AMBITION IS THE FUEL OF ACHIEVEMENT

The true essence of life isn't simply about where you happen to be going, but how you choose to get there. The means truly is the end. The vehicle that transports you on life's journey must reflect your own sense of dynamism and verve. Firmly attuned to the road, self assured, vigorously energised. When you choose the IS from Lexus, every journey from where you are now to where you truly want to be takes on a greater sense of vitality and urgency. Feel driven by excitement, be pampered in luxury, take control.

TAKE A VIRTUAL TOUR

DESIGN RESHAPES THE WAY YOU SEE THE WORLD

Certain drivers see motor vehicle design as an extension of fashion, to others a luxury car is a statement of intent, it's their voice that speaks to the world. It fits snugly around their outer torso. Its style reflects their attitudes and thoughts. It is dynamic and decisive, positive and potent. Lexus has sculpted the inner sanctum of the IS to define a modern attitude about life. It's about being unexpected, embracing surprise and feeling content within oneself. Life is too short to drive a boring car.

PURSUING A NEW DEFINITION OF LUXURY

BRAND HERITAGE

In the mid 1980s, a team of passionate designers embarked on a remarkable journey. They travelled to America and integrated themselves into an exclusive neighbourhood to better understand the intricacies of privileged lifestyles.

Designers visited upscale boutiques and exclusive country clubs to discover the true essence of western style and to learn what luxury vehicle buyers really wanted. They observed how a new definition of luxury was permeating American society. Wealth had filtered down into younger hands, and with it came a more simplistic sense of style and sophistication. Fashion, design and architecture were being reshaped by these younger, more affluent professionals who were also turning their backs on conventional luxury vehicles, seeking a more rewarding driving experience.

At the same time, Lexus sent design teams to the French Riviera to gain a sense of European elegance, class and culture. Such a fact-finding mission was followed by one of the most extensive development programs ever undertaken by a motor vehicle company. The end result was the Lexus LS 400, a vehicle so extraordinary, it ultimately redirected the course of luxury vehicle design, elegance and performance.

The late '90s saw the arrival of a more athletic expression of Lexus, the IS 200. It caught the attention of a new generation of younger, achievement focused individuals, whose footloose lifestyles yearned for a more energised ride without leaving indulgence behind. Rather than being simply a condensed form of the original LS, the IS was a vibrant and very different Lexus destined to excel on twisty roads and free flowing

highways. The IS proved to be a worthy platform on which to launch a whole new family of Lexus vehicles, to satisfy upwardly mobile individuals who eagerly embraced change and adopted new ideas faster than any generation in history.

Meanwhile, the Lexus commitment to ground-breaking design and forward thinking is forging ahead into bold new territory. One of the more recent reminders has been the unveiling of the LF-CC coupe concept at the Paris Motor Show. The LF-CC serves as a glimpse into the Lexus vehicle of tomorrow, exposing the vibrant new personality of Lexus through its breathtaking, aerodynamic design. Its new generation hybrid power plant unleashes performance worthy of a true sports coupe, while setting new benchmarks for higher efficiency and lower emissions.⁽¹⁵⁾

EXHILARATION REDEFINED

INTRODUCING THE IS

When Lexus released the IS 200 in 1999, it not only reinvented Lexus in the eyes of a new generation of drivers, but redefined the concept of the modern sports sedan. It delivered precisely what more spirited drivers were asking for: Agility matched with luxury, performance with style, comfort without sacrificing control. Numerous motoring critics and leading Australian auto clubs recognised this and named it 'Best Prestige Car' in 1999. The IS 300 followed close behind its tailpipes, further elevating the sporting credentials of Lexus.

The release of the IS 250 in 2005 blended L-finesse design elegance with greater performance. It won 'Best Prestige Car' in the Australia's Best Cars awards for 2006 and 2007 plus Drive's 'Car of the Year' for 'Best Luxury Vehicle under \$60K' in 2006. UK's Top Gear named it

'Executive Car of the Year' in 2006, while in Germany it won the 'Golden Steering Wheel Award', Europe's leading vehicle award. Soon a racetrack-proven IS F was unveiled with a potent V8 engine, followed by the seductive IS 250C hardtop convertible.

Now a Lexus IS has been created that doesn't simply break the mould, but destroys it. Uniquely focused on driver enjoyment, its revised suspension geometry together with a rigid body structure have further elevated handling precision and cornering dynamics. Its accelerator, transmission shifting performance and braking system work together to deliver increased linear response.

Within its driver focused interior, advanced technologies instil a more vivid sense of exhilaration while immersing you

in uniquely Lexus levels of comfort and refinement. F Sport models feature a high technology Thin Film Transistor (TFT) instrumentation lifted straight out of the LFA, which lets you customise the menu display to suit your unique preferences.

It's time to get more response, more exhilaration and feel a greater connection with the vehicle that you drive. The very latest Lexus IS awaits your inspection.

Overseas IS 200t Luxury model with Enhancement Pack 1 shown

POWERS OF ATTRACTION

STYLE AND DESIGN

Design is all about desire. It summons the emotions, arouses the senses and unlocks the power of attraction that defies pure logic. The Lexus IS speaks to you through a design language known as L-finesse, defiantly different and passionately Lexus. From the distinctive signature spindle grille flows a body design that comes alive with sweeping curves leading to tight apexes, signalling in no uncertain terms, that once you step into the driver's seat, you're going to get noticed.

LED Daytime Running Lights (DRL) underscore powerful Bi-Xenon High Intensity Discharge (HID) headlights. On the 300h Sports Luxury model, LED headlights illuminate sooner, shine brighter, yet remarkably consume less energy.

The foglights display a similar brilliance, as LED bulbs create a whiter, softer light with reduced glare in misty conditions.

This body design is not only elegant but efficient, achieving a low 0.28 drag coefficient (CD) in petrol models, and a sleek 0.27CD in hybrid models. This means less wind noise, more control and enhanced fuel economy.⁽¹⁾ IS 300h models go even further with a unique rear bumper design and lower diffuser which redirects airflow for increased stability and reduced drag. Sleek hybrid badging on the rocker panels serves as a vivid reminder of the vehicle's impressive credentials.

While the L-finesse design language unifies the IS line, an array of appointment levels and Enhancement Packs create individuality, allowing you to select an expression of the IS which best embodies your driving ambitions and personality.

IS Luxury variants offer a comprehensive portfolio of refinements as standard and are distinguished on the outside by 17" alloy wheels. F Sport models evoke a more athletic persona

energised by aggressive 18" F Sport wheels and a more flamboyant treatment of the Lexus signature spindle grille. The sophistication of Sports Luxury models is seen in bold 18" multi-spoke alloy wheels on the 200t and 300h, while the 350 Sports Luxury features exclusive 18" 5-spoke alloy wheels which add a finishing touch to the striking L-finesse design.

[DISCOVER MORE ABOUT THE IS](#)

INTERIOR REFINEMENT

STYLE AND DESIGN

Inside the IS you'll discover a welcoming sense of space, yet at the same time a feeling of snugness and security. The aim was to create a 'Human Machine Interface' - Lexus engineers' speak for making the occupants feel as one with the vehicle. Such a feeling begins the moment you approach the vehicle with your Smart Key or Smart Key Card.⁽²⁾ Opening the doors is as simple as gripping the door handle. Then, having put your foot on the brake, you can start the engine with the start button.

L-finesse is focused on driving ergonomics as much as elegance. Essential switches are within easy reach in the lower operation zone. On the centre console, feel how the concave shape of the Lexus Remote Touch Controller (LRT) slips neatly into the palm of your hand. As intuitively as using a computer mouse, it lets you access audio and climate control settings, or operate the navigation system.

Instrumentation is positioned near eye level in the upper display zone. A centrally-located 7" colour multimedia screen, standard across all models, displays audio settings, music data, phone caller details and satellite navigation maps.⁽³⁾ Depending on your location, you'll receive live traffic alerts⁽³⁾ via the Lexus Remote Touch Controller.

In the Luxury and Sports Luxury models, a crisp Multi Information Display (MID) between the instruments provides concise information right in your line of vision.

An LFA inspired, 8" LCD instrument display exclusive to F Sport models lets you customise menus, providing information including audio settings and trip data in your preferred configuration. Whether your vehicle is equipped with the Pioneer 8-speaker system or the Mark Levinson[®] audio system, each incorporates a Digital Radio (DAB+),⁽⁴⁾ iPod^{®(5)} and Bluetooth^{®(6)} Connectivity and a dual USB input.⁽⁷⁾

For optimum posture, the driver's seat offers 10-way power adjustment while the passenger's seat has eight settings. Sports Luxury and F Sport models give you three driver's seat memory positions allowing you to instantly recall your preferred seat adjustments, steering wheel and exterior mirror settings. Fortunately, heated and ventilated front seats are standard for all-weather comfort.

The longer wheelbase means more interior space, even the sculpted seatbacks enhance rear seat legroom, while the 60/40 split rear seat helps accommodate long cargo items.

To quell annoying sun glare, an electric rear sunshade rises up at the touch of a button; a convenience reserved for Sports Luxury models. Thoughtfully, the sunshade drops down automatically when you select reverse. The IS is also equipped with a self-dimming interior mirror which reduces glare from fellow motorists.

FEEL THE ENERGY, FEEL ALIVE

PERFORMANCE

With the first turn of the steering wheel, you'll feel the difference. It begins with the way Electric Power Steering (EPS) delivers more direct steering at higher speeds, allowing easier parking at lower speeds.

There's another twist; Drive Mode Select is standard. A simple turn of the dial on the centre console turns the personality of the vehicle from sedate to sensational. When 'ECO' mode is selected, the output of the drivetrain, and air conditioning are automatically controlled to enhance fuel-efficient driving, while an 'ECO' meter is displayed on the dash. 'NORMAL' mode ensures smooth acceleration and refined vehicle response. Turn to 'SPORT/SPORT S' mode and the instrumentation display changes from blue to red and the throttle becomes more direct.

The performance of the F Sport and Sports Luxury models goes even further. For more agile cornering, 'SPORT S+' mode firms up the Electric Power Steering (EPS) as well as the Adaptive Variable Suspension (AVS) on F Sport, 200t Sports Luxury and 350 Sports Luxury models. In IS 350 F Sport and Sports Luxury models, Variable Gear Ratio Steering (VGRS) is also retuned, for greater high speed sensitivity and precision.

The double wishbone front suspension, a configuration used in most race cars, has been engineered for flatter cornering. Even the multi-link rear suspension enhances cornering grip.

You have a choice of three exhilarating engines. In the IS 350, a lightweight quad-cam 233kW 3.5 litre V6 is comprehensively equipped with technologies including dual variable valve timing (VVT-i) for maximum power when you need it and maximum fuel economy when you don't.

A high performance 8-speed transmission uses technologies derived from the racetrack-proven Lexus RC F to help you manage all this power. Such thinking includes G AI-SHIFT control which preselects the right gear on hills. It can even analyse G-forces when cornering to choose the optimum gear for precise control. In 'M' mode the transmission performs like a manual, with rapid shifting performance for crisp acceleration response.

The innovative Lexus Hybrid Drive in the IS 300h offers another dimension in responsive yet whisper quiet performance. As the advanced Atkinson cycle petrol engine works together with a high output 650 volt electric motor, acceleration response is truly electric.

In IS 200t models, a 2.0 litre 16-valve 4-cylinder engine with the addition of a turbocharger delivers responsive performance. This, combined with a silky smooth 8-speed Sequential Sports Programmed Direct Shift (SPDS) transmission and the added sporty feel of Paddle Shifters, ensures every ride in an IS 200t is an exhilarating one.

Whichever engine you choose, you'll breathe easier knowing IS 200t, IS 300h and IS 350 engines are certified to the latest Euro V emissions standards.⁽¹⁵⁾

F Sport Exclusive Pedals shown

WHEN YOU MAKE TRACKS, MAKE A STATEMENT

F SPORT

A team of passionate designers and engineers employed by an elite 'F Sport' division have developed a unique line of IS models. You'll see their passion in the design of the IS F Sport with its confident demeanour and a more free-flowing treatment of the signature spindle grille. Large air vents recessed into the front bumper draw in air to help cool the brakes while improving stability and fuel economy.⁽¹⁾

The stronger body structure gave Lexus engineers the ideal platform on which to develop a sports tuned suspension system, which helps keep all four wheels in contact with the road. Adaptive Variable Suspension (AVS), continually adjusts the damper settings to suit driving and road conditions.

With the Drive Mode Select dial set to 'SPORT S+' mode, the Electric Power Steering becomes more direct and the Adaptive Variable Suspension becomes firmer. Vehicle Speed Sensing Control firms up the ride as speeds increase,

while Roll Attitude Control regulates the damping force for flatter cornering. In the IS 350 F Sport and Sports Luxury models, Variable Gear Ratio Steering (VGRS) becomes more direct for agile cornering.

Lexus engineers put the IS F Sport through its paces at Fuji International Speedway and the Nürburgring in Germany, widely regarded as the world's most demanding racing circuit. This enabled Lexus engineers to fine tune damper settings, spring rates and suspension geometry for ultimate performance.

Fortunately, F Sport models look and feel as good as they perform. Immerse yourself into the driver's seat and discover how Lexus designers have developed a new integrated foam technique where the upholstery and the seat foam are formed as one. A snug recess grips the body for greater lateral support, while high side bolsters counteract G-forces to keep you secure while cornering.

Aluminium Sports Pedals and F Sport brushed aluminium scuff plates add a sporting edge, complementing the premium steering wheel. The LFA-inspired instrumentation comes alive as the centre display slides across to reveal customisable menus displaying precisely the information you want, from audio settings to engine data. In the hybrid equipped F Sport, the central display actually turns into a hybrid meter at the same time, displaying the status of the hybrid system from 'Charge' to 'Power'.

In 'M' mode, paddle shifters behind the steering wheel allow you to make rapid shifts like a manual vehicle. You may also use the paddle shifters in 'DRIVE' mode, which instantly changes the transmission to a temporary sequential mode. Experience the IS F Sport and get a sense of what it feels like to drive on Fuji Raceway.

TOUCHING THE HEART BY INSPIRING THE MIND

MARK LEVINSON

Lexus designers understand the emotive power of music. It has the ability to soothe, motivate, inspire and excite. To unlock such powers, Lexus commissioned audiophile designer Mark Levinson® to create a truly extraordinary audio system.

Mark Levinson® is not one man, but a group of acoustic engineers who have traditionally created high-end audio systems for discerning audiophiles. They had previously refused to create systems for motor vehicles until they discovered Lexus, the first automotive company capable of providing an acoustically superior environment in which to showcase their audio systems.

From the outset, the objective was to create high resolution sound reproduction within a 360 degree sonic space. Such precision is standard on Sports Luxury and IS 350 F Sport models, or optional on IS 200t and IS 300h F Sport models. You are surrounded by a network of 15 audiophile-quality

speakers. In the instrument panel there are three 'Unity™' speakers, which are quite different from conventional designs because they have two coils, two diaphragms and one magnet for greater acoustic response. They can react instantly, switching from playing a high pitched snare drum to a soothing synthesiser tone, resulting in a breathtaking sense of audio dimension. A 200mm subwoofer mounted in the rear reproduces the deep bass tones and utilises an inverted motor structure that helps to ensure optimum performance yet conserves cabin space.

The 'GreenEdge®' speakers are capable of remarkable performance with reduced power consumption and distortion. Each speaker is equipped with an acoustic lens which disperses sound more evenly throughout the cabin. The driving force is a 12-channel 'Class D' digital amplifier that produces 835W of crystal clear 5.1" channel sound. A fanless design keeps it operating efficiently and quietly, delivering 250% more power than a conventional amplifier. Even the

digital radio DAB+⁽⁴⁾ achieves greater audio clarity. The audio system is able to connect to your iPhone,^{®(5)} iPod,^{®(5)} or iPad^{®(5)} expanding your music library. While luxury motor vehicles typically employ consumer quality audio systems, Lexus offers an indulgence typically reserved for a select group of audiophiles.

As you turn up the volume, prepare your mind for an audio performance as scintillating as the on-road experience created for your body by Lexus engineers.

SAFETY IS THE ULTIMATE FORM OF SECURITY

SAFETY

Lexus believes prevention is the best form of protection, so its engineers have developed some of today's most advanced safety measures. Take the Vehicle Dynamics Integrated Management (VDIM) System. When cornering hard or travelling on slippery surfaces, VDIM harnesses a range of critical systems to work as one, helping to maintain vehicle stability and keep you out of harm's way.

A Pre-Collision Safety System (PCS)⁽⁹⁾ takes safety even further. PCS responds whenever it perceives there is a possible impending collision by first sounding a buzzer and displaying a warning in the Multi Information Display (MID). Then Pre-Collision Brake Assist is activated to supplement your braking effort. If a collision is unavoidable, Pre-Collision Braking helps reduce collision impact. Sports Luxury models and selected Enhancement Packs incorporate a Lane Departure Warning (LDW)⁽⁹⁾ system which monitors your position. Should you ever stray out of your lane, a buzzer sounds and a warning appears on the Multi Information Display (MID).

A Blind Spot Monitor (BSM)⁽¹⁰⁾ available in F Sport and Sports Luxury grades can detect vehicles in the blind spot alongside you. It even incorporates a Rear Cross Traffic Alert

which sounds a buzzer to warn of traffic which may be outside your normal field of vision behind you when you're reversing.

The Rear View Camera (RVC) with Rear Guide Assist (RGA)⁽¹⁰⁾ shows you what's behind your rear bumper. Cruise Control is fitted as standard, yet Sports Luxury and F Sport models with Enhancement Pack 2 go even further.

An intelligent Radar Active Cruise Control (ACC)⁽¹¹⁾ helps maintain a selectable preset distance from traffic ahead.

Automatic High Beam (AHB)⁽¹²⁾ in Sports Luxury models can sense oncoming traffic and intuitively dip the powerful Bi-Xenon HID headlights for added safety. During sudden braking, the rear LED brake lights illuminate with a pulsing effect to warn drivers behind you.

Lexus has engineered a totally new body structure utilising advanced techniques including laser-screw welding that holds panels together much stronger than traditional welding. Engineers then added a high strength body bonding adhesive and extra spot welds in critical areas for additional strength without additional weight. A stronger, more rigid body means

not only greater collision protection, it also optimises roadholding, especially while cornering.

Ten Supplemental Restraint System (SRS) airbags are fitted as standard, including dual stage front airbags, two front knee airbags, front and outer rear side airbags and curtain shield airbags.

Even the bonnet structure offers protection, as it incorporates an Electronic Control Unit (ECU) which can determine when a pedestrian or other moveable objects have collided with the vehicle. If the system is activated, the bonnet pops up to help cushion the impact and reduce the risk of pedestrian injury.

[DISCOVER MORE ABOUT THE IS](#)

WHEN YOU MAKE A MOVE, MAKE A QUANTUM LEAP

THE POWER OF h

In the IS 300h, the Lexus Hybrid Drive delivers an unparalleled driving experience. An advanced 2.5 litre Atkinson Cycle petrol engine works together with a high output electric motor delivering 164kW of silky smooth power yet consumes just 4.9L/100km of fuel.⁽¹⁾ The Continuously Variable Transmission adds to the blissfully smooth driving sensation.

During a typical journey, electricity provides the initial acceleration. As the pace picks up, the petrol engine kicks in. At cruising speeds the petrol engine is the main power source, then as you decelerate or brake, regenerative braking recharges the battery.

For increased acceleration, turn the Drive Mode Select dial to 'SPORT' or 'SPORT S' mode allowing the engine to rev higher between up-shifts. To quieten things down, 'EV' mode moves you gently along at up to 55km/hr utilising only electric power.

COLOURS THAT COME ALIVE

EXTERIOR FINISHES

Pearls that sparkle. A Titanium finish that shimmers. These are some of the lighting effects that await as you view your Lexus IS in direct sunlight or under the glow of headlights after dark.

To achieve even greater allure, Lexus appoints a master craftsman known as a 'Takumi' to oversee critical stages of the painting process. These Takumi are highly accomplished individuals who hold an esteemed position in Japanese culture and possess a highly trained eye and rare skills.

The IS assumes a range of personalities through a series of advanced paint finishes utilising five different levels of paint technology. More than simply colours, these paint finishes are applied through complex processes which reveal a new sense of dimension and character in the L-finesse body design.

Your choice includes finishes like Titanium Silver which is the result of a complex six-coat, four-bake sonic process. First, a protective

coating is applied to the body, then a design layer is added which incorporates aluminium pigment, followed by a layer of solid colour. As the paint dries, the intricate structure of the aluminium pigment realigns to evoke an effect reminiscent of polished metal.

Starlight Black on the other hand employs a glass flake technology which displays a level of glitter and sheen when exposed to city lights quite unlike any other finish. Tiny glass flakes embedded within the paint coat reflect rays of light and emit a delicate yet powerful radiance and a golden hue under bright sunlight.

Exclusive to F Sport models, White Nova emits a dazzling glow reminiscent of the LFA supercar. A newly developed white pigment below the paint surface interacts with highly transparent glass flakes to produce a sleek whiteness with intense highlights.

Premium Silver is a rich metallic finish which incorporates tiny metallic particles embedded within the clear coat. This results in a three-dimensional lighting effect which accentuates the deep curves and raised character lines of the body panels, adding structure and definition to the design.

Or you may prefer the more pronounced texture of mica finishes presented in Vermillion or Mercury Grey. This complex process incorporates flakes of mica which emit a mysterious blue-green tone.

As the IS moves, the colours and finishes move with it to add a new definition to the design.

THE INSIDE WORD ON STYLE

INTERIOR TRIMS

It's the feeling of leather accented seats against your skin. The warmth of woodgrain-look interior offset by metallic accents. These are some of the sensations you'll experience inside your Lexus IS model, as finely crafted materials and finishes add a tactile nuance to the L-finesse design language.

The opulence of a leather accented interior on the seating and door panels comes in a selection of four interior treatments in Luxury and Sports Luxury models.

Topaz Brown leather accented interior creates a warm, inviting ambience. Then there's the soothing elegance of the Ivory interior. The latest addition to the interior palette is the cool crisp look of Moonstone. For the purists, there's also the classic elegance of a rich Black.

Each hue is offset by a choice of mouldings which highlight the clean lines of the interior design. The sleek lustre of Black Metallic adds a sense of definition and dynamism, while Sports Luxury models offer the sophistication of a soothing Ebony Grey interior treatment, or the warmth of Ebony Brown.

Whichever design package you choose, a premium steering wheel and shift knob come along for the ride. The rich lustre of a silver metallic finish

enhances the steering wheel design, offset by rich black trims. Across the instrument panel and door panels, high sheen metallic mouldings add vibrancy. So too, the silver metallic finish of the electrostatic air conditioning switch instils added style.

Sports Luxury models assume a look of refinement with woodgrain-look interior trims in a range of finishes. Cross quilting of the leather accented seats gives a sporty persona, perforated inserts add comfort.

F Sport interiors are energised by a choice of two interior design treatments. If you're daring, the new Dark Rose colour treatment features a deep red hue for a striking interior. Or maybe you'd prefer your F Sport in Black. In each scenario, F Sport models have exclusive wedge metal mouldings. These genuine metal structures have been etched to achieve a three-dimensional effect which complements the high performance attitude of the F Sport, while aluminium pedals and scuff plates add highlights to the high-tech look.

So you see, whatever attitude your preferred Lexus IS model displays to the outside can be complemented by an equally distinctive personality on the inside.

Black Metallic

Bamboo (Hybrid models only)

Ebony Grey

Wedge Metal (F Sport models only)

Ebony Brown

Lexus Australia reserves the right to vary and discontinue the current interior and exterior colours, trims and colour/trim/model combinations. Colours and trims displayed here are a guide only and may vary from actual colours due to printing/display process. See your Lexus dealer to confirm colour/trim/model availability when ordering your vehicle.

BUILD AND PRICE

OWNERSHIP SOLUTIONS

OWNERSHIP SOLUTIONS ALLOWS YOU TO DETERMINE YOUR FINANCE COSTS AND KNOW THE GUARANTEED FUTURE VALUE (GFV)⁺ OF YOUR VEHICLE FROM THE OUTSET. IT OFFERS YOU CHOICE, CONTROL AND CERTAINTY. IN SHORT, EVERYTHING YOU'D EXPECT FROM LEXUS.

How does Ownership Solutions work?

- You choose the deposit that best fits your needs.
- You choose your term.⁺⁺
- We agree on the estimated kilometres you think the vehicle will have travelled at the end of the term (the End Odometer). The End Odometer will also include any kilometres already on the vehicle.
- Lexus Financial Services (LFS) then determines the GFV of your vehicle. The GFV is the minimum value of your Lexus at the end of your finance contract. Your monthly repayments are then calculated based on the above information with a final payment equal to your GFV. Then, if you return your Lexus at the end of the term and satisfy the agreed terms and conditions, LFS will pay you the GFV which will be put against the final payment.

The end of the term? Simply replace, retain or return.

At the end of your term you can choose to:

- Replace or sell your Lexus using the trade-in value or sale price to pay the remaining balance of your account.
- Retain your Lexus and simply pay the remaining balance of your account (including final payment).
- Alternatively, return your Lexus and, subject to fair wear and tear conditions and the agreed kilometres being met, we'll put the GFV towards the final payment on your account.

Choosing your deposit – what is best for you?

With the flexibility of Ownership Solutions, you can choose the deposit that best fits your current needs.

- If, for example, you have funds tied up in other investments, you can choose to finance your new Lexus with a zero deposit.⁺⁺
- Alternatively, by using a larger deposit you can lower your monthly repayments.
- Better still, compared to other finance options over a similar term, Ownership Solutions can provide more affordable monthly repayments.⁺⁺⁺

Want more certainty?

With Ownership Solutions, you've got the reassurance that at the end of the term (subject to fair wear and tear and agreed kilometres being met) you'll never owe more than your vehicle's worth to LFS. In other words, you don't have to worry about what your vehicle will be worth in the future because you know its minimum value from the outset.

What happens in the case of the unexpected?

If your vehicle incurs damage and does not meet the Fair Wear and Tear guidelines, LFS will give you the opportunity to have your vehicle repaired. Otherwise, LFS can organise the repairs and deduct the cost from your GFV. This adjusted GFV will then be the price that LFS will offer you if you return the vehicle at the end of your term. Of course, if you retain the vehicle, the condition doesn't matter, however, if you replace it or sell it privately, the condition will obviously impact your sale price.

So what does your accountant think?

Naturally, we think Ownership Solutions is an excellent, innovative way to put you in control of buying a new Lexus. That said, we suggest you seek independent advice to ensure Ownership Solutions is right for you.

Wouldn't it be great if Ownership Solutions was just the beginning?

Lexus' innovations and commitment to customer service extend well beyond Ownership Solutions. Once you purchase a new Lexus, you'll become a member of the Lexus Encore Privileges Programme and enjoy a host of exclusive benefits.[†]

For further details, simply visit your nearest Lexus dealer or see lexus.com.au/services/benefits/

⁺ Guaranteed Future Value (GFV) is the minimum value of your new or approved demonstrator Lexus at the end of your finance contract, as determined by Lexus Financial Services (LFS). If you decide to return your car to Lexus at the end of your term, (LFS) will pay you the agreed GFV amount which will be put against your final payment, subject to fair wear and tear conditions and agreed kilometres being met. The information provided is general in nature. You should seek your own financial advice to determine whether Lexus Ownership Solutions is appropriate for your individual circumstances. Terms and conditions, fees and charges apply. Lexus Ownership Solutions GFV products are available to approved customers of Lexus Financial Services, a division of Toyota Finance Australia Limited ABN 48 002 435 181, Australian Credit Licence 392536.

⁺⁺ Up to four years.

⁺⁺⁺ Lower monthly repayments compared to similar term with no Guaranteed Future Value (GFV) or equivalent balloon final payment. Total interest charges will be higher if a GFV or balloon final payment is selected.

[†] Terms and Conditions apply.

THE BENEFITS OF ENCORE

THE BENEFITS OF BEING A LEXUS OWNER GO FAR BEYOND THE INTRINSIC PLEASURE OF DRIVING THE VEHICLE. FROM THE MOMENT YOU'RE HANDED THE KEYS, YOU'LL ALSO BE WELCOMED TO THE LEXUS ENCORE PRIVILEGES PROGRAMME† - OFFERING A RANGE OF EXCLUSIVE INITIATIVES THAT REAFFIRM OUR ONGOING PURSUIT OF PERFECTION.

It all means you'll enter a world of benefits that extends to every corner of life. A world where everything's just that much easier and works that much more seamlessly. And a world where, should trouble ever find you, you can always find a helping hand.

Take our After Sales Service as an example. Both our technology and our technicians are at the forefront of automotive innovation. And our profound understanding of every single component of your Lexus means we can do more to ensure it's a pleasure to drive today, and in the long run. It's a world you've always belonged in. A privilege unique to Lexus drivers.

Silver service

Every aspect of your Lexus is built around your comfort and convenience, so it's fitting that when it's ready for a service, we'll come and pick it up from you and provide you with a complimentary loan car while we're inspecting. Plus, when we return your Lexus, it will have received a complimentary wash and interior vacuum.

Experience Lexus outside your vehicle

We're constantly striving to enhance the Lexus ownership experience. It's what we're known for. Our luxury events will be the perfect way to experience the Lexus lifestyle and network with other owners. Tickets may be limited, so be quick to secure your place.

Peace of mind

Wherever you are and whatever you're doing, you can relax, because with our Encore Privileges Programme, you have the 24-hour support of Lexus DriveCare.* We'll look after your car and, just as importantly, we'll look after you and your passengers.

Well read

You can stay abreast of all things Lexus from the comfort of your own home, with our Lexus Magazine delivered right to your door. It'll keep you updated on all aspects of luxury living and covers everything you need to know about the cars that are leading the world.

See lexus.com.au/services/benefits for details.

† Terms and Conditions apply.

* Full DriveCare details and conditions are available in your Lexus DriveCare wallet or you can phone 1800 253 987. Lexus Australia reserves the right to change, without notice, any benefits specified. Benefits should be confirmed at the time of ordering with your authorised Lexus dealer. To the extent permitted by law, Lexus Australia will not be liable for any damage, loss or expense incurred in relation to the benefits specified above (whether by way of negligence or otherwise). Lexus Australia, a division of Toyota Motor Corporation Australia Limited ABN 64 009 686 097, 155 Bertie St, Port Melbourne Vic 3207.
