## DESCRIPTION

Some customers may complain of a whining noise from the automatic transaxle when driving at 10 mph and above. The noise:

- Depends on the vehicle's speed only (the more speed, the more noise)
- Occurs with all types of driving (acceleration, deceleration, steady speed)
- Does not depend on rpm, gear, or ATF temperature

Customers having this concern should have their vehicle repaired using the following repair procedure.

#### REPAIR PROCEDURE

- 1. Verify customer concern.
- 2. Replace the 6AT assembly with a new one according to MS3 online instructions or Workshop Manual section 05-17.
- 3. Verify repair.
