370Z

SHIFT the way you move

Come on – you know you want to. The Nissan 370Z Coupe and Roadster are the new generation of sports cars, pure and simple. Direct descendants of the legendary 240Z of the 1960s, these cars are designed to raise the hair on the back of your neck; to make your pulse race; to reawaken your joy of driving. Whether you choose the Coupe or the new Roadster, you'll discover the ultimate expression of Nissan's philosophy of true performance, design and innovation. The 370Z will shift your expectations; it will shift your soul; it will shift the way you move.

Brilliant Silver Coupe and Bordeaux Roadster shown.

Monterey Blue Coupe shown.

Introducing the new Nissan 370Z Roadster. It may be roofless but it is just as ruthless. Featuring all the power, handling and style of the 370Z Coupe, the Roadster goes one step further with the opportunity to enjoy the exhilaration of open air driving. With the touch of a button, the roof stores itself in less than 20 seconds. To ensure that you will be driving like the wind and not against it, the car also features a tempered glass wind deflector to minimise cabin noise and turbulence.

Eau Rouge Red Roadster shown.

Just look at it. Here is a car that appears ready to pounce even before the engine starts. Yet its sleek, eager curves aren't merely for show. Every contour and every design element is focused on providing just one thing; a blistering, exhilarating, breathtaking performance. **The 370Z's aggressive stance** has been honed through decades of Nissan sportscar design and engineering. These cars are lighter than you would have thought possible, yet harbour an engine that provides an astonishing level of power. The result? A driving experience that leaves you open-mouthed and the competition grinding their teeth.

Shiro White Coupe shown.

Diamond Black Coupe shown.

Beneath this body, carefully crafted to cut through the air, is a raging heart. It is the VO37VHR 3.7 litre V6 – an engine with power and torque to spare. This is the latest generation of Nissan's celebrated VQ series – the most awarded V6 engine series in history. **The Nissan 370Z engine** is well prepared for any driver willing to take it on, with a formidable 245kW of power and 363Nm of torque.

Monterey Blue Roadster shown.

Shiro White Coupe shown.

The 7-speed automatic also offers the benefit of SynchroRev Match to smooth out gear changes. By selecting M-Mode, you can take full control and drive the car like a manual using convenient paddle shifters located behind the steering wheel. No matter which transmission style you choose, you will enjoy **razor-sharp responsiveness** as you guide the 370Z through that right-hander.

When it comes to controlling all this power, the Nissan 370Z gives you a choice of either a 6-speed close-ratio manual transmission or a 7-speed automatic with Manual Mode (M-Mode). The manual model includes a world first on a production vehicle – **SynchroRev Match**.

This technology automatically controls and adjusts engine speed when changing gears, essentially altering the throttle as the shift occurs to match the exact engine speed of the next gear position. Not only does this allow you to focus more on braking and steering, but it improves the vehicle's balance and smoothness by reducing the shock that can be experienced when the clutch is engaged. Naturally, the system can be deactivated at the press of a button for drivers who prefer less vehicle intervention.

A detailed view of the interior of a Nissan 370Z Coupe. The image shows the driver's perspective, with hands on the steering wheel and gear shift. The dashboard features a large touchscreen displaying a navigation map, a central infotainment system with a radio and CD slot, and various control buttons. The steering wheel has the Nissan logo and a 'Z' badge. The interior is dark with leather accents and illuminated gauges. The background shows a cloudy sky through the windshield.

You'll recognise the 370Z as a new breed of sportscar even before you climb in. Leave the Intelligent Key in your pocket and just push the button on the door handle to open it. Settle into the stylish leather sports seats, with non-slip cloth inserts, designed to hold you snugly as you take the curves. Now, press the engine start button to hear the vigorous burble of the 3.7 litre engine coming to life. The automatic headlights will come on to light up the road ahead. Adjust the 4-way power driver and passenger seats to get yourself comfortable and turn on the heated seats. Not sure where you're headed? Simply use the touchscreen to call up the **DVD Satellite Navigation**. Take a call with the Bluetooth® handsfree phone system – all the controls are conveniently located on the steering wheel, beside the audio, cruise and Satellite Navigation controls. Or fire up the BOSE® 6 CD in dash auto-changer; it will fill the cabin through 8 speakers including 2 subwoofers. Are 6 CDs not enough? Plug in your MP3 player or turn on the AM/FM radio.

Eau Rouge Red Coupe shown.

While you enjoy the thrill of taking the 370Z through its paces, others will have to be satisfied with merely watching. But don't feel too sorry for them; this car offers an abundance of pleasures for spectators too. A variety of graceful curves combine to provide the 370Z with its striking profile. The front and rear lights have distinctive styling which gives them a subtle aggressiveness. **19" Alloy wheels add an athletic elegance** to the car's contours, while the front underbody spoiler and rear spoiler on the 370Z Coupe work seamlessly with the rest of the design. At the front, powerful Xenon headlights stay sharp and clear thanks to headlight washers. Even the new Z badge side indicator lights are an understated reminder that this is no ordinary car.

Shiro White Coupe shown.

The 370Z is built on a platform that enhances handling, ride comfort and overall safety while reducing noise, vibration and harshness. All elements of design, construction and technology work in harmony to deliver **an extraordinary driving experience**. The double wishbone multi-link front suspension and independent multi-link aluminium-alloy rear suspension will have you gliding effortlessly around curves. As you apply pressure to the accelerator coming out of a corner, the Viscous Limited Slip Differential will ensure the rear wheels use the power wisely. You'll also find that it improves off-the-mark acceleration.

Naturally, with 245kW of power to harness, we have created the Nissan Premium Braking System to help keep you in total control. The front and rear **power assisted ventilated disc brakes** are massive – 355mm rotors at the front and 350mm at the rear. Meanwhile, the speed-sensitive hydraulic power steering alters the feel of the steering dependent upon your speed; a more direct, confident experience when driving at high speed, and a lighter, undemanding touch for easy manoeuvrability when parking.

370Z Coupe shown.

Clever storage solutions

Large accessible cargo area

Vehicle Dynamic Control (VDC) compares the actions of the driver with the current vehicle behaviour and selectively brakes individual wheels and controls engine power to help keep the car on its intended path. **Traction Control System (TCS)** limits tyre slip for safer driving. When the system senses one wheel is spinning faster than the others, it automatically reduces engine power and pumps that wheel's brake to reduce speed and lessen slip.

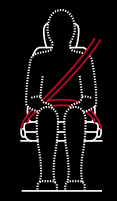

6 airbags. With dual front, dual side and dual curtain SRS airbags, the 370Z is well prepared to protect the occupants in the case of a front or side impact.

High performance protection

Pop-up engine hood. In the event of a collision with a pedestrian, the bonnet will automatically pop up to help minimise the impact.

Active headrests provide additional neck protection for the driver and passenger in the event of a rear collision, to minimise the chance of whiplash.

Seatbelt pretensioners with load limiters use sensors to determine the severity of a potential crash and instantly tighten accordingly. Should additional force be exerted on the seatbelt, the load limiters ensure appropriate give to reduce any damaging pressure on the torso.

Anti-lock Braking System (ABS), Brake Assist (BA) and Electronic Brakeforce Distribution (EBD) work together to help you retain control when braking, apply additional braking in an emergency situation and optimise control by sensing the load condition of both passengers and luggage.
