1. These figures are obtained from controlled laboratory tests conducted by Ford Motor Company of Australia Limited to Australian Design Rule 81/01, which requires use of 95 RON fuel, and are provided to assist you in comparing the fuel consumption of FPV models with other vehicles. The actual fuel consumption you achieve will depend, however, on many factors, including your driving habits, the prevailing conditions and your vehicle's equipment, condition and use. All figures based on FPV F6 Typhoon.
