

# F-TYPE

# F-TYPE

It had to be powerful, agile and utterly distinctive. It had to look, feel and drive like a Jaguar. A true Jaguar sports car; the latest in a distinguished bloodline. We couldn't just call it F-TYPE; we had to make it F-TYPE.

F-TYPE is engineered for high performance and instantaneously responsive handling. Powerful, supercharged engines and a lightning-fast gearbox; lightweight aluminium body construction and an obsession with balance and proportion; a superb suspension and a host of advanced driving technologies; peerless design and a driver focussed cockpit.

Together they produce a uniquely connected driving experience, and a sports car that only Jaguar could create - ultra-precise, powerful, sensual and, most of all, alive.

# ONE PHILOSOPHY, SIX LIVES

F-TYPE's technical excellence delivers a breadth of capabilities to suit the road, the conditions and the demands of the driver. Its single engineering philosophy encompasses two bodystyles, Convertible and Coupé, as well as including all six models. While each offers its own distinctive flavour and characteristics, every **F-TYPE** is equally at home on the switchback of a mountain pass, on the highway and in the city.

**ENGINE**

**STOP**

# SUPERCHARGED ENGINES

Power is delivered from a range of four highly advanced engines - 3.0 V6 250kW, 3.0 V6 280kW, 5.0 V8 364kW and 5.0 V8 404kW. Each features a Roots-type twin vortex supercharger mounted in the "V" of the engine to maintain the powerplants' compact dimensions.

Jaguar is a leader in the field of **supercharged induction technology**. The advantages of supercharging are clear and compelling. It provides a linear delivery of performance, and instant access to high levels of torque at all engine speeds, minimising the gap between the driver's demand for power and the engine's response.

**F-TYPE's Sports Exhaust** delivers a crisp note from start up, with the promise of performance building to a race-car inspired crescendo at high rpm and during overrun. An **Active Sports Exhaust** is standard on **F-TYPE S**, **F-TYPE V8 S** and optional on **F-TYPE**. The system features active bypass valves which open during performance driving to allow exhaust gases to exit more directly for a deep, dramatic sound. **F-TYPE R** has a **Switchable Active Exhaust** that allows manual control of the system, for even greater driver involvement.

# V6

3.0 LITRE 250KW

0-100 KM/H

TOP SPEED KM/H

3.0 LITRE 280KW

0-100 KM/H

TOP SPEED KM/H

Jaguar's new generation, supercharged 3.0 V6 engines are powerful and refined. Generating extremely high specific power outputs of up to 195kW per litre, they deliver thrilling performance and a rewarding driving experience. The compact supercharger's sophisticated boost control and secondary throttle valve ensure that torque curves rise steeply over a broad range of engine speeds. A water-cooled intercooler reduces the temperature of the intake air for greater power and efficiency, while an innovative system of counter-rotating front and rear balancer weights aids smoothness and refinement. They also feature a fast-reacting **Intelligent Stop/Start** system that can improve fuel economy by up to 5 percent.

# V8

5.0 LITRE 364KW

5.0 LITRE 404KW

0-100 KM/H

TOP SPEED KM/H

0-100 KM/H

TOP SPEED KM/H

Both 5.0 V8 engines are supremely powerful. A larger supercharger delivers up to 404kW and as much as an astonishing 680Nm of torque. Acceleration is rapid and progressive, response is immediate and predictable. Advanced technologies deliver performance, refinement and efficiency. The lightweight die-cast aluminium blocks are supplemented by cross-bolted main bearing caps to increase rigidity. Valves are controlled by dual independent variable cam timing to optimise power at all engine speeds. Spray-guided direct injection delivers precisely measured quantities of fuel directly into the centre of the combustion chambers at pressures of up to 150bar for cleaner, more efficient combustion. In common with the V6 engines, they also feature an **Intelligent Stop/Start** system that can improve fuel economy by up to 5 percent.

# QUICKSHIFT TRANSMISSION

**8-SPEED  
RATIOS**

**ADAPTIVE  
SOFTWARE**

**INSTANTANEOUS  
RESPONSE**

F-TYPE's Quickshift automatic transmission is both lightning-fast and superbly refined, offering the benefits of a double clutch transmission and a conventional automatic without the limitations of either. Eight closely-spaced ratios keep the engine within its most effective rev range for longer, providing instantaneous response and outstanding driver feedback, while also optimising the engine for both economy and outright performance.

The transmission control system is intelligent and adaptive. It monitors the driving situation together with the demands the driver is making on the car, and responds to provide a truly dynamic experience. Adaptive software automatically modifies the gear shift strategy, ensuring the right gear is selected for every situation. **Fast Throttle-Off** recognises when the driver is making rapid throttle adjustments, for example during multiple manoeuvres, and automatically holds the gear ratio in anticipation of the next move. **Corner Recognition** senses when the car is in a corner and holds the ratio ensuring the car is in the correct gear when exiting a bend. When decelerating and changing down, the **Speed Matching Management System** matches the engine speed to the gearbox speed, and automatically 'blips' the throttle during downshifts when in Sport Automatic mode, while **Spontaneous Vehicle Deceleration** enables F-TYPE to rapidly downshift under very hard braking conditions.

**Dynamic Launch Mode**, standard on **F-TYPE S**, applies maximum torque through the gear changes delivering optimum acceleration from rest to 100 km/h. The driver can, of course, take full manual control of the transmission using either gear shift paddles mounted behind the steering wheel, or the joystick-style SportShift gear selector. Once in manual mode, the Quickshift system delivers rapid and precisely timed engine torque interventions, creating shorter and crisper sounding gear shifts.

# LIGHTWEIGHT ALUMINIUM CONSTRUCTION

STRONG AND RIGID

HIGH POWER-TO-WEIGHT AND TORQUE-TO-WEIGHT RATIOS

Jaguar has been at the forefront of aluminium car construction for more than a decade and continues to push the boundaries of the technology. A lightweight aluminium body structure with high torsional rigidity is the ideal platform for a sports car, and is fundamental to the way F-TYPE performs, handles and feels. A strong, stiff structure provides an inherently stable platform for precise, agile handling and allows the finely tuned suspension system to deliver connectivity and driver feedback. F-TYPE's body is the perfect complement to its high-performance engine range. Together they produce the exceptional power to weight and torque to weight ratios that deliver the real world measures of performance in a sports car.

All exterior panels are aluminium with the exception of the boot lid and tailgate, which are made from composite materials. These exterior panels are constructed from a new AC600 alloy that combines robustness and quality of finish with much greater formability for greater clarity and tightness of radii and feature lines. On Coupé models, the side pressing is one of the most technically advanced in the automotive industry and results in cleaner lines with an extraordinarily beautiful, uninterrupted sweep from the A pillar all the way to the trailing edge. Whichever F-TYPE you choose, the use of advanced materials and innovative techniques allowed Jaguar's engineers to reproduce F-TYPE's beautifully crisp, crafted lines exactly as the designers had intended, as well as delivering a vehicle with extraordinary structural integrity.

# ON BALANCE

**OPTIMUM WEIGHT  
DISTRIBUTION**

**LOW CENTRE  
OF GRAVITY**

**PERFECT  
PROPORTIONS**

It is essential in the design of a great sports car that weight is kept to a minimum, is evenly distributed front to rear and that the centre of gravity is kept as low as possible. This configuration in F-TYPE means that the car has natural balance and is the result of meticulous attention to detail during the design and construction of the body structure. An uncompromising focus on weight distribution achieves the optimum balance between front and rear wheels, with items such as the battery, electronic systems and even the washer bottle located at the rear of the car.

A shorter car is more agile; a wider car is more stable. The relationship between F-TYPE's length of 4,470mm and width of 1,923mm was precisely engineered to deliver inherent agility and means that the car has outstanding driving dynamics. Its low centre of gravity reduces body roll in corners, while short front and rear overhangs mean that the mass is concentrated within the wheelbase. These essential factors combine to ensure that F-TYPE is naturally agile.

## MASS MOMENT OF INERTIA

The closer the weight is to the centre of the car, the easier it is to turn the car.

$$I = \sum_{i=1}^N m_i r_i^2$$

VEHICLE SHOWN: F-TYPE R IN POLARIS WHITE WITH JET AND RED DUOTONE PERFORMANCE SEATS AND OPTIONAL PANORAMIC ROOF

F-TYPE immediately connects with the driver, so that he or she becomes almost an extension of the car. Its 1+1 configuration is designed to wrap around the driver. The cockpit's design provides visibility, minimal distractions and close-to-the-centre-of-gravity seating with rigid seat frames and structure. The fascia has been intentionally kept as low as possible and free from clutter to increase the forward view. The **Intelligent Venting System**, part of the advanced climate control system, hides the twin central air vents which automatically deploy when required, rising from the dashboard and retracting after use. On F-TYPE Coupé models, an optional panoramic roof brings an atmosphere of increased light and airiness to the interior.

Two seat styles are available, the standard **Sports Seat**, and an optional **Performance Seat**, offering enhanced lateral support during rapid cornering and upholstered in Premium leather. For the ultimate in luxury, all models can also be specified with the optional **Premium leather interior**, which adds leather to the upper fascia, centre console and door casings. Premium leather interior with twin needle stitching and Performance Seats are standard on F-TYPE R.

## DRIVER-ORIENTATED CONTROLS

F-TYPE presents information to the driver only as necessary or when requested. Instruments are simple, clear and easy to read featuring two large analogue dials - essential in a sports car. The three spoke design of the steering wheel incorporates key functions, with gearshift paddles mounted behind the spokes for manual control without the need for the driver's hands to be taken from the wheel.

The **Jaguar SportShift Selector** is simple and intuitive to use, inviting greater driver involvement: it offers full Auto mode plus, in Sports mode, manual operation. This allows the driver to select gears sequentially by tipping the lever forward to shift down a ratio and shift up a gear by pulling the lever back so that the shift direction is in-line with the lateral loading on the car during acceleration and braking.

**Dual Mode Rotary Switches** are used as part of the controls for the advanced climate control system. Right and left dials control cockpit temperature on the respective sides of the car when dual zone climate control is specified. When pressed, the dials change mode to control the optional seat heating functions, with the screen at the centre of the dial changing to display the corresponding use.

F-TYPE's **8 inch colour Touch-screen** provides simple control of a number of the car's features, including Navigation, Infotainment and, where specified, the **Dynamic-i** display system.

## PUT TO THE TEST

F-TYPE first took to the road in the virtual world of Jaguar's Computer Aided Engineering (CAE) systems ensuring that all components underwent extensive development and testing before being committed to the physical testing process. Engineers produced a series of virtual prototypes to realistically simulate the behaviour of complex mechanical systems allowing them to analyse multiple variations until the optimum design was achieved. For example, using a technique first used in the aerospace industry, aerodynamic testing took place in a virtual wind tunnel with Computational Fluid Dynamics running on high speed supercomputers. During its virtual life, F-TYPE completed half a million analyses, requiring 10 million computer processor hours and creating 300TB of data. The CAE development process was one of the key contributing factors in delivering F-TYPE's exhilarating performance and responsiveness.

**COMPUTER AIDED  
ENGINEERING**

**COMPUTATIONAL  
FLUID DYNAMICS**

**10 MILLION  
PROCESSOR HOURS**

The real world testing to prove the car and fine tune the set-up took place in specialist facilities and the harshest environments across the globe in temperatures ranging from -40°C to +50°C, and at altitudes of up to 4,000m. High-speed stability tests, for example, were conducted at Nardo in southern Italy. The Nordschleife circuit at the Nürburgring in Germany was the perfect location to prove out handling, braking, cooling and durability. Known as the “Green Hell”, and featuring 20.8 kilometres of track with 73 turns, it is renowned as the most demanding circuit in the world and the ultimate test of both car and driver.

## A CAR THAT FEELS ALIVE

The essential ingredients in place, F-TYPE is ready to take on the world's most thrilling roads. You'll discover an intuitive and instinctive driving experience like no other. An experience that surpasses high performance and pin sharp handling to deliver pure entertainment. The most awe-inspiring and exhilarating twists and turns on the road belong to F-TYPE.

## ACTIVE AERODYNAMICS

Aerodynamic performance is the essence of F-TYPE's design and is seamlessly integrated into the body for low levels of lift and excellent stability at high speed. A front splitter beneath the grille and rear venturi manages airflow along the vehicle's underside with the sharply defined tail helping air to separate cleanly at lower speeds. A deployable rear spoiler rises at higher speeds to reduce lift by up to 120kg. Even the door handles retract when not required, with their flush design creating an uninterrupted airflow along the flanks.

## THE FASTEST CONNECTION BETWEEN DRIVER AND ROAD

F-TYPE's quick, responsive steering is designed to provide the most direct connection between the driver's hands on the wheel and the contact point of the tyres on the road. The car's quick steering rack delivers a precise reaction to driver input. The feeling of connection is also maximised by the use of aluminium alloy for the front subframe. This not only helps to reduce weight, but, in conjunction with F-TYPE's forged alloy suspension, also creates an immensely strong structure for the ultimate in precise feedback and control.

VEHICLES SHOWN: F-TYPE V8 S IN SALSA RED

## CHASSIS AND SUSPENSION

F-TYPE's aluminium body creates an immensely stable platform from which the all-round forged aluminium double wishbone suspension can control the car. With the damping set-up optimised for the best partnership between dynamics and refinement, it gives the perfect combination of control, agility and feedback.

On **F-TYPE S**, **F-TYPE V8 S** and **F-TYPE R** models, Adaptive Damping assesses body motion and pitch rates 100 times per second, and adjusts the settings for each damper accordingly. The system improves control, handling and agility as well as the ability to rapidly detect and react to critical driving conditions and driver demands. It achieves this with a series of sensors that are placed around the car to monitor the body's vertical movement, pitch and roll rates. The steering wheel position is measured 500 times a second enabling the system to predict the body's roll rate. The stiffness of each individual damper is then adjusted to help maintain body control, stability and agility.

## PERFORMANCE BRAKING SYSTEMS

A range of braking systems is available, each one engineered to deliver confident, progressive feel and sustained, consistent high performance. The front calipers make extensive use of aluminium to reduce the 'unsprung mass' of the car, benefiting both handling and ride refinement. Each system features large, ventilated brake discs - up to 380mm in diameter on the High Performance and Super Performance systems. This large 'swept area' improves braking force as well as providing greater capacity for the discs to absorb and dissipate the heat energy generated during braking.

Brake cooling is also enhanced with additional suspension scoops and ducts developed with the assistance of advanced Computational Fluid Dynamics systems. This channels cooling air directly to the brakes, reducing fade, and helping sustain their performance during extended periods of dynamic driving.

CARBON CERAMIC

# CARBON CERAMIC BRAKES

**SUSTAINED**  
HIGH PERFORMANCE

**WEIGHT SAVING OVER**  
CONVENTIONAL SYSTEMS

Derived from motorsport technology, the optional Carbon Ceramic Braking system is available on **F-TYPE S**, **F-TYPE V8 S** and **F-TYPE R**. It is the most powerfully performing braking system ever fitted to a Jaguar road car. Instantly recognisable with striking yellow calipers and offering up to a 21kg weight saving, it further reduces unsprung mass with corresponding benefits to both ride and handling. The system features monobloc calipers with 6 pistons at the front and 4 pistons at the rear.

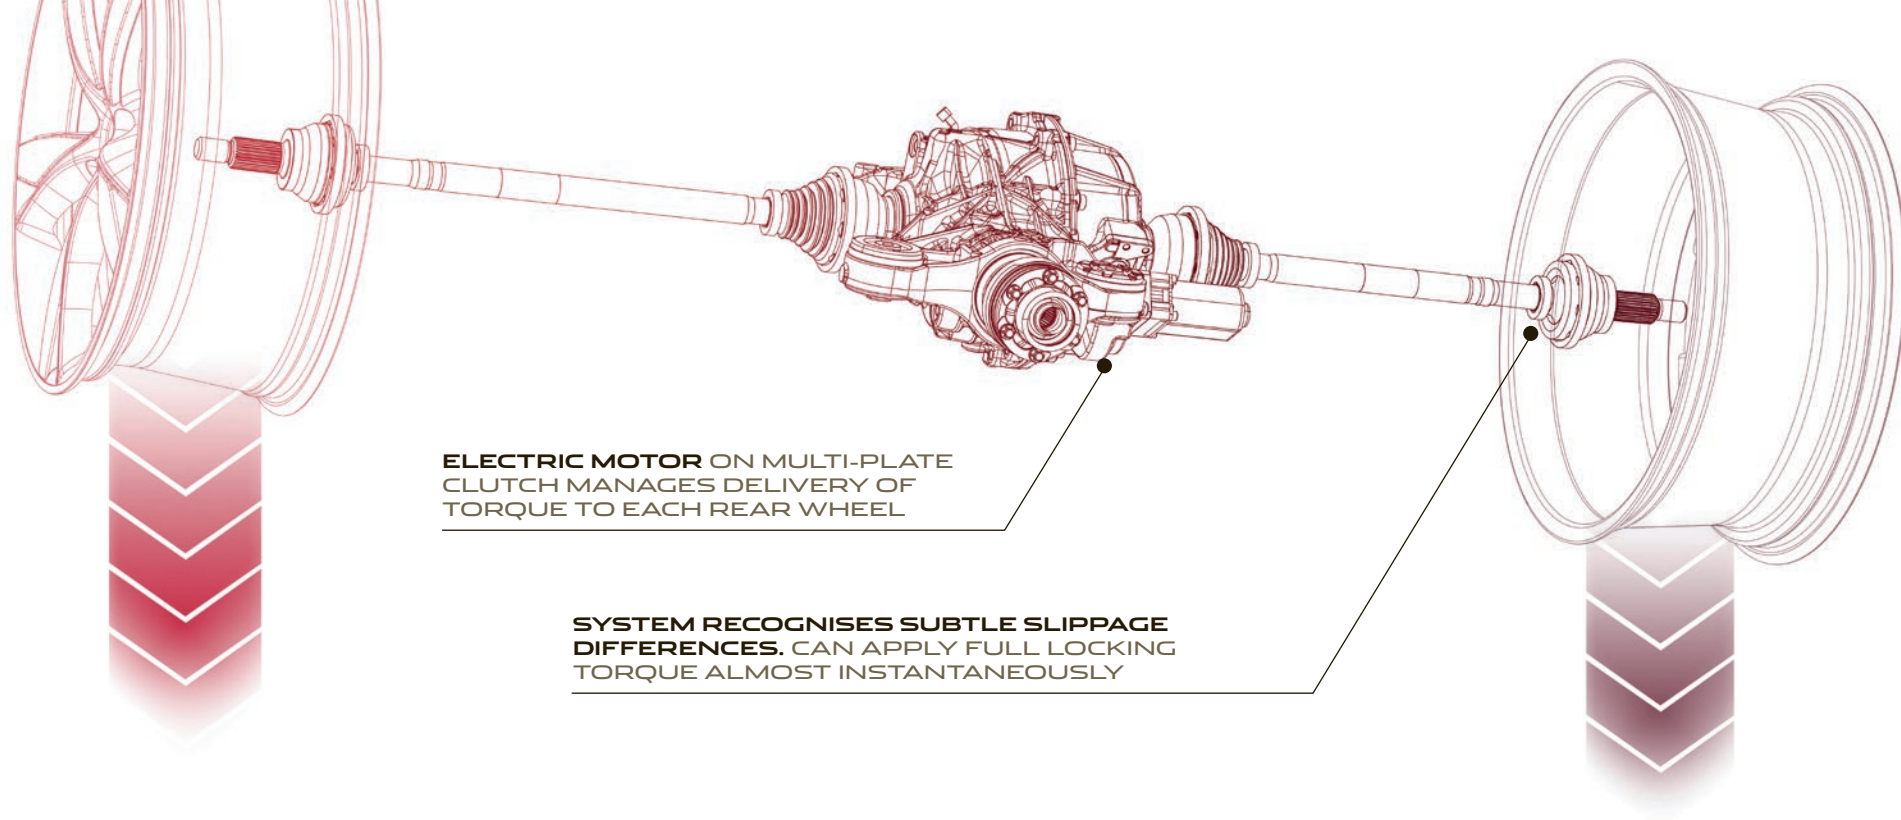

Providing greater resistance to fade and wear, as well as delivering high levels of sustained performance in even the most demanding conditions, the Carbon Ceramic Braking system was track tested over hundreds of hours at long and short course race circuits across Europe. These included the Nürburgring, Rockingham in the UK and Fiorano in northern Italy, which are all recognised as taking an extraordinary toll on brake components: temperatures on the Carbon Ceramic discs reached between 600 and 900 degrees centigrade during fast lap driving.

JAGUAR  
CARBON CERAMIC\*

CALIPERS: YELLOW (STANDARD)

\*Jaguar Carbon Ceramic brakes available as an option on F-TYPE S, F-TYPE V8 S and F-TYPE R models  
Carbon Ceramic Braking system is available only with 20 inch Storm wheels

**ELECTRIC MOTOR ON MULTI-PLATE CLUTCH MANAGES DELIVERY OF TORQUE TO EACH REAR WHEEL**

**SYSTEM RECOGNISES SUBTLE SLIPPAGE DIFFERENCES. CAN APPLY FULL LOCKING TORQUE ALMOST INSTANTANEOUSLY**

## DIFFERENTIALS

The mechanical **Limited Slip Differential** featured in **F-TYPE S** was chosen because of its innate suitability for the rear-wheel drive sports car experience. It offers the perfect opportunity to leverage the car's superb handling and the upper limits of its grip. The Limited Slip Differential improves traction and agility during acceleration out of corners and on slippery surfaces. The car can also make better use of the available traction before the DSC system needs to intervene and results in more refined stability control during dynamic driving.

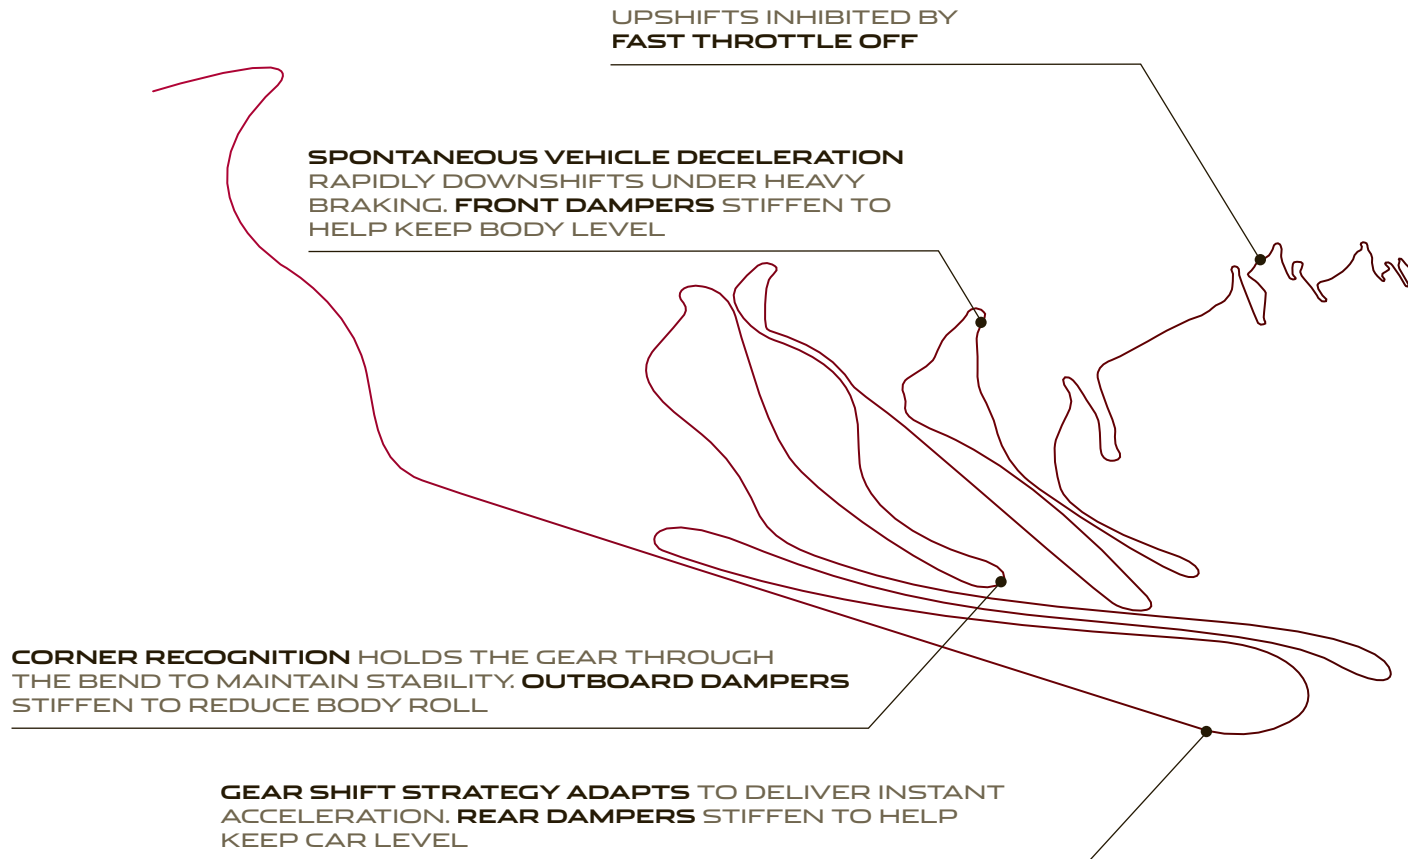

An **Electronic Active Differential** on **F-TYPE V8 S** and **F-TYPE R** forms part of the Torque Vectoring technology which helps provide outstanding agility and control. Working in conjunction with the stability, traction and ABS systems, the Electronic Active Differential uses an electric motor acting on a multiplate clutch to manage the delivery of torque to each of the rear wheels. Full electronic control of the rear differential lock enables the system to apply full locking torque almost instantaneously. The Electronic Active Differential allows for very fine control of the power delivery to limit wheelspin, maximise traction and offer even greater levels of control.

# ADAPTIVE DYNAMICS

Adaptive Dynamics instinctively modifies the car's response to road conditions and driver input, enhancing the driving experience. It analyses how the car is being driven by measuring acceleration and braking, cornering, as well as road load and kick down activation. It then uses sophisticated adaptive software to ensure that the most appropriate gear shift strategy is automatically selected. For even more responsive performance, the selection of Sport Mode alters the gear shift programme to deliver shorter shifts and hold ratios at higher revs for longer.

# DYNAMIC MODE

**>** SHARPENED THROTTLE RESPONSE | QUICKER GEAR SHIFTS

**Dynamic Mode** remaps the car's software to further emphasise its sporting character. It sharpens the throttle response, increases steering weighting and performs gear shifts more quickly and at higher engine speeds. Selecting Dynamic Mode also prevents automatic upshifts when the gearbox is used in manual mode.

The **Configurable Dynamics** system, standard on **F-TYPE R** and optional on **F-TYPE S** and **F-TYPE V8 S**, allows the driver to define which characteristics are altered when Dynamic Mode is selected. This option also features the **Dynamic-i** display system, which can show performance indices such as G-Force meter and lap time, plus throttle, steering and brake inputs on the 8 inch Touch-screen.

R IS INTENSITY. IT PROVIDES MORE. AND DELIVERS THE ULTIMATE EXPRESSION  
OF F-TYPE: THE MOST POWERFUL, THE MOST DYNAMICALLY CAPABLE,  
THE MOST THRILLING. F-TYPE R IS THE SPORTS CAR AT ITS MOST HONED,  
SENSUOUS AND EXCITING.

## PERFORMANCE

> 5.0 V8 404KW | 680NM

**F-TYPE R** is the definitive sports car. Powered by Jaguar's incredible 5.0 V8 404kW supercharged engine with 680Nm of torque for sheer unadulterated performance that is 100 percent exploitable - 0-100 km/h in 4.2 seconds, best-in-class power output and power-to-weight. **F-TYPE R** takes full advantage of the extremely rigid bodyshell. Its stiffness provides the definitive platform for suspension enhancements that can apply available traction and fully harness the immense power on hand.

## TORQUE VECTORING

INCREASED STEERING PERFORMANCE

IMPROVED CORNERING CAPABILITY

**F-TYPE R** offers unparalleled levels of handling, grip and controllability. It has all the inherent duality of everyday usability with the character of an out-and-out sports car, putting the emphasis on greater agility and excitement and a crisper, edgier temperament.

**F-TYPE R** invites enthusiastic driving. Its supplemental Torque Vectoring technology provides controlled braking on the inside rear wheel, at the same time as feeding more power to the outside rear wheel, to help increase steering performance and inspire even greater driver confidence. The system works in conjunction with the **F-TYPE R**'s Electronic Active Differential to improve the cornering capabilities and driver control.

## R INSIDE

# ASSISTANCE AND REASSURANCE

BLIND SPOT MONITOR

REVERSE TRAFFIC DETECTION

INTELLIGENT HIGH BEAM

Sophisticated driver assistance systems are available to provide reassurance, information and control, and allow the driver to focus on the pleasure of the drive. These include **Cruise Control with Automatic Speed Limiter** and **Blind Spot Monitoring**, which is designed to help alert the driver to the presence of a vehicle in an adjacent lane. **Reverse Traffic Detection** can provide warnings of other vehicles in the reversing path of F-TYPE, for example when in a car park. **Front and Rear Parking aids** and a **Reverse Park Camera** also provide valuable assistance during parking manoeuvres.

**Bi-Function HID Xenon headlamps** provide an intense white light for both main and dipped beam in a single unit. The optional **Adaptive Front Lighting** system measures the speed of the car and angle of the steering wheel, swivelling the lamps by up to 14 degrees out, and up to 7 degrees in, for improved visibility during cornering. The optional **Intelligent High Beam** system automatically switches between low and high beam when necessary, using a sensor mounted at the front of the rear view mirror. The rear lamps feature LED technology with light guides that not only create a distinctive design, but also have the ability to illuminate to full brightness more quickly than conventional bulbs, potentially giving a following driver more time to react.

Every F-TYPE also features a complement of advanced active and passive safety systems, including **Emergency Brake Assist (EBA)**, **Electronic Brake-Force Distribution (EBD)**, driver and passenger front airbags, seat mounted airbags, seat belt pre-tensioners and an industry-leading **Pedestrian Contact Sensing System™**.

## EVEN THE ROOF IS FAST

F-TYPE's fabric roof offers both light weight and refinement with the outer canopy acoustically enhanced with composite fabric and a flush fitting heated rear window glass. The roof can be raised or lowered in just **12 seconds** and operated fully automatically at speeds of **up to 50 km/h**. Its neat, compact stowage keeps the rear of the car low and sleek and avoids the need for a tonneau cover - another weight saving. An optional removable wind deflector can also be fitted between the roll over protection bars.

## THE LUXURY OF SPACE

407 LITRES

OPTIONAL POWERED TAILGATE

F-TYPE Coupé models offer the useability and practicality of a single rear loadspace area. With a capacity of up to 407 litres, it is large enough to accommodate a full set of luggage. For ease of access and added convenience, the tailgate can be opened or closed at the touch of a button with the optional powered function.

## PANORAMIC GLASS ROOF

Introducing even more natural light and airiness to the interior, a full width panoramic roof is optional on F-TYPE Coupé models. For increased seclusion, should it be required, this option features an interior blind that can be closed manually.

VEHICLE SHOWN: F-TYPE R IN POLARIS WHITE WITH OPTIONAL PANORAMIC ROOF AND BLACK PACK

## PEAK PERFORMANCE

**MERIDIAN SOUND**  
SYSTEM 380W

**MERIDIAN SURROUND**  
SOUND SYSTEM 770W

Two superb audio systems bring the cockpit to life with incredible, rich sound. These systems were designed in conjunction with British audio experts Meridian specifically for F-TYPE. They feature advanced technology, such as Digital Signal Processing (DSP) technology, to optimise every element of the system and use Meridian Cabin Correction' s advanced algorithm to tailor the music experience to the precise acoustics of the vehicle's interior.

The **Meridian Sound System** offers superb audio reproduction through 10 speakers - including 2 sub woofers, **380W** and 12 channels.

The ultimate **Meridian Surround Sound System** features 12 speakers and **770W**. This advanced system uses Meridian Trifield technology to deliver an authentic and consistent music experience within the cabin.

# THE FEELING INSIDE

F-TYPE's interior conveys a combination of functional ergonomics with sporting style through its meticulously considered cockpit architecture, its simple controls and its clear instrumentation. It is designed to put the driver first and to be an opportunity for individual expression. Everything offers a rewarding, highly tactile experience with extensive ranges of fine leathers, colours and materials making it more personal. Push the Start button and the car comes alive with a cascade of light from the switchgear. **Configurable Lighting**, standard on **F-TYPE S**, **F-TYPE V8 S** and **F-TYPE R**, adds even greater personalisation with choices of Phosphor Blue, Pale Blue, White, Coral or Red to suit the driver's mood. Activate Dynamic Mode and the lighting switches to Red on the door grab handles, centre console and instrument cluster.

## SEATS

Two seat styles are available, both offering superb comfort and support. On **F-TYPE** the **Sports Seat** with leather and Suedecloth facings is standard. **F-TYPE S** and **F-TYPE V8 S** models gain the added luxury of full leather facings. All models can be specified with the optional **Performance Seat** with Premium leather which offers enhanced lateral support during rapid cornering. **F-TYPE R** features the **Performance Seat** as standard with the R badge embossed on the headrest. Both the Sports and Performance seats feature 4 way electric and 2 way manual adjustment, or 14 way electric adjustment and memory function as an option. They can also be specified with a heated function. For the finishing touch, it is also possible to choose between Jet, Red or Camel seatbelts.

Now you're ready to choose just the right interior colour combination from Jaguar's exclusive collection.

# ADDED ATTITUDE, ADDED OPTIONS

F-TYPE's strong visual assertiveness can be further enhanced thanks to the availability of two exciting options - **Design Pack** and **Black Pack**. The Design Pack is available on **F-TYPE**, **F-TYPE S** and **F-TYPE V8 S**. It features body-coloured sill extensions, front aerodynamic splitters and a Gloss Black rear valance and, on F-TYPE and F-TYPE S models only, a colour-keyed rear venturi. The Black Pack is available on all F-TYPE models, both Convertible and Coupé, and features a Gloss Black finish on the front grille surround, as well as to the bumper beam, bonnet louvres and front splitter. The Gloss Black finish also extends to the front outer meshes, side power vents, rear valance, the roll over protection bars for Convertible or window surrounds on Coupé.

## DESIGN PACK\*

1. Body coloured front bumper splitter 2. Body coloured aerodynamic splitters 3. Body coloured side sill extensions 4. Gloss Black rear valance 5. Body coloured rear bumper venturi

\*Not available on F-TYPE R  
†Content dependent upon model

#### INTERIOR BLACK PACK\*

**1.** Gloss Black air vent surrounds and door switch pack surrounds **2.** Flat-bottomed Sports steering wheel with Gloss Black trim finisher **3.** Gloss Black Instrument Cluster Dial Rings **4.** Black Hex Aluminium console finisher

#### EXTERIOR BLACK PACK†

**1.** Gloss Black finish to front grille surround, bumper beam, front splitter, front outer meshes and rear valance **2.** Gloss Black bonnet louvres **3.** Gloss Black side power vents **4.** Gloss Black window surrounds (Coupé only) and Gloss Black Roll Over Protection Bars (Convertible only)

# ACCESSORIES

A wide range of high quality accessories is available from your Jaguar dealer. They are all designed to complement your lifestyle, add further individuality or enhance practicality. For the full, extensive collection of F-TYPE accessories, please refer to the Specification and Price Guide.

## **SUEDECLOTH STEERING WHEEL WITH CARBON FIBRE CENTRE CONSOLE FINISHER**

Enhance the vehicle's interior with the supple touch of the Suede Cloth Steering Wheel and the stylish look of the Carbon Fibre Centre Console Finisher.

## **CARBON FIBRE ENGINE COVER**

Add a dynamic flair to your F-TYPE with this lightweight Carbon Fibre Engine Cover.

## **WIND DEFLECTOR**

Reduce wind in the cabin with this easy to install, quick to remove, Wind Deflector.

## **CARBON FIBRE ROLL OVER PROTECTION BARS**

Accentuate your F-TYPE's contemporary sporting style with these Carbon Fibre Roll Over Protection Bars.

**20" BLADE FORGED ALLOY  
TECHNICAL GREY/CARBON FIBRE**

Add your own style to your F-TYPE with these striking forged 20 inch wheels. Featuring high-grade Carbon Fibre inserts and Jaguar's dynamic 'Blade' design.

**CARBON FIBRE MIRROR COVERS**

Accentuate the dynamic design of your F-TYPE's exterior mirrors and add further individuality to its sporting character.

**CARBON FIBRE BONNET LOUVRES**

Emphasise one of your F-TYPE's most distinctive features with these high-grade Carbon Fibre Bonnet Louvres.

#### **CARBON FIBRE SIDE VENTS**

Take F-TYPE's sporting credentials to another level with the addition of these Carbon Fibre Side Vents.

#### **CARBON FIBRE FRONT SPLITTER BLADE**

Give F-TYPE an even more assertive look with this performance-inspired Carbon Fibre Front Splitter Blade.

#### **CARBON FIBRE REAR DIFFUSER**

Make a bold exterior styling statement with this high grade Carbon Fibre Rear Diffuser featuring aero blades.

#### **EXHAUST FINISHERS**

Making an eye-catching, more individual styling statement, these bright polished Exhaust Finishers replace the twin exhaust outlet on F-TYPE V6 models.

#### **SKI CARRIER**

Carry up to 2 pairs of skis safely and securely on this lockable Ski Carrier. Designed to minimise wind noise and air resistance, the carrier requires no auxiliary lighting or number plate and fits/removes in minutes.

#### **5-PIECE LUGGAGE SET**

Designed for the exact dimensions of F-TYPE's boot space, this high-quality, 5-piece Luggage Set looks good anywhere and maximises the car's carrying capacity.

#### IMPORTANT NOTICE

Jaguar Land Rover Limited is constantly seeking ways to improve the specification, design and production of its vehicles and alterations take place continually. Whilst every effort is made to produce up-to-date literature, this brochure should not be regarded as an infallible guide to current specifications, nor does it constitute an offer for the sale of any particular vehicle. Distributors and dealers are not agents of Jaguar Land Rover Limited by any express or implied undertaking or representation. Comparisons are based on manufacturer's own data and testing.

#### ENVIRONMENTAL INNOVATION AT JAGUAR

Jaguar is proud to continue the company's tradition with its approach to Environmental Innovation. From the choice of lightweight materials and lean production methods to the efficiency of its engines and designs, Jaguar is committed to operating as a more sustainable business and reducing its overall environmental impact.

Jaguar's flagship XJ model was the first in the company to achieve ISO 14040, the international standard for vehicle life cycle assessment. This certification measures the environmental impact of XJ from component material sourcing and manufacturing process, through driving 200,000km, to final disposal. But that's not all. Every new Jaguar is designed to be 85% recyclable and reusable, in addition 95% recoverable and reusable, with 10% specifically for energy recovery.

The XJ, F-TYPE and XK's innovative use of lightweight aluminium, which incorporates up to 50% recycled material from the manufacturing process of the body structures, provides considerable performance benefits. This includes improved fuel consumption and less CO<sub>2</sub> emissions associated with lighter structures as well as the dynamic performance inherent in its weight saving design.

Jaguar is committed to reducing dependency on fossil fuels, using fewer resources and creating less waste as part of our approach to sustainability excellence.

The company plan includes 25% reduction targets in operating and tailpipe CO<sub>2</sub> emissions, waste to landfill, logistics efficiencies (15%) and water consumption (10%), all based on per vehicle built since 2007. In addition the manufacturing assembly CO<sub>2</sub> emissions of each Jaguar built in the UK since 2009 is 100% offset. For each tonne of CO<sub>2</sub> emitted in the assembly process, Jaguar invests in projects that reduce an equivalent tonne of CO<sub>2</sub> elsewhere.

Taking into account the company's global sales growth and increased investment in more efficient operating facilities, we are proud to have delivered and in some cases exceeded our Environmental Innovation targets as planned for 2012. And we are on track to meet our 25% reduction in joint European fleet average tailpipe CO<sub>2</sub> emissions by 2015.

Looking forward, we have developed our 2020 vision for sustainable business growth that focuses on continued improvements in tailpipe CO<sub>2</sub> emissions, operational carbon neutrality and zero waste.

To date the company has offset over 6 million tonnes of CO<sub>2</sub>, provided over 4,000 direct jobs in 60 emissions reductions projects in 17 countries and improved the lives of over 1 million people in our global cook stoves emissions reduction programme.

But it doesn't stop there. Our manufacturing facilities have been certified to ISO14001 since 1998 and we are credited to Platinum Plus level in the UK's Business in the Community Corporate Responsibility Index.
