

Mercedes-Benz

Vito Van and Crew Cab

2010 Model Range

Mercedes-Benz Vito.

Love Your Work.[®]

When you consider how much of your life is taken up with work, you want to make the most of it. And thanks to the Mercedes-Benz Vito, you can. With its outstanding blend of comfort, economy and safety, the Vito has lifted van standards. The Vito range has now been expanded to cater for an even wider spectrum of working applications.

Whether you choose the Vito Van or Crew Cab, whether you want it longer, taller or stronger, each and every Vito model comes standard with the quality that Mercedes-Benz is renowned for. With its streamlined exterior, the Vito cuts a dynamic profile on the road and lets everyone know that you take pride in your business. Inside, smart use of space and driver-friendly ergonomics make the Vito a van that can go the distance. And it's not just a van that drives like a car; it's a van that drives like a Mercedes-Benz.

Vito has built a reputation for excellence and when you get behind the wheel of a Vito, you'll understand why work's a whole lot easier when you love what you drive.

The right van for your business. More and more, business success depends on getting the small things right. Which is why the choices within the Vito range are now even greater.

Our engineers have challenged themselves to come up with the right van for your application. The Mercedes-Benz Vito proves it can be done. And it also shows that apart from being flexible, it's also possible to provide high levels of specialisation.

The two different models of the Vito – Van and Crew Cab – are available with a range of high-performance Mercedes-Benz engines.

There's a choice of four powerful CDI diesels with outputs from 70 to 150kW (95 – 204hp).^{*} Choosing the right engine for your driving preferences and load carrying requirements is now that much easier. Importantly for the

driver, the Vito is blessed with exceptional dynamism and agility. When it comes to coping with difficult entrances, narrow streets and congested city centres, Vito has the ability to make light work of tricky situations.

Every Vito features a comfortable, ergonomically designed driving position. The cabin has a high-quality look and feel and a number of clever touches such as the loading facility under the front seats, which increases the maximum load length by 200mm.

What's more, there's bound to be a body length to suit your needs. Whether you opt for compact, long with a high roof or extra long, each of the three body lengths give your Vito its own distinct character and specific capabilities.

For even greater scope, there are two wheelbase selections and two roof heights. With so many opportunities to combine different features, finding a Vito for your business is easy.

*Not all engines are available with all body types. Vehicles shown may have non-standard options and colours available at extra cost.

The Vito Van – three sizes fits all.

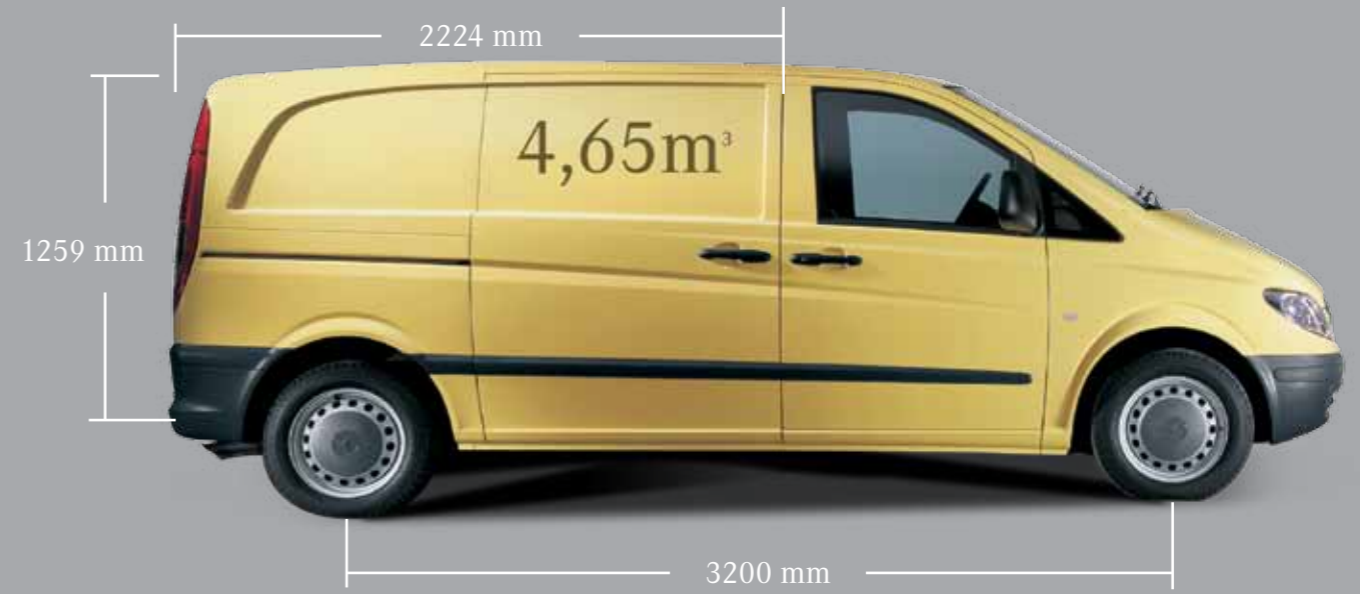

Whatever your needs, the Vito Van will carry your tools of the trade and everyday cargo with ease. All three body lengths – compact, long high roof and extra long – offer generous load capacity. The doors open wide for easy access and the low ride height makes loading from the rear and dual side sliding doors a straightforward task.

The load width between the wheel arches is designed for pallet access while the lashing eyelets integrated into the compartment floor allow your loads to be safely secured. With a choice of two wheelbases, three body lengths, high roof on long body and optional barn doors,* matching your Vito Van to the specific demands of your business becomes a much more straightforward task.

With load volumes ranging from 4.65m³ to 6.49m³ and payloads up to 1150kg – as well as compact exterior dimensions and reliability – the Vito Van is fit for any job.

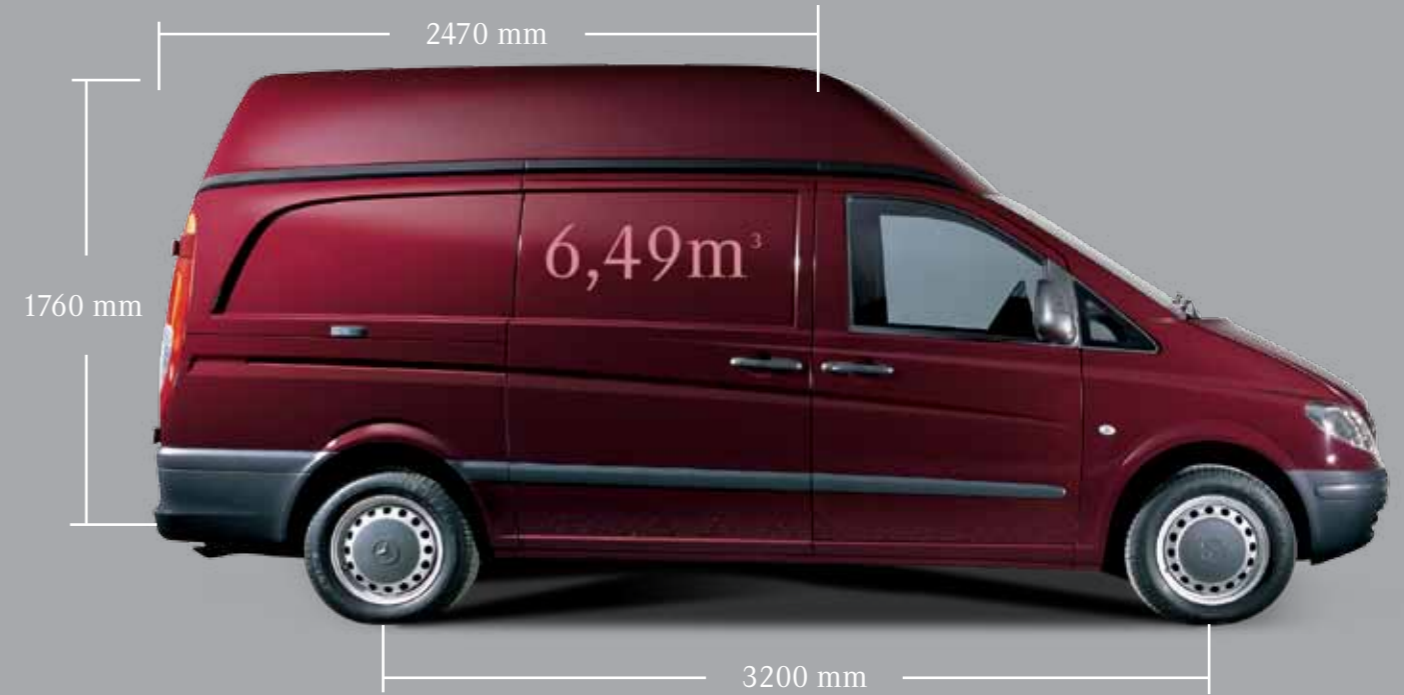

The Mercedes-Benz Vito redefines the entire van segment. By combining optimum practicality with ultimate comfort and exceptional design, the Vito has raised the bar by a considerable margin. It doesn't take long to discover that the driving characteristics, comfort and styling levels are strongly influenced by the Mercedes-Benz passenger car range. However, this certainly isn't at the expense of any commercial vehicle requirements. The Vito is designed to work hard. Just like all the vans we've built over the years.

The Vito Crew Cab – it pays to be flexible.

When business calls, it pays to answer. If you need to transport people as well as goods, the Vito Crew Cab measures up, thanks to its optional ability to carry up to six occupants* and a sizeable load of cargo.

From building to industry to municipal services – many activities require vans that offer more than just the largest possible cargo area. Having the flexibility to move people and goods at the same time is a very important business attribute.

Enter the Vito Crew Cab – a van that shows it is possible to do both and more. Because, as well as providing room for up to six* and being an extremely competent load carrier, the Vito Crew Cab also excels in offering a dynamic driving experience.

A talented all-rounder, the Vito Crew Cab lends itself to such a wide range of uses you'll find it's equally adaptable to both work and leisure. The flexible seating concept (five seats as standard or six seats* as an option) is just one of many strengths that include a generous amount of interior space, dual sliding side doors, a large tailgate or, for greater rear access, optional rear barn doors.*

There's even a removable row of rear seats for extra cargo. It also comes with a wooden floor and windows in the sliding doors. And because the Vito Crew Cab is

designed with passengers in mind, it offers them interior appointments and ride comfort along with the levels of safety that only Mercedes-Benz can deliver. The Vito Crew Cab stands out from the crowd thanks to its attractively designed body and low drag coefficient of 0.33. High-quality interior panelling and a comprehensive range of comfort features give a welcoming atmosphere on board. The chassis and rear-wheel-drive deliver dynamic, neutral handling at all times. In the Vito Crew Cab, there's no reason why business can't also be a pleasure.

Second row of seats can be removed to create more cargo room

More than just torque. Vito 120CDI. The most powerful diesel van in Australia.

With its three-litre V6 multi-stage turbo diesel cranking out 150 kilowatts and 440 Nm the Vito 120CDI is more than just torque. In fact, it's the most powerful diesel van in Australia.

Now here's even more of a reason to love your work. A van offering the agility, power and driving enjoyment normally reserved for Mercedes-Benz cars. The Vito 120CDI proves that fun doesn't have to come at the expense of practicality. With a torque range and dynamic, sharp handling, this is one work tool that isn't blunt.

The Vito 120CDI is the first turbocharged V6 diesel van in the one tonne market and delivers a comprehensive package of standard equipment coupled with strong performance.

The Vito 120CDI comes standard with a 5 speed automatic gearbox, 17-inch six spoke alloy wheels fitted with 225/55 tyres, colour coded bumpers, a leather-wrapped steering wheel and gear stick. As well as tinted rear window on the Crew Cab. With greater practicality than a ute, (you can lock all your tools away out of sight and customise the interior to suit your needs) the Vito 120CDI makes a statement on the road. And on the worksite.

Stylish interior of the vito 120 features metallic effect dash trim.

Tough on the outside, stylish on the inside.

When you're contending with congested roads on a daily basis, you appreciate all those things that make it easier to get the job done – like the Vito's comfortable working environment. Its high-quality interior sets high standards in practicality and ergonomics, which makes good business sense because a motivated driver is a better driver.

Where business meets pleasure.

The spacious, bright and welcoming look of the driver's area strikes you the moment you open the door, while the low access height is a particularly welcome feature on runs that involve frequent stops. The driver and front passenger have four-way adjustable seats as standard and ergonomically designed height adjustable head restraints and seat belts. If further seating is required, a front three-person bench seat is also available as an option.*

The cockpit.

Foremost in the driver's field of vision is the attractively styled instrument cluster with large, legible dials and displays.

All controls are positioned ergonomically – including, the joystick-type gear selector lever – which is integrated into the instrument panel for easy operation. Numerous stowage facilities provide handy accommodation for, drinks, logbooks, pens and documents – all within easy reach of the driver.

Standard equipment for the Mercedes-Benz Vito range includes:

- Driver and front passenger airbags
- Dual sliding doors
- Power steering
- Remote central locking
- Electronically operated heated mirrors
- Steering wheel adjustable for height and reach
- Walk-through access to cargo area in Van and Crew Cab variants
- Air conditioning
- Powerful, 5 speed heating and ventilation system
- 6 speed manual transmission for 109CDI and 111CDI
- 5 speed automatic transmission for 115CDI and 120CDI (optional on 111CDI)
- In-dash CD player

Automatic gear shift integrated into instrument panel.

Handy storage compartments throughout the cabin.

CD player with AM/FM radio and convenient pen holder.

Safety comes standard.

Safety isn't a luxury, it's a necessity. That's been the Mercedes-Benz way right from the beginning. All our commercial vehicles must meet high standards of practicality and economy, while helping to ensure the driver and passengers safety. When it comes to safety, we think more is better.

Safety: our first design principle.

Because the Vito is built by Mercedes-Benz, you get the benefits of over 100 years of innovations and leadership in the area of vehicle safety.

But don't just take our word for it. Our base model Vito has been given an ANCAP Safety Rating of 4-Stars, while a Vito fitted with optional head protecting window airbags has achieved the highest ANCAP Safety Rating available in Australia today; 5-Stars. This 5-Star rating is a first for the Australian Van Market, and the Vito is currently the only van in Australia to have achieved this outstanding result.

Technology to keep you on the safest track.

Standard equipment includes ADAPTIVE ESP® system, which combines anti-lock braking (ABS) in combination with acceleration skid control (ASR); electronic brake force distribution (EBD) and a brake assist system (BAS). Together, these systems help improve directional stability and traction in critical situations.

Working in conjunction with the Vito's powerful brake system, ABS, BAS and EBD help to keep stopping distances reassuringly short and help to ensure that the vehicle remains easy to control, even during emergency braking.

Additional safety features:

- Disc brakes all round
- 3-point seat belts for all seats, with pre-tensioners for driver and front passenger
- Driver and front passenger airbags
- Safety body with high-strength load-bearing members
- Height and reach adjustable steering wheel
- Headlight beam range control
- Rear centre stop light
- Adaptive brake lights
- Halogen front and rear fog lamps

How ADAPTIVE ESP® works.

This state-of-the-art, innovative safety technology helps to stabilise the vehicle in hazardous driving situations by applying a braking force to one or more wheels and adjusting the engine output as required. Equipped with Load Adaptive Control, which allows it to take account of the vehicle's load status, the system continuously processes data from a large number of sensors – including the steering angle sensor, the wheel speed sensors, the lateral acceleration sensor, the longitudinal acceleration sensor and the yaw rate sensor. If necessary, it intervenes to correct the situation and actively applies the appropriate braking forces to help overcome the hazardous situation.

Adaptive Brake Lights.

New to the 2010 range is the addition of the Adaptive Brake Light warning system. In the case of emergency braking at a speed above 50km/h, the Adaptive Brake Lights are activated by the ESP system. The brake lights will flash during the emergency brake situation. The flashing brake lights give drivers following behind you greater warning in an emergency braking situation. As soon as the emergency brake situation is over, ESP will deactivate the Adaptive Brake Lights and the brake lighting becomes static as usual. If emergency braking is required at speeds of over 70km/h ESP again activates the Adaptive Brake Lights and keeps them on until the vehicle comes to a complete stop where the hazard lights will also be switched on automatically. The hazard light can then be switched off manually or the system will switch them off automatically as soon as the vehicle speed exceeds 10km/h.

The safety systems described in this brochure have been developed to enhance active safety and to help van drivers devote their full attention to the situation on the road. Despite their capabilities, these innovative assistance systems cannot defy the laws of physics and do not absolve the driver of the duty to drive safely. Vehicles shown may have non-standard options and colours available at extra cost.

Lifesaver.

Australia's Safest Van. It's no accident.

At Mercedes-Benz we believe that safety is not a luxury, it's a necessity. All of our vehicles are built to meet high engineering standards. That's why the Mercedes-Benz Vito has been awarded 5-stars* by ANCAP, making it the first 5-star safety rated van in Australia. When it comes to safety, we think more is better.

On the 18th August 2009 the Australasian New Car Assessment Program (ANCAP) announced that the Vito was the first van in Australia to achieve a 5-star* rating. The Mercedes-Benz Vito successfully passed all of the rigorous testing protocols set down by ANCAP, concluding with a side impact 'pole' test.

There are 3 types of tests that determine to the star ratings. Offset Frontal, Side Impact and a Pole Test. All the test scores are added together to produce a combined score, which in turn determines the star ratings of between one and five stars. The higher the scores awarded, the better the star rating. For a vehicle to be awarded the top possible 5-star result it must achieve a minimum combined score of 32.5 points from a maximum possible total of 37. The scoring is broken down as follows:

Star Rating	Min Score in front off-set test	Min score in side impact test	Seat belt reminder bonus points (max)	Pole test (max)	Min combined score (inc pole test & seatbelt reminders)
5	12.5/16	12.5/16	3	2	32.5
4	8.5/16	8.5/16	3	-	24.5
3	4.5/16	4.5/16	3	-	16.5
2	1.5/16	1.5/16	3	-	8.5
1	-	-	-	-	0.5

As it can be seen in the above table there can be a vast difference between each of the star ratings. For a vehicle to achieve the top-level 5-star rating, it must also be fitted with window airbags and electronic stability control, a device championed by Mercedes-Benz more than 15 years ago. ADAPTIVE ESP® is an advanced safety feature fitted as standard to every new Mercedes-Benz Van sold in Australia.

*Vito is rated 5-stars when fitted with optional window airbags.

Torque about performance.

A Mercedes-Benz Vito is much more than just a box on wheels, it's born from the philosophy that driving enjoyment shouldn't be limited to our passenger cars.

Technological refinement and clever engineering have made this a real driver's machine. You'll understand what we mean when you've discovered how the Vito's sophisticated chassis and lively, high-torque engines add a new dimension of enjoyment to every journey.

The Vito is available with a choice of four Mercedes-Benz CDI diesels, designed to be powerful on the road. Our engineers have been uncompromising in their pursuit to create an engaging experience from every traffic light, at every corner and along every freeway. Now it's your turn.

The CDI engines: dynamic and powerful.

In the all-important low-rev range, the CDI diesel power plants offer a high degree of pulling power that makes for an engaging driving experience. These units owe their high power output and impressive torque curves – peaking at 150kW and 440Nm in the top-of-the range multi-stage turbo diesel 120CDI V6 powerplant – to the very latest engine architecture. The common-rail, direct-injection diesel technology features four valves per cylinder, a 1600 bar injection system and an exhaust turbocharger with a variable nozzle turbine.

Good fuel economy figures complement the enhanced power and performance created by these innovative engines.

All Vito engines feature an advanced electronic engine management

system which communicates with the control units of the transmission and the dynamic handling systems such as ADAPTIVE ESP® via a CAN data bus. The electronic immobiliser, which is standard equipment, acts directly on this control unit preventing unauthorised starting of the vehicle.

Rear-wheel drive.

Regardless of which high performance engine you choose, you'll be impressed by the dynamic characteristics of the Vito. A key feature of the Vito is its rear-wheel drive layout. This arrangement offers huge advantages for a van's dynamic handling properties, manoeuvrability and safety. It's a proven concept.

Rear-wheel drive helps to keep torque-steer to a minimum and helps to ensure that the handling retains its forgiving character even when the

vehicle is fully laden. This becomes an important safety factor when dealing with permissible gross vehicle weight as high as 2.94t.*

Rear-wheel drive also has a positive effect on Vito's turning circles – at just 11.8m (compact and long models) and 12.5m (extra long model) – they are reassuringly small. As well as enhancing handling, rear-wheel drive offers better climbing and traction characteristics than front-wheel drive because the driven rear axle takes the weight of the load. This characteristic is invaluable when moving off on a slope or towing a trailer.

Power is nothing without control. In addition to the drive concept, ADAPTIVE ESP® and the independent suspension also play a key role in the Vito's safe handling characteristics.

*The safety systems described in this brochure have been developed to enhance active safety and to help van drivers devote their full attention to the situation on the road. Despite their capabilities, these innovative assistance systems cannot defy the laws of physics and do not absolve the driver of the duty to drive safely. Vehicles shown may have non-standard options and colours available at extra cost.

Efficiency, reliability.

Cost-efficiency is essential when looking at a new vehicle. It's not just the purchase price you need to consider but everything else that comes after it. That's why our engineers have paid particular attention to those aspects of the vehicle that affect your hip pocket: like reliability, long service life and an engine that combines fuel economy with ample power reserves.

Servicing.

There is nothing better than the feeling of a brand new Mercedes-Benz. And a Mercedes-Benz service helps to keep your vehicle running like new. Factory-trained technicians, with the resources and backing of Mercedes-Benz, have the tools, the knowledge and the dedication needed for your Vito. A feature of the Vito is the CDI diesel engine, which owes its outstanding cost-efficiency to the low fuel consumption, long service life and long service intervals.

Warranty.

To make you feel more comfortable the Vito has a Mercedes-Benz factory-backed warranty for 3 years or 200,000km - whichever comes first.

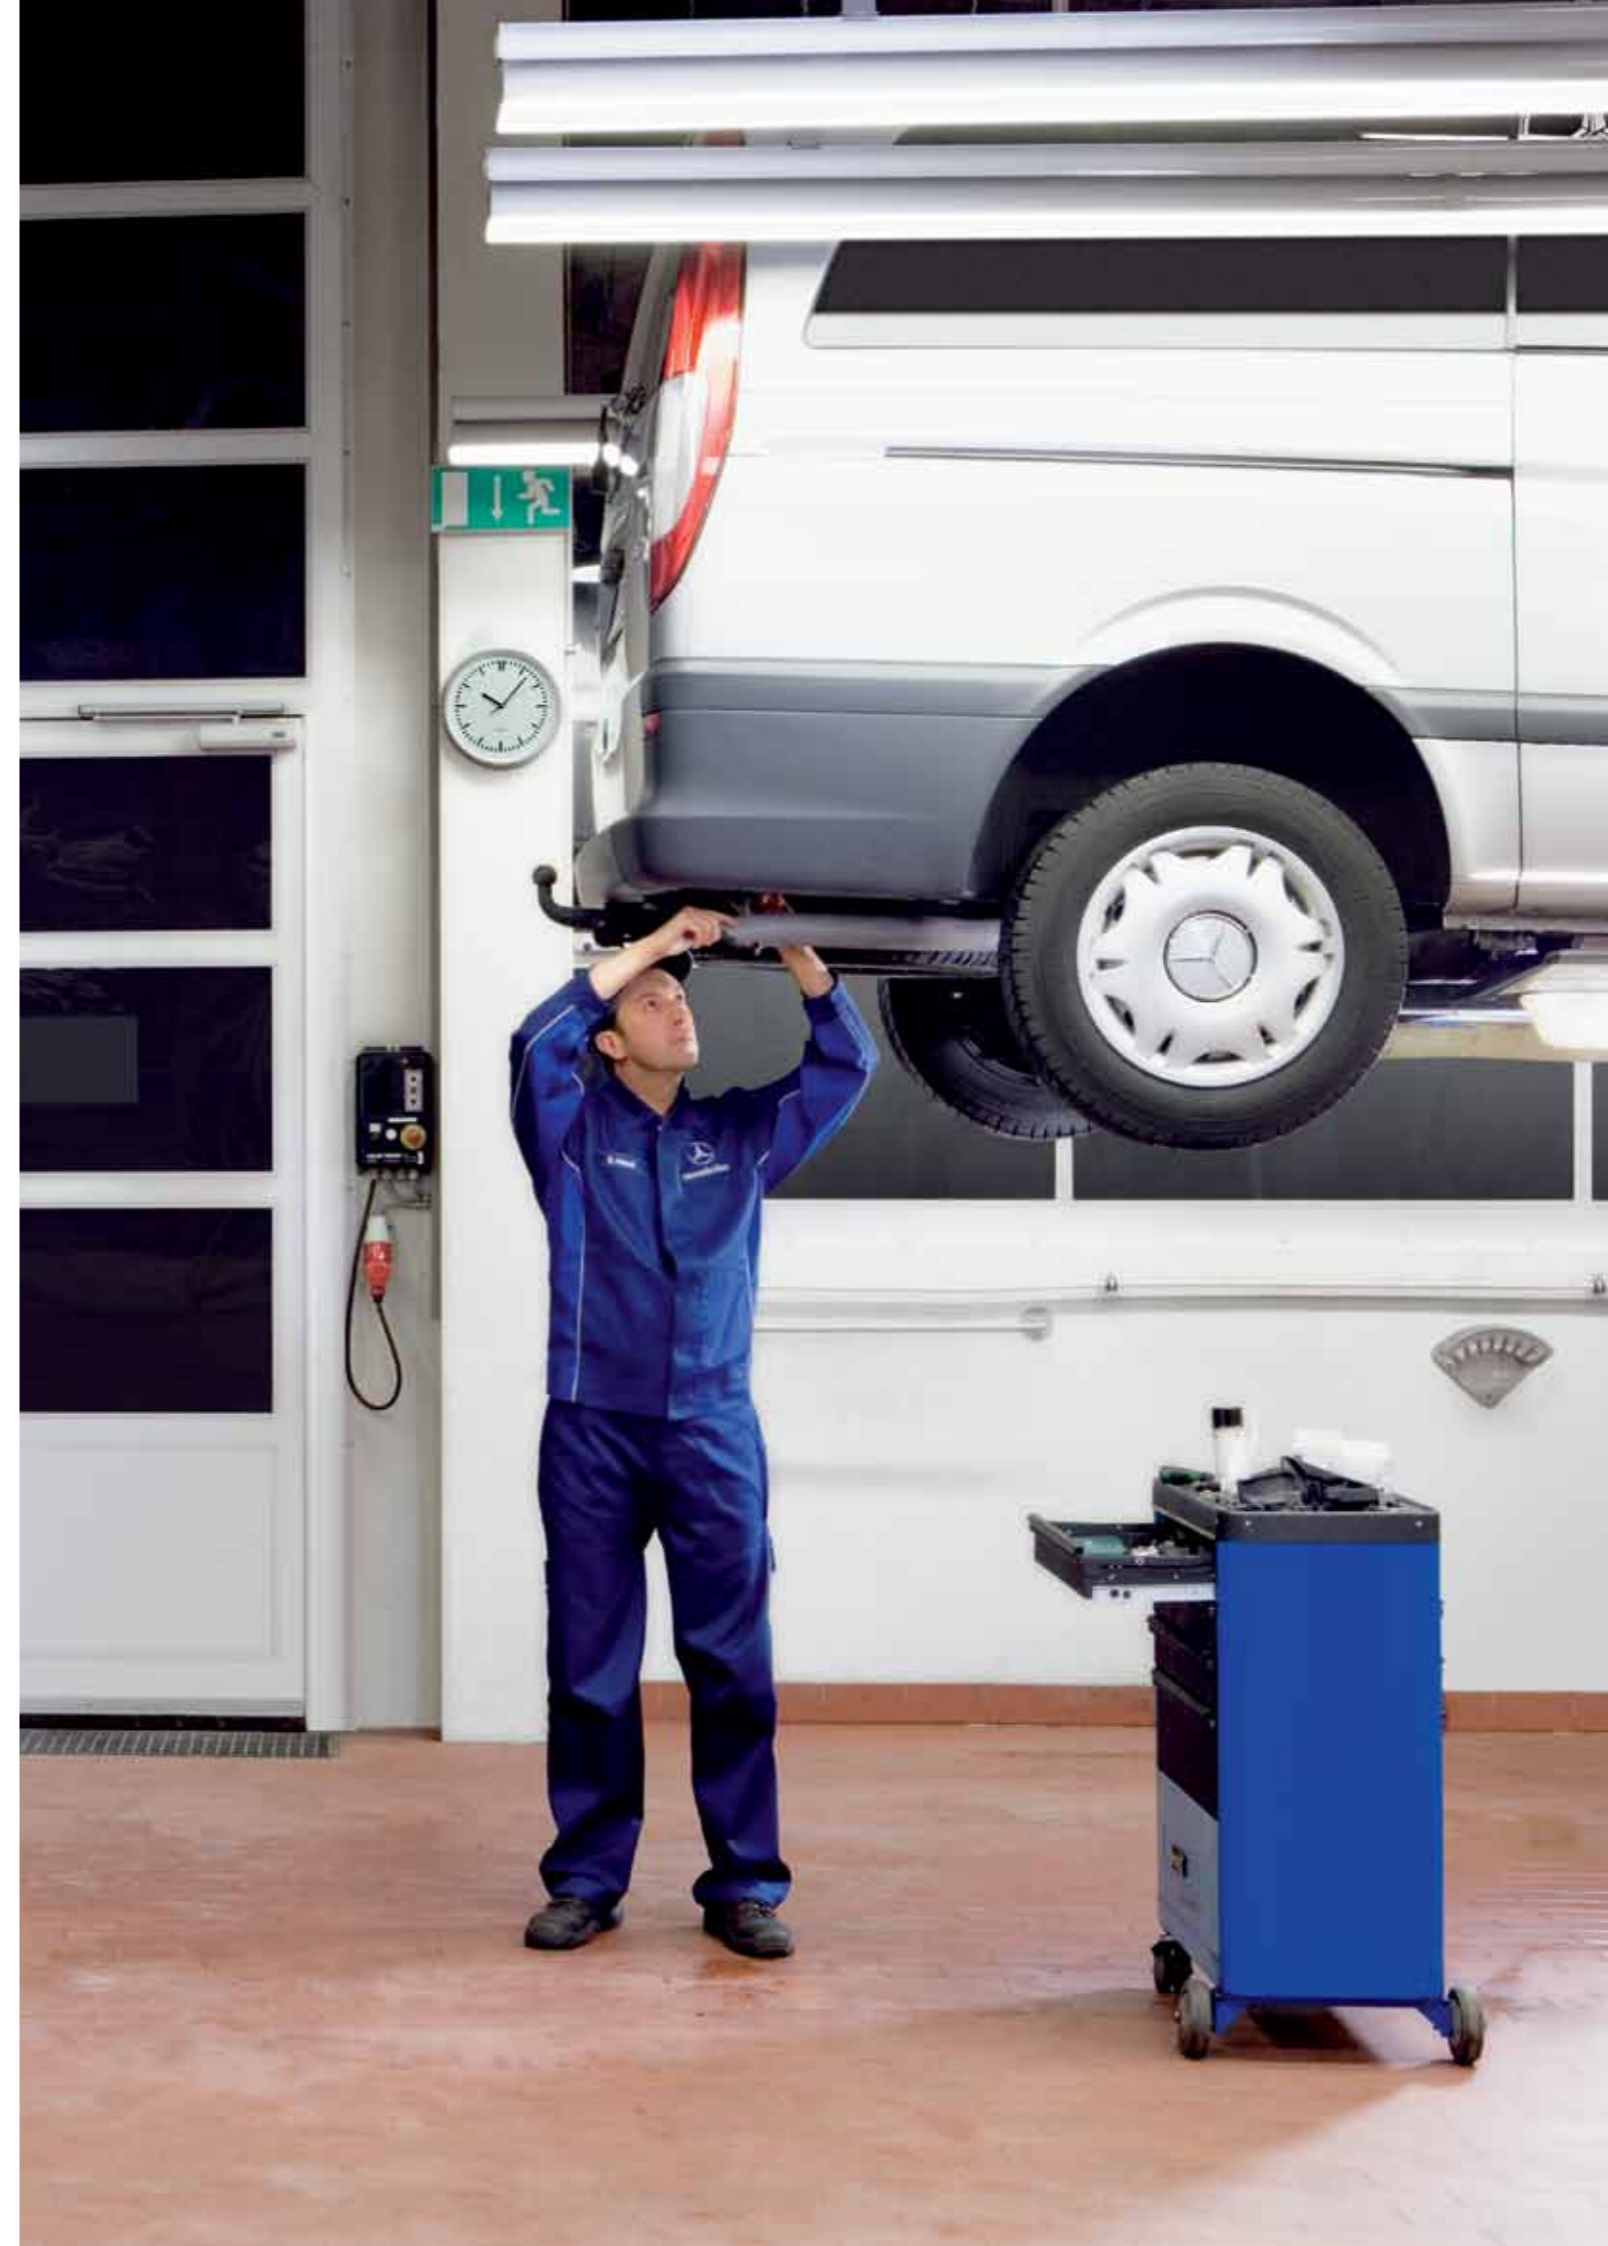

Dealer network.

With a national dealership network in over 60 locations around the country, you can hit the road with confidence, knowing you're not too far from Mercedes-Benz trained technicians and factory-approved spare parts.

Roadside assist.

In the unlikely event of needing assistance, all you have to do is call. And because we have a nation-wide dealer network, help is never far away. Mercedes-Benz Van Road Care is designed to provide you with assistance in case of a breakdown anywhere in Australia - 24 hours a day, 365 days a year. The standard Mercedes-Benz Van Road Care is available to the owner at no additional cost for the duration of the manufacturer's warranty period and can be upgraded* depending on your needs.

Vehicles shown may have non-standard options and colours available at extra cost. *Please note, some vehicles are excluded, please see Road Care brochure for full terms and conditions. Upgrades to the standard Road Care package are available at additional cost.

Tailored Insurance & Finance means Vito performs even better on paper.

If it's your dream to own a Mercedes-Benz Van, our tailored finance packages may help you achieve that dream. With flexible terms, competitive rates, and the assurance and backing of the Mercedes-Benz brand, Vito performs even better on the balance sheet as it does on the road. We can also help you protect your Mercedes-Benz Van, with our tailored insurance packages, which have been designed with you in mind. With new vehicle replacement (for van's deemed a total loss within three years of registration that have travelled less than 80,000km), safe driver discounts and authorised Mercedes-Benz repairers and parts, you needn't worry for a moment.

Finance Solutions.

We are part of the Mercedes-Benz family and our charter is to finance Mercedes-Benz vehicles. We know Mercedes-Benz Vans better than any other financier. We can offer fast finance approvals because we understand the van market. We offer a dedicated finance assessment team who appreciate the needs of Mercedes-Benz Van buyers and you benefit from competitive pricing, flexible finance contracts and no on-going monthly account-keeping fees.

Our finance products include:

- Operating Lease
- Asset-Hire Purchase
- Asset Loan
- Finance Lease
- Consumer Sale by Instalment

Mercedes-Benz Van Boss.

Specifically designed for customers who only need one or two vans for their business, Mercedes-Benz Van Boss is a guaranteed future value (GFV) product that gives you even more choice. So at the end of the contract term you can either return the vehicle with no further obligation, change the vehicle for a new model or buy the vehicle outright. As well as the flexibility offered at the end of the contract, Mercedes-Benz Van Boss also includes the vehicle finance price all scheduled 'A' & 'B' handbook services during the life of the contract, offering you complete peace of mind.

Finance GAP Cover.

In cases of 'total loss', the Mercedes-Benz Finance GAP product can help to cover the financial gap between the insured value of your vehicle and the total amount owed to your financier.

Finance Protection Insurance.

This policy covers your vehicle finance repayments if you are unable to work due to temporary or total disablement, involuntary unemployment or death.

Insurance Solutions.

What if something should happen to your new Mercedes-Benz Van? A bump? A scratch? An accident? What if you no longer needed to worry? It's reassuring to know that Mercedes-Benz Insurance helps to protect you and your assets, our insurance products can be partnered and financed as part of your finance solution, ensuring the complete Mercedes-Benz package.

Comprehensive Vehicle Insurance.

Mercedes-Benz Insurance provides the only policy specifically tailored for Mercedes-Benz vehicles and their owners. So you can rest assured that following an accident, your vehicle is restored with utmost care using genuine parts to maintain the safety, performance and value of your investment.

For further information regarding insurance and finance solutions from Mercedes-Benz Financial please contact your authorised Mercedes-Benz Van dealership or call 1300 730 200.

Mercedes-Benz Financial and Mercedes-Benz Insurance are registered business names of Mercedes-Benz Financial Services Australia Pty Ltd ABN 73 074 134 517, AFSL No: 247271 (MBFSAu). All finance products offered by MBFSAu are subject to conditions and standard credit assessment criteria. Mercedes-Benz Van Boss only available for new Mercedes-Benz Vito or Sprinter Vans (excl 4X4 Sprinter and Natural Gas Technology models) to approved business customers of MBFSAu financed with an Asset/Hire Purchase Agreement or Asset Loan (max 2 current contracts per customer). Please contact a participating Mercedes-Benz Vans dealer for details on the Schedule Servicing and Repurchase Agreement provided by MBFSAu (including Wear and Tear conditions and kilometre restrictions).
