

Jeep[®]
Cherokee

Purpose built.

Whether you're out for fun on the trail or in the big city, the Jeep® Cherokee is built to deliver. It keeps you going with world-class Jeep brand capability that's paired with a very long list of standard and available premium features.

Choose from two Cherokee models, the playful Sport and the well-appointed Limited. Then take it from there. Outfit Cherokee with innovative features like our exclusive Sky Slider™ roof, Uconnect™ Media Centre 731N navigation radio allowing you to head out with purpose, and build your adventure. This is how you enjoy living the Jeep life and everything it has to offer.

Capability is at our core.

At the heart of the Jeep® Cherokee lies a powertrain that puts its less capable rivals to shame. Cherokee's standard 4WD system, Selec-Trac® II, boasts world-class 4WD performance due to its unmitigated strength and real-time traction response. Selec-Trac II is constantly adjusting to road conditions to produce optimum grip on the road at all times. Should traction loss occur, Selec-Trac II immediately blasts the lion's share of torque onto the wheels with the most grip.

Cherokee's standard 3.7-litre V6 engine produces a robust 151 kW and 314 N.m of torque at 4,000 rpm, for a generous dose of power at the engine's low end that provides more pull when the going gets tough. Or option up to the ultra-efficient and economical 2.8-litre CRD engine with 460 N.m of torque at just 2,000 rpm. When you head for the higher peaks, Cherokee works impressively to make sure you make it up and over.

The standard Hill Start Assist (HSA) will momentarily hold brake pressure as you climb, fighting vehicle rollback and eliminating the need for two-footed driving in many on- and off-road situations.

The Hill Descent Control (HDC) assists when Cherokee comes down the mountain and returns you to your world of paved roads and traffic signals. Active in 4LO when the HDC button is depressed, it mimics the mighty Wrangler Rubicon's 4LO crawl ratio using automatic braking, allowing the driver to smoothly descend hills in a slow and controlled manner.

Jeep® vehicles are designed to perform in a variety of off-road conditions identified by five performance categories.

ARTICULATION

The ability to keep tyres in contact with the ground, providing traction to climb over large obstacles.

TRACTION

The ability to transfer power to the road or trail along with the ability of the suspension to keep the wheels in contact with the terrain.

MANEUVERABILITY

The ability to navigate around obstacles that are tightly situated.

GROUND CLEARANCE

The ability to drive over large obstacles or logs in combination with approach/ departure/breakover angles.

WATER FORDING

The ability to cross a specific depth of water at a specific speed.⁽¹⁾

⁽¹⁾Do not attempt water fording unless depth is known to be less than 50 cm. Traversing water can cause damage that may not be covered by the new vehicle warranty. Always off-road responsibly in approved areas.

Urban sophistication.

Here's a classic opening to Jeep® Cherokee's latest edition: Your great expectations for exceptional sophistication and luxury will definitely be met. Cherokee's new interior landscape features available, plush executive leather trim, so soft and supple that it begs to be touched and admired, plus a list of comfort and convenience features that rivals vehicles in the luxury car class.

Cherokee Limited's standard premium leather-trimmed interior features detailed tailoring on the roomy centre console, front grab handle, and front door armrests. The second chapter of this story opens with a plethora of finely crafted details that contribute to Cherokee's epic story of interior luxury. For instance, the standard Automatic Temperature Control lets you preset cabin temperature, then the system automatically adjusts airflow and can even filter out air particles down to 10 microns in size, like pollen, mould spores and dust. Two drivers can preset radio station preferences plus seat and mirror positions with the available Jeep Memory System. The passenger seat offers power-

driven adjustments to allow for comfortable customisation.

Cherokee hands you the ability to control your cruising speed, radio functions and EVIC information by putting controls to these items on the available leather-wrapped steering wheel. Additional available niceties include GPS Navigation, Uconnect Phone⁽¹⁾, ParkSense® park assist system⁽²⁾, auto on/off headlamps, and a rain-sensing automatic wiper system that instantly deploys when rain drops hit your windshield. Look around Cherokee's cabin and you'll see storage bins sprinkled throughout — in the instrument panel, the console, the glove box, and the doors.

⁽¹⁾ See your dealer for a current list of compatible mobile phones and any limitations your phone may have.

⁽²⁾ Always check entire surroundings before reversing.

Jeep Cherokee Limited leather-trimmed interior shown in Dark Slate Grey.

Sound interior design.

Cherokee Limited's interior features a leather-trimmed centre console armrest, front grab handle, front door and parking brake boot. A reversible rear cargo tray helps keep your interior neat and clean. One side is carpeted and the other reveals a 63.5 mm deep washable tray.

Fearless friend.

Sport. Humans who tend to drive Jeep® 4WD vehicles are hardwired with instinctive urges to explore and uncover adventure both on and off the beaten track. The Jeep Cherokee Sport presents itself as a useful tool for such human activities. Case in point: We offer Cherokee Sport equipped with the Selec-Trac II® active 4WD system for full-time four-wheel drive capability and outfitted with the

standard and pleasantly beefy 151 kW 3.7-litre V6 engine with Electronic Throttle Control (ETC).

Selec-Trac II® gets you going with its low-range mode that multiplies the torque ratio for added control and power during slow-speed technical rock crawling.

Equip Sport with a towing pack, one of several Genuine Jeep Accessories that are perfectly tailored for Cherokee, and the toys can join the journey too. When properly equipped, Cherokee can tow up to 2,270 kg. Very satisfying, indeed. The stylish and nimble Jeep Cherokee is the perfect blend of comfort and capability you need for your next adventurous excursion.

Play room. Jeep® Cherokee Sport gives you plenty of interior room to roam and lots of places to store maps, torches, and other fun stuff. The centre console gives you two cup holders that can accommodate more than just one size of cup, extra storage in the lower bin, accommodating up to 13 DVD cases; the console's removable upper tray holds phones, PDAs, and the like.

Low-back reclining front bucket seats (with a standard fold-flat front-passenger seat) and 60/40 split-folding rear seats with four reclining positions (that lean back to a restful 33-degree angle and also fold flat forward) offer comfort combined with flat-out utility. And with the standard Stain Repel⁽¹⁾ interior fabric, you don't have to worry about spills and such. The fabric repels stains and odours to remain clean and fresh for years to come. After the fun, stow your gear in Cherokee's standard reversible cargo tray.

Jeep Cherokee Sport shown in Brilliant Black with optional towing equipment

⁽¹⁾ Not compatible with aftermarket fabric-protecting coatings

Bring it on.

Six tie-down loops in Cherokee's cargo area help hold items in place. Genuine Jeep® Accessories by Mopar add style and function. After the fun, stow your gear in Cherokee's standard reversible cargo tray. The washable side is designed to transport everything from dripping wet dogs to muddy sporting goods. Be serious with the other side. It's carpeted to look like you mean business. Properly secure all cargo.

Civilised freedom.

Limited. Cherokee Limited is dressed for success with bright accents, premium materials and luxury features. But, remarkable utility and capability are always on-hand when required.

Comfortably capable. You can follow your dreams over hill and down dale with the help of Cherokee's standard 3.7-litre V6 engine enhanced with Electronic Throttle Control (ETC). It is matched to the standard Selec-Trac II® for full-time 4WD action. This system gives you four-wheel drive capability "on demand," based on real-time driving conditions.

When facing a challenging uphill climb, rough terrain, or extremely poor traction surfaces, the transfer case includes a 4WD Low mode that puts you in charge of an added dose of capability. You'll also find standard Hill Start Assist (HSA) and Hill Descent Control (HDC) always at the ready for additional peace of mind.

Refreshingly refined. The Jeep® Cherokee Limited offers the discriminating adventurer a long list of standard features and a robust selection of luxurious options.

Chrome surrounds Limited's iconic seven-slot grille and shines from the bodyside moulding and standard roof-rack side rails. If you're a fan of soft, supple leather, you'll love Limited's interior that provides an executive level of comfort. The luxury doesn't stop at the sumptuous leather. You can enjoy the comforting warmth of heated front seats, with power adjustment. You've also got climate control air conditioning at your fingertips to ensure you get the temperature just right. Cherokee Limited will even adjust to the correct seating positions and radio settings for two drivers each time the unlock button is pressed on the remote keyless entry transmitter.

Once you're on the road, the standard automatic headlamps and rain-sensing automatic wiper system make driving a breeze no matter what the conditions. Nine premium ∞Infinity® speakers, a 368-watt amplifier and subwoofer provide a phenomenal listening experience. Combine this with an optional Uconnect™ Media Centre 731N navigation radio and you've got a world-class voice-activated navigation and communication centre with touch-screen capability at your beck and call.

Jeep Cherokee Limited shown in Brilliant Black

Big, bold, open-air Sky Slider.™

Step into a Jeep Cherokee equipped with the industry-exclusive Sky Slider™ full-length, fully retractable roof and you can command a world-class drive while simultaneously enjoying open-air experience like no other. The Sky Slider roof opens up to reveal a massive 838 x 1,524 mm window to let you see, unencumbered, straight into the upper atmosphere. The Sky Slider roof opens front to back exposing both rows of seating, and back to front revealing only the second row, or any position in between. The roof is integrated into the vehicle's body via a reinforced safety cage-like frame consisting of 10 lightweight aluminium crossbars that help maintain structural integrity and gives added protection. Factory installation ensures optimum fit, finish, and function. Jump into your Cherokee with its Sky Slider roof and feel free to have fun out there. Just don't forget to put on some sunscreen.

Safety first.

Head out in your new Jeep® Cherokee with confidence, knowing you and your passengers are outfitted for safety and security wherever you may go. Active Front-Seat Head Restraints automatically react and adjust to help protect front occupants during rear-impact collisions, a new and standard safety feature. A complete air bag⁽¹⁾ system includes side-curtain and advanced multi-stage driver and front-passenger air bags.

Cherokee's Enhanced Accident Response System (EARS) is constantly on watch, and in the event of an impact that causes air bag deployment, EARS shuts off the fuel supply, switches on the interior and hazard lights and unlocks the doors after the vehicle has stopped. Cherokee's Electronic Stability Control (ESC)⁽²⁾ integrates a host of systems that all work together for the greater good, including a four-wheel anti-lock brake system (ABS), All-speed Traction Control (ASTC), a Brake Assist system that automatically helps provide strong braking power in emergency situations, and Electronic Roll Mitigation (ERM) that can apply appropriate braking or throttle control when sharp steering actions and/or wheel lift is detected. Hill Start Assist (HSA) is standard and always

ready to help Cherokee reach peak performance.

The standard Security Alarm and Sentry Key® anti-theft engine immobiliser helps deter vandalism and break-ins by monitoring doors, ignition, and liftgate key cylinders while making it nearly impossible to successfully start the vehicle without an encoded key. The standard Tyre Pressure Monitoring System continuously checks the pressure in the tyre and will immediately notify the driver when levels fall below the minimum acceptable level.

⁽¹⁾ Always sit properly in the seat with the seat belt fastened. Always observe the passenger air bag indicator light to determine if the Occupant Classification System (OCS) is appropriate. Children 12 years and under should always be in the backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight. ⁽²⁾ No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

Sky-high tech.

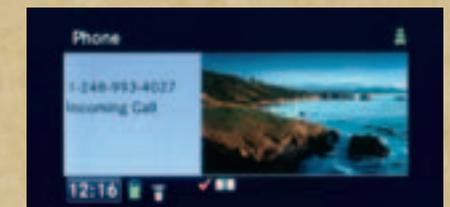

uconnect™ Introducing Uconnect™, the Jeep® brand's user-friendly approach to today's connected technology. From your family and friends, to music, movies or your travel destinations, Uconnect connects you to the things that matter most.

It's factory installed and at your beck and call to let you enter the sky-high world of on-demand communication and entertainment the moment you take the wheel. The 16.5 cm touch screen Uconnect Navigation Media Centre 731N provides entertainment, information and communication, all through a CD/DVD/HDD/NAV radio.

A 30GB hard drive allows you to store photos, playlists, and songs as well as rip, stash, organise, and shuffle thousands of digital music files from CDs or from the integrated USB port. All this as well as full mapping navigation.

The touch screen allows you to easily change radio stations and play digital audio files. Go high-tech with the included Uconnect Phone, an in-vehicle, voice-activated communication system that allows you to talk on your Bluetooth® compatible phone⁽¹⁾ virtually hands-free.

⁽¹⁾ See your dealer for a current list of compatible mobile phones and any limitations your phone may have.
