Volkswagen New Beetle

The Volkswagen Philosophy.

Innovation. Responsibility. Value. At Volkswagen we pride ourselves on this set of beliefs. So when you make the Volkswagen choice you can be assured that you have chosen a car with this creed at the very core of its inception, its development, and its realisation.

At Volkswagen we have combined the power of innovation with exceptional design to deliver a superior driving experience. Superb technologies such as our low emission petrol and TDI diesel engines not only offer an enhanced driving experience, but significantly reduce both carbon emissions and fuel consumption.

Responsible, efficient environmental considerations such as this not only save you money, but ultimately the planet's precious resources, and is just one example of the many commitments that Volkswagen has made to reduce its carbon footprint.

We are proud of the reputation we have earned for value. A Volkswagen vehicle offers safety, reliability and comfort, making it outstanding value for money. With trusted and timeless German engineering our models are the perfect vehicles for you and your family.

New Beetle.

From its cheeky good looks to its feature-filled interior, the New Beetle has been designed with one thing in mind: fun! And if just looking at it puts a smile on your face, imagine what a drive can do. The New Beetle is a refreshing change – a unique design that can only be described as a modern classic.

Design.

The New Beetle is a vehicle with character and extraordinary styling. Its harmonious curves make the car unique – from the arched roof and the windscreen drawn forward over the bonnet, to the sculptural rear sitting down low to the road. Its silhouette is instantly recognisable – a harmonious convergence of smooth lines and pleasing geometric arches. The result is an unconventional visual statement of optimism, fun and individuality.

The New Beetle's charm begins with its eye-catching but brilliantly simple styling. Intelligent functionality and exciting looks complement each other – right down to the smallest detail. Every piece is rounded, every surface, smooth. The oval shapes of the headlights and tail lights are perfectly integrated into the New Beetle's fluid contours, and they sit flush with the body. Nothing breaks the sculptured flow.

Safety.

Safety is of the highest priority to Volkswagen and is therefore an overriding theme in the design and engineering of the New Beetle. With a full suite of active and passive safety systems, you can rest assured that your safety has been thoroughly considered.

The New Beetle's safety credentials include its rigid body structure which creates a solid passenger cell. Its body panels are designed to crumple in the event of an accident, absorbing the energy of the impact. The New Beetle's lightweight construction is reinforced with hardened, high strength steel to give occupants maximum protection in an accident.

In an accident, depending on the severity of the impact, the New Beetle's safety features work together to protect occupants by deploying the belt tensioners and airbags. The system also activates the hazard warning lights, the doors are unlocked, interior lights are switched on and the fuel pump is deactivated.

Active Safety – Everything designed to help prevent accidents from happening.

Electronic Stabilisation Program (ESP)

ESP helps ensure that the vehicle goes where you steer it, even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with carefully pre-determined values. Should a situation arise in which the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to help correct the problem. It also minimises the likelihood of spinning off on a curve due to understeering or oversteering.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, helping enable the vehicle to remain steerable.

Electronic Brake-pressure Distribution (EBD)

Every vehicle's centre of gravity shifts forwards when the brakes are applied. This presents a risk of the rear wheels tending to lock up due to the reduction in traction. Electronic Brake-pressure Distribution uses the solenoid valves in the ABS unit to regulate the braking power at the rear wheels, thereby ensuring maximum braking performance at both the front and rear wheels and preventing the rear end from swerving out due to over-braking in the rear wheels.

Passive Safety – Design measures taken to protect the occupants of vehicles from injury, or to reduce the risk of injury.

Crumple Zones

Front and rear crumple zones absorb the energy of an impact and divert the resulting forces away from the secure passenger safety cell.

Airbags

All New Beetle models feature standard driver and passenger front and front side/head airbags. Airbags combine with the seat belts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

Safety Optimised Head Restraints

Safety Optimised Head Restraints on the front seats are optimally positioned and specially contoured to help reduce whiplash injuries. In the event of an accident, excellent protection is achieved via the seatback controlling upper body movements, and this is balanced with head movements being controlled via the head restraints.

Seatbelts

Front seat passenger seatbelts are equipped with belt pre-tensioners and belt force limiters. Belt tensioners tighten the seatbelt on impact, pulling it closer to the occupant's body, ideally positioning them for airbag inflation. Belt force limiters reduce seat belt forces on front seat occupants and, in conjunction with belt tensioners and airbags, lessen the risk of upper body injuries. Three-point seatbelts are fitted to all seats, and child seat anchor points are fitted in the rear.

Active Roll Over Protection System (New Beetle Cabriolet)

Sensors recognise a roll-over situation and activate the advanced roll over protection system in just 0.25 seconds. When activated, the rear head restraints pop up in a fraction of a second and when combined with the heavily strengthened windscreen frame, provide a sophisticated safety package.

Leather appointed seating shown is an optional extra.

Interior.

The New Beetle's refreshing design and sense of style flows through to its ergonomic interior. Quality materials and finishes define the interior space. The driver's view is focused on a single, circular instrument cluster which utilises distinctive blue illumination. The high quality controls are clearly labelled and placed in the most logical positions, for easy and intuitive access.

Getting comfortable is easy with the height adjustable driver's seat and a height and reach adjustable steering wheel. The standard air conditioning incorporates a dust and pollen filter to trap airborne particles so they don't enter the cabin. In-car entertainment is delivered by a premium six speaker CD sound system with MP3 compatibility. The small vase in the dash complete with a flower defines the spirit of the New Beetle.

The New Beetle Range.

Volkswagen's petrol or turbo diesel engines deliver impressive performance and fuel efficiency. The New Beetle represents intelligent features and extroverted style along with impressive fuel efficiency. Each model in the New Beetle range benefits from active safety systems such as Electronic Stabilisation Program (ESP), and Anti-lock Braking System (ABS) with Electronic Brake-pressure Distribution (EBD). Passive safety is also covered with airbags and front safety optimised head restraints as standard. Innovative technology is at your fingertips via the optional rear parking distance sensors, a 12 volt socket in the centre console, or electrically operated boot opening.

New Beetle Miami. A surprising and delightful combination of form and function.

The New Beetle Miami makes life comfortable through standard air conditioning and power windows. The brilliantly engineered Miami delivers an exceptional drive from its 1.6 litre petrol engine, producing 75kW of power and 148Nm of torque. 5-speed manual or 6-speed automatic transmissions are available. Safety features include Electronic Stabilisation Program (ESP), and Anti-lock Braking System (ABS) with Electronic Brake-pressure Distribution (EBD), and front and side/head airbags for the driver and front passenger.

New Beetle TDI. Effortless performance and remarkable fuel economy.

The New Beetle TDI makes an impact with remote central locking and a premium sound system with 6 speakers and MP3 compatibility. The impressive and stylish TDI delivers amazing performance and economy from its advanced 1.9 litre turbo diesel engine, producing 77kW of power and an impressive 250Nm of torque. A 5-speed manual transmission is available. Safety features include Electronic Stabilisation Program (ESP), and Anti-lock Braking System (ABS) with Electronic Brake-pressure Distribution (EBD), and front and side/head airbags for the driver and front passenger.

New Beetle Cabriolet. Fun, freedom and excitement with advanced engineering.

The New Beetle Cabriolet's irresistible appeal is enhanced with standard front fog lights, cruise control and an auxiliary input audio socket in the dashboard for MP3 player adaptability. 16" San Antonio alloy wheels are standard. The Cabriolet features an impressive petrol engine that produces 85kW of power and 172Nm of torque. It features a 5-speed manual transmission as standard or the option of a 6-speed automatic. Safety features include Electronic Stabilisation Program (ESP), Anti-lock Braking System (ABS), Electronic Brake-pressure Distribution (EBD), an active roll over protection system and front and side/head airbags for the driver and front passenger.

At the push of a button you can let the outside in. It's simple and takes only 13 seconds. One handle locks and releases the soft top and then the roof is quickly lowered or raised by pressing a button. The New Beetle Cabriolet is a true all-weather soft top. From balmy summer evenings to torrential rain in winter, the electric folding roof is fully insulated, lined and sealed to let you make the most of any weather. The thoughtful design extends to the glass rear window complete with a demister.

Stylish 16" San Antonio alloy wheels are standard on the New Beetle Cabriolet.

Optional Equipment.

Leather appointed seating

The New Beetle offers optional leather appointed seating with heated front seats.

Sunroof

The optional slide and tilt adjustable electric sunroof offers a liberating view of the outside world. The sunroof is not available for New Beetle Cabriolet.

Optional extras.

Rear Parking Distance Sensors ☐

The optional rear parking distance sensors warn of the distance to obstacles behind the vehicle, and operate by ultrasonic sensors mounted in the bumpers. A warning sound indicates how far the vehicle is from an obstacle. Rear parking distance sensors are switched on automatically when reverse gear is engaged.

Front Fog Lights ☐

Optional front fog lights mounted in the front bumper add a sporty element and an additional safety feature. Front fog lights are standard for New Beetle Cabriolet.

☐ Optional extras.

Volkswagen Genuine Accessories.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own personality and individual sense of style.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail. Each and every genuine accessory has been designed specifically with the Beetle in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Beetle, visit your local Volkswagen Dealer.

Owning a Volkswagen.

Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year/100,000km (whichever occurs first) manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year.

This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen Repair Centre.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

Volkswagen Extended Warranty

To give you added peace of mind and the assurance of added security, you have the option to extend the factory warranty to suit your ownership cycle. If your Volkswagen was purchased new by you, we can offer you a 36 month/60,000km extension on your already existing Volkswagen manufacturers Warranty. Have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles factory warranty, please consult your local Volkswagen dealer, refer to your owner's handbook or visit www.volkswagen.com.au.

Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre undertakes work in accordance to factory specified guidelines and maintenance schedules.

Volkswagen Genuine Parts®

Volkswagen Genuine Parts® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Parts®. Volkswagen Authorised Dealers offer a 2-year warranty on Genuine Parts from the date of purchase.

Volkswagen Finance

Buying, Borrowing or Leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers, across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are personalised to suit your individual requirements. You design your plan so that it meets your budgeting needs and can rest assured that there will be no surprises along the way. Speak to your local participating Volkswagen Dealer today to put together a financial solution that best suits your lifestyle.

Glossary.

Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the driven wheels from spinning under acceleration by reducing engine torque. It is active at speeds above 40km/h.

Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction. EDL is active in forward and reverse and operates up to 40km/h.

Electronic Stabilisation Program (ESP)

ABS, EDL and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

Australian Environmental Strategy.

Steps Towards Sustainability

To Volkswagen Group Australia, sustainability means taking responsibility for the environment, as well as actively participating in the development of society. We believe sustainability offers opportunities for long-term innovations, new approaches, efficient technologies and ground-breaking products. Our organisation has established an Environment Committee to manage our business activities and reduce our environmental impact.

Carbon Management Strategy

We have developed a Carbon Management Strategy to identify and manage carbon emissions from our business activities. Our fuel usage from company cars and energy usage were calculated to measure our Carbon Footprint, and comprehensive carbon reduction targets have been set. Volkswagen Group Australia aims to downsize its environmental footprint in the future.

Carbon Management Program

Our range of vehicles has earned a reputation for fuel efficiency. We're working to extend that efficiency throughout our entire operational structure. We've initiated a Carbon Management Program, to recommend changes to achieve emissions reductions. We're making real changes in reducing our carbon footprint.

Environmentally Friendly Engines

Our TSI twin or single-charged petrol engines achieve impressive fuel efficiency with reduced CO₂ emissions. Our TDI diesel engines use less fuel and have lower emissions, with the benefits of high torque and performance. Our diesel particulate filter extracts soot from vehicle exhaust emissions. Numerous engines already fulfill the stringent forthcoming Euro 5 emissions standard.
