NISSAN PATHFINDER

THE ALL-NEW NISSAN PATHFINDER 7-SEAT FAMILY SUV.

Meet the all-new Nissan Pathfinder - the next-generation SUV, where every detail has been meticulously considered to deliver a new level of comfort, from premium interior through to the optimum ride. 7 seats as standard, an ingenious EZ Flex™ seating system for ease of configuration like never before, and a third row that's so spacious even Big Uncle Roy can slip in and out with ease.

A stylish, aerodynamic exterior with a distinctive ready for anything look compliments the genuinely inviting interior, including Tri-zone entertainment* and Tri-zone temperature control to ensure absolutely everyone is happy and comfortable. You also get an intuitive 4-Wheel Drive System,^ Continuously Variable Transmission (CVT) for seamless power, and a class-exclusive Around View® Monitor* to make parking safer and easier than ever.

Packed with clever innovations inside and out, it's designed to make every day driving a genuine pleasure for the entire family, no matter where they're seated. Welcome to the all-new Nissan Pathfinder, the ultimate 7-seat SUV for the modern family.

*Available on Ti model only. ^Available on 4WD models only. *Available on Ti model and ST-L model with option pack only.

EASIER COME, EASIER GO.

There is little point setting the exceptional standard of 7 adult-sized seats if your passengers can't easily hop in and out. Now you can leave awkward entries and exits behind you. Specifically developed for the all-new Nissan Pathfinder, the innovative EZ Flex™ Seating System, featuring Latch and Glide™ Technology, is designed to get your family in and out with the greatest of ease. Now it's a cinch to access the 3rd row – just lift a lever to activate the 2nd row seat's slide function, and hey presto, you've got a wide berth in and out. Most innovatively of all, you can do this without the hassle of having to remove your 2nd row child seat, which remains securely anchored as you move the row back and forth. It is of course important your child is not in the child seat when using Latch and Glide™ technology. Being relegated to the 3rd row is no longer a punishment, with easy access for absolutely anyone (by the way, the 3rd row seats are also reclinable!). And it's not just the seating configuration that's spacious, there's a wide and generous rear door opening making it even easier to get in and get on with your journey.

^Latch element of the Latch and Glide™ Technology requires ISOFIX compatible child seats currently not available in Australia. ISOFIX compatible child seats are subject to Australian Standard approval, refer to child restraint manufacturer for more information.

NOW EVERYONE KEEPS THEIR COOL.

Forget freezing up the front to ensure the kids stay cool in the back. For the complete comfort of everyone, the all-new Nissan Pathfinder has three spacious cabin areas that benefit from the Tri-zone Automatic Climate Control System. A tailored climate is available to the driver, front passenger and rear passengers. Individual area temperature controls and strategically placed air vents ensure everyone can enjoy their choice of either cool or warm air. There's also the added indulgence of heated^{*} and cooled[^] front seats. The Nissan Intelligent Key[®] not only unlocks all doors and opens the power lift tail gate,[^] it also defaults to your preferred navigation and climate settings, as well as returning the driver's seat, steering wheel and side mirrors to the driver's preference.[^] Add to that the combination of a front sunroof^{*} with manual sunshade and panoramic glass roof^{*} with power sunshade and you've got the best seat in the house no matter where you are.

OPEN UP A WORLD OF POSSIBILITIES.

Extra passengers means extra stuff to lug around. The roomy interior of the all-new Nissan Pathfinder isn't just tailor-made for passenger comfort, there's also a whopping 2,259 litres of cargo space when the 2nd and 3rd row seats are folded flat. Alternatively, the 2nd row splits 60/40, and the 3rd 50/50, to give you numerous options for carrying both passengers and awkward loads. Thoughtful and clever carrying solutions have also been included; 4 grocery hooks to keep your shopping bags upright, and 4 cargo floor hooks to keep loads secure. Apart from the actual cargo or 'boot' area itself, there's an ingenious under-floor storage area, with even more room to stow your stuff or keep valuables out of sight. It's easily accessed even when the 3rd row is upright, providing extra cargo space when you've got seven on board. All in all, a load of clever storage solutions to open up your options.

SAFER. SMARTER.

There's a range of intuitive technology from top to bottom in the all-new Nissan Pathfinder, starting with the Advanced Driver-Assist™ Display screen standard across the range. A 4" colour display fitted in the centre of the instrument cluster sits directly in front of the driver, and delivers a range of information from trip computer and fuel usage, to 4WD torque distribution.* Its intuitive 3-D view and tilt design helps you assess information at a glance and ensures you keep your eyes firmly on the road. The Tyre Pressure Monitoring System (TPMS) displays the individual tyre pressures and alerts the driver in the event attention is required. Plus there's also steering wheel controlled audio, cruise control and Bluetooth® hands free connectivity as well as push button start and keyless entry. The all-new Nissan Pathfinder gives you seamless control like never before. Brilliant.

*Available on 4WD models only.

HOME SCREEN Defaults to display settings and information most utilised by the driver namely: distance to empty and outside temperature.

FUEL EFFICIENCY AND ECONOMY METER Ability for the driver to review and monitor fuel consumption and driving efficiency.

ALL MODE 4x4-i SYSTEM DISPLAY* This screen will show 4x4 status as well as Front to Rear torque distribution.

DRIVER SETTINGS Personalise vehicle settings for fitted features and options that are applicable to that grade.

SURROUND YOURSELF WITH THE PERFECT VIEW.

Reverse parking is the bane of many a driver, but the all-new Nissan Pathfinder makes it easier and safer than ever before. Fitted as standard is a Reversing Camera, which drastically increases your field of vision, giving you a 130-degree side-to-side view, and a 92-degree top to bottom view. With predictive path technology and distance guidelines clearly displayed, you can reverse with confidence and nail just about any park. The all-new Nissan Pathfinder also has reversing sensors, which beep to let you know when you're too close to something. Standard on the Ti model (and an option for the ST-L model), is the Around View® Monitor[^] (AVM). This brilliant piece of technology actually gives you a 360-degree birds-eye view of the vehicle and its surroundings – you'll see almost everything in your vicinity, be it front, back or either side, all at the same time. A split screen displays both your AVM view and either the view from the rear, or front cameras. You can even utilise AVM to get a curb view. Not only does it make parking a breeze, it keeps anyone near your vehicle a whole lot safer. Add to that HDD Satellite Navigation^{*} and watch your stress levels dwindle away.

[^]AVM is a driver's aid only. It cannot completely cover blind spots, and may not detect moving objects. Always check surroundings before moving vehicle.

^{*}Available on Ti model and ST-L model with option pack only.

Ti model interior shown.

TRIPLE THE FUN.

Things have moved on a little since the traditional game of eye-spy on a long family trip. But even modern innovations can't stop the age-old arguments of who gets to choose what - except perhaps in the case of the all-new Nissan Pathfinder. With Tri-zone entertainment* offering loads of individual entertainment options, it really is possible to please all of the people, all of the time. The two monitors in the 2nd row can play individually, with the viewer's choice of DVD, video games (Did you hear that kids? You can plug your consoles in. Awesome.), photos, music and more, all controlled from the front audio system's 8" screen. This incredible system is brought to life with a fabulous Bose® 13 speaker audio system,^ complete with music harddrive and Bluetooth® audio streaming. With passengers in the back wearing wireless headphones, the audio system can be set to play in the front only, so you can all enjoy your choice of entertainment in perfect harmony. Hopefully, you won't hear a peep from the back for hours.

PERFORMANCE MEETS ECONOMY.

Get ready to experience an engine that offers no compromises when it comes to performance and economy. The all-new Nissan Pathfinder features the highly refined, latest incarnation of the VQ series engine – the most awarded V6 engine series in history. The refined drivetrain in the all-new Nissan Pathfinder is powered by a 3.5-litre V6 petrol engine, that, coupled with the highly efficient next generation Xtronic Continuously Variable Transmission (CVT), gives you fuel economy rated at 9.9l/100kms*. The new engine and CVT combination delivers 190kW of power and gives super responsive and fluid acceleration in all situations. Plus there's new multi-link rear suspension so you're in for the smoothest and most comfortable ride yet. The power doesn't stop there, as the all-new Nissan Pathfinder has an impressive 2,700kg** of braked towing capacity placing it amongst the best in its class*. Engage tow mode at the push of a button for smooth and consistent acceleration whilst towing. Boat, trailer, bike or caravan: you name it, it's got it covered.

*Figures have been calculated in accordance with ADR81/02 on 2WD models. Actual fuel consumption will vary depending on driving conditions, driver behaviour, the condition of your vehicle and the accessories fitted.

^Class refers to Large SUV <\$70K VFACTS Market Segmentation.

**Towing capacity is subject to towbar/towball capacity and is based on the fitment of a Genuine Nissan towbar. Towing capacity figure described is a maximum figure. Actual towing capacity depends on the laden mass of the vehicle, driving conditions, fitment of any accessories or towing equipment limitations including the maximum towball download.

CONFIDENCE AT YOUR FINGERTIPS.

Using the very latest all-wheel drive technology, the ALL MODE 4x4-i system* gives the all-new Nissan Pathfinder added stability and traction so you can revel in its agility, dynamic handling and the confidence that comes with it, for that genuinely fun to drive feel. Controlled by a rotary dial, easily accessible by the driver, the ALL MODE 4x4-i system can be easily switched between 3 modes while driving. In 2WD mode, 100% of engine power is transferred to the front wheels, ideal for normal driving conditions. If a loss of traction is sensed, the 4x4-i system will automatically engage 4WD to keep you in control. In AUTO mode, the ALL MODE 4x4-i system monitors all four wheels to distribute the ideal amount of torque between them. If front wheel slippage is detected, torque is transferred to the rear wheels. LOCK mode permanently engages drive power with a 50:50 torque split between the front and rear wheels, and operates when you're travelling below 40km/h. Above 40km/h, the system reverts to AUTO mode.

ALL MODE 4x4-i System.

HILL START ASSIST.

The all-new Nissan Pathfinder gives you the added confidence of Hill Start Assist, which delays the release of the brakes to help prevent the vehicle from rolling backwards as you release the brake pedal and apply acceleration, keeping you in control and putting you on very solid ground indeed.

*Available on 4WD drive models only.

PROTECTING YOUR MOST PRECIOUS ASSETS.

The all-new Nissan Pathfinder is fully equipped with the latest safety technology designed to keep you and your loved ones safe. With a superior array of safety systems, it has been awarded a 5-Star ANCAP safety rating, the highest possible. Across the range safety technologies are designed to assist in the prevention of collisions and to protect you and your loved ones should an accident occur.

6 AIRBAGS Dual front, dual side and dual curtain SRS airbags will protect the driver and ALL outboard passengers, 3rd row included, in the event of a front or side impact.

VEHICLE DYNAMIC CONTROL (VDC) Compares the actions of the driver with the current vehicle behaviour and selectively brakes individual wheels and controls engine power, to help keep the car on its intended path.

TRACTION CONTROL SYSTEM (TCS) To help prevent wheel slip on low friction surfaces, TCS responds by reducing throttle or applying brake pressure to help improve traction.

ANTI-LOCK BRAKING SYSTEM (ABS) In the event of an emergency situation, ABS modulates the brakes to help the driver maintain stability and steering control as well as preventing the brakes from locking.

BRAKE ASSIST (BA) AND ELECTRONIC BRAKEFORCE DISTRIBUTION (EBD) Brake Assist senses emergency braking and automatically helps to apply maximum braking pressure if needed. Meanwhile, Electronic Brakeforce Distribution automatically varies the braking force in accordance with load distribution to maximise stopping power.

my nissan

A complete ownership experience to help you get the most out of your Nissan. It includes the following:

3 YEAR/100,000KM WARRANTY

Receive assurance with a 3 year/100,000kms warranty with the option of extending further for up to 6 years.
