

**Jeep**

# Grand Cherokee

[jeep.com.au](http://jeep.com.au)

# Capable style.

From the moment Jeep® Grand Cherokee appeared on the world's stage, it transformed expectations and created an entirely new class of transportation. Today, Grand Cherokee continues to raise the bar with a long list of lavish standard features and an impressive catalogue of available luxuries. Whether you choose to take Grand Cherokee on-road or off, its capability and handling will prove to be world-class. You'll drive away in one of the strongest vehicles on earth, with standards and options that fully outfit your Grand Cherokee with every bell and whistle, including a premium leather-trimmed interior, and a Media Centre radio with GPS navigation combined with a Universal Customer Interface (UCI) that allows a full integration of iPod® controls. Grandeur on wheels with a performance that inspires and delights. A modern-day classic.

# Get dirty and have some **clean fun.**

Tackle a rock-laden mountaintop or cruise over city streets flooded from rain with complete confidence. Jeep® Grand Cherokee's 4WD systems and engines deliver, Quadra-Drive® II, with its front and rear Electronic Limited-Slip Differentials (ELSD), can help transfer 100 percent torque to any one wheel with traction.

Quadra-Trac II® offers All-speed Traction Control (ASTC) to help keep you on course. If wheel slippage is detected, up to 100 percent of the available torque can be routed to the axle with the most traction. Shift into low range for rock-crawling prowess.

The 3.0-litre V6 CRD engine with its Variable Geometry Turbocharger (VGT) produces maximum torque at just 1,600 rpm. When properly equipped, Grand Cherokee can tow up to 3,500 kg of fun.

The 6.1-litre SRT HEMI® V8 serves up a whopping 313 kW that can shoot the strong-hearted from 0-100 km/h in about five seconds. Only available on Grand Cherokee SRT8.

Grand Cherokee Laredo shown in Jeep Green

Jeep® vehicles are designed to perform in a variety of off-road conditions identified by five performance categories.

## **ARTICULATION**

The ability to keep tyres in contact with the ground, providing traction to climb over large obstacles.

## **TRACTION**

The ability to transfer power to the road or trail along with the ability of the suspension to keep the wheels in contact with the terrain.

## **MANEUVERABILITY**

The ability to navigate around obstacles that are tightly situated.

## **GROUND CLEARANCE**

The ability to drive over large obstacles or logs in combination with approach/ departure/breakover angles.

## **WATER FORDING<sup>(1)</sup>**

The ability to cross a specific depth of water at a specific speed.

<sup>(1)</sup>Do not attempt water fording unless depth is known to be less than 508 mm. Traversing water can cause damage that may not be covered by the new vehicle warranty. Always off-road responsibly in approved areas.

**Good looks that get you somewhere.**

Above: Jeep Grand Cherokee SRT8 leather-trimmed interior shown in Dark Slate Grey.

Far right: Jeep Grand Cherokee SRT8 shown in Brilliant Black Crystal Pearl.

# King of the thrill.

**SRT8.** Hold on tight. Settle into the luxurious heated leather interior of SRT8 to command a thrilling 313 kW 6.1-litre SRT HEMI® V8 engine with 569 N.m of torque and a top speed of over 240 km/h.

This beast can launch you from 0-100 km/h in about five seconds, on either wet or dry roads. That's fast enough to earn a standing ovation from any crowd.

Only the beefed-up SRT 4WD system with its active full-time transfer case and All-speed Traction Control (ASTC) has the guts to handle this kind of action. All that tractive power is matched to massive 20-inch polished alloy wheels shod in 255/45ZR20 front and 285/40ZR20 rear high-performance tyres.

The incredible velocity of SRT8 is countered by its four-piston Brembo® Performance brake calipers. They grip massive rotors measuring 360mm front and 350mm rear, cooled by integrated, fully functional brake ventilation ducts. Each component works together to provide optimal stopping power.

Even the cabin is built for speed and style. Race-inspired leather-trimmed seating is finished with an embroidered SRT logo and features additional

side bolstering to keep the driver and passenger firmly planted when cornering.

A refined aluminium finish on the instrument panel, shifter bezel and floor console combine with graphite accents to complete the SRT8's sporty look.

Twin chrome 100mm exhaust tips over a genuine dual exhaust system with 70mm diameter pipes speak volumes about the legendary power that is the very essence of the one and only Grand Cherokee SRT8.

# The practicalities of refined value.

**LAREDO.** Jeep® Grand Cherokee Laredo comes equipped with the Quadra-Trac II® full-time 4WD system and combines all the capabilities of authentic Jeep brand DNA with Grand Cherokee's most valued finery.

The standard 3.0-litre CRD V6 turbo diesel engine provides efficient and reliable performance, utilising a highly pressurised fuel rail connected to piezo injectors that help fuel burn more completely. A Variable Geometry Turbocharger helps reduce fuel consumption, exhaust emissions and engine noise.

The standard Electronic Stability Control (ESC)<sup>(1)</sup> helps maintain vehicle control during challenging driving situations, plus a Tyre Pressure Monitoring System provides immediate notification of low tyre pressure.

An array of storage bins and pockets help keep things tidy, along with the standard reversible rear cargo tray — one side is carpeted and the other is a waterproof cargo insert ready for what ever you can throw at it.

A generous cargo capacity of 1,554-litres with second row seats folded holds plenty of gear.

Jeep Grand Cherokee Laredo is packed with all the features to make every day more comfortable and convenient. The leather-wrapped steering wheel features buttons to operate the MP3-compatible audio system remotely, plus access to the standard cruise control. Some of the niceties include dual-zone climate control air-conditioning, power driver and front passenger seats, remote central locking with alarm, power windows and mirrors. Laredo also comes standard with Uconnect Phone<sup>(2)</sup>. This voice-activated communication system allows you to talk on your Bluetooth® compatible phone virtually hands-free.

Properly secure all cargo. <sup>(1)</sup>No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. <sup>(2)</sup>See your dealer for a current list of compatible mobile phones and any limitations your phone may have.

# Shiny objects attract attention.

**LIMITED.** There's something about shiny objects that attracts attention. When it comes to Jeep® Grand Cherokee Limited, plenty of attention will be bestowed. The exterior gleams with a spectacular finish, including 17-inch alloy wheels, chrome exterior accents and chrome roof rack side rails.

Limited also boasts a standard 3.0-litre CRD turbo diesel engine, an efficient performer that utilises a highly pressurised fuel rail connected to piezo injectors that help fuel burn more completely.

The elegant interior includes chic Olive Ash Burl trim on the centre console and doors which swirls together with subtle tones, resulting in a powerful statement of beauty. The beauty is more than skin deep, as Limited also offers ParkView™ reversing camera, ParkSense® front and rear parking sensors<sup>(1)</sup> and Uconnect™ Media Center 435 which provides entertainment, information and communication, at the touch of a button. A 30GB hard drive lets you store photos, playlists, and songs as well as rip, stash, organise, and shuffle thousands of digital music files from CDs or via the integrated USB port. A 16.5 cm touch screen

LCD monitor lets you move seamlessly through the Uconnect functions.

Adjust the tilt/telescopic leather-wrapped steering wheel for customised comfort, then enjoy the constant-grip safety of steering wheel-mounted controls to navigate the Electronic Vehicle Information Centre (EVIC), cruise control and multimedia system.

The available sunroof with convenient one-touch express operation offers an instant breath of fresh air, along with a warm dose of sunshine. Or enjoy the standard dual-zone climate control and create a personalised interior temperature for you and your passengers. The standard Jeep Memory System will recall the ideal seating position, favourite radio stations and mirror position for two drivers at the touch of a button.

The standard Royale leather-trimmed seating - with two heat settings for the driver and front passenger - completes your tailored luxury environment for enjoying adventures that only a Jeep can deliver.

<sup>(1)</sup> Always check entire surroundings before reversing.

# Air of confidence.

Jeep® Grand Cherokee's robust Electronic Stability Control (ESC)<sup>(1)</sup> includes Electronic Roll Mitigation (ERM), anti-lock brake system (ABS) and Brake Assist, All-speed Traction Control (ASTC), and standard Trailer Sway Control (TSC). By alternating brake pressure, TSC helps reduce trailer sway and improves handling in adverse towing conditions caused by crosswinds and traffic. When the network of ESC sensors detect that you're veering off your intended path, this system instantaneously takes action to help keep you moving forward.

Hill Start Assist (HSA) and Hill Descent Control (HDC) are standard features on the Laredo and Limited employing automatic braking to help get you up and down the mountain. Choose the available ParkView™ reversing camera<sup>(2)</sup>, to assist in the detection of hidden obstacles during reversing manoeuvres. High Intensity

## Inflation issues solved.

Grand Cherokee's standard Tyre Pressure Monitoring Display System gets your attention by displaying the tyre pressure of each individual wheel. This helps identify when additional air is needed to minimise rolling resistance and maximise fuel economy. In addition, a 'LOW TYRE' message and audible alert notify you if any tyre loses significant pressure. Proper tyre inflation is an important part of on- and off-road safety.

Discharge (HID) headlamps with auto-levelling are standard on STR8 to improve nighttime visibility by casting a beam of light three times brighter down the road. Standard side-curtain and advanced multistage front air bags<sup>(3)</sup> work in tandem to provide protection. Grand Cherokee's available ParkSense® front and rear parking sensors<sup>(2)</sup> help make sure you park safely and securely. Ultrasonic sound waves give an audible and visual warning when driving in reverse at speeds below 15 km/h. The available Rain-Sensing Automatic Wiper System goes into action the moment raindrops hit the windshield.

<sup>(1)</sup>No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. <sup>(2)</sup>Always check entire surroundings before reversing. <sup>(3)</sup>Always sit properly in the seat with the seat belt fastened. Always observe the passenger air bag indicator light to determine if the Occupant Classification System (OCS) is appropriate. Children under 12 years and under should always be in the backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight.

# Sky-high tech.

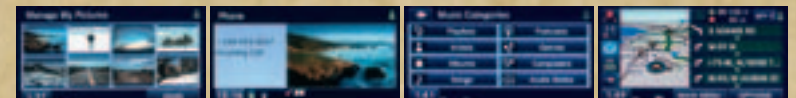

Introducing Uconnect™, the Jeep® brand's greatest, high-tech in-vehicle multimedia system. This collection of integrated digital systems lets you bundle communication, entertainment and visual capabilities into your own in-vehicle information hub.

The available Uconnect Media Center 435 provides entertainment, information, and communication through an AM/FM/CD/DVD/30GB HDD multimedia system. The 16.5 cm touch screen and 30GB hard drive allows you to store photos, playlists, and songs, as well as rip, stash, organise, and shuffle thousands of digital music files from CDs or via the integrated USB port. The touch screen allows you to easily change radio stations and play digital audio files.

Or, step up to Uconnect Media Centre 731N, which includes all the same great features, and adds the convenience of full mapping navigation. The world-renowned six-speaker Boston Acoustics® premium speaker system is also included with Uconnect Media Centre 731N.

The included Uconnect Phone<sup>(1)</sup> provides hands-free, voice-activated capability with your Bluetooth® compatible phone virtually hands-free.

<sup>(1)</sup>See your dealer for a current list of compatible mobile phones and any limitations your phone may have
