasure and a distinct personality, but also with practical space and great fuel economy. It will also appeal to older drivers looking for a comfortable and spacious compact car with high levels of specification.

Whilst most models in the small car market either focus on style (with sporty, dynamic characteristics) or practicality (with an emphasis on value-for-money), the new C3 strikes an excellent balance between the two.

PRODUCT IN DETAIL

STYLE – EXTERIOR

The new C3 represents an upmarket shift by Citroën towards the highest levels of small car segment comfort and prestige. Retaining some of the familiar lines of its predecessor, the tauter and sleeker new C3 takes inspiration from small car premium models and from the sector above. The result is a stylish and contemporary design that places an emphasis on quality, sophistication and fun.

The design of the body is much more dynamic, with smooth lines flowing over chrome trimmed surfaces. There's even chrome detailing at the top of the panoramic Zenith windscreen where it meets the roof. The new look is underpinned by the gaping front grill, the incisive boomerang-shaped headlights and emphatically drawn wings, which help to give new C3 its purposeful, low-slung stance.

Catering for a wide range of customer preferences, buyers can personalise their new C3 with a choice of eight elegant body colours. There is also a choice of optional stylish alloy wheels, with 15" alloys available on VT and VTR+ models and 16" alloys on Exclusive versions.

STYLE – INTERIOR

Inside the cabin, Citroën's designers have focused on quality and comfort, with a stylish and sophisticated interior tailored with chrome and gloss black trim and a choice a leather seat option.

The flowing lines of the exterior are mirrored in the smooth horizontal dashboard design, which combines chic styling with high-tech appeal and is finished with either a brushed steel or chrome strip that runs the full width of the car.

The new C3 is designed for an enjoyable driving experience. From the comfort of the contoured seats, the driver looks through the sculpted steering wheel to a brand new instrument cluster design, which sports two analogue dials and an LED display.

PANORAMIC ZENITH WINDSCREEN

The Exclusive version of the new C3 is fitted as standard with the innovative panoramic Zenith windscreen, which dominates the car's appearance from every forward angle. Unique to the market, this massive screen opens up new perspectives and sensations for all occupants.

Soaring 1.35 m from bonnet to roof, the panoramic Zenith windscreen is 36% bigger than a normal screen on an average five-door small car and the angle from the driver's eye line to the top of the windscreen is a huge 108° instead of the segment average 28°.

Coupled with slim A-pillars, the curved glazed area offers unrivalled visibility – with obvious safety benefits – and gives occupants a truly panoramic view of the world. Progressive tinting across the top 25 cm of the screen ensures optimal protection from overhead sunlight. A sunblind, featuring two sun-visors, can easily be pulled forwards when driving in low-angle sun conditions.

QUALITY

With breakthrough levels of quality, the new C3 was benchmarked by its designers against models from the segment above. The huge leap in refinement stems from the special attention paid to the quality of the finishes and materials used – such as on the 'soft-touch' upper dashboard.

Throughout the interior, the new C3 is inspired by cues from upper segment vehicles, delivering the highest levels of comfort and prestige.

To maintain a calm and peaceful ambience in the cabin, the levels of soundproofing are amongst the best in the segment. Mechanical vibration, as well as noise from the road, have all been minimised and the engine compartment has three times as much sound-absorbent material (155 dm²) compared to the outgoing C3 (48 dm²).

An integrated air freshener helps maintain a fresh and pleasant aroma in the cabin and is a luxurious little touch to enhance the sense of well-being on-board. With a range of available perfumes, the system can continually diffuse a light fragrance into the passenger compartment via the air vents.

SPACE

The new C3 is one of the most compact models in the segment at just 3.94 m long, 1.73 m wide and 1.52 m high, and also offers one of the most generous cabin environments in its class for both occupant space and load volume.

The intelligent design of the car's internal architecture utilises the best of Citroën creativity to generate the maximum amount of useable space. For example, the recessed lower dashboard frees legroom for the front passenger, which means they can sit further forward, creating more legroom for back seat passengers. The slim design of the front seat backs creates an additional three cm of legroom in the rear and the semi-raised front seating position also creates space under the seats for rear passenger's feet.

The 300-litre boot, with its optimised design, is the biggest in the segment and offers easy loading – thanks to the lowered boot sill (only 22.7 cm from the floor of the boot to the top of the sill), and the increased width of the boot aperture (104 cm). For secure stowage, the boot also has four lashing rings and can be equipped with a removable load net. To increase rear load space, the 60:40 split-folding rear seats can be folded down with one hand in a single effortless movement

using levers accessed from either the boot or the back seats. With the rear seats down it is possible to load boxes up to 1029 x 1189 x 689 mm in size.

Providing convenient storage throughout the cabin, the new C3 is fitted with front and rear door cubby holes, compartments in the central fascia and, on the Exclusive, a central armrest.

EFFICIENT PERFORMANCE

One of Citroën's key objectives in the development of new C3 was to maximise efficiency. A design emphasis was placed on minimising the car's overall weight and optimising the aerodynamic performance – new C3 boasts a Cd of 0.30 – helping the model to deliver excellent fuel economy and low CO₂ emissions.

With its agile frame and optimised aerodynamic profile, new C3 is effortless to manoeuvre with a responsive feel. Utilising Citroën's extensive knowledge of combining smooth road manners with precise handling, new C3's MacPherson-type front suspension, new rear axle with flexible traverse beam and variable electric power steering, all combine to strike the best balance between ride comfort and road holding. The refined running gear benefits from a range of suspension settings adapted to the power and torque of each engine. Light steering at low speeds and the 10.2m turning circle make the new C3 an ideal vehicle for city driving.

Citroën's acclaimed HDi turbo diesel 1.6 16V 66 kW effortlessly blends performance with economy and low emissions.

The two petrol engines – Citroën's 1.4 16V 54 kW and the Citroën/BMW joint venture 1.6 16V VTi 88 kW – offer refined and economical performance.

For drivers keeping a close eye on their fuel costs, the new C3 delivers excellent combined cycle fuel economy of as little as 6.1 l/100 km for petrol models and 4.3 l/100 km for the diesel-powered versions.

TECHNOLOGY

New C3 has a range of convenient driver aids, including cruise control with speed limiter on the top four variants and the new Gear Efficiency Indicator (GEI) that helps drivers maximise fuel economy.

Designed for those who like to travel with their music library, new C3 is always well connected with an auxiliary socket fitted as standard across the range – meaning portable music players can always be hooked up to the car's audio system. Optional on the VT and VTR+ and standard on the Exclusive, the USB box that features an integrated socket on the central console. This allows users to connect, play and control portable media devices through the car's audio system with the song title and information shown on the audio display.

The Bluetooth[®] hands-free equipment allows drivers to stay safely in contact on the road and conveniently enables music stored on mobile phones to be streamed wirelessly through the audio system – without the need for connective cabling.

SAFETY

With high levels of both active and passive safety, including a reinforced cabin structure, the new C3 is a reassuringly secure environment for both driver and passengers.

For confident stopping power, all models are fitted as standard with front ventilated disc brakes and ABS with EBD (Electronic Brakeforce Distribution) and EBA (Emergency Braking Assistance). Providing even more assured handling in low-grip conditions ESP is also standard.

From the VTR+ trim level, all models are specified as standard with six airbags (driver, front passenger, front lateral and curtain), and for the secure fitment of child seats.

TRIM LEVELS

The new C3 will be offered in Citroën's three core trim levels – **VT**, **VTR+** and **Exclusive**.

Representing outstanding value-for-money, the entry-level **VT** models features generous levels of standard equipment, including an MP3-compatible radio/CD player with steering mounted controls, air conditioning, electrically adjustable door mirrors, front electric windows and a multi-function on-board trip computer.

At the heart of the range, the **VTR+** trim, front 'one-touch' electric windows, curtain airbags, front fog lights, leather steering wheel, cooled glove box, and cruise control with speed limiter.

The range-topping **Exclusive** models offers premium levels of design and comfort with additional equipment such as digital air-conditioning, front centre armrest, height and tilt adjustable front passenger seat, front and rear 'one-touch' electric windows, interior mood lighting, Bluetooth, USB connectivity, dark tint rear windows, electrically folding and heated door mirrors and 16" wheels.
