UTE PERFORMANCE REDEFINED

At HSV, we're continually pushing the boundaries. We pride ourselves on building iconic vehicles that set new standards in performance and design. And now, we're proud to introduce a vehicle that re-writes the rule book and will change the way you think about utes forever.

The Limited Edition GTS Maloo.

Arguably the most powerful ute in the world, the GTS Maloo delivers exhilarating performance through its 6.2 litre Supercharged LSA engine generating a staggering 430 kW of power and 740 Nm of torque - performance normally the domain of V8 Supercars.

The signature GTS front fascia and forged 6-piston brake calipers combine with light-weight 20" "Blade" forged alloy wheels and HSV's Remote Locking Hard Tonneau and Performance Sail-plane to deliver stunning street appeal.

And, in a global first for a utility, the GTS Maloo also features brake Torque Vectoring.

Wrap yourself in the HSV Performance seats and take charge through either the TR6060 (MG9 spec) 6-speed manual transmission with oil cooler and twin plate clutch or the optional 6L90E 6-speed heavy duty automatic transmission. Instantly, you'll know you're in control of a machine that's every bit as serious as it looks.

With build of the GTS Maloo restricted to just 250 vehicles (240 Australia, 10 New Zealand), and with each individually numbered, you're probably asking yourself why we would build such a jaw-dropping ute.

It's simple. Because we're HSV and we can.
