If the laden vehicle's mass is reduced as shown in the tables, the towball download can be increased correspondingly. Accordingly, if the laden mass of diesel variants is 410kg less than the GVM\*\*, a towball download of 300kg is approved. For petrol variants, if the laden mass is 260kg less than the GVM\*\*, a towball download of 200kg is approved. Different trailer types and different trailer manufacturers have varying towball downloads. The customer will need to contact the trailer manufacturer for information as to the download. Nissan is not able to make any recommendation on the use or suitability of load-levelling or weight distribution devices to be fitted to the vehicle. Customers should contact the manufacturers of these devices for further information.
