

SENATOR SV

A RARE BEAST

FOR THE CHOSEN FEW

The Senator SV is a rare beast indeed. Only 50 are in existence in Australia and 2 in New Zealand.

THE SPECIES

With its HSV DNA, the Senator SV has everything you'd expect. Powered by HSV's 340kW, LS3 V8 engine with the stealth of a 6-speed automatic transmission with Active Select and Paddle-shifters or a Tremec 6-speed manual.

THE LIFESTYLE

The luxurious interior is enhanced by HSV Performance seats wrapped in Onyx leather trim. There's also a 9-speaker Bose audio system, Magnetic Ride Control suspension and a Driver Preference Dial to control a range of electronic performance systems. Meanwhile the Senator SV's AP Racing forged 4-piston brake calipers and MoTeC inspired Enhanced Driver Interface simply add to the fierce appeal.

DISTINGUISHING MARKS

This beast also boasts many unique features that set it apart from the pack, like the distinctive "pitch black" styling accents found on the grille surround, fender vents, mirror scalps and luxury lip spoiler. It moves sure-footedly on the stunning new 20" SV Rapier forged alloy wheels in Dark Stainless while the "Senator SV" markings on the sill plates, I.D. plate and EDI screen, together with the unique build number, remind you that this beast is something very special.

THE HUNT IS ON

With so few in the wild, this powerful beast is going to be hard to catch. Hunt one down today (before it's extinct).
