# A family of high achievers.

## It's simply a better way to drive.

When Prius was born at the dawn of the 21st century, it combined the power of a petrol engine and an electric motor in the world's first mass production hybrid car.

Going beyond delivering exceptional fuel efficiency, it also shaped a motoring revolution – with advanced design and powerful performance. And it received great acclaim, the world over.

Importantly, Prius anticipated and responded to the needs of an increasingly environmentally-conscious society, shaping a new direction for what is possible, and setting all new benchmarks for the vehicles of the future. Today, Prius has evolved into a truly remarkable, high achieving family of hybrids. Each offers unique dynamic styling, superior comfort and optimal power and control.

The original Prius continues to impress, with its raft of innovative features and enduring style. The economical, stylish and compact Prius c is hard to beat when it comes to zipping about town. Completing the Prius family is the seven-seat Prius v wagon, offering all the technical brilliance of the third generation Prius, but with impressive functionality and flexibility, and an abundance of space for passengers and cargo.

There's a Prius to suit everybody, which one's for you?

# Contemporary style for the modern family.

Prius v redefines how you and your family get from A to B. With more than enough space to fit everything you need, it's adaptable enough to take whatever your busy life can throw at it.

Everything about this smart vehicle has been designed with versatility, comfort and style in mind. On the outside, aerodynamic performance is enhanced by clever design with features such as the headlamps and 16" alloy wheels with aero covers specifically designed to provide optimal fuel efficiency. Furthermore, electric power steering and a refined suspension system help Prius v achieve the handling and agility of a passenger car with enough room for a growing family. The 1.8L engine with our world leading Hybrid Synergy Drive® technology allows you to rapidly switch driving modes depending on your needs. Choose the power 'PWR' mode for strong, on-demand performance, the economy 'ECO' mode for absolute fuel efficiency, or the electric vehicle 'EV' mode for low speed driving that only utilises the electric motor. It's this innovative technology that puts you in control and gives Prius v its outstanding fuel economy – only 4.4L/100km<sup>1</sup>.

Setting new standards in terms of seven-seat comfort, adaptability and refinement, Prius v's windscreen has been made with UV-reducing green glass and features innovative noise and vibration reduction capabilities. Even the headlamps have been given serious thought. Designed to reduce fuel consumption and increase visual appeal, the i-Tech<sup>®</sup> model features ultra-bright and efficient LED lamps with pop-up cleaners – so the road ahead is always crystal clear. Prius v also delivers peace of mind with a sophisticated passive safety system, including seven SRS airbags with a driver's knee airbag and curtain shield airbags that extend along the front and rear seats. It also features several active safety features such as Vehicle Stability Control, Brake Assist Electronic Brake-force Distribution and more.

Radar Cruise Control to help ease the strain of motorway driving, and the Pre-Crash Safety System<sup>2</sup> – an intelligent, sensor-based system that automatically detects the likelihood of a collision, then alerts the driver, engages Brake Assist and even holds the seatbelts tight in anticipation of an impact.

- Fuel consumption will vary depending on driving conditions/style, vehicle conditions and options/accessories. Source of fuel consumption data: ADR81/02 combined (L/100km) for auto models.
- Pre-Collision Safety System is a driver assist technology and should not be used in place o
- Reversing Camera is designed as a driver assist device only and should not be used as a substitute for skilled driving (and/or safe parking practices). The area into which the vehicle is to be driven must be visually monitored by the driver.
