# A car just for you.

Whether you're cruising along the coast, cutting through city traffic or simply heading out with friends and family, the Volkswagen Polo will get you there with confidence and style.

The Polo is a car whose parts fit together perfectly, creating a vehicle that's fun to drive, economical and somehow more than the sum of its parts. Call it good design, call it quality engineering or maybe just call it 'Volkswagen' – whatever it is, the Polo has it in spades.

It's also a car that stands out from the crowd. It's a well-proportioned vehicle and its interior shows the attention to detail that has become Volkswagen's hallmark.

Four models are available: the well-appointed Trendline (available with a 5-speed manual or 7-speed DSG transmission);

the sporty 77TSI Comfortline; the thrifty 66TDI Comfortline (with diesel engine) and the potent GTI.

Common to all models are a number of key features. These include Bluetooth® connectivity, daytime driving lights, power windows, Hill Start Assist, Traction Control and Braking Control, six airbags, head restraints, Media Device Interface (MDI) and more. The Polo may be a small car, but there's nothing under-sized about its specifications or performance. In fact, it has a 5-star ANCAP safety rating – the highest rating possible.

The Polo was also named World Car of the Year 2010; a terrific accolade but also further proof, if any were needed, that this is a car with universal appeal and that provides great value to motorists no matter where in the world they may be.

# Range Overview.

## Trendline

Page 8.

### Small is beautiful

Confident, bold and stylish – and that’s even before you step inside. The Trendline is well-appointed and makes a big impression with a generous array of standard features both inside and out, including a finely tuned entertainment system and impressive safety devices.

## 77TSI Comfortline

Page 10.

### Memory maker

Take your on-road enjoyment to a whole new level with the 77TSI Comfortline. Because sometimes things need to feel as good as they look. With a front centre armrest, leather multi-function steering wheel and convenient cruise control, every moment in the driving seat will be memorable.

## 66TDI Comfortline

Page 12.

### One for the drivers

Volkswagen has been refining its diesel technologies for years, and the result is a range of highly sophisticated engines. The Polo 66TDI Comfortline's 1.6L Common Rail turbo diesel engine delivers 66kW of power and 230Nm of torque while sipping just 4.6L of fuel per 100km (combined)\*. As a Comfortline model it's also stylish and comfortable inside and out; just the thing for drivers who want to minimise their environmental impact without compromising on the driving experience.

\* 7-speed DSG, as per Australian Design Rule 81/02.

## GTI

Page 14.

### Pocket rocket

Three legendary initials. The Polo GTI is a real pocket rocket and it more than lives up to the reputation of the GTI badge. From the classic 'honeycomb' grille with red highlights to the 1.4L, twin-charged TSI engine (outputting 132kW and 250Nm), Jacky tartan sports seat upholstery and 17" Denver alloy wheels, it's a package that excites all the senses whether it's standing still or gliding through the curves.

# Trendline.

## Keeping you on the move.

Looking for a car that's dynamic, stylish and makes a statement? The Polo Trendline has it all. No more blending into the background – stand out from the crowd and step into the spotlight, with the 5-door Trendline's exceptional array of standard features making a perfect package.

Both the 5-speed manual and the optional 7-speed automatic DSG transmission models provide lively performance, with the 1.4 litre petrol engine kicking out 63kW of power and 132Nm of torque.

The innovative technology extends to the inside too. A Media Device Interface (MDI) and Bluetooth® connectivity are standard on the vehicle. The RCD310 radio system comes complete with MP3 compatibility, giving you the option of listening to your all-time favourite tracks, without the interruptions.

Of course, if you welcome interruptions from your passengers, then the Trendline's cabin accommodates five – and you'll feel

even cooler with the chillable glove compartment and front and rear cup holders. And should you decide to splurge at the shops or head off on an action-packed adventure, then the ultra efficient 60/40 split folding rear seats fold down to create a level cargo floor for those extra-long bits and pieces.

Safety-wise, the standout features speak for themselves. Trendline benefits from no less than six driver and passenger airbags, Electronic Stabilisation Program, Anti-Slip Regulation (ASR) traction control and ABS brakes with Brake Assist.

Hill Start Assist (HSA) won't let you down on tricky gradients, and Electronic Differential Lock (EDL) will keep you from getting in a spin by automatically braking a spinning wheel, diverting power to the wheel with grip to give you optimum traction when you need it most.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

# 77TSI Comfortline.

## More than meets the eye.

Life is hectic: things to do, places to go, people to see. But getting there has never been so much fun. And whatever the occasion, the 77TSI Comfortline makes for the perfect getaway car, with all the convenience, reliability and comfort you'd expect from a Polo.

Its 1.2 litre TSI petrol engine delivers 77kW of power and 175Nm to get you where you need to be, and its strong silhouette, athletic lines and stylish Lakeside 15" alloy wheels can't help but get you noticed. Even better, the 77TSI Comfortline's fuel consumption impresses at just 5.5L/100km\*.

The sleek interior can't help but make a further lasting impression, oozing style, sophistication and a laid-back elegance. Feel the difference for yourself as you sink into the tasteful cloth seats and grip the multi-function leather steering wheel, complete with

mounted audio controls. Take in the multi-function display, giving you everything you need to know at a glance, and set your own beat with the MP3 compatible CD player.

And when looking this good just gets too much, take comfort in the cruise control feature, air-conditioning and front centre armrest.

Of course, safety doesn't take a back seat when it comes to the 77TSI Comfortline. Whether you opt for the 6-speed manual or the 7-speed DSG transmission, you can rest easy in the knowledge that you're driving a 5-star ANCAP safety rated-car. It's easy to see why, with its multitude of driver and passenger airbags, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) traction control.

Optional sport package shown.

77TSI Comfortline 11

# 66TDI Comfortline.

## Power and thrift.

There's a reason why diesel engines are becoming an ever more popular choice among discerning motorists. They're quiet, fuel efficient, and offer driving characteristics to suit every driver, from the suburban commuter to the dedicated cruiser.

The 66TDI Comfortline is powered by an advanced 1.6L Common Rail turbo diesel engine. The Common Rail fuel injection system uses a high-pressure fuel rail to deliver precisely timed and carefully measured amounts of fuel to the cylinders for maximum performance and efficiency; the turbocharger provides a boost to performance but more importantly, has an important role in reducing fuel consumption.

The result? A healthy 66kW of power and a generous 230Nm of torque, combined with a fuel consumption of just 4.6L per 100km\*. This translates to a smooth, powerful drive, with plenty of pickup at low revs and effortless cruising and acceleration at speed.

But of course there's more to the 66TDI Comfortline than its engine and performance. As a Comfortline model it also includes a luxurious interior fit-out. Chrome highlights, multi-function leather steering wheel, front and rear power windows and an adjustable boot floor height will all make you feel at home and comfortable as soon as you take your seat. On the outside, Lakeside 15" alloy wheels add a touch of class and emphasise the Polo's classic lines.

On the technology side it includes six airbags, Electronic Stabilisation Program (ESP), ABS brakes with Brake Assist, Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR) – all of which help it achieve the highest possible ANCAP safety rating (5 stars).

It's a car that will fit in easily with your lifestyle, no matter what you plan to do or where you plan to go. Best of all, it'll take you there at a canter, in comfort and style.

This vehicle has been awarded a maximum 5 Star Rating by ANCAP.

\* 7-speed DSG, as per Australian Design Rule 81/02.

---

# GTI.

## An emphatic statement.

Big shoes for a little car to fill. The GTI badge is a Volkswagen hallmark of performance, dynamics and style, and the Polo GTI doesn't disappoint. At its heart is the engine: a 1.4L, twin-charged TSI engine that kicks out a mighty 132kW of power and 230Nm of torque. Mated to a smooth-shifting, 7-speed Direct Shift Gearbox (DSG) as standard, the power makes it to the ground courtesy of distinctive 17" Denver alloy wheels shod with low-profile, high performance tyres.

Handling dynamics are razor sharp, thanks to the tuned suspension and Extended Electronic Differential Lock (XDL) system, which helps prevent wheelspin and understeer. And you'll definitely feel in control with the flat-bottomed, three-spoke leather steering wheel (with red highlight stitching) and Jacky tartan-upholstered sports seats.

Available as a 3 or 5 door hatch body style, you'll love the way it looks. The famous GTI badge and honeycomb grille with red

highlights make a clear statement, as do the (optional) Bi-Xenon headlights with LED daytime driving lights, red brake calipers and classic Polo lines.

Not that it's spartan inside. Bluetooth® phone connectivity, automatic climate control air conditioning, rain sensing windscreen wipers and an automatically dimming interior rear-view mirror help you keep your eyes on the road and your hands on the wheel. Meanwhile, the Media Device Interface (MDI) with USB connection cable (iPod cable available separately) and the RCD510 touchscreen audio system with 6 disc CD changer and SD slot will keep your favourite tunes playing no matter what media they're on.

So if you're looking for a pocket rocket with a dash of class, look no further: Polo GTI is the car for you.

Bi-Xenon headlights shown are optional extras.

# Exterior.

## More than just eye candy.

Clean, purposeful, dynamic. The Polo's external simplicity belies the many hours of careful design work that have gone into improving its aerodynamics and aesthetics. Its profile is confident, its stance purposeful – this is a car that knows what it is and where it's going.

The grille and headlights accentuate the Polo's low centre of gravity while its distinctive tail lights emphasise its broad shoulders. The integrated roof spoiler, side skirts and streamlined side mirrors complete the stylish, aerodynamic design.

### 01, 02 & 03. Wheels

Wheels are an important part of any car's appearance and the Polo range has a number of options, including 15" full wheel trims; Lakeside 15" alloy wheels (standard on 77TSI Comfortline and 66TDI Comfortline); and Denver 17" alloy wheels (standard on GTI).

### 04. Bi-Xenon headlights with LED daytime driving lights

Optional on the GTI, Bi-Xenon headlights produce even more light than their halogen counterparts, providing improved visibility and an expanded field of view. The LED daytime driving lights further improve visibility in all driving conditions.

### 05. Panoramic electric glass sunroof

An option for the Comfortline and GTI variants, the Polo's panoramic, electrically-operated glass sunroof lets in the sun and air when conditions are good, and its integrated wind deflector and sunblind keeps them out when they're not. Simple, effective and highly functional – just what you'd expect on a Polo.

### 06. Daytime driving lights (not pictured)

When you're on the road it's not just important to see clearly; it's also important to be seen clearly. The Polo's daytime driving lights help ensure that other road users will see you coming well before you draw near.

## Interior.

### Home away from home.

You're going to spend a lot of time inside your car, so it's important that its interior is pleasing to the eye, comforting to the body and soothing to the nerves. It also needs to present all your car's controls in a logical, easy-to-understand and easy-to-operate fashion.

The Polo's interior has been carefully crafted to meet all these requirements. From the supportive seats to the smallest details of trim and finish, everything is there for one reason and one reason only: your comfort and amenity.

#### 01. RCD510 touchscreen audio system

The Polo GTI's RCD510 audio system will provide crystal-clear audio every time you drive. Controlled via its full-colour touchscreen, it includes a six-disc CD changer with MP3 compatibility and an SD card slot, so it's as versatile as you are.

#### 02. Media Device Interface (MDI)

The Polo's device interface allows you to connect USB devices, data storage devices and Apple\* devices, and operate them through the car's in-dash audio system, so you don't need to distract yourself with your portable device's controls. Best of all, it also starts charging your device as soon as it's connected.

#### 03. Automatic dimming rear view mirror

Fitted as standard on the GTI or as part of the Comfort package on Comfortline models, the automatic dimming rear view mirror uses sensors to detect the light level and adjust the mirror's reflectiveness. This allows it to reduce the amount of light and glare reflected in the mirror, which improves visibility in low-light or night time conditions.

#### 04. Bluetooth® phone connectivity

As much a safety feature as a convenience, Bluetooth® phone connectivity comes as standard on all Polo variants. The ability to make and receive calls hands-free, and to access address book

information on the car's touchpad, makes communicating on the move a breeze.

\*ipod® cables available as an accessory.

# Technology.

## Designed for drivers.

Every Volkswagen combines a range of carefully-selected technologies designed to optimise its performance, comfort and reliability, and the Polo is no exception. Every model has been crafted and comprises an advanced engine (including the availability of TSI and TDI) and transmission (manual or DSG) mated to

state-of-the-art running gear and a sophisticated internal fit-out.

From the moment you turn on the ignition you'll know you're in for a great ride; from the moment you move off you'll know how it feels to be driving a piece of automotive art.

### 01. TSI engine

Volkswagen's TSI technology includes turbo-charged petrol engines with direct injection. The innovative engineering boasts excellent torque and power at low revolutions – for you that means lower fuel consumption and fewer emissions.

### 02. TDI engine

Volkswagen's cutting-edge TDI engines with Diesel Particulate Filters feature Common Rail technology that injects precise amounts of fuel at extremely high pressure. This not only results in a cleaner burning engine – and years of hard-wearing

durability – but exceptional fuel economy, impressive torque and compelling performance whatever the drive.

### 03. Direct Shift Gearbox (DSG)

DSG is an advanced 7-speed transmission in which the clutch and gearshift are controlled electronically. What makes DSG unique is that the next gear is already pre-selected and awaiting power to be transferred, resulting in a gear change that takes only 3-4 hundredths of a second. The benefits are virtually no interruption to power, traction or acceleration, and additional flexibility. Furthermore, because it ensures optimum

transmission of the engine power, DSG provides excellent fuel consumption and driving satisfaction.

### 04. Hill Start Assist (HSA) (not pictured)

Hill Start Assist holds the vehicle stationary for 1.5 seconds on hills with an incline greater than 5 percent, when the foot brake is released, by temporarily locking the brake pressure. This intelligent feature provides a comfortable hill start, which importantly avoids any rolling back.

# Safety.

## Safety comes as standard, every time.

The Polo has been designed with your safety in mind from the outset; keeping drivers and passengers safe has always been a key goal for Volkswagen's designers and engineers.

This is because it combines two kinds of safety measures: active features to help you avoid accidents, like traction control and braking control systems; and passive features to protect occupants from injury in case of a collision, like crumple zones, airbags and head restraints.

It's all in the design and engineering, and the end result is a car that gives you confidence in all conditions, a car that's as safe as some vehicles twice its size.

### 01. Traction Control (EDL, ASR and ESP) Braking Control (Brake Assist, ABS and EBD)

Traction control helps to ensure that you maintain control of your vehicle even in difficult driving situations. Built around three distinctive functions, Electronic Stabilisation Program (ESP), Electronic Differential Lock (EDL) and Anti-Slip Regulation (ASR), Traction Control improves grip, helps prevent wheel spin and adjusts engine power automatically depending on the conditions.

### 02. Airbags

Six airbags (twin front, side and curtain) are standard features. Airbags combine with the seat belts to help reduce the risk of severe head and chest injuries in collisions. When inflated, airbags cushion the head and upper body and distribute the resulting loads over as large an area as possible.

### 03. Safety Optimised Head Restraints

By working in unison with your vehicle's seatbelts, your Polo's front Safety Optimised Head Restraints are designed to reduce whiplash injury – ensuring optimal protection when you need it most.

### 04. Crumple zones (not pictured)

The body of the Polo has also been designed with the passengers 'safety in mind. Front and rear crumple zones absorb the energy of an impact in the event of an accident, working together with the safety cell for you and your passengers inside the cabin.

### 05. Seatbelts (not pictured)

All seats feature three-point seatbelts, while the front seats also have belt pre-tensioners (which tighten the belt on impact) and belt force limiters (which reduce forces on passengers). These help position the body so as to minimise injuries in the event of a crash.

# Optional Equipment.

## The personal touch.

Let's face it, no two car owners are alike. So why should two cars be alike? At Volkswagen we have a range of optional equipment for the Polo that will help you make your car uniquely your own.

So no matter what your lifestyle or automotive requirements are, we're confident that you'll be able to find the Polo that's right for you – and then add the options to make it a perfect fit.

After a little more comfort? A little more style? Then we've got you covered. All our options enhance an already complete offering, making it just that little bit more your own.

### 01. Comfort package (not pictured)

Comfortline owners may like to include the Comfort Package, a suite of extras that make driving in, and living with, your Polo just that little bit more enjoyable. It includes rain-sensing wipers, a low tyre pressure indicator, automatic climate control air conditioning and an automatically dimming rear-view mirror.

### 02. Sport package

If you want your Comfortline to feel sportier, the Sport Package is a great option offering a number of subtle but effective additions. These include dark tinted rear side and

rear windows, sports suspension, a low tyre pressure indicator, 17" Boavista alloy wheels and front fog lights.

### 03. Alcantara/Leatherette upholstery with heated front sports seats

Comfortline and GTI owners can opt for our Alcantara/Leatherette upholstery with heated front sports seats. These durable, comfortable seats add a touch of panache to the Polo's interior.

# Volkswagen Genuine Accessories.

## The finishing touches.

Movement fascinates. In fact, there are few subjects that excite people more, that's because movement is synonymous with freedom. Our comprehensive range of genuine accessories give you the freedom to customise the look and feel of your vehicle to reflect your own.

The product philosophy is simple – to deliver innovative technologies and premium design – right down to the finest detail.

Each and every genuine accessory has been designed specifically with the Polo in mind and has been engineered and rigorously tested to ensure that it meets the same high standards of quality as the vehicle itself.

No matter what you choose you can have peace of mind knowing that any genuine accessory fitted by your local Volkswagen Dealer, at the time of your vehicle purchase will be covered by the same warranty as the vehicle itself.

For more information or to experience the full range of genuine accessories designed to suit the Polo, visit your local Volkswagen Dealer.

# Fuel Saving Tips.

## We can all Think Blue.

At Volkswagen, we believe we have a responsibility to produce the most fuel efficient, environmentally sustainable vehicles possible. But the good news is that all of us can Think Blue. By driving more responsibly, we can reduce fuel consumption even further.

How much difference can just one person make? Rather a big difference, we think. It's not just about individual actions and the savings they make. It's also about the effect they have on the wider world. Your decision to consume less fuel and limit your carbon emissions sends a clear message about your commitment to sustainability and your determination to act accordingly. As individuals, the difference we make to global emissions is modest. As part of a global movement to act responsibly and take better care of our planet, the difference we make is huge.

Fossil fuels are a limited resource, just like clean air and clean water. They won't last forever, so the less we use now, the longer our supplies will last and the longer we'll have to find better alternatives.

There are also benefits that are real and noticeable right here, right now. Reducing your consumption will put money back in your pocket as you enjoy low-emission motoring – and it couldn't be simpler.

We believe that to 'Think Blue' about your driving style isn't difficult, and its practical benefits go far beyond just saving money and reducing emissions. Here are nine tips on how to drive more efficiently.

## Be aware and save fuel. Think Blue.

### 04. Comfort high, fuel consumption low Use auxiliary equipment in moderation.

We all love our sound systems, air conditioning and other creature comforts, but they all use energy, which ultimately means that they all consume fuel. Turn off seat heaters and de-misters once they've done their job. Open your windows for a moment or two as you drive off in summer to let the hot air circulate out before reaching for the air conditioning. Check your route before you get going and the equipment you're using – if you don't need it, consider turning it off.

### 05. Savings are in the air Check your tyre pressures.

Checking your tyre pressures before driving off can pay big dividends when it comes to cutting fuel consumption. Under-inflated tyres massively increase rolling resistance, forcing your car to work harder (and burn more fuel) just to move down the road. If you're buying new tyres, look out for those with lower rolling resistance. Keeping your tyres in good order can help you save fuel before you've even driven off!

### 06. A warm engine – a cool way to save Avoid short trips.

Many short trips means higher fuel consumption. Why? Because cold engines run less efficiently, and lots of short trips means your engine will spend much more time running cold. Plan your errands to minimise the number of trips you need to make and you'll save yourself time and stress as well as fuel and emissions. (It's unnecessary to run the engine just to warm it up – as it doesn't reduce fuel consumption and is environmentally unfriendly.)

**01. Take it easy and save**  
**Drive the modern way and think ahead.**

Aggressive driving – hard braking and acceleration, sudden lane changes and unpredictable behaviour – is also fuel-inefficient driving. Instead, take a modern approach: predictive driving. Drive smoothly, watching as far ahead as you can to anticipate hazards and other events; cruise with the traffic and use your momentum to help you arrive safe and relaxed.

**02. Change up early and fill up later**  
**Drive in the highest gear possible.**

If you have a manual transmission, work your way up through the gears as quickly as you can. Change into second gear once you've moved forward a car length, and cruise in the highest gear that's practical. It's like riding a bike – cruising at low revs uses far less energy than pedaling hard all the time. With an automatic, reduce excessive acceleration and avoid a kick down.

**03. Just let it roll**  
**Use overrun fuel cutoff.**

With the right driving techniques you can really start saving. The overrun fuel cutoff feature interrupts fuel supply to the engine so that not a single drop of fuel is used. Simply take your foot off of the accelerator, keeping your car in gear when coasting down hills or towards traffic lights. This will reduce your fuel usage.

**07. Well-oiled for impressive savings**  
**Use Volkswagen approved engine oils.**

A well-lubricated engine produces less emissions than a poorly lubricated engine, especially when the weather is cold or the trip is short. Volkswagen Approved engine oils circulate easily, helping reduce fuel consumption and emissions. So make sure you use Volkswagen Approved engine oils and make sure you stick to your car's recommended oil change intervals.

**08. Keep it sleek**  
**Cut aerodynamic drag.**

Aerodynamics can have a significant impact on fuel consumption, especially on longer trips. So make sure you take your roof racks, bike racks, roof boxes and other attachments off your car when they're not in use. And keep windows up (and sunroofs closed) when cruising, as the air turbulence they create increases drag and hence, fuel consumption. You'll feel the difference as you drive and you'll see the difference at the fuel bowser.

**09. Lightly does it**  
**Avoid unnecessary weight.**

Every kilogram you load into your car takes energy to move – energy that will be supplied by burning fuel. You don't want to be caught short of items you need, but there's no point in lugging around your golf clubs, tent, portable barbecue and full tool box 'just in case'. Pare your regular load down to the minimum and enjoy the space as well as the fuel savings.

# Glossary.

## Anti-lock Braking System (ABS)

When braking, wheel speed sensors measure the road wheel speed and should one or more wheels start to lock the ABS system reduces brake pressure to that wheel. This prevents the wheels from locking during heavy or emergency braking, enabling the vehicle to remain steerable.

## Anti-Slip Regulation (ASR)

ASR is a switchable traction control system that prevents the driven wheels from spinning under acceleration by reducing engine torque. It is active at speeds above 40km/h.

## Brake Assist

During emergency braking, Brake Assist aids the driver by increasing the brake pressure automatically to a level exceeding the locking limit. The ABS is thus quickly brought into the operating range, which enables maximum vehicle deceleration to be achieved.

## Direct Shift Gearbox (DSG)

DSG is a manual gearbox in which the gearshifts are controlled electronically. What makes the DSG unique is that it has 2 separate gear sets operated by 2 clutches. The benefit of 2 gear sets and 2 clutches is that one gear set and clutch is engaged driving the vehicle with the second disengaged clutch having already pre-selected the next gear awaiting for power to be transferred. As the next gear has already been pre-selected prior to power being applied, the gear change only takes 3-4 100ths of a second. There is virtually no interruption to power, traction or acceleration. The DSG also offers Tiptronic gear selection and sports mode.

## Electronic Brake-pressure Distribution (EBD)

Electronic, more sophisticated means of regulating the ratio of front/rear brake pressure. Settings are varied according to driving and load conditions to ensure each wheel is braked to the optimum extent.

## Electronic Differential Lock (EDL)

EDL improves driving and steering characteristics when accelerating on road surfaces where each wheel has a different degree of traction. The system operates automatically and is combined with the ABS system. Using the ABS wheel sensors, EDL monitors the speed of the individual driving wheels. When a difference in driving wheel speed is detected (i.e. when one wheel starts to spin due to differences in road surfaces, e.g. due to water or dirt) the system brakes the spinning wheel, transferring engine power to the wheel with the best traction. EDL is active in forward and reverse and operates up to 40km/h.

## Electronic Stabilisation Program (ESP)

ABS, EDL and ASR traction control systems are integrated into the Electronic Stabilisation Program (ESP). In short, ESP helps ensure that the vehicle goes where you steer it even in extreme driving conditions. The ESP system constantly compares the actual movement of the vehicle with pre-determined values and should a situation arise where the vehicle starts to skid, ESP will apply the brakes to individual wheels and automatically adjust the engine's power output to correct the problem. ESP prevents the vehicle from losing control when trying to avoid an accident, for example. It also prevents spinning off on a curve due to either understeer or oversteer.

## Extended Electronic Differential Lock (XDL)

XDL is an extension of the Electronic Differential Lock (EDL) function. When cornering, XDL responds to the load relief at the front wheel on the inside of a corner. The ESP hydraulics are used for the XDL to apply pressure to the wheel on the inside of the corner in order to prevent wheel spin. This improves traction and reduces the tendency to understeer. As a direct result of the one-sided and precise braking pressure, cornering is sportier and more accurate.

## Hill Start Assist (HSA)

Hill Start Assist (HSA) holds the vehicle when the foot brake is released by temporarily locking the brake pressure (for a maximum of 1.5 seconds) to provide comfortable starting-off without rolling back. Hill Start Assist (HSA) operates on inclines greater than 5% and is fitted in combination with manual transmissions and the Direct Shift Gearbox (DSG).

# Owning a Volkswagen.

## Volkswagen New Vehicle Warranty

Every new Volkswagen passenger vehicle is covered by a 3-year unlimited kilometers manufacturer's warranty, which includes Volkswagen Assist (24hr roadside assistance). Every new Volkswagen passenger vehicle is also covered by a 3-year paintwork and 12-year anti-corrosion perforation warranty.

## Volkswagen Assist – 24 Hour Roadside Assistance

As a valued customer, you can be assured that wherever you travel within Australia, you will have access to roadside assistance, 24 hours a day, 365 days a year. This is complimentary for the duration of the vehicle's original Volkswagen warranty period. You will receive help in the event of a breakdown or accident and if required, your vehicle will be mobilised or transported to an Authorised Volkswagen dealer.

As a Volkswagen owner you will also have access to the additional benefits of accommodation and car rental if your vehicle cannot be mobilised within 24 hours, when you are over 100kms away from home. Volkswagen Roadside Assist can also be renewed at the expiry of the original warranty, ensuring ongoing coverage for your vehicle.

## Volkswagen New Vehicle Extended Warranty\*

To give you added peace of mind and the assurance of added security, you have the option to extend the warranty period to suit your ownership cycle. If your Volkswagen is still covered by its New Vehicle Warranty, we can offer you a 36 month/60,000km extension on the original warranty period already existing with your Volkswagen manufacturers Warranty. You then have the assurance that your Volkswagen remains a Volkswagen. For further information regarding warranty and extending your vehicles warranty period, please consult your local Volkswagen dealer, refer to your owner's handbook or visit [volkswagen.com.au](http://volkswagen.com.au).

\* Volkswagen New Vehicle Extended Warranty product is provided by Allianz Australia Insurance Limited (Allianz) ABN 15 000 122 850, AFSL Licence No. 234708. In arranging this cover, Volkswagen Group Australia Pty Ltd, ABN 14 093 117 876 and the authorised dealers act as agents of Allianz and not as your agent. Limits apply to the benefits you can claim. For full terms and conditions of cover, please refer to the relevant Volkswagen New Vehicle Extended Warranty policy document, available to you from your Volkswagen authorised motor dealer.

## Volkswagen Service

Your Authorised Volkswagen Service Centre is part of Volkswagen's global Quality Management System, ensuring all dealers are certified to ISO 9001:2000 – an internationally recognised Quality Standard. Authorised Volkswagen Service Centres have factory trained Technicians equipped with the very latest diagnostic equipment, specialist tooling and Volkswagen Genuine Parts. An Authorised Volkswagen Service Centre is able to undertake work in accordance to factory specified guidelines and maintenance schedules.

## Volkswagen Genuine Accessories®

Volkswagen Genuine Accessories® are designed for your vehicle and approved by Volkswagen, with particular regard to safety. The workmanship, dimensional accuracy and materials used in these parts comply with factory specifications. To ensure safety and reliability, Volkswagen recommends the use of Volkswagen Genuine Accessories®. Volkswagen Authorised Dealers offer a 3-years/ unlimited kilometres warranty on genuine accessories if fitted prior to vehicle purchase, or a 2-years/unlimited kilometres warranty if fitted after purchase.

## Volkswagen Finance

Whether you are buying, borrowing or leasing, Volkswagen Finance will certainly make you think differently about financing and insuring your new Volkswagen. Committed to meeting the needs of Volkswagen drivers across Australia, we offer a range of leasing, financing and insurance products, each with distinct advantages depending on your specific circumstances. Our packages are designed to suit your individual requirements and budgeting needs with fast approval times.

Speak to your participating local Volkswagen Dealer today for the best financial solution and ultimate insurance protection for your vehicle or visit [volkswagenfinance.com.au](http://volkswagenfinance.com.au).

**VOLKSWAGEN FINANCE**

# Think Blue. Creating a sustainable future together.

Volkswagen is committed to sustainability now and in the future, for us this means taking responsibility for the environment by getting involved in initiatives that contribute to a sustainable future through our products and behaviour.

We call this way of thinking, Think Blue.

Volkswagen aims to become the leading automotive manufacturer for the environment and economy, making efficient and sustainable vehicles available to everyone. We want to inspire and motivate people to get involved in ecological sustainability, on the road and everywhere else.
