

Peugeot //

Partner

From professionals to professionals

When you choose the Peugeot Partner, you're choosing more than a simple van. You're buying a vision, Peugeot's vision, created to satisfy your specific requirements and meet all of your expectations: a vision of a totally original vehicle, designed to work for your business as well as your drivers.

This is based on real, practical benefits that will help you get the most out of your investment: carrying capacity, flexibility, driving pleasure, style and low running costs.

Carrying capacity: The Partner's load space boasts large capacity and is very easy to access. In the standard (L1) version, a cubic capacity of 3.3 to 3.7* m³ and a payload of 850kg, or in the extended (L2) version, a cubic capacity of 3.7 to 4.1* m³ and a payload of 750kg, will help you get the most out of your van, every day.

Modularity: Thanks to the innovative Multi Flex passenger seat (optional), the Partner offers even more flexibility and carrying capacity, making it the perfect business partner.

Driving pleasure: Comfortable to be in however long your journey, the Partner features an ergonomically designed driver's seat plus lots of storage spaces to make your working life easier. It's also very enjoyable to drive thanks to Peugeot's high quality, technologically advanced engines, combined with our renowned ride and handling.

Design: With its dynamic lines and rugged character, the Partner has all the style you could want.

Running costs: Economical petrol and HDi turbo diesel engines and robust build quality help to keep costs as low as possible. Looks like the relationship between you and your Partner, as two professionals, is destined to be perfect.

*With the optional Multi Flex passenger seat.

Style //

Partner.

It says as much about you as your business card!

Your professional vehicle is a little like yourself: it introduces you, marks your presence, represents you. To make the Partner as right for you as possible, Peugeot designed it with versatility in mind. Choose the model from the Partner range that best expresses your professionalism.

Partner (L1)

Partner (L2)

A range to meet every requirement

All professionals and organisations have different needs. That's why we've made the Partner available in a variety of specifications.

- **Body shapes**

Tailor your Partner to suit your business. Choose from two vehicle lengths, two load volumes and two load lengths.

- **Doors**

Choose your Partner's door layout to make getting your stuff in and out of the load space really straightforward.

Asymmetric hinged rear doors are standard across the range and the L2 version comes with twin side sliding doors. You can choose a left side or twin side sliding doors on the L1 as an option.

Modern and dynamic style

From the moment you lay eyes on the Partner you know it means business.

Its tough yet dynamic style suggests strength, confidence and capability,

and its wraparound lower front panel and purposeful front grille are designed to make both you and your business look good.

Dimensions //

Space to suit the way you work

Small enough to be handy and agile, yet hugely accessible and big enough inside to take whatever you throw at it, the Partner is your ideal workmate. At the rear, the asymmetric hinged doors ensure easy loading, and you can make this job even simpler if you choose the optional sliding side doors (standard on L2). The mid

height rear lights are positioned well above the impact zone, protecting them from the majority of low speed knocks. Lastly, door hinges concealed behind the lights are just another example of the attention to detail, quality and aesthetics that have gone into the Partner.

Two available lengths

Need a bit more room? The Partner comes in two lengths, the 4.38m standard model (L1) or, with an extra 25cm on the rear overhang, the longer 4.63m (L2). Both models are 1.8m wide with the door mirrors folded

(2.1m including door mirrors). Plus, as the wheelbase on the longer model is the same as the standard model, it gives you extra space without compromising on the handling.

Two possible payloads

The Partner offers two payloads. 850kg on the standard model (L1) which is among the best in its class.

The payload on the L2 (extended) model is 750kg.

Carrying capacity //

Space designed for you and your business

More room inside

The load space available in the Partner is up there with the best in its class – there's enough room to carry a standard pallet. The load length ranges from 1.80m to 3m* on the standard L1 model and from 2.05 to 3.25m* on the longer L2 model. The Partner also boasts a maximum load width from 1.5m (with two sliding doors fitted) to 1.62m (without side doors) and a width between the wheel arches of 1.23m.

A very accessible load space

Loading your van shouldn't take up half your day, so we've designed the Partner to help you out as much as possible. The low load sill makes for easy access even when you're carrying heavy items, and the asymmetric hinged rear doors open to an angle of 180°, making it simple to access the generous load area – even with a forklift.

Adaptability second to none

Once you've loaded your Partner, you want peace of mind that your cargo is stored securely. On the floor, 6 tie down hooks are fitted as standard to stop loads moving around. In addition, the Partner offers two bulkheads: the standard driver's ladder frame protector or a half height bulkhead with removable upper mesh grille.

*With optional Multi Flex passenger seat.

Internal dimensions	L1	L2
Payload	850 kg	750 kg
Volume	3.3 to 3.7m ³ ***	3.7 to 4.1m ³ ***
Load length (to the seats)	1800 mm	2050 mm
Load length (with the Multi Flex passenger seat)	3000 mm	3250 mm
Maximum load width	1620 mm*	1500 mm**
Width between wheel arches	1229 mm	1229 mm
Maximum load height	1250 mm	1250 mm

*without sliding side doors.

** with two sliding side doors.

*** with the Multi Flex passenger seat retracted.

Bulkheads

1. Driver's Ladder Frame Protector

Loads occasionally move around during transit, so a 5 bar protective ladder is situated behind the seat as standard to protect the driver.

2. Half height bulkhead with upper mesh grille

This configuration includes a half height bulkhead with upper mesh grille, available as an option for added cabin protection.

3. Rear door lock

If you need to carry an awkward load, you can drive with the large rear door locked shut and the small door open.

Loading aids

3

*without sliding side doors.

Flexibility //

Convenience with the innovative Multi Flex passenger seat

Choose how you use the Partner's interior space to stay one step ahead. Its unique modular Multi Flex passenger seat, available as an option*, allows you to increase your load capacity and storage length by using the passenger seat area.

For example, the side seat folds completely flat to free up a continuous flat floor, which runs the length of the van. Your Partner can then accommodate loads up to 3m long (3.25m on the long model) and 10cm high.

* at extra cost.

The cushion of the side seat can also be raised to allow tall loads to be carried in the cab area.

And if you need to make notes or catch up with paperwork, the backrest of the middle seat converts into a handy writing table, while lifting up the seat cushion provides access to a hidden storage space.

1. Thanks to the Multi Flex passenger seat, plus a central seat for occasional use, the Partner can seat up to three people.
2. The side seat retracts fully. Long loads can be slid easily into place without encountering any uneven surfaces.
3. When folded, the backrest of the central seat converts into a flat working space with a strap to hold documents.
4. The cushion of the side seat lifts completely to carry tall loads.
5. The cushion of the central seat hides a storage space underneath which can be equipped with a padlock (not supplied).

Standard front seat configuration

The Partner is designed to help you work on the go. The passenger seat offers the same comfort and support as the driver's seat, and this seat's backrest can fold when needed to create a useful writing table. It also contains two handy cup holders in the folded down position.

Comfort //

Work in complete comfort

We've designed the Partner with the comfort of driver and passenger in mind, creating a modern work environment with high-performance features.

Convenience

Running a commercial vehicle no longer means you have to compromise on your driving enjoyment and comfort.

A trip computer is equipped as standard, and the follow-me-home lighting and electric door mirrors add a touch of convenience.

What's more the cruise control lets you maintain a constant speed without having to use the accelerator, while the speed limiter can restrict your speed to a pre-programmed level.

If you spend a lot of time in the city, the Partner can be equipped with an optional rear parking aid. It's very handy when you're manoeuvring in tight spaces or parking in narrow spots.

Visibility

With its wide, raked windscreen and large, sloping headlights, the Partner offers maximum visibility for driver and passengers.

Comfort

You shouldn't have to sacrifice comfort just because you're working. Thanks to its efficient suspension, the Partner is a fluid, comfortable drive whether the vehicle is loaded or empty. The electric windows and central locking are useful for both driver and passengers. Lastly, the interior noise level is kept pleasantly low, thanks to the fact that the engine and chassis are insulated from the rest of the passenger compartment.

High-performance audio equipment

OK, you're at work. But that doesn't mean you can't enjoy yourself. The Partner is an entertaining place to be, with a modern audio system and digital communication equipment.

MP3 compatible RD4 audio system
Featuring two speakers located in the front doors, the Partner's RD4 audio system has an output of 4 x 35 watts, separate adjustments for bass, treble, balance and fader, and an MP3 compatible CD player and a radio tuner with 18 memory presets.

Bluetooth® hands-free kit*
Keep your hands on the wheel with this optional hands-free kit. You can hold a conversation without removing your Bluetooth® compatible GSM mobile phone from your pocket, using the steering wheel mounted controls and the microphone incorporated in the courtesy light console.

*optional at extra cost.

Numerous cleverly placed storage areas

The Partner is full of ingenious storage ideas. Indeed the total available storage volume can be as much as 61.5 litres, meaning there's more than enough room for all your essential bits and pieces.

Driver's glove box
The fascia panel of the Partner incorporates an easily accessible glove box behind the instrument cluster with a volume of 4.1 litres, making it

perfect for maps, notebooks or even your coffee flask.

Storage under the driver's seat
If there are items you always need to have close at hand, a storage drawer is available under the driver's seat.

Overhead storage
Overhead storage in the roof with a total volume of 12.5 litres is perfect for storing A4 sized documents and folders.

Engines //

Flexible and dynamic driving with the Partner

All of Peugeot's engine and road holding know-how has been incorporated into the Partner. By offering the choice of one petrol engine and two diesel engines, the Partner gives you the opportunity to find the vehicle that exactly matches your needs, whatever your business.

1.6 litre 16V 66kW

Dynamic to drive yet set up for great economy at lower speeds, this new engine offers a winning compromise between performance and running costs.

1.6 litre HDi turbo diesel 55kW

The entry level model in the diesel engine range, this unit comes with second generation "Common Rail" injection and offers remarkable

economy to cost-conscious businesses. With plenty of torque available from the very lowest engine speeds, this engine combines very good load carrying capabilities with reduced running costs.

1.6 litre HDi turbo diesel 66kW

The heart of the range, this efficient diesel engine offers excellent torque whether you're in town or on the open road. Always a capable

performer, it offers liveliness when moving off, good acceleration through the gears, and a dynamic drive regardless of load.

Running costs.

If you're keeping an eye on your budget, the Partner makes an extremely cost-effective employee. The advanced HDi engines are highly fuel efficient and have low CO₂ emissions.

If you drive a lot in the city, you'll know that small day-to-day knocks are an occupational hazard, but the wide wrap around bumpers, side protection mouldings and high level rear light clusters make the Partner highly resistant to low speed impacts.

Performance			Fuel consumption (L/100km)				CO ₂ Emissions (g/km)
Engine	Maximum power (kW at rpm)	Maximum torque (Nm at rpm)	Engine	City	Highway	Combined	Combined
1.6 litre 16V	66 @ 5800	132 @ 2500	1.6 litre 16V	10.8	6.8	8.2	195
1.6 litre HDi	55 @ 4000	185 @ 1750	1.6 litre HDi	7.0	5.1	5.8	153
1.6 litre HDi	66 @ 4000	215 @ 1750	1.6 litre HDi	7.0	5.1	5.8	153

Intelligence that protects

The Partner is a small van for today's business user, offering a comprehensive range of modern equipment designed to improve the safety of both driver and passengers.

Anticipation (active safety)

• Braking

With two ventilated discs at the front (283 mm) and two non-ventilated discs at the rear (268 mm), the Partner offers high performance braking under all road conditions.

• ABS

The anti-lock braking system (ABS) helps you to control the vehicle during emergency braking by preventing the wheels from locking.

• EBFDD

Electronic Brake Force Distribution (EBFDD) controls braking wheel by wheel to maximise stopping performance, particularly when cornering.

• EBA

Emergency Brake Assist (EBA) helps reduce stopping distances to a minimum by amplifying the pressure applied to the brakes.

• Automatic activation of the hazard warning lights

If you have to pull up sharply, the hazard warning lights will come on automatically to warn vehicles behind you.

• ESP

Available as an option, ESP (Electronic Stability Program) anticipates potential under- or over-steer and helps you to maintain control of the vehicle's steering.

• ASR

As part of the ESP option, traction control (ASR) prevents wheel slip in the event of loss of grip.

Protection (passive safety)

• Front impact

The Partner has been designed to protect driver and passengers. In the event of a front impact, the integrity of the passenger compartment is assured by three impact absorption structures; lower, medium and high. These are designed to gradually absorb impact energy, channelling it from the front to the rear of the vehicle.

• Side impact

In the event of a side impact, energy is channelled and absorbed through the vehicle's subframe.

• Rear impact

The Partner is designed to deflect and absorb energy in the event of a rear impact thanks to crumple zones

and subframe components which help to contain the impact to the rear of the vehicle.

• Rollover

The passenger safety cell is safeguarded in the event of a rollover thanks to the vehicle's exceptional body strength.

• Protection of pedestrians

Vans often spend a lot of time in towns and cities, so pedestrian safety is high on Peugeot's agenda. The structure of the Partner has been designed to reduce the effects of an impact with a pedestrian as far as possible.

• Steering column

The steering column retracts over a distance of 40mm in the event of a collision to provide maximum safety for the driver.

• Restraint systems

All the seats in the Partner are equipped with three point seat belts. The belts are height-adjustable, with pretensioners and force limiters (please note that if the Multi Flex passenger seat is fitted, the three point seat belt for the central seat does not have these features).

• Fasten seat belt indicator

An indicator and an audible alarm warn the driver if his/her seat belt is unfastened.

• Head restraints

The backrest of the seats and head restraints have been designed to follow the movements of the body in the event of impact, thereby reducing as far as possible the effects of a collision.

• Airbag

The Partner is equipped with a driver's airbag, helping to protect in the event of a frontal collision. A passenger airbag is available as an option.

Theft protection

People who drive vans often keep valuable tools, equipment or goods in them. The Partner has also been designed to offer peace of mind with high levels of vehicle protection and security.

• Remote central locking

The Partner is equipped with a three-button remote control, allowing you to lock or unlock the vehicle, or the load space only. And once the vehicle exceeds 10km/h all the door locks are activated automatically.

• Selective locking

If you wish to leave the cab unlocked while the cargo area remains securely locked, you can do this by using the button located on the fascia panel. The status indicator on this button also tells you whether the load space is open or locked.

Choose //

Accessories

Peugeot Accessories are designed specifically for each model, which means there are no compromises on fit or function. In addition, they are tested to our own high standards giving you complete confidence and piece of mind. Peugeot Accessories help equip your Partner van with all the comforts you'd expect of a mobile office. Your Peugeot Dealer can also assist you in selecting the fitout best suited to your business.

Roof bars and a wide range of roof mounted accessories let you carry additional loads with complete safety.

Peugeot and You //

Peace of Mind

When you choose Peugeot, you have the reassurance of knowing that your vehicle has been designed and manufactured to give you years of worry-free motoring. Our commitment to you continues after purchase and is embodied in the Peugeot AfterCare program. You can rest assured that everything you'll ever need for your vehicle is covered, from accessories and servicing to parts and warranty. The Peugeot Assistance card you are provided with is a key part of AfterCare, as is the reassurance of having a dedicated network of Dealers Australia-wide with specialist factory trained technicians to look after you and your vehicle. AfterCare demonstrates that we care for your Peugeot as much as you do, and ensures the quality of your ownership experience lasts long after you've left the showroom.

Driving down the cost of servicing

Peugeot has passed on the benefits of technology in engine design and lubrication by extending major service intervals. Peugeot Light Commercial Vehicles require minor servicing at 15,000km intervals which consist of an oil and filter change followed by a major service every 45,000km. Peugeot's Light Commercial Vehicle service intervals are designed to save you time and money by reducing the time spent in the maintenance bay and requiring fewer service visits. While Peugeot can reasonably predict the maintenance needs of the engine and other major components, the wearing of certain components such as tyres and brake pads is less predictable and subject to driving conditions.

3 year / 100,000km warranty

Should any part of the vehicle require repair or replacement as a result of a manufacturing or material defect within the warranty period, the part will be repaired or replaced completely free of charge by your authorised Peugeot Dealer, regardless of any change of ownership during the period covered. The warranty

does not cover items replaced during normal service and maintenance operations and which are subject to wear and tear. During the period you will also automatically receive Peugeot Assistance.

6 year anti-corrosion warranty

Peugeots are renowned for their durability and longevity. This is due in part to the sophisticated measures which are taken during the vehicle's production process to optimise long-term protection from the elements. Peugeot backs this advanced technology with a 6 year warranty against corrosion-perforation of your vehicle's bodywork.

Peugeot Assistance

Peugeot Assistance has been designed to give you total peace of mind. You can drive your Peugeot with the security of knowing that one phone call delivers help Australia-wide, at any time of the day or night. You and your Peugeot will be back on the road as quickly as possible, with minimum inconvenience. Every Peugeot is delivered with three years' complimentary roadside assistance – for the complete period of your new vehicle warranty.

Peugeot Genuine Parts

If your van is in for a service or repair, the parts required to keep it on the road are Peugeot Genuine Parts. Using specifically designed and manufactured parts ensures your Peugeot can operate at peak performance at all times. Only Peugeot Genuine Parts preserve the original integrity of the vehicle. They are guaranteed to be of the same quality as the original component and are backed by a 12 month unlimited kilometre warranty. It's not a Peugeot without Peugeot Genuine Parts.
