

SX4

SEDAN

Way of Life!

Life just works in an SX4 Sedan.

This is the sedan that literally takes small cars to a new level. A new level of refinement. A new level of spaciousness. Striking the perfect balance between driveability, sleek styling, comfort, space and safety. With an impressive list of sophisticated features and a spaciousness that's capped off by one of the biggest boots in its class, no wonder life just works so well in a SX4 Sedan.

A powerful efficient engine

The SX4 sedan now features a more powerful 2.0 litre engine (112kW), that's also more economical with fuel efficiency of just 7.3L/100km*. An engine that can handle all your driving demands on the road and on the petrol gauge.

*ADR 81/02 combined manual.

Audio system

With controls built into the steering, your own sound studio is at your fingertips. The mp3-ready CD tuner system, with 8 speakers built directly into the doors, and one further speaker built into the dashboard centre, creates a high quality listening experience for both the driver and passengers. The audio system also features an auxiliary input jack compatible with all popular mp3 players.

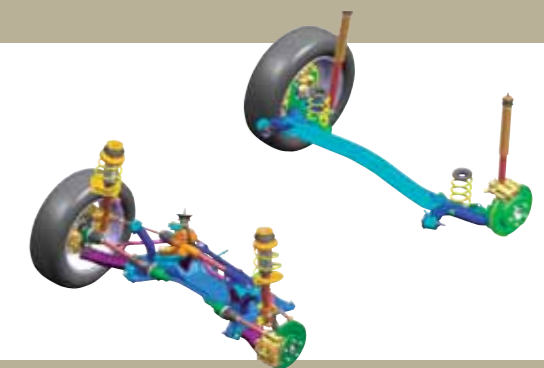

A place for everything

The cleverly designed and spacious interior is highlighted by a host of convenient interior storage spaces. There are cup holders and storage compartments located throughout, so everything you need is within reach.

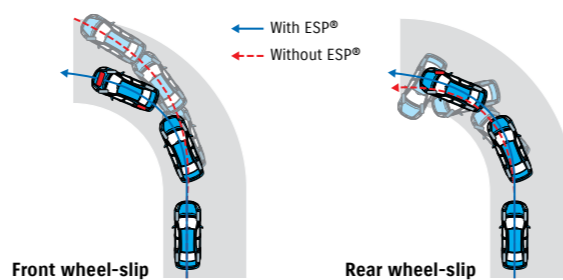

Travel through life in style.

Just admire the sleek lines of the SX4 and you can see how life is smooth sailing in this stylish sedan. The sports bodykit, rear spoiler and alloy wheels all sum it up beautifully. A blissfully comfortable ride only enhances the enjoyment of a spacious, elegantly crafted interior offering a range of refined features such as the keyless start system, electric windows and mirrors, cruise control and digital climate control. It's the only way to travel.

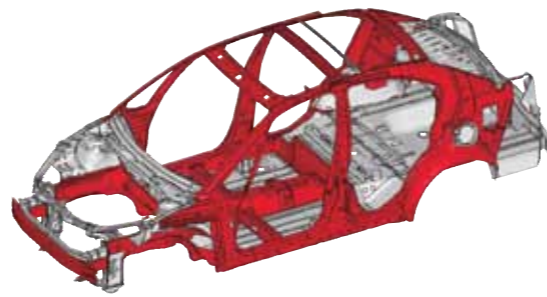

MacPherson Strut Suspension

The SX4 uses independent MacPherson Strut front suspension and rigid torsion beam rear suspension, to help absorb vertical motion and reduce bouncing. This means a safer, smoother ride and better handling response.

Electronic Stability Program

All SX4 models are equipped with the Electronic Stability Program (ESP®) technology. This advanced safety feature helps the driver regain control of a sliding vehicle. ESP® is a computer controlled technology which uses in-built sensors to individual wheels and modulates engine power to help restore correct road alignment as soon as any loss of vehicle control is detected.

Safety engineered body

The body of the SX4 Sedan employs a highly rigid design with the front and rear crumple zones progressively absorbing impact in the unlikely event of a collision. For added protection, the frame is designed to direct the energy away from the car occupants.

Safety works in an SX4.

It's safe to say the SX4 Sedan is now even more protective of passengers than ever. Its state-of-the-art rigid body design, based on Suzuki's Total Effective Control Technology (TECT), resists impact forces during an accident and directs them away from the driver and passengers. You also have the added reassurance of 6 airbags as well as Electronic Stability Control (ESP®) as standard. A highly sophisticated braking system that incorporates ABS with EBD and BA gives you greater control of the vehicle under extreme braking conditions.

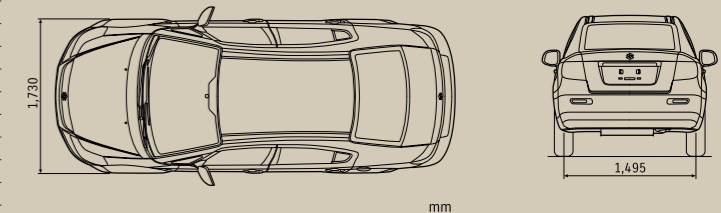

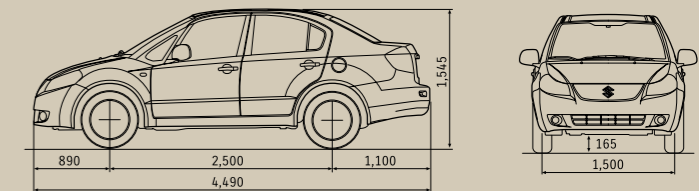

Specifications
