Service Procedure

NOTE

Before conducting this procedure, verify that the vehicle is included in the attached VIN list.

If not, no further procedure is required.

Fuel Feed Hose Replacement

1. Remove the engine cover and remove the mounting bolt (A) of the fuel feed hose.

Tightening Torque :

4.9 ~ 5.9 Nm (0.5 ~ 0.6 kgf.m, 3.6 ~ 4.3 lb-ft)

NOTE

Re-use the bracket and bolt (A).

2. Disconnect the fuel feed hose adapter (B) by pressing the locking hooks of the quick-connector.

NOTE

When disconnecting the fuel feed hose adapter (B), place a shop towel under the adapter.

3. Unclip the fixing clip (C) and disconnect the fuel feed hose.

NOTE

When disconnecting the fuel feed hose, place a shop towel under the hose.

4. Replace the affected fuel feed hose with a new one and install all the removed parts in the reverse order of removal.

CAUTION

After completing the above Service Procedure, check if any fuel from the fuel line connections leaks or not.
