“Being so unique, different and simple that it distinguishes itself from the rest. That’s Volkswagen.”

Walter de’Silva
Head of Volkswagen Group Design

Truly an icon.

There's just no getting around it. The Volkswagen Golf is a true automotive icon, a classic car in every sense. At Volkswagen we never rest on our laurels and we've been improving the Golf with every model since its introduction to the market. In that time, the Golf has established itself as one of the world's great cars, and our latest models proudly combine their long heritage with the very latest in automotive technology and safety features.

On the inside, the carefully-designed ergonomics and the quiet, comfortable ride makes driving the Golf a respite from the daily grind.

On the outside, precision is evident in the Golf's simple yet dynamic curves. Pleasing to the eye, they also help the Golf slip through the air with great aerodynamic efficiency.

Work and play, or home and away: with nine models to choose from, there's a Golf to suit your needs – whatever they may be. For comfort and convenience, look no further than the 77TSI; or with its host of in-car technologies, the 90TSI Trendline is ready for anything. The 118TSI Comfortline boasts an award-winning engine that's both powerful and efficient, while the 103TDI

Comfortline features a diesel engine for fuel efficiency and extra torque. And for even more excitement and athleticism, the Golf GTD, GTI and Golf R will be right up your street.

Whatever you choose and whether you opt for TSI (petrol) or TDI (diesel) technology, you can rely on exceptional performance, power and fuel consumption across the board.

But of course, the Golf doesn't just look good, feel great and drive well. Safety is paramount, which is why seven airbags and safety optimised front head restraints come as standard on all variants, and a fleet of innovative, high-tech features unite to give you complete confidence when you most need it.

Safe and secure it may be, but the Golf is serious fun too. Pleasure seekers won't be able to resist its charisma, smooth handling and high-tech in-car features, including Bluetooth® phone connectivity to keep you in the loop while on the move (standard on all models except the 77TSI and BlueMotion).

But don't just take our word for it – the Golf has won numerous awards around the globe throughout its life, proving its European design and reliability are a winning combination.

Production of Shark Blue Metallic will conclude from mid February 2012.

Range Overview.

77TSI Page 10.

Aiming high.

With all the style and comfort you'd expect from a Golf and then some, the 77TSI offers exceptional functionality, making every moment behind the wheel a pleasurable one. Fun, reliable and smart, this model gains added appeal and top marks with its 5-star rating by the Green Vehicle Guide* – the highest award possible.

*7-speed DSG version.

90TSI Trendline Page 12.

Interior innovation.

Whether you prefer the silence of your surroundings or the accompaniment of a favourite drive-time playlist, the 90TSI Trendline has it all. Its turbocharged 1.4 litre TSI petrol engine makes for enjoyable driving, while the Multi-Function Display (MFD Plus) and RCD310 entertainment systems put all your roadside anthems at your fingertips.

118TSI Comfortline

Page 14.

Convenience on wheels.

Sometimes you need a little finesse, which is where the 118TSI Comfortline comes in. In addition to its luxurious interior it features a potent twincharged 1.4L petrol engine outputting a healthy 118kW of power and 240Nm of torque.

103TDI Comfortline and 103TDI Comfortline with BlueMotion Technology

Page 16.

Frugal, friendly.

Whatever the weather's doing outside, the 103TDI Comfortline is there to keep you cool, calm and collected on the inside, with dual zone automatic climate control air conditioning and rain sensing windscreen wipers. With 103kW of power and 320Nm of torque, it'll handle any road with ease. The BlueMotion Technology variant adds in further systems optimised for fuel efficiency without compromising performance or driving pleasure.

Range Overview.

Golf GTD

Page 18.

Power house.

Looking for a sportier style? The Golf GTD has it in buckets. Think Jacky upholstered sports seats, gearshift paddles (with DSG), chrome-plated gearshift knob and a sporty exterior. What's more, the 2.0 litre turbo charged TDI engine and sports suspension delivers an exciting drive and top performance – not to mention impressive fuel economy.

Golf GTI

Page 20.

Legendary performer.

Get the adrenaline pumping with the Golf GTI. Yes, the performance is a force to be reckoned with, as the TSI engine takes you from 0 to 100km/h in just 6.9 seconds, but it's got style in equal measure. Prepare to be enticed by the black honeycomb grille, traditional red trim strips and aerodynamic silhouette.

Golf R

Page 22.

Bold and beautiful.

When it comes to power, the Golf R tops the range. In fact, it's the most powerful Golf yet released in Australia, with its 2.0 litre TSI petrol engine delivering a remarkable 330Nm of torque and 188kW of pure power. Its dynamic on-road abilities are boosted by Volkswagen's 4MOTION® all-wheel-drive system, which improves traction and helps keep you glued to the road.

77TSI.

Fun for all.

Whether you're taking on the daily commute, running your errands around the city or out exploring with friends and family, the 77TSI rises to the occasion.

Slip behind the wheel of either the 6-speed manual or the 7-speed DSG transmission and feel the 1.2 litre TSI petrol engine kick out 77kW of power and 175Nm of torque, while emitting just 144g/km* of CO₂.

The 77TSI also gets you where you need to be in style, thanks to its Titanium finishing touches inside, supportive seats and comfortable ergonomics. And wherever it is you're heading to, no journey is complete without an accompanying soundtrack. Set your own beat with the built-in RCD310 entertainment system, complete with an MP3-compatible CD player and auxiliary input audio socket to connect to your MP3 player.

As well as being fun, the 77TSI makes your safety a number one priority. With no less than seven airbags, front safety optimised head restraints and carefully designed crumple zones, our designers have worked hard to ensure that should the worst happen, you and your passengers are as protected as possible from injury.

Better yet, the 77TSI also includes active safety features to help avoid accidents in the first place. These include Electronic Stabilisation Program (ESP), which helps keep you on track in all driving conditions, ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) traction control, and you've got a safety package to be reckoned with.

Smart, stylish and safe – everything you'd expect from a Golf, and then some.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

Production of Shark Blue Metallic will conclude from mid February 2012.

90TSI Trendline.

Style and value.

The 90TSI Trendline is the perfect driving companion. Reliable, entertaining and quiet when you need some downtime. And it doesn't hurt that it looks this good too.

Its value is enhanced by active and passive safety features, design and superior engine technology. On the entertainment front, it's packed with user-friendly, in-car technology. And it's quiet, thanks to its single-charged 1.4 litre TSI engine, which is turbo-charged to boost both performance and fuel efficiency.

If you enjoy listening to music as you drive, you'll love the RCD310 entertainment system. Featuring MP3 compatibility and the ability to stream your music directly from your phone without the need for pesky cables (thanks to the in-car Bluetooth® technology), it's a breeze to operate. All the controls you need are available at your fingertips with the Multi-Function Display (MFD Plus), keeping your attention just where it needs to be – on the road ahead.

So sit back and enjoy the ride, safe in the knowledge that with cruise control as standard you can soak up the atmosphere while effectively managing your speed on your next open road adventure – or commute to the office. Plus Hill Start Assist (HSA) will help avoid any potential roll backs on those steep inclines.

Other safety features guaranteed to make your life easier include ABS with Brake Assist, Electronic Stabilisation Program (ESP), Anti-Slip Regulation (ASR) traction control and seven airbags.

Available as a 6-speed manual or a 7-speed DSG transmission, whichever 90TSI Trendline you opt for, you can be sure of very low fuel consumption and emissions that emits just 143g/km* of CO₂. So much so, in fact, that it's been awarded a maximum 5-star rating by the Green Vehicle Guide.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

* 7-speed DSG transmission, as per Australian Design Rule (ADR) 81/02.

118TSI Comfortline.

Star performer.

The 118TSI Comfortline is a car built to appeal to drivers who enjoy a car with plenty of performance as well as plenty of comfort. With a twin-charged 1.4 litre TSI engine delivering 118kW of power and 240Nm of torque, it's very much a driver's car.

The Comfortline strikes a near-perfect balance between the extremes, offering a relaxing yet spirited experience to driver and passengers alike. Dual-zone air conditioning, adjustable seats and a quiet, carefully-sculpted cabin cocoon the Comfortline's occupants regardless of whether the journey is to the corner shops or the far reaches.

The Volkswagen 1.4 litre Twincharger – with turbocharger and supercharger – engine was awarded International Engine of the

Year 2010 and also topped the 1.0 litre to 1.4 litre category. Best of all, it doesn't do so at the cost of the environment, as it returns a frugal 6.2L/100km fuel consumption figure (7-speed DSG, as per Australian Design Rule (ADR) 81/02). So you can enjoy your driving and still save at the petrol pump.

Working in conjunction with the 118TSI Comfortline's engine your choice of a 6-speed manual or 7-speed DSG transmission, it delivers sharp performance and an engaging drive.

You'll also enjoy the security offered by a range of key safety and technology features, including seven airbags, Electronic Stabilisation Program, ABS brakes with Brake Assist, Electronic Differential Lock and Anti-Slip Regulation traction control.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

103TDI Comfortline and 103TDI Comfortline with BlueMotion Technology.

Eco-nomic marvel.

If you like driving and also want to minimise your fuel consumption, then the 103TDI Comfortline, or the 103TDI Comfortline with BlueMotion Technology, is the Golf for you. Both models are powered by a 2.0 litre TDI engine that delivers 103kW of power and a massive 320Nm of torque – so there are no compromises when it comes to the driving experience.

The 103TDI Comfortline offers a refined ride. The interior is luxurious, with plenty of storage space, ergonomically designed and located controls, flowing lines and comfortable, supportive seats. It'll also support you at the fuel bowser, with a combined fuel consumption figure of only 5.6L/100km*.

The 103TDI Comfortline with BlueMotion Technology includes a number of technologies to further improve fuel efficiency. The Start/Stop system can automatically switch off the engine

when waiting in traffic – and re-start it again when it's time to get moving, while the Brake Energy Recuperation system captures some of the energy generated while coasting and braking and utilizes it to charge the battery. The result? Lower emissions and a miserly fuel consumption (combined) of just 5.3L/100km* – and a saving of 1L/100 km on the urban cycle (compared to the regular 103TDI Comfortline model).

On the outside of both models you'll see the same classic Golf lines, with 16" Cleveland alloy wheels and the Golf's classic, confident stance. The drive is exactly what you'd expect from a Golf – comfortable, relaxing and fuss-free, but with plenty of performance lurking under the bonnet should the need arise for some quick progress or sharp responses.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

* Fuel consumption figures according to Australian Design Rule (ADR) 81/02.

Golf GTD.

Unique sports-tourer.

The GTD is a truly special car. Combining the torque and tractability of its diesel engine with the sporting refinements of other high-specification models, this is a sporty Golf with a difference.

With 125kW of power and an impressive 350Nm of torque from its turbocharged engine, the GTD is definitely not a car that'll be left standing still. It's got diesel driveability, suspension and dynamics tuned for a more spirited approach to the road, and buckets of style.

The badge, fog lights and Seattle alloy wheels are subtle cues from the outside; on the inside you'll find a leather-bound multifunction steering wheel, sports seats upholstered in our unique 'Jacky' fabric, gearshift paddles for DSG models and a chrome-plated gearshift knob.

The Golf GTD has been engineered with just one goal in mind: maximum driving pleasure. And on this count, it delivers.

From the moment you turn the ignition key you can tell it's a diesel like no other. It accelerates from 0 to 100 km/h in just 8.1 seconds but still manages to return fuel figures of 5.5L per 100km* (combined). Its tightly-tuned handling and generous engine performance, mated to a 6-speed transmission (manual or DSG) and low-profile tyres, will keep you grinning from ear to ear – and from the open road to the fuel bowser.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

Bi-Xenon headlights shown are optional extras.

Golf GTD 19

Golf GTI.

The original hot hatch.

It's a classic within a classic. The Golf GTI is one of the automotive world's great sports cars and this latest variant is a proud successor to that tradition. The tread linking all these models – apart from the badge itself – is great handling, muscular performance and understated good looks.

It all starts at the front end. The now-iconic black honeycomb grille, red trim strips and GTI badge immediately set this car apart. Alloy wheels – 17" Denver or optional 18" Detroit models – are nothing short of a statement of intent, while from the rear, the diffuser, chrome tailpipes and GTI badge leave the cars you've passed in no doubt as to what you're driving.

Sitting in the cockpit is an equally gripping experience. The leather-trimmed multi-function steering wheel fits

your hand like a glove and all controls fall naturally, and unobtrusively, to hand.

Once you're on the road, you'll find that the GTI delivers a pure dose of driving pleasure. The TSI engine takes you from 0 to 100km/h in just 6.9 seconds and a raft of performance and safety technologies work on concert to ensure your drive is as safe as it is breathtaking. Seven airbags, Electronic Stabilisation Program, ABS brakes with Brake Assist, Electronic Differential Lock and Anti-Slip Regulation traction control will give you confidence to attack the curves and enjoy the ride.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

Golf R.

Making your dreams come true.

The most powerful Golf released in Australia, the Golf R is a no-compromise car for those who demand only the highest specifications of performance and distinctive style.

Step inside and settle into the sports seats and not only will you see, but you'll also feel the quality. The seats are expertly tailored in a combination of Kyalami black cloth and San Remo microfibre. The interior features a subtle, stylish Silver Lane decorative trim throughout. The steering wheel blends aesthetics with the practical, in the form of gloss black inserts and (on DSG models) gearshift paddles. And the dual zone automatic climate control air conditioning will ensure you keep your cool whatever the weatherman has in store.

Outside, it's a similarly eye-catching story. It's clear to see the class-leading build in the Golf R's bold design, with the gloss black R-specific radiator grille complete with R badge, exterior mirrors and brake callipers.

But of course, it's not just all about the looks. The Golf R's 2.0 litre TSI petrol engine is turbocharged and features direct injection technology, taking you from 0 to 100km/h in 5.7 seconds*. Its 188kW of power and impressive 330Nm of torque make for a dynamic drive, yet it still fulfills the Euro 5 emissions standards. And although it's the most powerful Golf to be released in Australia, its 4MOTION® all-wheel drive system gives you the best possible traction, no matter the weather, speed or road condition.

All this to be enjoyed to the beat of your choosing, played via the RCD510 6-disc CD sound system with 6.5" touchscreen display and eight speakers.

Safety-wise, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL), Anti-Slip Regulation (ASR) traction control and no less than seven airbags complete the exceptional Golf R package.

19" Talladega alloy wheels shown are optional extras.

Golf R 23

Exterior.

Modern classic.

It's a shape known the world over. Classic, sophisticated, inspiring – the Golf is simply unmistakable. It epitomises the Volkswagen approach to automotive design; first of all, it does its job; second of all, it's aesthetically pleasing; and thirdly, it identifies itself as part of the Volkswagen family.

Every generation of the Golf has further optimised its design and this model is no different. From aerodynamics to lights and from mirrors to windows, every angle, every component and every decision has been carefully considered and precisely executed.

01. Overall exterior design

The exterior of a car should do a couple of things. Most importantly, it should help the vehicle to cut through the air and help provide stability in all external conditions – road, weather and environmental. It should also make a strong design statement and locate the vehicle within a continuum of previous models and marque stablemates. The Golf does all this with aplomb, from the sleek grille to the integrated bumpers and from the aerodynamic mirrors to the pillar locations. No matter which way you look at it, the Golf is a car that appeals to the eye.

02. Sunroof

Let the sun shine in! There's no doubt that a sunroof makes a great addition to any car, and the Golf's optional version is no exception. Electrically controlled, it's tilt and slide adjustable, with an internal sunblind for maximum convenience. So you can enjoy fresh air and natural light night and day, summer and winter alike.

03. Rear view camera integrated in badge

The Golf's optional rear view camera – cleverly integrated into the badge – makes manoeuvring in tight spaces, not to mention

reversing, a much easier and much less stressful process. It provides a clear view on the dashboard-mounted display and further boosts the Golf's safety package.

04. Daytime driving lights

A car can never be too visible. The Golf's daytime driving lights help other road users to see it coming from near and far. Mounted within the main headlight assembly and protected by a polycarbonate lens, they're another great addition to the Golf's feature set.

Interior.

Beauty within.

Beauty, of course, is more than skin deep. The Golf's interior conveys a feeling of quality above all else. The steering wheel has been carefully sculpted, for optimum comfort and control. The driver's seat is height adjustable and will keep you comfortable (and ergonomically supported) every time you go for a drive.

The design is also easy on the eye; the lines flow smoothly from one element to another and all controls, indicators, information displays and storage spaces are logically located and easy to access. Material design has also received careful thought, with the end result that every surface is durable, easy to clean and highly tactile.

02

01

04

01. RNS510 Satellite Navigation

The RNS510 Satellite Navigation System uses a touchscreen and an intuitive user interface to provide real-time location and navigation information on its bright, hi-res display. The fast processor provides rapid updates and accurate navigation, and the system includes a DVD drive and 30GB hard drive to handle mapping data and a range of music files.

02. Multi-Function Display (MFD)

The MFD is standard on the 77TSI and is a screen-operated multi-function display system that is used to display useful vehicle information (like fuel range or outside temperature)

and trip information (like average speed, current speed and speed warnings). The MFD Plus is standard on all other models and allows you to also display information from other systems (radio, navigation, phone etc.) and customise lighting and security settings.

03. Bluetooth® (not pictured)

Built-in Bluetooth® (in all models bar the 77TSI and BlueMotion) means your phone can be operated hands-free while you drive. So you can make and receive calls without diverting your attention from the road. It also allows you to wirelessly stream audio content from your phone to the car's audio

system. Better still, it can be operated from the MFD Plus and you can even access your phone book. There is a variety of Genuine Bluetooth® accessories available for the Golf 77TSI and BlueMotion models.

04. Media Device Interface (MDI)

This convenient feature allows you to connect your USB media player, storage device or iPod®* to the Golf's audio system. The device may then be controlled by the in-dash system rather than its own interface, making operation safer and easier. Best of all, the MDI connection will charge your portable device up while it's connected, (standard on Comfortline models and above).

Technology.

Built for the future.

To build its cars, Volkswagen draws on a proud heritage of technological innovation and world-class engineering. It expresses itself in subtle ways; the easy integration of devices and systems; the effortless driving and smooth performance; and the seamless marriage of mechanical, electronic and computerised components.

All of which should be largely invisible to you, the driver. Technology is a tool to help make your drive safer, easier or more enjoyable, not an end in itself. Every technology in the Golf has a specific purpose and will play its part in helping you get on with your busy life.

01. TSI engine

Volkswagen's TSI technology includes turbo-charged petrol engines with direct injection. The innovative engineering boasts excellent torque and power at low revolutions – for you that means lower fuel consumption and fewer emissions.

02. TDI engine

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology that injects precise amounts of fuel at extremely high pressure. This not only results in a cleaner burning engine – and years of hard-wearing durability – but exceptional fuel economy, impressive torque and compelling performance whatever the drive.

03. DSG - Direct Shift Gearbox (DSG) (not pictured)

DSG is an advanced 6 or 7-speed transmission in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that

01

01

02

04

06

takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction

04. Adaptive Chassis Control ■

The optional Adaptive Chassis Control electronically adjusts the damper characteristics for each wheel, ensuring optimum driving comfort for any road surface or driving situation. It achieves the optimum balance between driving comfort and driving dynamics, based on a newly developed control algorithm.

05. Hill Start Assist (HSA) (not pictured)

Hill Start Assist holds the vehicle stationary for 1.5 seconds on hills with an incline greater than 5 percent, when the foot brake is released, by temporarily locking the brake pressure. This intelligent feature provides a comfortable hill start, which importantly avoids any rolling back.

06. BlueMotion Technology

BlueMotion Technology is the name Volkswagen has given to its range of innovations and intelligent technologies that make its fun to drive, fuel efficient and more environmentally-friendly. On the Golf 103TDI Comfortline with BlueMotion Technology these

include the Start/Stop System and Brake Energy Recuperation, both of which are simple in theory and robust in application. The BlueMotion Technology brand mark lets you know you're driving one of the cleanest, most energy-efficient vehicles in Volkswagen's range.

Safety.

Safety comes as standard, every time.

It's all about the engineering. Volkswagen believes the single most important aspect of any car's design is safety. From airbags and head restraints to braking and anti-skid systems, your Golf will do everything it can to help you avoid an accident – and to protect you if one occurs. These active and passive systems combine to provide the best possible safety so you and your passengers can arrive at your destination safe and sound.

01. Traction Control (EDL, ASR and ESP) Braking Control (Brake Assist, ABS and EBD)

Traction control helps to ensure that you maintain control of your vehicle even in difficult driving situations. Built around three distinctive functions, Electronic Stabilisation Program (ESP), Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR), Traction Control improves grip, helps prevent wheel spin and adjusts engine power automatically depending on the conditions.

04

02. Seatbelts

All seats feature three-point seatbelts, while the front seats also have belt pre-tensioners (which tighten the belt on impact) and belt force limiters (which reduce forces on passengers). These help position the body so as to minimise injuries in the event of a crash.

03. Safety Optimised Head Restraints

By working in unison with your vehicle's seatbelts, your Golf's front Safety Optimised Head Restraints are designed to reduce whiplash injury – ensuring optimal protection when you need it most.

04. Airbags

Seven airbags (front, front side and front and rear curtain and driver's knee) are standard features. Airbags combine with the seat belts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

05. Crumple zones (not pictured)

The body of the Golf has also been designed with the passengers 'safety in mind. Front and rear crumple zones absorb the energy of an impact in the event of an accident, working together with the safety cell for you and your passengers inside the cabin.

06. Crash Impact Sound Sensor (not pictured)

The Golf is equipped with the CISS (Crash Impact Sound Sensor). This remarkable innovation detects the sound frequencies of noises typically heard during a crash, cross-checks them against deceleration sensors, and activates the airbags and seatbelt pre-tensioners in above average time. The hundredths of seconds it saves can be crucial in a crash situation. CISS is also perceptive in recognising minor accidents, so that airbags won't unnecessarily deploy.

Optional Equipment.

Make something unique.

The Golf is nothing if not versatile, making it a great match for your own busy life and diverse interests. That's why Volkswagen offers a range of optional equipment – to make sure you can tailor your Golf to your exact requirements.

Options for the Golf cover everything from entertainment systems, technologies to assist the driver and overall performance and appearance. Taken in combination with the extensive choice of model variants, accessories, paint colours and trim options, it's never been easier to create a Golf that's as unique as you are.

01. Optical Parking System (OPS)

The Optical Parking System (included with optional Park Assist with parking sensors) takes the parking aid/parking sensor concept to a new level. A silhouette of the Golf is displayed on the radio or navigation system screen during parking, showing the Golf's position and distance from obstacles. Any obstacle within range of the ultrasonic sensors is shown on screen.

Optional for specific models.

02. Park Assist with Front and Rear Parking Sensors Park Assist is able to manoeuvre the vehicle into parking spaces for you. Once engaged, ultrasonic sensors compare the available space with the length of the vehicle, when driving past a parking space. If there's enough room to park, Park Assist automatically takes charge of the steering when you select reverse gear. The accelerator, clutch and brake are all you need to control as the Golf is expertly parked for you.

03. DYNAUDIO Excite 300W Premium Audio System (not pictured) Available for the GTD, GTI and R, with eight speakers and 300W of power, the DYNAUDIO Excite Premium Audio System turns your Golf into a mobile hi-fi. Available in combination with the standard RCD510 or optional RNS510 Satellite Navigation System, it's a great option for audiophiles and casual listeners alike.

04. Sport Package Comfortline owners can also select an optional sport package for their Golf. This includes dark tinted rear side and rear windows to help keep the car cooler in summer; front fog lights to aid visibility when the weather closes in; stylish 17" Seattle Alloy Wheels and sports suspension to improve handling and enhance the car's appearance; and sports seats, for a firmer, more supported ride when you decide to up the tempo. (Not available on the 103TDI Comfortline with BlueMotion Technology.)

Volkswagen Genuine Accessories.

The finishing touches.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail.

Each and every genuine accessory has been designed specifically with the Golf in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Golf, visit your local Volkswagen Dealer.

Fuel consumption **				
Combined, L/100km	5.6		5.5	5.8
Urban, L/100km	7.3		7.2	7.4
Extra Urban, L/100km	4.7		4.5	4.9
CO ₂ emission g/km	147		145	152
Fuel tank capacity, Litres	55		55	55

[^] Emission level according to European Regulation (EC) No. 715/2007 and Regulation (EC) No. 692/2008.

*The Start/Stop system is designed to reduce fuel consumption and CO₂ emissions. It achieves this by automatically switching off the engine while the vehicle is stationary and then starting it again automatically when the driver wants to drive off. There are certain operating conditions where the Start/Stop system is deactivated (e.g. during engine warm-up), please refer to the owner's manual for full operating information.

Please note figures are sourced from overseas data where equipment levels by model variant may vary.

** Fuel consumption figures according to Australian Design Rule (ADR) 81/02.

The driving style, road and traffic conditions, environmental influences, the fitment of accessories and vehicle condition can in practice lead to consumption figures which may differ from those calculated with these standards.

Please note Metallic and Pearl Effect paint are optional at additional cost, except Golf R. The print process does not allow for exact reproduction of the exterior or the upholstery colours. Please contact your Volkswagen Dealer for further information on colours and upholstery combinations.

Fuel Saving Tips.

We can all Think Blue.

At Volkswagen, we aim to produce the most fuel efficient, environmentally sustainable vehicles possible. The good news is – we can all do our little bit to ‘Think Blue’.

Below, we have summarised the best tips for how you can drive more responsibly and reduce fuel consumption even further. It’s not just your wallet that will benefit from these tips, but the environment too. Its practical benefits go far beyond just saving money and reducing emissions. Here are nine tips on how to drive more efficiently.

Be aware and save fuel. Think Blue.

01. Take it easy and save Drive the modern way and think ahead.

Drive smoothly and anticipate hazards. Hard braking and acceleration, sudden lane changes and unpredictable behaviour is fuel-inefficient.

02. Change up early and fill up later Drive in the highest gear possible.

Use a higher gear with a manual transmission. Low revs take far less energy. With an automatic, reduce acceleration and avoid a kick down.

03. Just let it roll Use overrun fuel cutoff.

With the right driving techniques, you can really save. Whilst in gear, coast down hills or towards traffic lights to reduce feeding fuel to your engine.

04. Comfort high, fuel consumption low Use auxiliary equipment in moderation.

Check the equipment you’re using – if you don’t need it, consider turning it off. De-misters, sound systems and air conditioning all use energy.

05. Savings are in the air Check your tyre pressures.

Check your tyre pressures to cut fuel consumption. Under-inflated tyres force your car to burn more fuel. Tyres in good order will help you save fuel.

06. A warm engine – a cool way to save Avoid short trips.

Plan to minimise the number of trips you need to make. Frequent short trips mean higher fuel consumption as cold engines run less efficiently.

07. Well-oiled for impressive savings Use Volkswagen approved engine oils.

A well-lubricated engine produces less emissions especially when the weather is cold or the trip is short. Change your oil at regular intervals.

08. Keep it sleek Cut aerodynamic drag.

Remember to remove roof racks, bike racks or roof boxes off your car when they’re not in use. Keep windows up and sunroofs closed to reduce drag.

09. Lightly does it Avoid unnecessary weight.

Every kilogram you load into your car takes energy to move – energy that will be supplied by burning fuel. The lighter you drive, the more you save.

Glossary.

4MOTION®

An all-wheel-drive system that provides the best possible traction at all road speeds, in all weather and road conditions. An electronic Haldex clutch responds to traction losses at the front and rear axles and directs torque to the axle with the best traction.

Adaptive Chassis Control ☐

The electrically controlled dampers of adaptive chassis control constantly adjust to the road conditions, the driving situation and driver's requirements. Using a button located on the centre console, the driver selects between three damper settings – NORMAL, COMFORT and SPORT.

Starting from the normal setting, the driver can change the basic character of the car towards sporty or more comfort-oriented driving. In SPORT and COMFORT settings, the corresponding name is illuminated in the button. In NORMAL setting, only the shock absorber symbol is illuminated. In all settings, the adaptive chassis control adjusts the damping to the particular driving situation (up till one thousand times per second) which means it offers an optimum level of driving comfort and enjoyment at all times. In addition, in the SPORT setting the steering feel is also adapted. Particularly on windy roads and poor surfaces, using adaptive chassis control offers sporty and yet comfortable driving.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the wheels from spinning under acceleration by reducing engine torque.

Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

Direct Shift Gearbox (DSG)

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 clutches. The benefit of 2 gear sets and 2 clutches is that one gear set and clutch is engaged driving the vehicle with the second disengaged clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction.

Electronic Stabilisation Program (ESP)

ABS and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Extended Electronic Differential Lock (XDL)

XDL is an extension of the Electronic Differential Lock (EDL) function. When cornering, XDL responds to the load relief at the front wheel on the inside of a corner. The ESP hydraulics are used for the XDL to apply pressure to the wheel on the inside of the corner in order to prevent wheel spin. This improves traction and reduces the tendency to understeer. As a direct result of the one-sided and precise braking pressure, cornering is sportier and more accurate.

Hill Start Assist (HSA)

Hill Start Assist (HSA) holds the vehicle when the foot brake is released by temporarily locking the brake pressure (for a maximum of 1.5 seconds) to provide comfortable starting-off without rolling back. Hill Start Assist (HSA) operates on inclines greater than 5% and is fitted in combination with both the manual transmission and the Direct Shift Gearbox (DSG).

Park Assist ☐

Park Assist actively helps the driver when reversing into parallel parking spaces. The system works by using sensors mounted either side of the front bumper together with parking distance sensors front and rear. To parallel park the driver needs to press the Park Assist button and use the appropriate indicator before the car passes the potential parking space. Sensors in the front bumper then scan the size of the parking space as the car is driven slowly past and the driver is alerted if the parking space is big enough. If there is sufficient space, the driver stops the car, selects reverse and let's go of the steering wheel.

Park Assist will alert the driver of the intended reverse path in the Multi-Function Display, within the driver's field of vision. Park Assist then actively supports the driver by taking over the steering control and parks the vehicle in the available space using the ideal course, if necessary with several moves. The driver can however take over the control of the steering at any time and end the automatic parking procedure. The system can reverse into parking spaces on both the left hand and right hand side of the road, for example on one way streets.

Park Assist cannot replace the driver's attentiveness. The driver is still legally responsible for the vehicle. If the driver notices a risk that pedestrians, other vehicles or objects could be damaged or if they are uncertain of the risk, they will need to react accordingly and stop the vehicle, ending the function.

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year unlimited kilometers manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen dealer.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen New Vehicle Extended Warranty*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 36 month/60,000km extension on the original warranty period already existing with your Volkswagen manufacturers Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit volkswagen.com.au.

* Volkswagen New Vehicle Extended Warranty product is provided by Allianz Australia Insurance Limited (Allianz) ABN 15 000 122 850, AFSL Licence No. 234708. In arranging this cover, Volkswagen Group Australia Pty Ltd, ABN 14 093 117 876 and the authorised dealers act as agents of Allianz and not as your agent. Limits apply to the benefits you can claim. For full terms and conditions of cover, please refer to the relevant Volkswagen New Vehicle Extended Warranty policy document, available to you from your Volkswagen authorised motor dealer.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre is able to undertake work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Accessories®

Volkswagen Genuine Accessories® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Accessories®. Volkswagen Authorised Dealers offer a 3-years/ unlimited kilometres warranty on genuine accessories if fitted prior to vehicle purchase, or a 2-years/unlimited kilometres warranty if fitted after purchase.

Volkswagen Finance

Whether you are buying, borrowing or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are designed to suit your individual requirements and budgeting needs with fast approval times.

Speak to your participating local Volkswagen Dealer today for the best financial solution and ultimate insurance protection for your vehicle or visit volkswagenfinance.com.au.

VOLKSWAGEN FINANCE

Think Blue. Creating a sustainable future together.

Volkswagen is committed to sustainability now and in the future, for us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and behaviour.

We call this way of thinking, Think Blue.

Volkswagen aims to become the leading automotive manufacturer for the environment and economy, making efficient and sustainable vehicles available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.
