KOLEOS

DRIVE THE CHANGE

A TRUE 4X4 PEDIGREE

Overseas model shown

Koleos packs real 4x4 ability to take all types of terrain in its stride. Its high approach and departure angles, high ground clearance and intelligent, electronically-controlled transmission allow it to revel on even the most challenging surfaces – mud, dirt, snow, ice. Its All-Mode 4x4-i transmission and ESP (Electronic Stability Programme) combine to constantly optimise grip by delivering just the right amount of torque to each wheel, while the '4WD Lock' mode ensures that you stay in control in extreme conditions by evenly distributing torque front and rear for maximum grip and safety.

Steep slopes don't stop Koleos. The automatic Hill-Start Assist (HSA) function (4WD only) automatically deploys on slopes of 10% or more to ensure smooth take offs every time, with no rolling back and with no need to use the parking brake. Similarly, Koleos' Hill Descent Control (HDC) function (4WD only) with the 'lock' transmission mode selected, stabilises the speed of Koleos at 7km/h, enabling steep downhill slopes to be negotiated in safety without the need to use the brakes.

Overseas model shown

KOLEOS 4X2

THE ON-ROAD OFF-ROADER

The Koleos 4X4 is extremely capable off the beaten track. With technology such as All-Mode 4x4-i transmission, Hill Start Assist, Hill Descent Control making difficult off-road expeditions simpler and safer than ever before.

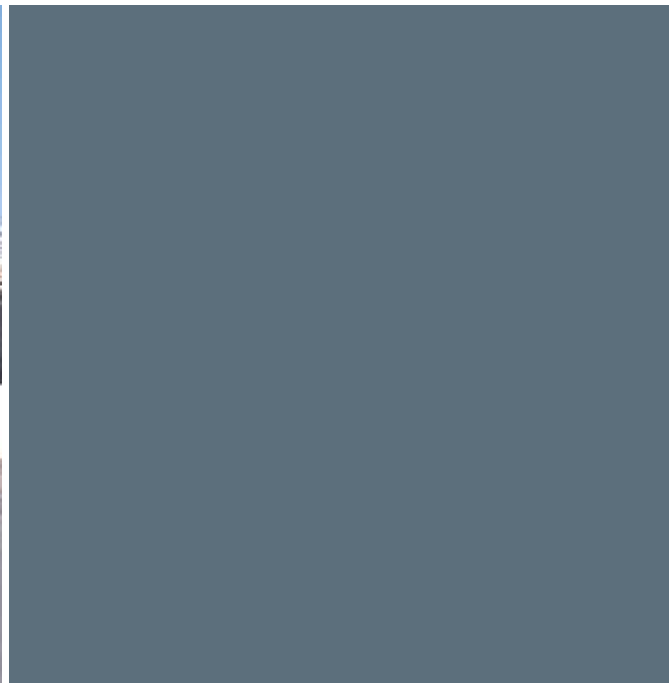

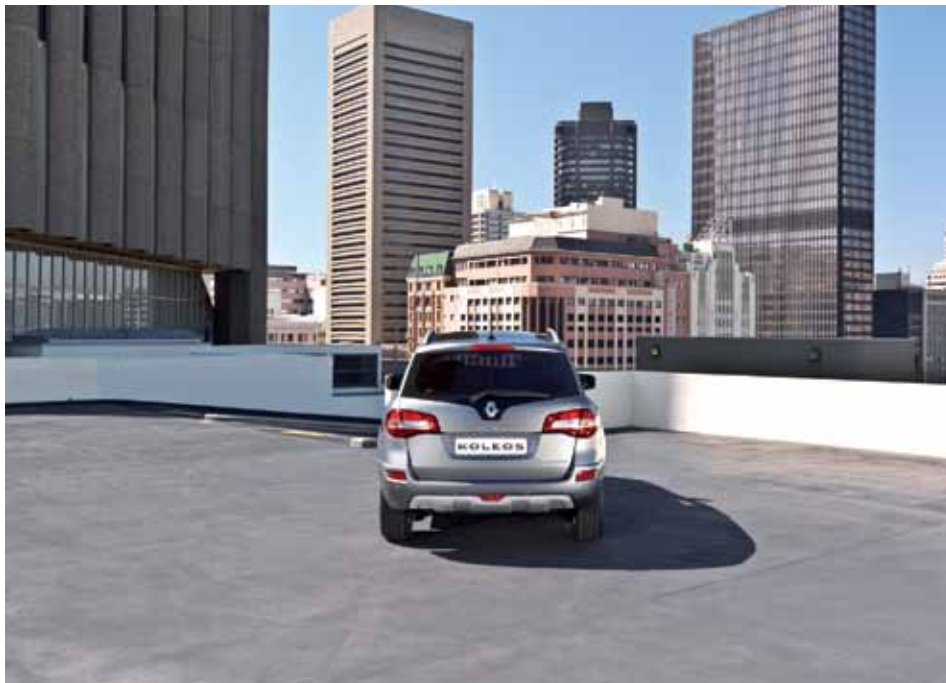

But not everyone wants to go where no man has been before.

Many people want safety, a roomy interior, the increased vision an SUV offers and a car that can take on the challenges of the daily life... without having to climb mountains.

Enter the Koleos 4x2.

Powered by a 2.5L petrol engine the Koleos 4x2 is the Ultimate Suburban Vehicle.

Boasting all the design, safety and practical benefits of the Koleos 4x4, the Koleos 4x2 is an exciting alternative.

TECHNOLOGY

1. 4X4 TRANSMISSION

A choice of three modes

- **AUTO mode** (default mode when starting). The All Mode 4x4-i system guarantees best possible traction in all conditions by permanently optimising the torque split to the four driven wheels: those which benefit from the most grip receive more torque.

- **LOCK mode**: In more difficult conditions, and at speeds of less than 40km/h, torque is evenly distributed to the front and rear wheels, allowing Koleos to showcase its 4x4 ability.

- **2WD mode**: The two-wheel drive mode is ideally suited to dry roads or highway driving.

2. SATELLITE NAVIGATION SYSTEM AND RADIO/MP3 CD WITH RDS AND BLUETOOTH HANDS FREE CONNECTIVITY

A fully integrated Satellite Navigation, Radio/ MP3 CD (with auxiliary & USB input) and Bluetooth Hands Free system featuring voice guidance, highly developed voice recognition, 2D/3D mapping and dynamic intersection views displayed on an ultra-fast 7" 16:9 ratio full colour screen. Safe and convenient fingertip control using the console joystick and steering wheel mounted remotes.

3. BOSE® SOUND SYSTEM (PRIVILEGE ONLY)

Specially designed for the acoustics of Koleos' cabin, the Bose® sound system – comprises a digital amplifier, seven loudspeakers and a woofer – delivers sound of an exceptionally high quality.

COMFORT

1. SUNROOF (OPTIONAL ON DYNAMIQUE)

The vast electric sunroof ensures a brightly lit cabin and a panoramic view of the world overhead. The front part of the sunroof opens and both parts are equipped with adjustable sunblinds.

2. CRUISE CONTROL WITH SPEED LIMITER

The cruise control with speed limiter enables you to pre-select a cruising or maximum speed. The chosen speed can be adjusted by a steering wheel-mounted control.

3. SUNBLINDS

Passenger comfort is enhanced by retractable sunblinds incorporated in the rear doors.

4. RAIN AND LIGHT SENSORS

The front wipers are automatically activated and their speed adapted as a function of the amount of rain falling.

The headlamps are automatically switched on by a light sensor in the dark or when entering a tunnel.

5. CLIMATE CONTROL

The dual-zone automatic climate control permits each front passenger to adjust the temperature to their individual requirement. Rear passengers can also choose the ideal setting thanks to the vents control located at the rear of the centre console. A carbon filter protects passengers from pollen, dust and odours.

6. RADIO CONTROLS

Practical fingertip steering wheel-mounted remote controls allow you to scroll through the main audio menus.

SAFETY

1. EURO NCAP

Renault, the only car manufacturer to have 12 vehicles awarded 5 stars in the Euro NCAP crash tests

2. ESP

The Electronic Stability Programme (ESP) constantly controls the grip provided by each wheel to optimise cornering stability, notably in wet conditions.

3. EMERGENCY BRAKE ASSIST (EBA)

EBA reduces stopping distances by automatically applying the car's full braking power in an emergency situation.

4. AIRBAGS AND REINFORCED STRUCTURE

The structure incorporates programmed crumple zones engineered to absorb a proportion of impact energy in an accident. Occupants are further protected by a package of six airbags, with front and side airbags for front passengers, plus front/rear curtain airbags.

5. FRONT AND REAR PARKING PROXIMITY SENSORS (PRIVILEGE ONLY)

Proximity sensors facilitate parking by warning you of the presence of obstacles in front of or at the rear of the car. Audible beeps become faster the closer the vehicle gets to such an obstacle.

6. CHILD MINDER MIRROR

It enables the driver to see passengers in the rear without having to adjust the rear view mirror.

MODULARITY

1. MODULAR INTERIOR

According to your needs of the moment, the 60/40-split rear seat can be folded to form a flat floor. Items of up to 260cm in length can be carried by tipping the front passenger seat back forward. (Modularity pack*)

2. SKI FLAP

The central rear armrest incorporates a ski flap. With the armrest removed, a snowboard can be carried.

3. EASY ESTATE SYSTEM (MODULARITY PACK)

To free up additional load carrying capacity, easy-to-access levers in the boot or by the rear seats permit the 60/40-split rear seats to be folded forward, either individually or together.

4. REAR UNDERFLOOR STORAGE

The rear incorporates two discreet five-litre underfloor storage spaces.

5. CENTRE CONSOLE

The 7.3 litre multi-purpose centre console cubby houses a removable bin (Modularity pack) which is ideal for tidily storing your favourite CDs.

6. DRAWER (MODULARITY PACK)

A drawer at the rear of the centre console and accessible from the rear seats offers a further 2.3 litres of storage.

*The modularity pack is optional on Dynamique, standard on Privilege.

EQUIPMENT LEVELS

DYNAMIQUE

The charcoal colour scheme of the Dynamique Pack version's sporty interior combined with chrome-effect trimming, medium-charcoal cloth upholstery (1-3) and leather-trimmed steering wheel and gear lever knob. Koleos Dynamic Pack sits on stylish 17-inch Oasis wheels (2).

EXPRESSION

Koleos Expression is the latest addition to the Koleos range. It represents an outstanding value, yet it does not compromise on safety nor driving comfort. Koleos Expression comes with 17" Fidji alloy wheels.

Overseas model shown

4

Overseas model shown

PRIVILEGE

Black hues dominate inside the luxuriously-appointed Privilege version which features leather-trimmed upholstery. (Beige leather optional.)

The 17-inch aluminium alloy Sari wheels (5) underpin Koleos' natural elegance. Marking a first at Renault, the Bose® sound system has been carefully matched to the characteristics of Koleos' cabin to deliver a hi-fi experience of a quality identical to that of the car itself (6).

Centre console with Carbon fibre effect (7).

7

POWERTRAINS

AUTO ADAPTIVE

AUTOMATIC TRANSMISSION

This six-speed transmission offers you a choice between fully automatic or flick-shift modes for dynamic performance in and out of town, enhanced acoustic comfort and low fuel consumption on highways.

MANUAL GEARBOX

The six-speed manual gearbox ensures precise, smooth gearshifts for heightened driving enjoyment. The sixth gear minimises fuel consumption and CO2 emissions.

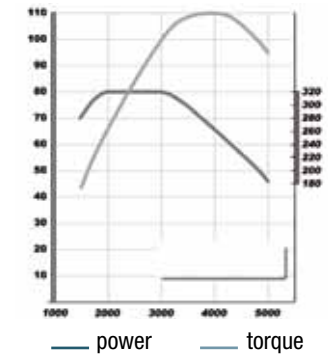

CONTINUOUSLY

VARIABLE TRANSMISSION (CVT)

CVT is an automatic gearbox which constantly optimises engine speed and torque to the economy/speed equation dictated by the driver. It is a computer controlled, seamless transmission. It provides virtually limitless number of gear ratios for smoother acceleration. This places the accent very much on comfort and fuel economy.

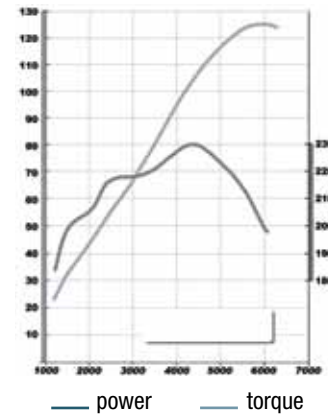

2.0 dCi 110kw (AUTOMATIC)

With a maximum torque of 320Nm, this particle filter-equipped engine combines performance with low fuel consumption and acoustic comfort.

2.5 16V 126KW (MANUAL AND CVT)

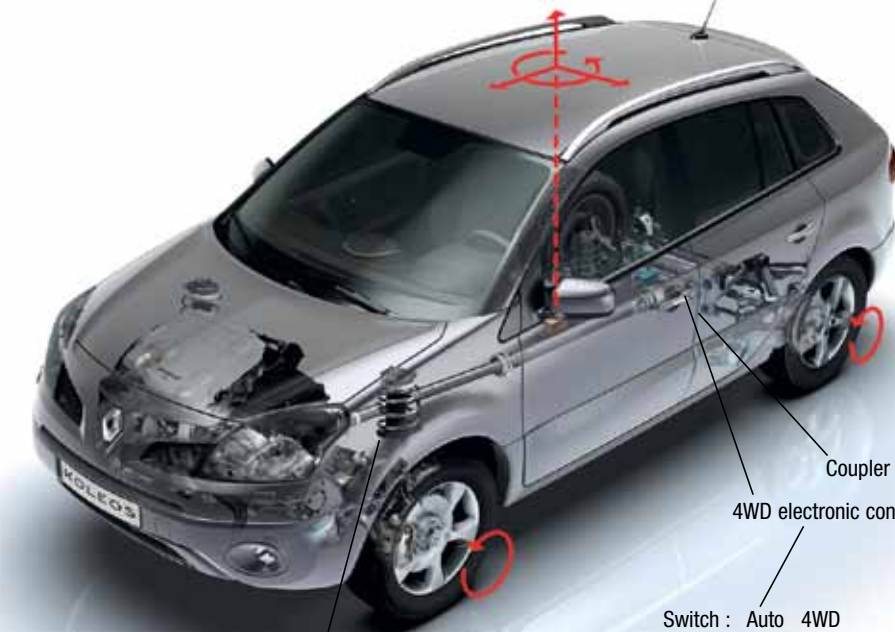

Maximum torque of 226Nm makes this punchy and responsive engine particularly enjoyable to drive.

Longitudinal acceleration, lateral acceleration and yaw rate sensors

ALL MODE 4X4-i TRANSMISSION

The transmission system of Koleos features an electronically-controlled differential coupler and a choice of three modes depending on running conditions ('Auto', 'Lock' and '2WD').
