Caddy® puts the fun back into work.

What is it about the Caddy Van that makes it Australia's most favourite compact van? Is it the brilliant drive characteristics that make it handle more like a car than a van? The array of safety equipment? The extraordinary cargo space in the rear? Or is it the versatility that makes it so handy? Perhaps it's the style... the sleek face that matches the 'family' look? The cute rounded corners and happy shape that makes people smile whenever Caddy Van slips past in busy city traffic?

Whatever it is, there's absolutely no doubt business people all over the nation love the Caddy Van. Evidence of this is everywhere, with the clever designs that adorn almost every Caddy Van on the road. And that's one of the most important features of the Caddy Van, how it is an essential marketing tool for businesses that wish to express their personality. Caddy Van says that you take your business and your customers seriously. At the same time, it speaks volumes of how much you enjoy your work. And because there are more working days than weekend days, shouldn't we be having a little fun at work?

Built to drive.

Cargo down back. Car up front.

The consensus from Caddy Van owners is that the Caddy Van handles just like a quality passenger vehicle. If you love driving then Caddy Van really does put the fun back into work. Zip up city streets, whip down alleyways. Nip in and out of traffic with ease. Yes, Caddy Van is the ultimate urban delivery van because it doesn't feel like you're driving a van.

With a range of engines and transmissions paired to an electro-mechanical power steering system, driving a Caddy Van is guaranteed to change the way you feel about work. Then there's the assortment of car-like driving technology and instrumentation at hand that gives Caddy Van a truly ergonomic environment. Whether you're the boss of your own small business or you happen to be running a fleet of Caddy Vans you need a vehicle that makes it easy to get the job done efficiently.

But performance and driving enjoyment are only part of the equation. Safety is also paramount, and in this respect, Volkswagen leaves no stone unturned. Meticulous German design and robust construction accompanies a long list of safety and security features built into every Caddy Van. The cargo in the back might be important, but to us, the cargo up front is infinitely more precious.

Safety features include driver and front passenger airbags with the option of side head and thorax airbags. Caddy Van also

features ESP (Electronic Stability Programme) and TCS (Traction Control System) as standard, which keep you safe when the road conditions aren't. You also benefit from ABS (Anti-lock Braking System), EBA (Electronic Brake Assist) and EBD (Electronic Brake Distribution) – absolute essentials for ducking in and out of inner city streets and negotiating constantly changing traffic conditions.

Of course, while Caddy Van is the perfect urban van, that doesn't mean it only loves the city. Caddy Van is also a joy to drive on the open road and handles beautifully on the freeway. And if you're likely to encounter more challenging surfaces with varying grip (think country roads or muddy worksites here), there's the option of 4MOTION all-wheel drive.

If your business is more about inner city driving, why not make it even easier with Volkswagen's DSG. Unique in the commercial vehicle sector, the DSG system is not just one automatic clutch... it's two, working in tandem to deliver the smoothest, fastest, most efficient auto transmission anywhere. While one clutch is engaged and powering your Caddy Van along, the other is ready to accept the next gear.

This twin clutch technology means you can change gear much faster than with a standard automatic gearbox – actually in less than four hundredths of a second. Think about the stop-start nature of working in the city and you'll realise just how valuable DSG will be in your Caddy Van.

Caddy Van.

When Caddy Van first entered the market in Australia, it took a lot of people by surprise. The combination of an easy-to-drive vehicle that was economical, manoeuvrable in tight urban environments, versatile and could take considerable cargo became irresistible for many business owners. The good news is that nothing in this regard has changed. While there have been key changes to the front end of the vehicle and to the list of specifications and equipment, the cargo space remains at a class leading 3.2m³ with an incredible payload of up to 800kg.

If you really don't need a one-tonner and want all the driving and efficiency

benefits that many one-tonners struggle to deliver, then Caddy Van will fit the bill.

Greengrocers to auto mechanics, florists to plumbers. We know the range of businesses that rely on Caddy Van, so we made sure that the back end of the vehicle can be tailored to suit your needs with all sorts of factory options. Add a second sliding door, install some purpose built flooring, or have your Caddy Van with tailgate and heated window. Easy. And if you already own the previous model with a specialised fitout, the great news is that you can upgrade to the new model and bring your existing fitout with you.*

Main image: Caddy Van pictured fitted with optional alloy wheels. * Mark 3 Caddy Van onwards.

Caddy Maxi Van.

If Caddy Van isn't quite enough van for you and you need to fit more in, Caddy Maxi Van is here to the rescue. Think of Caddy Maxi Van as the long wheelbase Caddy Van. Almost half a metre longer in fact.

You might be surprised by just how much extra space this yields. Caddy Maxi Van virtually steps out of the compact van segment to give every other one-tonner on the road a run for its money. The load space in the rear of a Caddy Maxi Van is

2.25m long, with a load volume of 4.2m³ and a payload of up to 850kg. For a compact van, that's big – easily the biggest in its class.

With dual sliding doors as standard on Caddy Maxi Van and dual wing doors at the rear, all this cargo space is incredibly easy to access. For serious tradesmen with bigger equipment or mixed businesses with larger product, Caddy Maxi Van makes tremendous sense. It gets in and

out of those tight spaces just like Caddy Van does, and is just as enjoyable to drive.

If you think an extra cubic metre must have impacted on the area up front, think again. There have been no compromises on the driver and passenger space. Comfort, safety and ergonomics are all first class. And just like Caddy Van, if you're upgrading from a previous model of the Caddy Maxi Van, your specialised fitout can be moved to your new model.*

Main image: Caddy Maxi Van pictured fitted with optional alloy wheels. * Mark 3 Caddy Van onwards.

Caddy Maxi Crewvan.

Work is rarely simple. Sometimes it's people you need to carry. Sometimes it's equipment. Often it's both. This is where Caddy Maxi Crewvan comes into its own.

Caddy Maxi Crewvan has a rear bench seat that not only splits 60/40 but folds up and down too. That means you can carry a full load in the back with the bench seat folded up, or a variety of combinations of cargo and passengers with the seat down. With the convenient 60/40 split, you can flip the smaller side down to carry two people in the back comfortably, leaving convenient space for longer items. Flip the larger side down if you only need to carry one person in the back and you've just created even more space.

If you need to carry the whole crew of five plus a load of gear in the back, Caddy Maxi Crewvan has you covered. The comfortable rear seat safely accommodates three passengers and even with everyone on board, you've still got a huge 1.6m³ of space behind the rear seat to load up all the gear.

There's so much safety technology, comfort, features and functionality in the Caddy

Maxi Crewvan, that it feels just like driving a car. You have the option of pairing the zippy 250Nm/75kW TDI engine with a brilliant 5-speed manual gearbox or a superb 7-speed auto DSG. Comfort, functionality, practicality, performance, efficiency and car like driving. It's the hallmark of the Caddy Maxi Crewvan.

4MOTION

If your Caddy Van is likely to encounter different terrain, such as a muddy worksite, you can't afford to slip and slide with heavy gear on board.

Enter 4MOTION – Volkswagen's clever all-wheel drive system that provides your Caddy Maxi Van with extra grip in standard off-road situations.

The tractive force of the Caddy Maxi Van 4MOTION is distributed by Volkswagen's ingeniously designed, electronically regulated 4th generation Haldex coupling system. As soon as the system detects any wheel spin via the ABS sensors a pump is activated which builds up pressure in the multi-plate Haldex system – effectively “coupling” the two axles to each other.

The coupling provides an infinitely variable torque transfer between the front and rear axles, depending on the degree of slip in the front or rear. Of course, you won't be aware of the lightning quick adjustments being made by the system beneath you.

Features.

Caddy Van is equipped for practicality, comfort and worry-free driving. Standard features include electric windows and door mirrors, central locking with radio-remote control and SAFELOCK system. Say goodbye to hill starts with Hill Hold and enjoy the ease of speed-related variable steering assist on all models. Cruise Control is standard on Caddy Maxi Van and Caddy Maxi Crewvan. A variety of optional assistance systems add a finishing touch to the comfort and convenience of your Caddy Van.

Caddy Van Bluetooth™ option enables telephone hands-free operation with all Caddy Van audio units. For units with RCD310 or RNS510 the ability to wireless stream audio tracks from Bluetooth™ equipped phones and media players is also included.

CV **CMV** **CMC**

Lumbar support: a comfortable ride. In order to ensure no matter how long your journey you arrive feeling relaxed, lumbar support for both front seats is available as an option on all Caddy Van models.

CV **CMV** **CMC**

“Lights & Vision”. This assistance feature includes automatic headlight activation, separate daytime running lights, “Leaving home/Coming home” function where headlights activate as you lock or unlock the vehicle and a windshield wiper with rain sensor.

CV **CMV** **CMC**

15” Kemora alloy wheel. This stylish alloy wheel can be added to Caddy Van or Caddy Maxi Van to upgrade the look and durability of the 15” steel wheels which are standard on both models.

CV **CMV**

16” Siracusa alloy wheel. One size larger than the standard fitment, this stylish alloy wheel can be added to Caddy Van or Caddy Maxi Van to upgrade the look and durability of the 15” steel wheels which are standard on both models.

CV **CMV**

Multifunction steering wheel. Rocker switches on the multifunction steering wheel operate the multifunction display and the radio.

CV **CMV** **CMC**

standard **CV** Caddy Van
 optional extra **CMV** Caddy Maxi Van

CMC Caddy Maxi Crewvan

Cruise control system. A touch of a button and speed can be set at a constant level – the system is deactivated by operating the lever or depressing the brake or clutch pedal. A handy speed limiter function is also included.

CV CMV CMC

RCD310 Radio system. The radio has a high-grade tuner and an MP3 compatible CD player.

CV CMV CMC

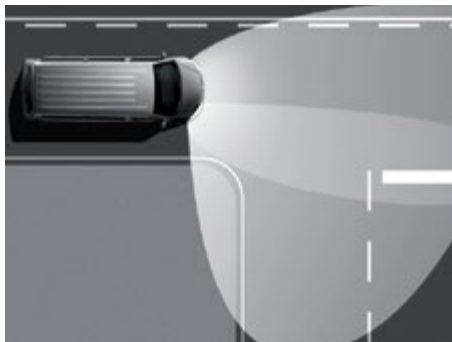

RNS510 Satellite navigation system. Volkswagen's own state-of-the-art innovation. This system will calculate your travel routes at incredible speeds with a touch sensitive display for easy operation, high-res 16:9 screen and high performance processor.

CV CMV CMC

Park distance control. (Not illustrated) Never be caught by a blind spot when parking again. Park distance control acoustic warning signal helps you to reverse into the tightest of spots with ease.

CV CMV CMC

The turning light integrated in the foglights, lights up curves and bends on the road when you make a turn at 40km/h or less. This allows you to anticipate possible risks sooner and ensures that you arrive safely.

CV CMV CMC

Black roof rails. Roof rails can be added as an option to ensure that you can carry everything you need for your work.

CV CMV CMC

The Bluetooth™ word mark is owned by The Bluetooth SIG, Inc. Not all devices will be compatible and functionality will vary depending on the device.

Safety

The Caddy Van has a comprehensive, intelligent safety system to help keep you safe on the road. Safety features such as front passenger airbags are standard. Caddy Van also features ESP and Traction Control, ABS, EBA and EBD – essentials for inner city driving.

EBD

Electronic Brakeforce Distribution (EBD) prevents lock-up of the rear wheels when the vehicle weight is transferred to the front wheels under heavy braking.

CV **CMV** **CMC**

The **seat belt warning** reminds the driver that seat belts are not fastened.

CV **CMV** **CMC**

The **Electronic Stabilisation Programme (ESP)**, including hill holder, prevents the vehicle from swerving in critical driving conditions.

The **Anti-lock Braking System (ABS)** prevents wheels from locking up and improves manoeuvrability.

CV **CMV** **CMC**

The **Brake Assist system** recognises the speed at which the brake pedal is pushed. Under reflex or emergency braking, the system senses the urgent need and applies full brake pressure more rapidly.

Accessories

The Caddy Van can be geared entirely to your business requirements. However, if you would like a few practical extras, Volkswagen Genuine Accessories offer you many further items of equipment.

Rear cargo net. If you occasionally carry small, light loads, this handy net keeps items from sliding around in the load compartment. Securing hooks and lashing eyes are available to fasten the net.

Rubber floor mats. These rugged mats with Caddy motif are available for both the passenger and driver's sides and do an excellent job of protecting the floor from wear and tear and dirty work boots.

Rear window protection. If you're carrying heavy, bulky goods, you might consider installing this robust steel grille for the windows of the rear wing door to protect against knocks and bumps on the road. They're a great protection against theft too.

Rear boot tub. This tough plastic tub with Caddy motif fits neatly into the rear load space of the Caddy Van. Perfect for catching the grime and dirt, and can be taken out quickly to hose off.

MEDIA-IN interface. Allows you to connect external audio sources including USB, USB mini, 3.5mm jack and iPod®#. Plays your favourite tracks through the vehicle's audio system. (Only with optional RCD310)

Bluetooth™ phone kit. Negotiating around busy roads and taking calls on the fly is now much easier thanks to this handy Bluetooth™ phone kit. It pairs quickly with all major phones and installs neatly on the dash.

The Bluetooth™ word mark is owned by The Bluetooth SIG, Inc. Not all devices will be compatible and functionality will vary depending on the device. # iPod® is a registered trademark of Apple Inc.

Engines

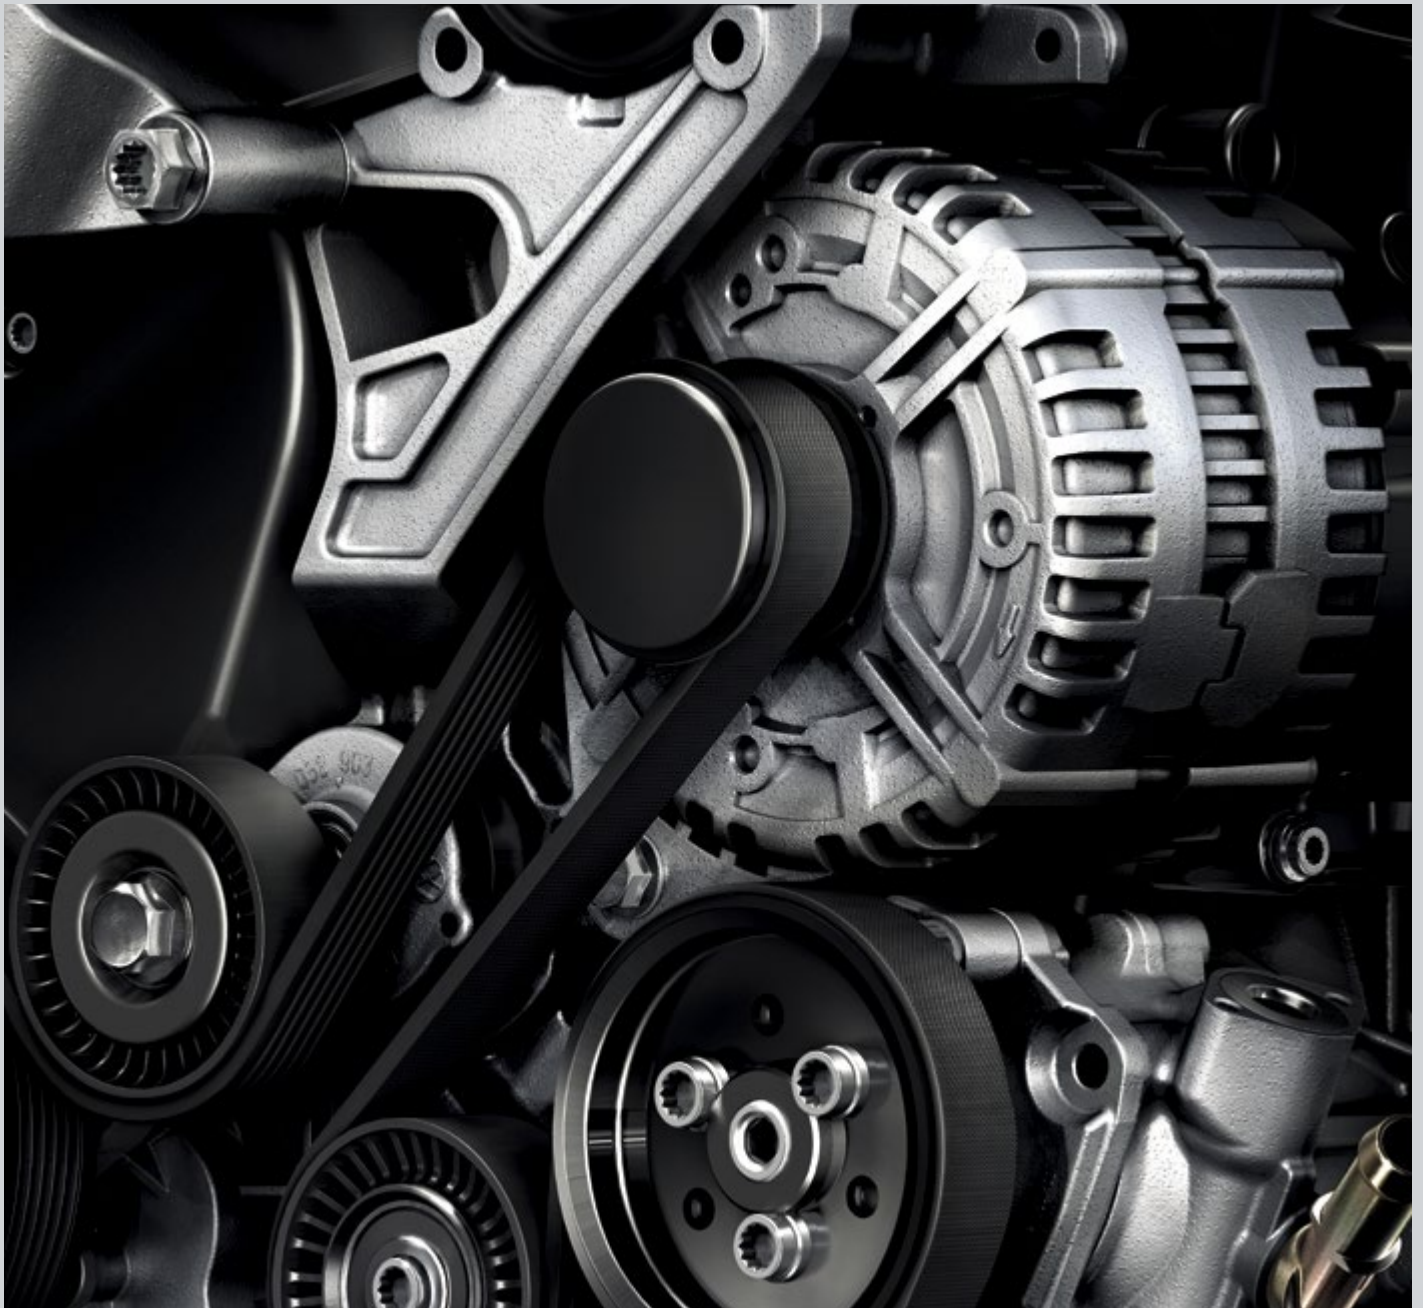

A range of engines sit beneath the stylish bonnet of both Caddy Van and Caddy Maxi Van delivering amazing levels of performance, sharper fuel efficiencies and kinder environmental outcomes.

Volkswagen's TSI160 and TSI175 continue to break new ground with TSI technology. These engines, coupled with five-speed manual transmissions deliver an economical 63kW and 160Nm of torque, or an amazing 77kW of power and a healthy 175Nm of torque. At the bowser, to say it is cost effective is an understatement,

achieving fuel consumption figures from 6.8L to 7.0L/100km, according to vehicle specification. In combined-cycle testing, the engine emits between just 154 and 158g/km of CO₂.

The next engine up is the TDI250 (common-rail) turbo diesel available with either a standard five-speed manual or a seven-speed DSG transmission. This engine develops 250Nm of torque and achieves staggering fuel efficiencies of 5.7 to 5.8L/100km, emitting from just 149 to 152g/km of CO₂. Since it develops

more torque, the TDI320 is offered with a six-speed DSG as standard. The engine itself generates 320Nm of torque and still achieves incredible fuel efficiencies of just 6.3L/100km while emitting lower CO₂ emissions than ever before.

Paint colours

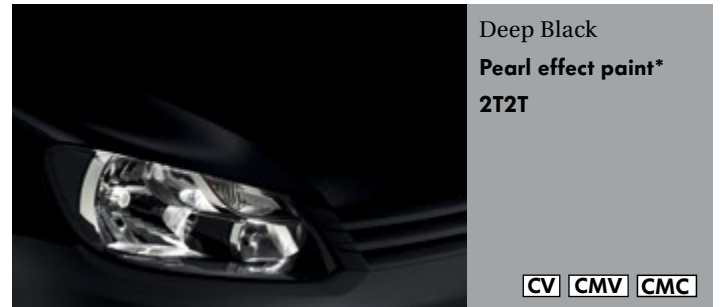

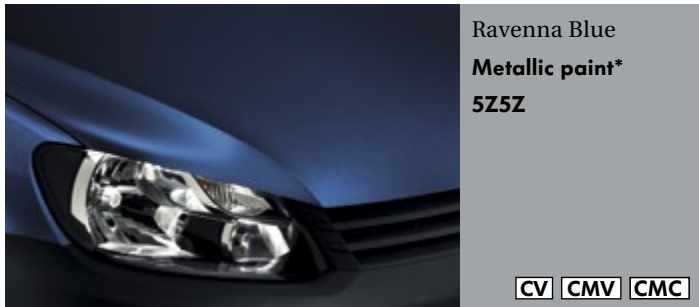

The bodywork is first galvanised to give your Volkswagen Commercial Vehicle optimum protection against mechanical and chemical influences. Only then is the paint applied in several layers and left to harden. The result is a scratch-resistant, hard finish for the top coat.

* Metallic and pearl effect paint are available at extra cost. The illustrations on these pages can only be regarded as a general guide as the printing process cannot render the colours with absolute accuracy. Please contact your local Volkswagen Commercial Vehicle dealer for details of the standard equipment and optional extras available.

Trim

High-quality, robust materials and skilled workmanship are essential in the manufacture of hard-wearing seat upholstery. The colours and patterns for the upholstery are painstakingly matched to the interior trim and paint finishes.

Owning a Volkswagen

Volkswagen New Vehicle Warranty

Volkswagen Caddy Van, Caddy Maxi Van and Caddy Maxi Crewvan are covered by a 3-year/unlimited kilometre manufacturer's warranty, which includes Volkswagen Assist (24 hour roadside assistance). Caddy Van is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist 24 hour roadside assistance

As a valued customer, you can be assured that, wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event

of a breakdown or accident and, if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

Volkswagen Extended Warranty

Why not continue the confidence of a Volkswagen Warranty by purchasing a Volkswagen Extended Warranty? For further details on this option, please contact your local Volkswagen Dealer.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained technicians

equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre undertakes work in accordance with factory specified guidelines and maintenance schedules.

Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 2-year warranty on Genuine Parts from the date of purchase.

Environment

On a local level, we have undertaken a number of initiatives to reduce the environmental impact of our business processes, including careful recycling of office waste, for example. Energy usage is being reduced through lights controlled by motion sensors in toilets, kitchens and meeting rooms.

But there's no question that the area in which we can contribute most to environmental sustainability is with our vehicles. Our TSI engines combine innovative and world leading direct injection petrol technology with

turbocharging and are extremely fuel efficient with reduced CO₂ emissions.

Our TDI diesel engines consume less fuel and emit less exhaust fumes offering high torque and performance, while our diesel particulate filters extract soot from the exhaust fumes. Numerous engines already fulfill the very stringent Euro 5 norm.

Our dual-clutch DSG gearbox provides the comfort of conventional automatic transmission and the dynamic drive of a manual transmission. It has significantly lower fuel consumption in comparison

with a conventional automatic transmission with torque conversion. The newest member of our DSG family is the 7-gear DSG transmission for front transverse mounting, and is the first dual-clutch gearbox with a 'dry' double clutch, achieving exciting new fuel consumption efficiencies.

General information

Volkswagen is distributed by Volkswagen Group Australia Pty Ltd. 24 Muir Road, Chullora, NSW 2190. ABN 14 093 117 876. Specifications are as planned at November 2012 for model year 2013 and are subject to change without notice or obligation. Cars and accessories are shown for illustrative purposes only and may not depict Australian specifications. Fuel consumption figures according to Australian Design Rules (ADR) 81/02. All Volkswagen approved parts and accessories are warranted for 2 years/unlimited kilometres. All warranties implied by legislation or otherwise are excluded to the maximum extent permitted by law. The liability of Volkswagen shall, subject to the law, be limited at Volkswagen's discretion: 1. In the case of the goods, the repair or the cost of repair, or the replacement or the cost of replacement; and 2. In the case of services, the re-supply of the services or the cost of re-supply of the services. All information in this brochure is correct at time of publication, however variations may occur from time to time and Volkswagen, in so far as it is permitted by law to do so, shall not be liable in any way as a result of any reliance by any person on anything contained in this brochure. The colours shown in the brochure are indicative only and may vary from actual items owing to the printing process. Authorised Volkswagen dealers will provide up-to-date information on model application, design feature, prices and availability on request. Volkswagen Insurance & Volkswagen Extended Warranty are provided by Allianz Australia Insurance Limited (Allianz), AFS Licence No. 234708, ABN 15 000 122 580. In arranging this insurance, Volkswagen Financial Services Australia Limited, ABN 20 097 071 460 & Volkswagen Group Australia Pty Ltd, ABN 14 093 117 896 and the authorised dealers act as agents of Allianz and not as your agent. Volkswagen Finance is a trading name of Volkswagen Financial Services Australia Limited. Locked Bag 6252, Regents Park, NSW 2143. Tel: 02 9695 6311.
