

# RANGE ROVER EVOQUE

2012

The all-new Range Rover Evoque. A Range Rover with an altogether different spirit. The most exciting vehicle in a generation. Bold and sophisticated in design. With clever technology that's innovative, relevant and always intuitive to use. Nothing else looks like it, feels like it, or drives like it. In fact, Range Rover Evoque is a quantum leap in the evolution of Range Rover.

## Design

The all-new Range Rover Evoque. Design that is inspired by the vibrancy and energy that defines the greatest cities on earth. A spirit that belongs to a new generation. Bold and uncompromising. Unique. Original. With an attitude that's got whatever it takes. The future transformed into stunning reality.

Unashamedly on-road with an all-new chassis, Range Rover Evoque provides an engaging blend of dynamic and sporty handling with impressive refinement. The lightweight, compact footprint of the vehicle and the low centre of gravity facilitate both quick responses and extraordinary agility. And with the availability of optional Adaptive Dynamics with advanced MagneRide™ dampers there is an optimum balance between confident, nimble handling and a supple, controlled ride.

Range Rover Evoque masters all surfaces and all weathers, using legendary Land Rover all-terrain technologies. It is smaller, lighter – the most efficient Range Rover... ever. A true Range Rover in compact form, a new class of SUV.

Available in two distinct body styles. Range Rover Evoque and Range Rover Evoque Coupé. Bold, assertive design that is also available in three distinct derivatives; Pure, Prestige and Dynamic – each one offering a tempting array of choices and technology.

## Range Rover Evoque

The five-door version, with its sleek, striking design and a more practical profile to suit specific lifestyle needs.

## Range Rover Evoque Coupé

The compact premium crossover, with its breathtaking contemporary design. A bold, new interpretation of classic Range Rover design cues with a dynamic profile and powerful stance.

## Exterior design

Utterly contemporary, with a sporty, dynamic profile: Range Rover Evoque creates a new class it can call its own. It offers a new interpretation of classic Range Rover design cues including the signature clamshell bonnet, the floating roof and the prepared-for-anything 'wheel at each corner' stance. There's a new, dramatic rising beltline – a muscular shoulder runs the length of the vehicle – and a unique, distinctly athletic taper to the roofline which is emphasised by the black pillars. Range Rover Evoque always makes an entrance. It is unmistakably Range Rover

in its confidence with the bold horizontal graphic that is created by the perforated two-bar grille and distinctive headlamps.

Superbly designed. Carefully created by Range Rover designers to give more opportunity for individual expression and to make every journey more personal. It is the true Range Rover experience on a compact scale. The striking exterior design conveys an immediate sense of luxury with its precision build quality and

the use of eye-catching metallic finishers or sophisticated details such as the vents on the bonnet\* and at the side of the vehicle, as well as the jewel-like characteristics of the front and rear lamps with their LED signature lighting\*\* and the tapering blade indicator clusters.

Range Rover Evoque's advanced lighting technology achieves outstanding performance as well as providing some of the vehicle's most striking signature

design elements. The innovative LED lighting systems are used to create the unique graphics of the front daytime running lights and complex 3D 'petal' design in the rear lamps. Night-time driving is also enhanced with the optional availability of adaptive Xenon headlamps. These optional headlamps have an adaptive feature to provide added illumination in tight bends and can be upgraded with Automatic High Beam Assist which detects light from oncoming traffic and switches automatically between high and dipped beams as appropriate.

\*Range Rover Evoque Coupé only  
\*\*Certain models - fitted with Xenon headlamps

# Pure

# Prestige

The purest expression of the Range Rover Evoque design form and intent.

The ultimate in Range Rover Evoque luxury with an exterior that offers excitement and an interior that is sheer indulgence.

# Dynamic

The boldest expression of Range Rover Evoque with sports interior themes and daring gloss black detailing.

## Sports command driving position

Range Rover Evoque introduces the new Sports Command Driving Position which offers a new take on the feeling of control and command that is an integral feature on every Range Rover. The driver sits lower, 'in' the vehicle, cocooned by the interior with all important information clearly visible and all controls easy to reach. The result is a drive that is sportier than ever while retaining the legendary view of the road ahead and the surrounding environment.

## Luxury finishes

The same ethos of luxury, quality and attention to detail that goes into every other, larger Range Rover. The same ethos is behind the materials. The fine leathers. The authentic metal and real wood finishers and innovative recycled materials. Whichever Range Rover Evoque you choose, it's a true Range Rover.

Depending on your choice of Range Rover Evoque model, there are two grades of high quality leather available. Some models even feature Oxford leather with its beautifully soft, high-grade hides which have been specially selected for their tactility and appearance. The finest twin-needle stitching also features on Range Rover Evoque. From its length and direction, to its colour and the

excellence of the thread and even the size and shape of the needle: it all guarantees the highest quality finish. The luxury in Range Rover Evoque also extends to the rear accommodation which offers generous legroom and provides a surprisingly spacious environment.

# Features

Even as the driver activates the remote key fob to unlock Range Rover Evoque, the vehicle stirs, illuminating puddle lamps that project the unique 'Range Rover' signature graphic onto the ground.\* Once inside the vehicle, start up is a moment of pure theatre. The transmission's Drive Select rotary shifter\* purposefully rises from the centre console to 'greet' the driver. The needles on the twin dials dramatically sweep across the face of the instrument panel. Living with Range Rover Evoque is rewarding, memorable and exciting.

\*Automatic transmissions only

# Lighting

Range Rover Evoque can be enhanced with ambient interior LED mood lighting. This can be configured to suit personal tastes with a choice of five colours and a variety of brightness settings. To add a real sense of occasion; automatic colour changes are activated when the driver chooses Dynamic Program on Terrain Response®, changing the ambient lighting to red.\*

\*Only available with Adaptive Dynamics

## Panoramic glass roof

There is also the choice of an optional full-size, fixed panoramic glass sunroof, cleverly engineered to maximise its length and width to create a sensation of space and light, as well as providing uninterrupted views of the surrounding environment. Importantly the toughened glass has a dark tint to protect occupants and the interior from the sun's rays. A full-sized interior blind is also provided for those who may prefer a more private experience.

## Lightweight materials

Starting at just 1595kg and using a range of advanced lightweight materials, Range Rover Evoque is the lightest Range Rover ever. There are key weight-saving materials throughout the vehicle, including an aluminium bonnet and roof and a magnesium cross car beam. The front fenders and tailgate assembly are constructed from composite materials. Even the thickness of the acoustically laminated windscreen is reduced to save weight and improve fuel efficiency, performance and handling. The interior materials have been independently tested by a leading international consultancy to help ensure that all occupants enjoy an allergy-free environment. This helps reduce potential allergenic symptoms for people who suffer from allergies and for those with sensitive skin.

## 2.0 litre Si4 petrol engine

The Si4 petrol engine is a 2.0 litre engine in a lightweight all-aluminium unit with the latest direct-injection technology, advanced turbocharging and twin independent variable valve timing to help lower fuel consumption and CO<sub>2</sub> emissions by up to 20 percent compared with traditional larger capacity engines delivering equivalent performances. The engine is fitted with a 6-speed automatic transmission that has been engineered to improve fuel economy and that features Drive Select, an advanced rotary gearshift with steering wheel mounted paddle controls. It also delivers a rich, powerful engine sound during strong acceleration and features a unique exhaust manifold for quicker warm-up and lower emissions, a low friction design and a state-of-the-art electronic management system. This includes Smart Regenerative Charging, which prioritises the charging of the battery when the vehicle is decelerating to capture wasted kinetic energy and reduce fuel consumption.

## TD4 and SD4 turbo diesel engines

The latest 2.2 litre turbo diesel, available in two forms TD4 (110kW) and SD4 (140kW), delivers superb torque, responsive performance and impressive refinement. The engines provide power on demand, a very broad torque curve and can be specified with either 6-speed automatic or 6-speed manual transmissions. Diesel vehicles with the manual transmission feature an intelligent Stop/Start system to reduce the fuel consumption of these engines by a further 8 percent.

129  
g/km

## eD4 diesel engine

The 2.2 litre turbo diesel is also available as an eD4 (110kW) 2WD version which shares the TD4 and SD4 characteristics yet delivers CO<sub>2</sub> emissions of 129g/km on Range Rover Evoque Coupé and 133g/km on Range Rover Evoque.

All diesel engines also feature Smart Regenerative Charging, which charges the battery when it is most economical to do so.

# 1000 TIMES PER SECOND

## On-road dynamics

With its lightweight and more compact footprint, Range Rover Evoque offers the enthusiast driver quicker responses and greater agility. Optional on Prestige and Dynamic models, Adaptive Dynamics with advanced MagneRide™ monitors vehicle movements at least 1000 times per second, reacting to driver or road inputs instantaneously to give greater control and minimise body roll, providing a balanced, flat ride. The system will even sense off-road conditions and optimise damping accordingly.

Range Rover Evoque features the latest in power assisted steering technology. EPAS (Electric Power Assisted Steering) delivers accurate, consistent steering and agile cornering. Power assistance is speed-sensitive for lightness and responsiveness at low speeds and increased firmness at higher speeds. When compared with a conventional power steering system, EPAS is more energy efficient and can reduce fuel consumption as well as CO<sub>2</sub> emissions by up to 3 percent.

DYNAMIC PROGRAM

GENERAL DRIVING

GRASS/GRAVEL/SNOW

MUD & RUTS

SAND

All surface

Like every Range Rover vehicle, Range Rover Evoque optimises performance and capability in all on and off-road conditions. It does this by employing a suite of innovative technologies including Terrain Response®,\* which adapts Range Rover Evoque's engine, transmission and electronic systems to maximise drivability, comfort and traction.

There are four Terrain Response® settings: General Driving, Grass/Gravel/Snow, Mud & Ruts and Sand. A fifth Dynamic setting is added when Adaptive Dynamics is specified.

\*Not available with 2WD eD4

-  GENERAL DRIVING
-  GRASS/GRAVEL/SNOW
-  MUD & RUTS
-  SAND

## All weather

Other cutting-edge technologies include the Land Rover patented Hill Descent Control (HDC)\* which assists with controlled descents of difficult slopes by maintaining a constant speed and applying braking separately to each wheel. Gradient Release Control (GRC)\* which is designed to prevent the vehicle 'running away' on a steep incline when the driver inadvertently releases the brake and Hill Start Assist which is designed to prevent roll back after a hill start.

There is also Dynamic Stability Control (DSC). Designed to correct over- and under-steer, DSC interacts with the engine and brakes to help maintain stability. Electronic Traction Control (ETC) senses when wheel slip is occurring and uses the braking system to minimise wheel spin. Roll Stability Control (RSC) detects critical levels of roll and applies braking to increase the turn radius to help reduce the likelihood of a rollover.

\*Not available with 2WD eD4

-  GENERAL DRIVING
-  GRASS/GRAVEL/SNOW
-  MUD & RUTS
-  SAND

## Audio

Range Rover Evoque is packed with clever, relevant technology including state-of-the-art connectivity. This includes Bluetooth® for both hands free connection, with a compatible mobile phone, to the vehicle's in-built phone system and audio streaming for the enjoyment of personal music from a portable Bluetooth device via the audio system. Essential connectivity for iPod®, MP3 and USB memory stick is also provided via direct inputs.

All audio options on Range Rover Evoque achieve the highest possible sound quality with a total of three In-Car Entertainment Systems available. They offer unsurpassed performance and enjoyment for driver and passengers alike.

By working with Meridian™, a world leader in audio technologies and digital sound processing, Land Rover has also developed two advanced audio systems to delight the most discerning music fans.

The 380W Meridian Sound System features 12 channels and 11 loudspeakers including a dual-channel subwoofer. The Meridian Surround Sound System produces an incredible 825W of surround sound through 15 channels and 17 loudspeakers including a subwoofer. Meridian systems offer unique technologies that provide superior audio performance within the confined space of a vehicle. Digital Signal Processing (DSP), for instance, allows a speaker to perform with the characteristics of a speaker of eight times the volume.

The result is the very best in world-class audio reproduction with sound that is real and totally convincing... it's just as the artist intended. Also pioneered by Meridian is Trifield technology which ensures a perfect stereo image for each occupant, producing an holistic sound within the cabin to further improve the concert-like experience. A special feature, Dynamic Volume, detects variations in the cabin and balances out the sound quality so that it's consistent throughout the car.

iPod is a registered trademark of Apple Inc., registered in the US and other countries. The Bluetooth® word mark and logos are owned by the Bluetooth SIG, Inc. and any use of such marks by Land Rover is under licence.

# Interior technologies

## Dual view, voice control

Range Rover Evoque's interior features a suite of the latest technologies to provide driver and passengers with the most comfortable, most enjoyable experience possible.

All driver displays present clear, useful information. The centrepiece of the vehicle and the hub for controls and infotainment is the 8-inch colour Touch-screen in the fascia\*. This provides the latest in technology with exceptionally clear graphics. The availability of a dual view\* functionality with the Touch-screen allows the driver and front seat passenger to watch separate images simultaneously on the same screen.

Also available is a highly intuitive, powerful voice control system that includes the latest 'Say What You See'\* technology. And of course, connectivity is state-of-the-art with Bluetooth streaming as well as USB/iPod connections for handsfree phone operation and the driver's choice of listening while on the move.

The steering wheel houses controls for convenient features that are standard on Range Rover Evoque. These include Cruise Control and primary audio controls.

There are also separate twin 5-way toggle switches on the steering wheel to maximise control and ease-of-use of the Infotainment systems and Driver Information Display. The Driver Information Display's 5-inch full colour screen, conveniently located between the two instrument dials, presents primary vehicle information such as temperature and fuel levels and Terrain Response® settings as well turn-by-turn navigation information and 'Say What You See' voice control prompts.

The Hard Disk Drive (HDD) Premium Navigation system\* allows features to be accessed more quickly – for instance, route finder and route recalculation times are significantly reduced – helping minimise delays in determining directions for the driver. The system includes an 'eco' feature, which shows the most economical route to your destination.

Rear Park Aid. This convenient feature is standard on Range Rover Evoque. Other advanced driver technologies and convenient features include the latest Park Assist function\*, Front Park Aid\*, a Rear Camera system\* and a Surround Camera system\*, as well as powered electric tailgate\* and keyless entry\*.

Range Rover Evoque's Rear Seat Entertainment System\* has the ability to play high quality DVD Video and route it through the 8-inch screens located in the back of the front headrests as well as to the front seat passenger's display on the Touch-screen.

The system can also play MP4 Video Files\*\* stored on a USB Device plugged into a USB Port located in the vehicle. Analogue/digital television channels can be watched on the rear screens and front seat passenger display<sup>Δ</sup>.

Every Rear Seat Entertainment system comes with a Touch-screen remote control, which allows intuitive and user friendly operation. Two wireless digital headphones featuring WhiteFire® technology provide high quality sound and clarity to occupants using the Rear Seat Entertainment System.

\*Optional feature.

\*\*Please consult your Land Rover Dealer for detailed file compatibility information.

<sup>Δ</sup>Requires the television feature.

<sup>‡</sup>Available on Pure in combination with Tech Pack one.

WhiteFire® is a registered trademark of Unwired Technology LLC and any use of such marks by Land Rover is under licence.

## Park assist, surround camera, blind spot monitoring

**Park Assist\***. This useful latest generation, advanced automated technology appears for the first time on a Range Rover. Helping the driver to parallel park in tight parking spots (as little as 1.2 times the length of the vehicle), Range Rover Evoque uses ultrasonic sensors to steer while the driver operates the accelerator, brake and clutch. Real time information is also displayed on the Driver Information Display to aid the driver through each stage of the manoeuvre.

The Surround Camera system\* utilises five discreetly placed digital cameras to relay an almost 360 degree view around the vehicle to the 8-inch Touch-screen display on the fascia. The system provides a number of driver-assist features and can be invaluable when manoeuvring on-road and off-road. The five digital cameras are housed around the exterior of the car – two at the front, one on either side of the vehicle and one at the rear.

**Tow Assist**, part of the Surround Camera System, is a next generation reversing aid that predicts the rearward trajectory of both vehicle and trailer. This helps the driver perform more accurate manoeuvres and is selected from the Touch-screen menu. Wide-view cameras on the vehicle give a clear field of vision; guidelines are superimposed over the resulting image to highlight the predicted reversing path for the vehicle and trailer.

**Blind Spot Monitoring\*** is also available. This system uses side-mounted radars to warn of vehicles in the driver's blind spot. A bright amber warning icon is illuminated in the appropriate door mirror when a hazard is identified.

\*Optional feature.

## Choices

You're already making a statement with your Range Rover Evoque. Now you can express your individuality even more with one of the fabulous contrast colour roof options.

Vehicles shown from left: 1. Range Rover Evoque Coupé Prestige in Indus Silver with panoramic roof. 2. Range Rover Evoque Coupé Prestige in Colima Lime with Indus Silver contrast and panoramic roof. 3. Range Rover Evoque Dynamic in Mauritius Blue with Fuji White contrast roof. 4. # Interior finishers

The solidity and substantiality of real metal. Authentic aluminium finishers are used on every Range Rover Evoque. Each piece goes through more than twenty distinct processes resulting in exquisitely crafted detailing of superior quality with that telltale cold touch.

And while the use of traditional materials is reinvented with new imagination and creativity, Range Rover Evoque also innovates with the latest recycled materials such as luxurious Dinamica®. This 100 percent recycled fabric features on Pure models and provides supreme softness and comfort. Indeed the use of materials that are recycled, as well as exuding luxury and quality, is an integral part of the Range Rover Evoque 'philosophy'.

In fact, 16kg of premium recycled materials make a significant contribution to Range Rover Evoque. That's the equivalent of reusing one thousand 500ml plastic bottles. A further 21kg of natural materials are used in the vehicle, including leather for the seat covers, instrument panel and door casings.

# Dynamic

An exhaustive selection of unique exterior features. From unique bumpers, sills, the grille, the tailpipes, contrasting roof and spoiler colours giving an even more confident and assertive stance. And premium sports interiors based on a darker, moodier environment with splashes of bright contrast colour and leather seats with unique sports detailing. This is Dynamic.

Image shown: grille in gloss black

Image shown: bonnet louvres in gloss black (Coupé only)

Image shown: waist finisher in gloss black and Dynamic rear sport spoiler

**Dynamic features include:**

- Grille in gloss black
- Dynamic front bumper
- Dynamic side sills
- Dynamic rear sport spoiler
- Dynamic rear bumper
- Dynamic exhaust with skid plate
- Tailgate finisher in gloss black
- Bonnet louvres in gloss black (Coupé only)
- Chrome tread plates
- Gloss black mirror caps
- 19 inch Sparkle Silver Alloy Wheels 'Style 3' (Coupé) and 'Style 4' (five-door)
- Textured metal interior finisher
- 6/4 electric perforated grained leather seats
- Carpet mats with edging
- Perforated Oxford leather steering wheel

Please note: When choosing vehicles fitted with specific wheel and tyre combinations or optional wheels and tyres, your intended use of the vehicle should be considered. Wheels with larger diameters and lower profile tyres may offer certain styling or driving benefits, but may be more vulnerable to damage. Please discuss your requirements with your Land Rover Dealer for further details.

## RANGE ROVER EVOQUE DYNAMIC INTERIOR DESIGN THEMES

### VORTEX

1. Ebony Perforated Grained leather seats with Cirrus contrast stitch
2. Ebony soft touch material instrument panel topper with twin needle stitching
3. Ebony soft touch material mid section with twin needle contrast stitching
4. Textured Aluminium centre console finisher

■ Standard □ Optional - Not Available

\*Manufacturer's data according to new government EU5 test regulations.

\*\*Including fluids, 90% fuel and 75kg driver.

†If towing for commercial gain, please refer to your Land Rover Dealer for information relating to digital tachograph installation.

Fuel consumption figures: The results given here do not express or imply any guarantee of the fuel consumption of any particular vehicle with which this information may be supplied. Vehicles are not individually tested and there are inevitable differences between individual vehicles of the same model. The vehicle may also incorporate particular modifications. Furthermore, the driver's style and road traffic conditions, as well as the extent to which the vehicle has been driven and the standard of maintenance, will affect its fuel consumption.

## Accessories

It's your Range Rover Evoque. Unmistakably so with a range of exclusive accessories that reflects your lifestyle and your personality. Importantly, Range Rover Evoque accessories can be added at any stage during the vehicle's life...not just when it's new. A selection of accessories is illustrated here. Range Rover exclusive accessories are designed and manufactured to the same exacting standards as the original equipment fitted to your vehicle.

Visit [www.landrover.com.au](http://www.landrover.com.au) for more information.

**Please note:** The vehicle shown above includes Stainless Steel Side Tubes – VPLVP0071, 20 inch Alloy Wheels Gloss Black Finish – VPLVW0071, Roof Rails Black Finish – VPLVR0086, Crossbars Silver Finish – VPLVR0073 and Roof Mounted Bike Carrier – LR006847. The alloy wheels shown on page 39 may also be available as an accessory fitment. Please see your Land Rover Dealer for further details.

Featured Range Rover bike is a concept model only.

\*Please note: these accessories are not suitable for Caravans, Trailers or Lighting Boards fitted with rear mounted LED Lamp Kits.

The vehicle shown above includes Stainless Steel Side Tubes – VPLVP0071, 20 inch Alloy Wheels Gloss Black Finish – VPLVW0071, Front and Rear Mudflaps – VPLVP0065/VPLVP0069, Roof Rails Black Finish – VPLVR0086, Crossbars Silver Finish – VPLVR0073 and Ski and Snowboard Carrier – LR006849.

**Snow Traction System** – LR005169 Suitable for 17 inch front wheels only  
**Bulb Kit** – VPLHV0060  
**Warning Triangle** – KCC500021  
**First Aid Kit** – STC7642  
**Electric Cool Bag** – VUP100140L Powered by the 12 Volt auxiliary socket

IN SUPPORT OF

International Federation of Red Cross and Red Crescent Societies

At Land Rover we do this by investing in four key areas:

**e\_TERRAIN TECHNOLOGIES.** EFFICIENT POWER SYSTEMS, LIGHTWEIGHT STRUCTURES, REDUCED EMISSIONS

A joint £800m investment into new technologies designed to reduce CO<sub>2</sub> emissions and improve fuel consumption. We are targeting a 25 percent reduction in joint fleet average tailpipe CO<sub>2</sub> emissions by 2015, as part of our carbon management plan. The all-new Range Rover Evoque and Freelander 2 vehicles include innovative stop start technology (on the diesel manual gearbox) and Intelligent Power Systems Management (IPSM) with regenerative braking, just two examples of e\_TERRAIN TECHNOLOGIES that reduce our vehicles carbon footprint. What's more, Range Rover's Adaptive Dynamics System constantly monitors vehicle performance, to enhance driving and emissions efficiencies.

**FACT**  
We will use life cycle assessment to understand the environmental impact of our vehicles, including the use of e\_TERRAIN TECHNOLOGIES, beginning with Range Rover Evoque.

**SUSTAINABLE MANUFACTURING.** USING FEWER RESOURCES AND CREATING LESS WASTE

World class manufacturing facilities, certified to ISO14001 since 1998. As a company we are targeting a 25 percent reduction in operating CO<sub>2</sub> emissions by 2012, 25 percent in waste to landfill and 10 percent in water consumption, based on 2007 levels. Our activities include factory energy efficiencies, cutting transport miles and the carbon offset of all CO<sub>2</sub> emissions from manufacturing assembly. But it doesn't stop there. Every new vehicle is designed to be 85 percent recyclable and reusable, in addition 95 percent recoverable and reusable, with 10 percent specifically for energy recovery.

**FACT**  
Turning waste food into energy in a trial at our headquarters in Gaydon, has diverted 43 tonnes of waste from landfill and saved 3.7 tonnes of CO<sub>2</sub> emissions.

**CO<sub>2</sub> OFFSETTING.** INVESTING IN RENEWABLE ENERGY, TECHNOLOGY CHANGE AND ENERGY EFFICIENCY PROJECTS

For every tonne of CO<sub>2</sub> emitted during the manufacturing assembly of all our vehicles, Land Rover invests in carbon reduction projects that reduce an equivalent tonne of CO<sub>2</sub> elsewhere. In addition, we enable our customers to offset their first 45,000 miles/72,000 km of driving in their new vehicles. We do this in the UK as well as countries in Europe, the Middle East and Asia. Independently administered by ClimateCare and Forum for the Future, CO<sub>2</sub> offsetting allows us to take action now, to reduce our impact on the environment, as part of our integrated carbon management plan.

**FACT**  
We plan to offset approximately 3,000,000 tonnes of CO<sub>2</sub> emissions by 2012.

**CONSERVATION AND HUMANITARIAN PARTNERSHIPS.** WORKING PARTNERSHIPS FOR CONSERVATION AND SOCIETY'S GAIN

Our vehicles are designed for purpose, so are used by conservation and humanitarian organisations worldwide. Working with our five Global Conservation partners and the International Federation of Red Cross and Red Crescent Societies (IFRC), Land Rover is proud to support the important work of the Royal Geographical Society (with IBG), The Born Free Foundation, Earthwatch Institute, Biosphere Expeditions and the China Exploration and Research Society.

**FACT**  
In 2010 Land Rover launched a new three-year global initiative with the IFRC entitled 'Reaching Vulnerable People Around the World'. Land Rover has supported the IFRC's life saving work since 2007 and to date has given over £4m in vital funding and vehicle support to help vulnerable people around the world.

**OFFICIAL VEHICLE**

Land Rover is the Official Vehicle of Rugby World Cup 2011 in New Zealand and Rugby World Cup 2015 in England. Land Rover will supply vehicles to support the organisers, teams and officials.

TM © Rugby World Cup Limited 2008.

[www.landrover.com.au](http://www.landrover.com.au)

**WARRANTY.** A comprehensive manufacturer's warranty is a feature of every Land Rover vehicle and extends to any genuine Land Rover accessories fitted by a Land Rover Dealer. The warranty period for the vehicle is three years/100,000 kilometres. In addition, the paint surface is also covered for three years/100,000 kilometres and the body work covered for corrosion for six years.

**LAND ROVER ROADSIDE ASSISTANCE.** All Land Rover vehicles purchased in Australia benefit from complimentary Land Rover Roadside Assistance service for the length of the new car warranty. This covers you Australia-wide 24 hours per day every day. And because it is Land Rover Assistance, help will also be provided if you become bogged or disabled on roads that only four-wheel drives can travel.

**CUSTOMER CARE.** Land Rover Australia has a dedicated Customer Care Centre to assist owners who may have a general query. Owners seeking this level of assistance are invited to phone our Customer Care Centre on the toll-free number 1800 625 642 or email [enquiries@landrovercustomers.com.au](mailto:enquiries@landrovercustomers.com.au). Land Rover ownership includes a package of benefits designed to provide high standards of after sales care and support.

**LAND ROVER FINANCIAL SERVICES.** Just as Land Rover lets you tailor a vehicle to your specific requirements, we offer you the same service when it comes to finance. You can arrange to purchase and finance your Land Rover from the people who know it best - your Land Rover Dealer. Your Land Rover Business Manager can explain the full range of finance options available from Land Rover Financial Services and provide expert advice to help tailor a finance package to best suit your needs. To discover more about Land Rover Financial Services visit your nearest Land Rover Dealer, call 1800 037 711 or visit [www.landrover.com.au](http://www.landrover.com.au) for more information.

**IMPORTANT NOTICE:** This publication is intended for international usage and while Land Rover take the utmost care in ensuring that all details in the publication are correct at the time of going to press, we are constantly striving for improvement and therefore reserve the right to alter specifications and equipment without notice. Details of specifications and equipment are also subject to change to suit local market conditions and requirements, and not all products are available in every market. Some vehicles are shown with accessories or optional equipment fitted.

All Land Rover Approved Accessories fitted by a Land Rover Dealer within one month or 1,600 kilometres/1,000 miles (whichever occurs first) of the handover of a new registered vehicle will benefit from the same warranty terms and period of cover as the vehicle warranty. Accessories purchased outside of these parameters will be subject to a 12 month unlimited mileage warranty. All Land Rover Approved Accessories are rigorously tested to the same exacting standards as those applied to our vehicles. Performance in extreme hot and cold temperatures, corrosion resistance, impact and airbag deployment highlight some of the exhaustive product testing carried out to ensure accessories are both durable and importantly, continue to comply with current legislation. All our accessories are designed to be an integral part of Land Rover vehicles. While many items such as roof carriers are simple to fit, some products require specialist tools and diagnostic equipment to ensure correct integration with the vehicle structure and electrical systems. These products vary from market to market, please consult your Land Rover Dealer who will be pleased to advise you on current specifications and any query you may have.

The colours reproduced here are subject to the limitations of the printing process and may therefore vary slightly from the actual vehicle. The company reserves the right to alter or withdraw any colour finish without notice. Some of these colours may not be obtainable in your country. Please check availability of colours and current specifications with your Land Rover Dealer. Distributors and Dealers are not agents of Land Rover and have absolutely no authority to bind Land Rover to any express or implied undertaking or representation.
