Figures in brackets ( ) are for Automatic transmission which is standard specification on the MINI Clubman

<sup>1</sup> Fuel consumption, CO<sub>2</sub> emissions data, electrical consumption and range is based upon Combined Driving Test Cycle in accordance with ADR 81/02. Actual figures will depend on many factors including traffic conditions, driving habits, prevailing conditions and your vehicle's equipment, condition and use. These figures are unlikely to be achieved in real world driving conditions and should only be used for comparing one vehicle with another. BMW recommends the use of minimum RON 95 super unleaded petrol. Unleaded 91 RON and higher with a maximum ethanol content of 10% (E10) may also be used. Output and fuel consumption figures apply to RON98 fuel. All engines meet the EU5 emissions standard.
