

Jeep  
Patriot

# Adventure begins.

It is an impressive vehicle with capabilities that extend well beyond its frame. This is the Jeep® Patriot, and like any Jeep vehicle, it takes its rugged prowess as seriously as its ability to comfortably accommodate in the city. Equipped with brilliant standard features, Patriot delivers a rare blend of what is expected from a legendary Jeep vehicle with efficiencies that will surprise you. Welcome to Jeep Patriot.

# From paved roads to **beaten paths.**

When it comes to capability in a compact package, Jeep® Patriot is unmatched.

Standard Electronic Stability Control (ESC)<sup>(1)</sup> includes All-speed Traction Control (ASTC) and Electronic Roll Mitigation (ERM). These life-saving computer-controlled systems work in seamless harmony to allow Patriot's driveline to react instantly to ever-changing conditions and help ensure that control is maintained in the most challenging circumstances.

Go the extra distance thanks to the Jeep Freedom Drive™ active full-time 4WD system with LOCK mode. When the system's 4WD LOCK handle is engaged, torque is sent equally to the front and rear axles for improved low-speed traction and control. Outfitted with the standard Freedom Drive 4WD system, there is little doubt that Patriot is born from a long line of Jeep vehicles.

And to help you reach your peak destinations, Patriot's standard Hill Start Assist<sup>(2)</sup> employs automatic braking to help get you safely up each mountain or over rolling city streets. Independent front and rear suspension contributes to every-day comfort and precise handling whether you're on the road or on the track.

The available Constantly Variable Transmission (CVT) with Auto Stick features an infinitely variable number of gear ratios that transmit a constant stream of quiet power for both optimum fuel economy and highway-passing muscle when needed. The Auto Stick manual shift mode allows the driver to maximise engine braking, control upshifts and downshifts, and add to overall driving performance.

<sup>(1)</sup> No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt. <sup>(2)</sup> Only available with manual transmission.

## **A smooth ride makes a big difference.**

A four-wheel independent European suspension, with MacPherson struts up front and a multilink system in the rear works to ensure that contact with the road is constantly kept. After all, Patriot is a Jeep vehicle and, like the entire family, it takes the ability to acclimate to most conditions it encounters as a birthright.

# Its green. Packed with mean.

The Jeep® Patriot never backs down from a challenge. Its proven combination of capability and economy combines with the legendary strength that Jeep vehicles are known for. With Patriot, you've got a green machine that's packed with efficiency for adventuring far and wide.

The standard lightweight aluminium 2.4-litre petrol engine provides superb performance, but also employs a multitude of technologies to ensure that Patriot provides great economy and low overall emissions.

This engine combines dual Variable Valve Timing (VVT) and intake manifold flow control valves with dual overhead camshafts (DOHC), four valves per cylinder and high compression to produce more power, better fuel economy and smoother, quieter operation. Computer control helps ensure that the proper amount of power is delivered quickly and seamlessly to meet the demands of changing driving conditions.

When it comes to balancing power and fuel economy, Jeep takes this capability as seriously as the traditional traits one expects from a legendary Jeep vehicle. With 125 kW and 220 N.m on tap, Patriot delivers the performance you need without the penalty at the pump. In fact, with fuel economy as low as 6.7L per 100 kilometres,<sup>(1)</sup> Patriot can travel over 700 km between stops during highway touring.

The available Constantly Variable Transmission (CVT) is also a great choice for those that want a more relaxed driving experience. A CVT is free of the constraints of traditional fixed-ratio automatic transmissions. It can choose the best ratio for any driving condition, thereby operating at optimum efficiency and providing improved fuel economy and performance.

There is little doubt that Patriot is born from a long line of Jeep vehicles. The standard Freedom Drive™ 4WD system provides 2WD operation for improved fuel economy in every-day driving conditions, yet will instantly direct torque to all four wheels when the going gets tough - whether it's from a heavy storm on the way home or off the beaten

track on weekends. The fact that Patriot's fully independent suspension and finely-tuned steering absorbs the road's imperfections with such nonchalance, it may mask the system's true capabilities.

Patriot always delivers when it counts, with superb economy matched with the legendary Jeep sure-footed capability.

<sup>(1)</sup> 2.4L manual, extra-urban cycle of Australian Design Rule 81/02.

# High standards.

**Sport.** Jeep® Patriot Sport provides a compelling stepping stone to the land of Jeep brand capability with incredible value and a bevy of standard features that will fulfil any enthusiast's needs. Safety. Capability. Style. Comfort. The Jeep Patriot has it covered.

Challenging conditions will be much less intimidating thanks to the standard Freedom Drive™ active 4WD system, Electronic Stability Control (ESC)<sup>(1)</sup>, Anti-lock Brake System (ABS), Electronic Roll Mitigation (ERM) and All-speed Traction Control (ASTC). In the unlikely event of an accident, Patriot's standard advanced crumple zones, dual front and side-curtain air bags and other safety systems will help keep you safe and secure.

Jeep takes the challenges of the city as seriously as it does tackling the trail. Patriot provides a standard five-speed manual transmission for smooth shifting and ultimate control. Choose the Constantly Variable Transmission (CVT) with Auto Stick manual shift mode and you can control the system's upshift and downshift to expertly cover challenging urban conditions.

Standard 17" alloy wheels and striking colours perfectly complement Patriot's unmistakable Jeep styling, with our famous seven-slot grille, trapezoidal wheel arches and round headlamps.

The newly-designed interior offers roomy seating for five that will meet the demands of today's varied lifestyles thanks to our patented Stain Repel<sup>(2)</sup> seat fabric, the stain- and odour-resistant premium cloth upholstery for the ultimate in durability. The fold-flat front-passenger seat creates more cargo space, allowing for the longest of items to be stowed easily within Patriot's interior. When cargo isn't a priority, the folded-down seatback serves as a very practical tabletop.

Creature comforts aren't ignored either. Standard equipment includes air-conditioning, remote keyless entry, power windows and mirrors and much more. For example, the standard Media Centre 135 CD/DVD/MP3 Radio lets you hook up your MP3 player to an input jack located in the faceplate.

Step in to the Jeep Patriot Sport and you'll always get more than you bargained for.

<sup>(1)</sup> No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

<sup>(2)</sup> Not compatible with aftermarket fabric-protecting coatings.

## Rearrange your world.

Patriot's configurable interior lets you arrange things to your liking. The standard 60/40 fold-flat rear seats offer a recline feature for up to 12 degrees of added rear seat relaxation. When you heed the call to nature, be sure to properly secure all cargo.

# Substance meets style.

**Limited.** Jeep® Patriot Limited attracts attention without even trying, thanks to 17-inch alloy wheels, front fog lamps, available sunroof and a stylish touch of silver on its roof rack side rails and bodyside mouldings.

Deep-tint sunscreen glass on the rear door window, cargo area and liftgate not only adds to the prestigious appearance, but also provides privacy, security and welcome shade from the glare of the sun.

With the Jeep Patriot Limited, creature comforts are raised to a very appealing level. The re-designed interior is significantly enhanced and offers premium leather trim with heated front seats, and a leather-wrapped steering wheel with audio and cruise controls.

The feature-packed Media Centre 230 6CD/DVD/MP3 radio with Voice Command<sup>(1)</sup> and Audio Jack is standard on Limited. This radio can play MP3-encoded discs or you can plug in your portable device with the included audio jack. A standard 12-volt socket makes sure you're always powered on the go.

For those with even more demanding tastes, you can opt for the Technology Group that provides full-screen GPS navigation and premium audio features. The Media Centre 731N is command central, offering a 16.5 cm touchscreen with GPS Navigation and a 30GB hard disc drive that allows you to store thousands of songs, select playlists and display photos.

Other features include Uconnect Phone<sup>(2)</sup> and iPod® Control. Uconnect Phone is our hands-free communication system that works with your compatible Bluetooth mobile phone and iPod Control allows you to operate your iPod through the Media Centre screen and controls.

A system this sophisticated provides some serious capability, so we've matched it to MusicGate - a 458-watt nine-speaker Boston Acoustics premium audio system with flip-down liftgate speakers and subwoofer. Boston Acoustics are renowned the world over for their rich true-to-life sound reproduction, so MusicGate will always impress, whether weekend cruising or rocking your next outdoor gathering.

Take it to the next level in Jeep Patriot Limited.

<sup>(1)</sup> Requires Uconnect Phone. <sup>(2)</sup> See your dealer for a current list of compatible mobile phones and any limitations your phone may have.

## Sound off, everywhere.

Add value and fun by optioning Patriot's Technology Group. It's a suite of integrated digital entertainment, information, and communication systems that include a 9-speaker Premium Sound System with unique flip-down liftgate speakers.

# Play it safe.

Jeep® Patriot's air bag<sup>(1)</sup> system includes side-curtain with roll sensing technology and advanced multistage driver and front-passenger air bags. The standard Electronic Stability Control (ESC)<sup>(2)</sup> integrates a host of systems that include a four-wheel anti-lock brake system (ABS), All-Speed Traction Control (ASTC), and a Brake Assist system that automatically helps provide stronger braking power pressure in emergency situations. It also incorporates Electronic Roll Mitigation (ERM) that can apply appropriate braking and reduce engine power when sharp steering actions and/or wheel lift is detected. Hill Start Assist (HSA) is a standard feature in manual transmission equipped models that employs automatic braking to help get you safely started up the mountain.

In the event of an impact that causes air bag<sup>(1)</sup> deployment, Patriot immediately institutes safety measures. The Enhanced Accident Response System (EARS) switches on the interior lamps and the exterior hazard lamps, and unlocks the doors after the vehicle has stopped. And to help prevent loss, a standard Sentry Key® Anti-theft Engine Immobiliser makes it virtually impossible to drive without a valid key. The standard security alarm system helps keep Patriot loyal to only you.

<sup>(1)</sup>Always sit properly in the seat with the seat belt fastened. Always observe the passenger air bag indicator light to determine if the Occupant Classification System (OCS) is appropriate. Children 12 years and under should always be in the backseat correctly using an infant or child restraint system or the seat belt positioned correctly for the child's age and weight. <sup>(2)</sup>No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. Performance is limited by available traction, which snow, ice and other conditions can affect. When the ESC warning lamp in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behavior to prevailing road conditions. Always drive carefully, consistent with conditions. Always wear your seat belt.

## Beat inflation issues.

The available Tyre Pressure Monitoring Display (shown) provides notification of high or low pressure on individual tyres via an instrument panel readout (depending on system).

# Sky-high tech.

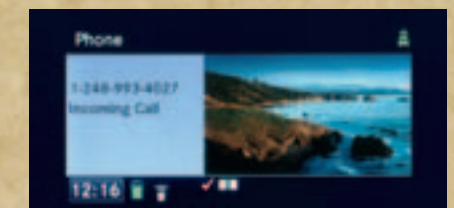

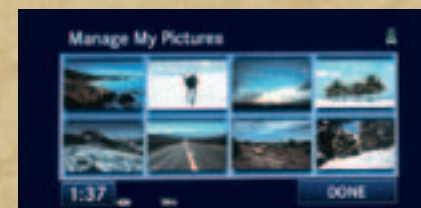

**uconnect™** Introducing Uconnect™, the Jeep® brand's user-friendly approach to today's connected technology. From your family and friends, to music, movies or your travel destinations, Uconnect connects you to the things that matter most.

It's factory installed and at your beck and call to let you enter the sky-high world of on-demand communication and entertainment the moment you take the wheel. The Media Centre 731N provides entertainment, navigation and communication, all through a CD/DVD/HDD/NAV radio.

A 30GB hard drive allows you to store photos, playlists, and songs as well as rip, stash, organise, and shuffle thousands of digital music files from CDs, or from the integrated USB port. All this as well as full mapping navigation.

The 16.5 cm touch screen allows you to easily change radio stations and play digital audio files. Go high-tech with the included Uconnect Phone, an in-vehicle, voice-activated communication system that allows you to talk on your Bluetooth® compatible phone<sup>(1)</sup> virtually hands-free.

<sup>(1)</sup> See your dealer for a current list of compatible mobile phones and any limitations your phone may have.

## POWERTRAIN

Engine	2.4L DOHC 16V dual VVT I-4
Displacement (cc)	2,360
Power (kW @ rpm)	125 @ 6,000
Torque (N.m @ rpm)	220 @ 4,500
Bore x Stroke (mm)	88 x 97
Compression Ratio	10.5:1
Alternator	120-amp
Battery	525-amp maintenance free
Service Interval, Primary (km)	12,000
Fuel Injection System	Sequential multipoint electronic fuel injection
Fuel Economy* - Combined, Urban, Extra-urban (L/100 km)	8.4, 11.4, 6.7

\* 5-Speed manual transmission

## Transmission

5-speed manual with overdrive, ratio range (:1) 3.77 - 0.72 (1st - 5th) overall top gear ratio: 2.97	Std
Constantly Variable Transmission (CVT), ratio range (:1) 2.35 - 0.39, overall top gear ratio: 2.41	Avail

## DRIVE SYSTEM

Freedom Drive™ Active full-time four-wheel drive (4WD) with selectable LOCK feature

## CAPACITIES/WEIGHTS/TOWING (kg unless otherwise specified)

Fuel Tank (L)	51.1
Cooling System (L)	6.8
Base Kerb Weight	
5-speed manual	1,490-1,535
CVT	1,525-1,570
Gross Vehicle Mass (GVM)	2,010
Maximum Loaded Trailer Weight	1,500
Tongue Load Limit	150

## BODY/SUSPENSION/STEERING

### Body Design

Unitised steel construction with a structural safety cage utilising advanced hot-stamped, tailor-rolled, dual-phase steel technologies and advanced joint design for added strength, reduced weight and improved Noise Vibration & Harshness (NVH) levels.

### Suspension

**Front:** Independent with MacPherson struts, coil springs over gas-charged shocks and stabiliser bar Std  
**Rear:** Independent multi-link with coil springs, gas-charged shocks and link-type stabiliser bar Std

### Steering

**Rack and Pinion with hydraulic power assist** Std  
**Turns** (lock-to-lock) 2.9  
**Turning Diameter** (Kerb-to-Kerb) (m) 10.8

## BRAKE SYSTEMS

### Front/Rear

Four-wheel disc, ABS, hydraulic, power-assisted, 294mm vented front/262mm solid rear discs

### Electronic Stability Control (ESC)<sup>(1)</sup>

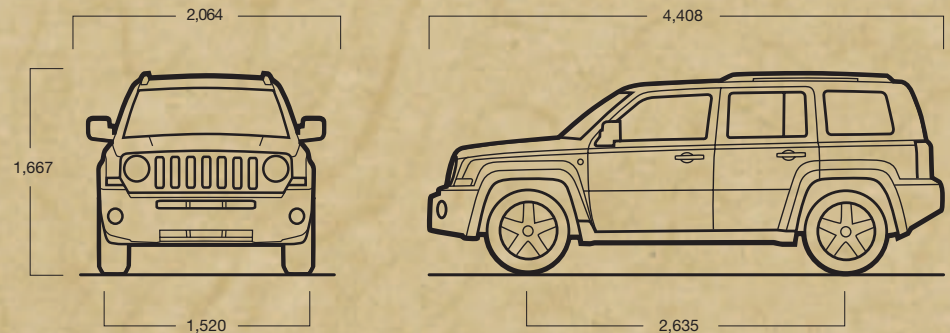

Four-channel, four-wheel anti-lock brakes with active wheel-speed, vehicle-speed, steering-wheel angle, yaw-rate, and lateral-acceleration sensors, vehicle stability management with two-stage activation switch, All-speed Traction Control (ASTC), Brake Assist, Electronic Roll Mitigation (ERM) and Electronic Brake Distribution (EBD)

## INTERIOR DIMENSIONS (mm unless otherwise specified)

Head Room, (without sunroof) front/rear	1,040/1,014
Leg Room, front/rear	1,032/1,000
Shoulder Room, front/rear	1,385/1,372
Hip Room, front/rear	1,329/1,295
Cargo Volume (L)	
rear seat up, to headliner/rear seat down, to headliner	536/1,357
Seating Capacity	5 Adults

## EXTERIOR DIMENSIONS (mm unless otherwise specified)

Wheelbase	2,635
Overall Length	4,408
Overhang, front/rear	881/893
Overall Width (including mirrors)	2,064
Track, front/rear	1,520/1,520
Overall Height (including roof rails)	1,667
Running Ground Clearance (at Kerb weight)	201
Approach Angle/Departure Angle (degrees)	22.3/34.0
Breakover Angle (degrees)	21.4

<sup>(1)</sup> No system, no matter how sophisticated, can repeal the laws of physics or overcome careless driving actions. When the ESC warning light in the speedometer flashes, the driver needs to use less throttle and adapt speed and driving behaviour to prevailing road conditions. Always drive carefully, consistent with conditions.
