THE XK

Power, style and uncompromised luxury; the XK epitomises Jaguar's legendary talent for creating beautiful high performance vehicles. A grand tourer with the heart and soul of a sports car, the XK builds on Jaguar's reputation for stunning design with its contemporary fusion of dramatic sweeping curves and a low-riding profile.

The range comprises three models – XK, XKR and XKR-S. Each is formed from aluminium, for a unique combination of lightness, strength and agility, and propelled by Jaguar's highly acclaimed 5.0 Litre V8 or 5.0 Litre V8 Supercharged engine. Together they offer a unique combination of sporting luxury, and the promise of an exhilarating driving experience that's designed to be exceptional.

DESIGN

The XK possesses all of Jaguar's classic design motifs – seduction, power, elegance – conceived with a modern contemporary edge. Its sleek styling and sculpted athletic lines embody the spirit of performance, perfectly matching the car's sporting prowess. The XK's exterior details are built to reflect its dynamic capabilities, from its muscular rear haunches and distinctive horizontal chrome side vents to the dramatic front sub-wing air intakes. New, slimmer, bi-function HID Xenon headlamps are lined with LED daytime running lights and create a striking and distinctive visual signature. The XK is eye-catching, head turning, breathtaking.

CONVERT

XK Convertible models combine the thrill of open top driving with uncompromised handling and comfort. Opening and stowing in just eighteen seconds, the roof folds itself neatly beneath a striking aluminium tonneau fitting seamlessly flush within the body – reducing buffeting at speed and compact enough to retain the XK's iconic shape. The triple layer roof, laminated to provide a taut and waterproof outer coat, incorporates innovative ultra-thin insulation material to deliver outstanding protection from weather, wind and road noise.

ALUMINIUM

The XK's all-aluminium body construction is fundamental to the way the car performs. Using technology derived from the aerospace industry, it delivers a combination of lightness, strength and rigidity – the key to great sports car handling, superb performance and impressive efficiency. High torsional rigidity delivers exceptional agility, reduced body roll and pin-sharp cornering.

Jaguar's 5.0 Litre AJ-V8 GEN III engine delivers heart-racing acceleration and effortless power. It employs state-of-the-art engineering technologies to maximise its performance and refinement. Spray-guided direct injection optimises air to fuel ratios, while Cam Profile Switching adapts cam periods, depending on power requirements, giving up to 10 percent more mid-range torque. Dual Independent Variable Cam Timing recycles residual waste gases lowering emissions and improving fuel economy.

P E R F O R M A N C E

The XKR re-defines the sporting capabilities of the XK, re-engineered and recalibrated, updated and enhanced – making a great car even greater and taking XK dynamic performance to another level. At the heart of the XKR is Jaguar's acclaimed 5.0 AJ-V8 GEN III Supercharged engine. This all-aluminium quad-cam powerplant produces 375kW with seamless power delivery and tremendous torque – up to 625Nm. XKR symbolises the intensifying of the sporting experience, delivering the sublime luxury of a grand tourer with the passion and muscle of a thoroughbred champion.

R E W A R D

At every turn the XK rewards the driver with involving, outstanding driving dynamics. With its aluminium monocoque bodyshell providing exceptional torsional stiffness, it offers precise handling and fine body control.

All models employ an array of intelligent adaptive technologies designed to assist but never overwhelm. The Servotronic 2 steering system provides support to improve manoeuvring at low speeds but reduces assistance at higher speeds. The ZF 6HP28 6-speed automatic transmission reads individual driving styles and the road environment to constantly adapt its gear shift pattern. It is designed to optimise fuel efficiency while anticipating and preparing to provide the instant power that high speed manoeuvring or overtaking may require. It works in conjunction with Dynamic Stability Control which intervenes in demanding driving situations by applying braking to individual wheels where necessary, reducing engine torque and helping to maintain stability in challenging driving conditions.

JaguarDrive Control™ offers the driver the opportunity to select different modes to suit their driving preference or the prevailing conditions. Dynamic mode delivers even more responsive acceleration for a thrilling sporting experience. Winter mode dampens the accelerator pedal response to help reduce the risk of spin and maintain progressive wheel control in slippery conditions. Its bespoke shift settings delay and soften gear shifts for better control with low grip.

SMOOTHING OUT THE CURVES

XK features a range of innovative and advanced driving technologies designed to complement the driver and enhance the drive. Adaptive Dynamics continuously monitors the car's speed, steering and body movements, analysing the suspension response and varying the damping to suit the conditions, whether cornering, navigating uneven surfaces or accelerating on an open road. The system calculates the appropriate suspension response 500 times every second keeping the vehicle flat, stable and secure allowing confident, precise handling without any loss of ride comfort.

With its higher performance capabilities the XKR demands even greater agility and control. The Active Differential works together with the XKR's traction, ABS and Dynamic Stability Control to analyse the firmness of the road surface. It adjusts the differential of each wheel to optimise traction on loose surfaces, and sharpen the car's agility through bends.

DETAIL

Jaguar selects the finest materials to create interiors that are finished to the most luxurious standards. Classic textures are combined with modern styling, flawless craftsmanship and signature phosphor blue mood lighting in a cabin that is elegant, contemporary and driver-focused. Leather features extensively, along with hand-crafted wood, Piano Black or technical finish veneers and smooth chrome. The wide selection of colours, materials and veneers offer the opportunity for personalisation and individuality, whilst unique choices such as optional Poltrona Frau® leather headlining can provide the perfect finishing touch.

LUXURY

Two seat styles are available, each with detailed finishing and a comprehensive range of colour choices. Luxury seats upholstered in soft grain leather are standard in the XK. They feature heating and cooling, 16-way power adjustment and memory function.

Performance seats are available as an option on the XK and XKR. They provide a supreme combination of comfort and lateral support, with integrated head restraints and strongly sculpted side bolsters for exceptional support during hard cornering. They are upholstered in luxurious soft grain leather and feature 16-way electric positioning with heating and memory functions.

AIRBAG

EMPOWER

Intuitive technology empowers but never overpowers the driving experience.

Press the pulsing red START button and the precision-made JaguarDrive Selector™ that controls the automatic transmission rises into the palm of the driver's hand. "Drive" is engaged with a simple twist. For maximum driver involvement gears can also be selected manually using paddle shifters mounted behind the steering wheel. The wheel itself features a host of interactive controls while the centre console 7 inch Touch-screen encapsulates Jaguar's design philosophy – simple and intuitive; you are never more than a few taps from any control. A masterpiece of clarity and smart functionality, it is used to operate the climate control, satellite navigation, Bluetooth® telephone system and in-car audio. The Front Media Interface provides control of an iPod or other MP3 player while USB storage devices can also be accessed. Other players can be connected to the car through a standard 3.5mm stereo auxiliary input port.

XK models can also be specified with a host of technologically innovative options that offer even greater convenience and driving pleasure. The Adaptive Front Lighting system features dynamic pivoting headlamps with integrated cornering lights that react to the car's speed and the driver's steering. It can deflect the headlight beams by up to 15 degrees, to cast light deeper into corners. Adaptive Cruise Control is designed to sense if the vehicle in front is moving at a slower speed and use the throttle and brakes to help maintain a constant time gap. The system automatically returns the car to its set speed once the road ahead has cleared. For assistance when parking, Jaguar's new Reverse Park Camera with Guidance provides a video display on the Touch-screen, along with a variable audio warning to alert the driver to the proximity of objects both in front of and behind the car.

HYPERSONIC

The XK features the astonishing, precision crafted, Bowers & Wilkins surround sound system. Acoustically designed exclusively for the unique soundscape of the XK's cabin, it delivers 525W of pure sound through eight strategically positioned speakers utilising Kevlar® cones in the larger speakers and aluminium domes on the tweeters. It offers exceptionally clear reproduction using Dolby® Pro-Logic® II Surround Sound for extraordinary sound quality throughout the cabin.

THE MONOCOQUE BODYSHELL IS CONSTRUCTED FROM ALUMINIUM
USING TECHNIQUES DERIVED FROM THE AEROSPACE INDUSTRY.
THE RESULTING STRUCTURE COMBINES LIGHTNESS WITH STRENGTH
AND EXCEPTIONAL RIGIDITY.

SAFETY

BY DESIGN

The XK's comprehensive range of advanced safety systems is designed to assist the driver in dealing with the unexpected, and help protect occupants and other road users.

Jaguar's unique and highly advanced Adaptive Restraint Technology System (ARTS™) helps to protect driver and passenger in the event of a collision. Within a fraction of a second, ARTS™ can assess the weight and position of the occupants, the severity of any impact, and deploy the XK's four dual-stage airbags.

The XK Convertible has its own array of safety features, including a highly advanced roll-over protection system. If the car's on-board sensors detect an impending roll-over, two massively strong hoops – hidden under the rear tonneau – are designed to deploy within 65 milliseconds. The XK even helps protect those around the car. The industry-leading Pedestrian Contact Sensing System™ is designed to raise the bonnet slightly if it detects a collision with a pedestrian in order to help prevent them from contacting hard points under the bonnet.

R E S P O N S I B L E

In manufacturing the XK, Jaguar remains at the forefront of environmentally conscious production. Aluminium is not only completely recyclable but up to 50 percent of the XK's body structure is made from recycled aluminium.

In addition, many of the the XK's central components have been constructed out of recycled materials, such as the insulation, battery and filter housings, air distribution channels and engine compartment plastic constituents.

XKR-S

The new XKR-S takes the Jaguar sports car experience to soaring new heights. Powered by a unique version of Jaguar's 5.0 Litre V8 Supercharged engine – calibrated to achieve 404kW and peak torque of 680Nm – the most powerful series production sports car Jaguar has ever produced is capable of 0-100 kph in just 4.4 seconds and a top speed of 300 kph.

CONTROL

Bespoke changes to the Adaptive Dynamics, together with a 10mm reduction in ride height and extensive revisions to the suspension components and geometry deliver pin-sharp handling, maximise grip and optimise control. The unique 20" Vulcan lightweight forged alloy wheels feature increased tyre widths, while the performance active exhaust gives the XKR-S its own distinctive sound signature. Dramatic, bold exterior styling changes have been designed to improve aerodynamics, maintain stability and reduce lift at high speeds. They include a carbon fibre splitter and lower spoiler, extended sills and a unique rear wing apron and diffuser.

UNIQUELY XKR-S

Inside a range of sporting themes are available, including exclusive carbon leather with Reims Blue micro-piping and stitching. A Poltrona Frau® Jet leather headlining and Dark Linear Aluminium veneer are standard. New 16-way adjustable Performance seats have strongly sculpted side bolsters for exceptional lateral support during hard cornering. A true driver's car – the experience is rewarding and unsurpassed for excitement.

PERFORMANCE AND TECHNICAL OPTIONS

ADAPTIVE FRONT LIGHTING WITH DYNAMIC PIVOTING HEADLAMPS AND INTEGRATED CORNERING LIGHTS

This optional system features dynamic pivoting headlights that react to the car's speed as well as the driver's steering and can deflect the headlight beams by up to 15 degrees, casting light deeper into corners to improve visibility while cornering. Cornering lights illuminate areas to the side of the car at low speeds when the indicators are in use, or at larger steering angles, for example when parking.

(Optional on all XK models)

REVERSE PARK CAMERA WITH GUIDANCE

This new optional feature provides added convenience and safety when reversing. Discreetly located in the rear boot lid finisher and operated via the Touch-screen, it integrates with the standard front and rear parking aids.

(Standard on XKR-S, optional on all other XK models)

BRIGHT STAINLESS STEEL PEDALS
Made from stainless steel and rubber, the pedals fit securely over existing pedals for a contemporary, sporting appearance.
(Standard on XKR-S, optional on all other XK models)

POLTRONA FRAU®
JET LEATHER HEADLINING
Produced by renowned furnishings house Poltrona Frau®, which draws upon its extensive experience in creating premium interiors for the motor industry.
(Standard on XKR-S, optional on all other XK models)

C2P21323

BULB KIT
C2P8534

WARNING TRIANGLE
C2S20992

LOCKING WHEEL NUTS
C2C9198

GLOSSARY

POWERTRAIN AND DRIVING DYNAMICS

JAGUAR SEQUENTIAL SHIFT™

Provides the choice of Drive, Sport Automatic or Manual gearshift modes, with one touch paddles mounted behind the steering wheel to control gear changes manually.

ADAPTIVE DYNAMICS

Designed to provide the optimum balance between low speed ride comfort and high speed handling precision, analysing body movement, steering and road wheel inputs up to 500 times a second and continuously adjusting the suspension settings through electronically controlled dampers.

ACTIVE DIFFERENTIAL

An electronically controlled, active differential with Handling Functionality that limits the slip between the rear wheels to improve traction and stability in different driving conditions, working in harmony with the Traction, ABS and DSC systems.

DYNAMIC STABILITY CONTROL (WITH TRAC DSC MODE)

Intervenes in demanding driving situations by applying braking to individual wheels and reducing engine torque.

JAGUAR DRIVE CONTROL™

Interacts with the DSC (Dynamic Stability Control) engine and transmission management systems to change the characteristics of engine mapping, transmission shifts and brake interventions. It offers different modes selectable by a button and is designed to optimise the vehicle response depending on driving conditions and style.

WINTER MODE

Softens the responsiveness of the engine and modifies the gear change strategy to improve traction in icy or slippery conditions. The vehicle performs in a more gentle and controlled manner, allowing more confident progress. When active, Winter Mode selects 2nd gear for pulling away on level ground (no incline).

DYNAMIC MODE

Designed to optimise vehicle systems to deliver a more involving driving experience. When Dynamic Mode is selected, Trac DSC is automatically engaged, and engine torque delivery characteristics and gear shift points are modified to further improve responsiveness. When selected while the transmission is in full Manual mode, transmission up-shifts are fully controlled by the driver, with no automatic up-shift when the rev limit is reached.

EXTERIOR FEATURES

ADAPTIVE FRONT LIGHTING WITH DYNAMIC PIVOTING HEADLAMPS AND INTEGRATED CORNERING LIGHTS

Sensors react to the car's speed and steering input, and the system can deflect the headlight beams by up to 15 degrees casting light deeper into corners, and giving added confidence at night.

XKR AERODYNAMIC PACK

Body coloured front splitter and body coloured larger rear spoiler.

INTERIOR FEATURES

AIR QUALITY SENSOR

Automatic cabin recirculation triggered by external odour sensor with 5 sensitivity settings.

JAGUAR SMART KEY SYSTEM™ WITH KEYLESS ENTRY

With the Jaguar Smart Key in your pocket or bag, the car automatically unlocks as you pull the door handle. Simply push the ignition button to start the engine. Upon leaving, simply press a button on the door handle to lock the car or use the Jaguar Smart Key.

VALET MODE

When Valet mode is enabled, the vehicle can be parked by a parking attendant who can lock the vehicle, but cannot open the luggage or glove compartments. Valet mode can be enabled and disabled through a secure function in the Touch-screen.

SAFETY AND SECURITY

ROLL-OVER PROTECTION SYSTEM

Two automatically deployable hoops which are designed to activate in a roll-over event (Convertible only).

MULTIMEDIA

NAVIGATION SYSTEM⁽¹⁾⁽²⁾

7 inch Touch-screen display with DVD mapping.

BOWERS & WILKINS 525W SURROUND SOUND SYSTEM

Featuring a unique multichannel amplifier with Dolby® Pro Logic® II Surround Sound, 3 channel Stereo, and specially-designed Bowers & Wilkins loudspeaker components, including high-output, low-distortion Kevlar® speakers and extended high-frequency aluminium dome tweeters.

WINDOWS MEDIA AUDIO (WMA) AND MP3 COMPATIBILITY

Enables the CD player to play CDs which contain WMA and MP3 files.

XK OWNERSHIP EXPERIENCE

SERVICE, ASSURANCE, AND PEACE OF MIND ARE ALL PART OF THE PRIDE OF OWNING YOUR XK.

THE JAGUAR ACCESSORY RANGE

Enabling you to personalise your car, to create a driving experience that is even more individually rewarding. All Jaguar accessories are tested rigorously for safety and durability in the most arduous of climates and conditions.

A comprehensive range of styling options, interior and exterior accessories, enabling you to tailor your XK to suit your personal style.

BECAUSE ONLY THE BEST WILL DO

An official Jaguar dealer can ensure that Jaguar trained, specialist technicians, with access to the full range of Jaguar approved parts and tools, will always be on hand to guarantee that every fitting, or repair, is carried out exactly the way Jaguar intended. Your Jaguar dealer can also supply and fit Jaguar approved accessories to personalise and add to the practicality and style of your XK model.

JAGUAR ROADSIDE ASSISTANCE†

All Jaguar vehicles purchased in Australia benefit from complimentary Jaguar Roadside Assistance service for the length of the new car warranty. This covers you Australia-wide 24 hours per day, every day.

WARRANTY*†

3 year/100,000km* mechanical warranty together with a 3 year unlimited kilometre Paint Surface Warranty and 6 year unlimited kilometre Corrosion (Perforation) Warranty.

JAGUAR MAGAZINE

Bringing to life Jaguar's racing heart, Jaguar Magazine is our owner publication. It combines features on our legendary performance, the inside track on our products and company, along with news and events from the world of Jaguar.

JAGUAR.COM.AU

Dedicated to you and your XK, the interactive jaguar.com.au website features helpful tools such as the dealer locator, model specifications - allowing you to see the car tailored to your specification and colour; the latest information on all the Jaguar models and a fascinating look into the passion and legacy that infuse the Jaguar name.

FREE SCHEDULED SERVICE

3 year / 100,000 kilometre* free scheduled service programme (wear and tear items not included).**

*Whichever is the earliest.

**Wear and tear items include battery, tyres, oils and additives.

†Terms and Conditions apply. Please contact your Jaguar dealer for more information.
