

VOLVO S60

WE'RE VOLVO CARS.

We put people first.

We're Swedish. Scandinavian designers always start with the person who's going to use an object and ask, "What can we do to make this person's life better, easier or more comfortable?"

We've always used this philosophy when we design our cars. So, while other car manufacturers might start with technology and try to squeeze people in around it, we begin by designing our cars around you. We ask what you need, and then use our technical skills to make your life easier, better, safer and more beautiful. Form follows function, and when you design a car inside and out with people in mind, it looks naturally beautiful. We think that looking at and interacting with our cars should make you feel great, every day.

Designing cars around people has led to many innovations over our 89-year history. You know the three-point safety belt in your current car? That was our invention from 1959. And now we're working towards our vision to design cars that should not crash. In the shorter perspective, our aim is that by 2020 nobody should be killed or seriously injured in a new Volvo. Of course, you'll already benefit from this research in your current Volvo. We've addressed a few environmental issues, too. In 1976 we developed the Lambda Sond – a sensor that monitors exhaust gas, reducing emissions and boosting performance as well as economy. It's still part of every petrol-engined car in the world. Innovation is at the core of Volvo Cars – it's because of where we come from.

THE VOLVO
EXPERIENCE | 44

We've designed the Volvo S60 for drivers like you: enthusiasts who love a focused, commanding ride combined with elegant contemporary Scandinavian design – and the comfort you'd expect from a Volvo.

"If you're the kind of driver who chooses the back roads when you drive home from work, then you're the person we had in mind when we were designing the new S60." That's how S60 Product Manager Stefan Sällqvist sums up our mid-sized sedan – and we couldn't put it better.

At the heart of our dynamic, natural driving experience is a great chassis. We're really proud of the standard Dynamic Chassis – we've spent thousands of hours perfecting and tuning it, and heightened its responsive, in-command driving experience.

And as soon as you get behind the wheel, you'll discover another great example of outstanding Scandinavian design based around people. Seats have been a Volvo strength since the 1970s, when we enlisted orthopaedic surgeons to help us develop an ergonomically supportive shape that ensures you arrive fresh and relaxed after even the longest

journey. And with the Volvo S60, we've been able to retain the comfort yet make the seats even sportier, as befits a true driver's car.

Then, there's the sheer build quality. You can always tell true craftsmanship by looking at the details. The Volvo S60 has beautifully styled integrated tailpipes, which are the physical and visual link to our technically advanced, highly efficient new generation of drivetrains.

But a dynamic driver's car also needs to have impact: we've all been in a situation where you look in your rear-view mirror and see a really striking machine. The Volvo S60 has that kind of look. With its strong shoulders and V-shaped bonnet, it's unmistakably a Volvo and carries itself with pride. The wide grille seems ready to devour the road ahead of it while the expressive headlights appear as if they've been shaped by the wind at high speed.

To add to the road-hugging expression, we've positioned the daytime running lights close to the ground. Together with the coupé-like silhouette, all these design elements create that feel of urgency and pace that expresses the character of the Volvo S60 so well.

"We've boosted the car's handling, design and controls with a comprehensive series of updates that'll have you searching for any excuse to get behind the wheel."

VOLVO S60

For people who enjoy taking the long way home.

The Volvo S60 is a beautifully balanced combination of dynamism, style and comfort. We've given our mid-sized sedan a host of upgrades. In our on-going quest to give you more power at lower fuel consumption, you can now choose from even more variants of our highly efficient Drive-E powertrains, both in petrol and diesel. And with our gearshift

paddles that are standard on Luxury and R-Design models you can shift up and down the automatic gearbox in manual mode without ever taking your hand off the steering wheel. Inside, you'll love the sheer comfort of the cabin – especially at night, when it is tastefully lit with Ambient Light. Then there's Premium Sound by Harman

Kardon®, which makes you experience your favourite music in an entirely new way. We've also given you more colours and wheel designs to choose from. All these improvements will have you searching for any excuse to get behind the wheel – or admire your Volvo S60 when it's parked in the driveway.

When you accelerate
out of a corner...
It's like it can read your mind.

We've focused on the Volvo S60's natural driving dynamics so that its actions immediately correspond to your desires.

When you accelerate out of a tight corner, for example, your Volvo S60 will follow the path you choose with almost telepathic accuracy. Drivers will love Corner Traction Control, a torque vectoring system that

helps you avoid understeer by applying just the right amount of power and brake force to the inner and outer wheels as you accelerate out of a corner. You'll find this particularly handy if you're merging into fast-moving traffic from a side road.

What's more, a good chassis is the foundation behind any great-handling car,

and Volvo S60 owners can choose from four individual chassis types: Touring, Dynamic, Four-C, and our Sport chassis. We've spent thousands of hours perfecting and tuning them. We think you'll be thrilled by the result: a responsive, in-command driving experience, whichever option you choose.

“We’re famous for our seats – they’re a proud tradition for us at Volvo Cars.”

We've designed the cockpit around you, the driver. Get inside and feel in complete command as the dashboard gently angles towards you. We were inspired by high-performance motorbikes when we came up with the idea of a single round instrument flanked by two smaller dials. Then, we carefully sculpted the three-spoke steering with the aim of giving you a very physical sense of connection between your car and the road. But where you sit is even more important.

“We’re famous for our seats,” says S60 Product Manager Stefan Sällqvist. “They’re another proud tradition for us at Volvo Cars. Our Sport seats look fantastic and, true to our unrelenting commitment to ergonomic design, you’ll be able to drive for hours sitting in the Volvo S60 without getting tired. The seats also have great side support all the way from your thighs to your shoulders, so they keep you firmly in position even when you’re cornering fast.”

No need to take your hands off your steering wheel as you shift up and down the automatic gearbox in manual mode – just flick through the gears with our optional gearshift paddles (standard on Luxury and R-Design models). You’ll be in total command of your car, with both hands on the wheel. And quicker gear changes give your drive an additional edge when you’re in the mood for upping the tempo.

“The car has a beauty that – as with much of contemporary Scandinavian design – is rooted in the natural world.”

SCANDINAVIAN DESIGN

Yes, it looks as good as it performs.

You know when you're driving on a highway, and you look in your rear-view mirror and see a really striking car's "face" approaching you? That's the Volvo S60.

"The road presence comes from its focused and determined-looking headlights," explains our Senior Exterior Designer Peter Reuterberg. "We were thinking of a wolf's eyes when we designed the car's 'face'. The

Volvo S60 has a confident, focused expression, like a powerful animal." The scalloped surfaces on the bonnet accentuate the classic Volvo V-shape with a purposeful frown running right down to the headlamps. The car has a beauty that – as with much of contemporary Scandinavian design – is rooted in the natural world.

"Those clean surfaces and contours give it

a very Scandinavian feel," says Reuterberg. The strong shoulders are another unmistakable Volvo design cue – as is the expressive grille with the iconic Volvo diagonal. They enhance the car's self-confident look and tell the world it's proud to be a Volvo.

“Sensus is about making your interaction with your car intuitive, and ensuring you’re on the road, but not offline.”

SENSUS

The intuitive way to interact with your car.

Volvo Sensus is our all-encompassing approach that connects you with your car and the world around you. It means you're on the road, but not offline. With Sensus Connect, you can turn the 7-inch screen in your dashboard into an internet-connected infotainment hub. Not only can you surf the web, you can also download various apps.

Sensus Connect also gives you access to basic internet maps and routing, and to take advantage of navigation guidance, 3-D views and navigation apps, there's our Sensus Navigation option.

Connected Service Booking allows you to book your car in for a service from the comfort of the driver's seat.

A high-end audio experience is also part of Sensus. That's why we've designed our state-of-the-art Premium Sound with Harman Kardon®. Using 12 high-fidelity loudspeakers, the amplifier is equipped with Dirac Live®, the next-generation sound enhancement software. With an incredibly realistic stage sound as well as enhanced bass performance, this sound system provides an unparalleled aural experience for every passenger and connects easily with external media players.

Our digital driver display is another delight. Not only does it give you all the information you need without overwhelming you, its three background

modes – Elegance, Eco, and Performance – also sync with the centre screen. The physical controls, such as our floating centre stack with its iconic 'manikin' climate control buttons, are another example of Swedish design that's both functional and beautiful.

And then there's our eye-catching illuminated gearshifter. Glowing gently in the dark, it adds a touch of atmosphere to your night drives.

SENSUS

*“Our vision is to design cars
that should not crash.”*

INTELLISAFE

Intuitive safety by Volvo Cars. For you, and for those around you.

At Volvo Cars, safety is an intrinsic part of our DNA. We've invented some of the world's most pioneering life-saving technologies – such as the three-point safety belt that's been acknowledged as one of the most important innovations of mankind.

But we aim higher. Our vision is to design cars that should not crash. In the shorter perspective the aim is that by 2020 nobody should be killed or seriously injured in a new Volvo.

IntelliSafe is our approach for a more harmonious relationship between cars and people. To achieve this, we have infused your Volvo with smart, intuitive innovations for a safer drive. And the IntelliSafe technologies help protect not only the people inside your car – we also consider people on the outside, for example with technology that helps you to detect pedestrians and cyclists.

When you drive at speeds up to 50km/h, our City Safety collision avoidance technology looks ahead of you and brakes automatically if you're about to run into a vehicle in front.

To give you more support at higher speeds, our Collision Warning with Auto Brake and Pedestrian and Cyclist Detection alerts you if you're too close to a vehicle and a collision is imminent – day or night. During daylight, the system also reacts if there's a pedestrian in your path or a cyclist ahead travelling in the same direction as your car. And should you not react to the warning, your car brakes automatically to help you avoid or mitigate a collision.

If your car should begin to drift between the lanes, our Lane Departure Warning will alert you to stay in the lane. There's even Driver Alert technology that reminds you to take a break in case your driving behaviour shows signs of drowsiness.

Our IntelliSafe technologies also support your daily driving. The Road Sign Information technology keeps you updated on actual speed limits and other important road signs. At night, our Active High Beam stays on high beam all the time to optimise your vision without dazzling other road users. And to

make you a bit more relaxed on the road, our Adaptive Cruise Control can maintain your set speed and distance to the vehicle in front. In slow-moving city traffic, our Queue Assist function can automatically maintain the selected distance to the car in front – from standstill and up to 30km/h. Our BLIS system helps you to early detect other vehicles in your blind spot, while the Cross Traffic Alert function facilitates reversing out of tight parking spaces where your vision can be restricted.

And because we know you love to drive, our active IntelliSafe technologies like Electronic Stability Control add to reassuring driving stability in all conditions without sacrificing the joy of driving. It's simply about giving you the most human driving experience, on your terms. And helping to keep people out of harm's way, whether they happen to be inside or outside your car.

Light up the dark. Driving in the dark just became a lot more enjoyable and safer. Our Active High Beam stays on high beam all the time. You don't have to flick between low and high beam, and when you meet or catch up another vehicle the system shades out only as much of your beam as necessary to avoid dazzling – while you still get the benefit of a brightly lit road. This intelligent technology can even recognise pedestrians and cyclists and avoid dazzling them, too. And when you enter a city, the high beam shuts off.

FIND OUT MORE AT VOLVOCARS.COM.AU

In town, City Safety is designed to prevent you from colliding with the car in front if it stops, or slows suddenly. This advanced IntelliSafe system will brake automatically to avoid a crash and works at speeds of up to 50km/h. An accident can be avoided at a speed difference of up to 15km/h to the vehicle in front.

Because we also care about other road users, our Pedestrian and Cyclist Detection with Full Auto Brake watches out for people walking in your path or cycling in the same direction as your car and applies the brakes if you're unable to react in time.

Our BLIS system uses radar sensor technology to alert you to vehicles that are close to or in your blind spots in your adjacent lane. This way, you're far less likely to change lanes when it isn't safe.

When you're reversing out of tight parking spaces, our Cross Traffic Alert function watches out for vehicles you can't see.

INTELLISAFE

“Our commitment to performance at ever-lower fuel consumption means that our entire powertrain range will soon consist of a new generation of highly efficient 2.0-litre four-cylinder engines.”

DRIVE-E

Enjoying more. Using less.

Drive-E isn't just about our new generation of efficient powertrains, it's about our all-embracing approach to sustainable driving. And while we're committed to creating smarter, more innovative technologies to reduce our cars' impact on the environment, we'll never lose sight of the pleasure to be had in driving. In short, we believe you don't need to sacrifice power and superb driveability for efficiency and low CO₂ emissions.

Our Drive-E powertrain range consists of highly efficient 2.0-litre four-cylinder petrol and diesel engines. We've mated these turbocharged, low-friction, light-weight powerplants to Geartronic®, our all-new eight-speed and six-speed automatic gearboxes, which ensures you get optimum performance at any engine speed.

Your Volvo also has an ECO+ function, which can reduce fuel consumption by up to five per cent, depending on driving style. ECO+ not only optimises shift points, engine control and throttle response, it also includes Stop/Start engine technology and an ECO coast function. This latter function disengages the clutch when you release the accelerator at speeds above 65km/h: instead of the engine braking the car and using up fuel in the process, your Volvo will coast along using its kinetic energy.

Our Drive-E diesel powertrain has additional technologies designed to reduce fuel consumption and emissions. Twin turbochargers and the revolutionary i-ART – where each cylinder has its own microchip and pressure sensor for perfect metering of

fuel – ensure that these intelligent engines provide responsive, clean and efficient performance. Better still, these advanced engines remain in precise tune even after years of use.

Of course, we're committed to a clean environment inside your car as well. As part of CleanZone, all materials in your Volvo's interior are hypo-allergenic and do not emit harmful gases. CleanZone also includes a highly effective dust and pollen filter. You can boost this further with our Interior Air Quality System. This uses an active carbon filter to reduce harmful gases and particles, enabling you and your passengers to breathe easy – even in polluted cities.

The Volvo S60 is available with a wide range of cutting-edge petrol and diesel engines designed to meet your preferences. All of them are designed to offer maximum driving pleasure while using fuel efficiently and keeping CO₂ emissions at a minimum.

Is fuel economy your priority? Then choose our 140kW D4 engine, which consumes just 4.2l/100km and emits 109g CO₂/km. Our petrol range comprises the six-speed 140kW T4 and the higher-performance T5 that is available with an eight-speed Geartronic transmission and produces 180kW.

DRIVE-E

Which Volvo S60 are you?

Congratulations, you've chosen a Volvo S60. You've even picked your preferred engine. Now all you need to do is select the trim level that's right for you. We've made it easy

for you by providing three that we think you'll love. Whether you'd like all the trimmings or a sporty look both inside and out, we have the right one for you.

KINETIC

17" Wheel Rex | Air Quality System | Aluminium Décor | City Safety | Cruise control | Electrically operated parking brake | Electronic Climate Control (ECC) | Illuminated vanity mirror, driver and passenger side | Inflatable Curtains (IC) | LED DRL (Daytime Running Light) | Leather Upholstery | Power Seat Driver | Rain Sensor & Tunnel detection | Remote control central locking | Sensus Connect High Performance Sound | Side impact airbags integrated in the front seats | Trip computer | WHIPS (whiplash protection integrated in the front seats)

LUXURY

Includes Kinetic equipment level plus the following:

18" Wheel Titania diamond cut gloss black | Active Bi-Xenon Lights | Gearshift paddle | Keyless Entry and Drive with personal car communicator | Power Passenger Seat | Sensus Navigation | Shimmer Graphite Décor Inlays | Volvo Guard Alarm

R-DESIGN

Includes Kinetic equipment level plus the following:

18" Ixion wheels | 3-spoke perforated leather-clad steering wheel with metal R-Design badge | Digital driver display with R-Design theme | Dual exhaust with visible tailpipes | LED DRL R-Design | Leather-clad sport gear knob | Nubuck textile/leather upholstery | R-Design interior decor trim | Rear-view mirror caps in silver metallic finish | Sport chassis | Sport floor mats | Sport pedals | Sport seats | Stainless steel treadplates R-Design | Unique R-Design front design | Unique R-Design rear diffuser

RDESIGN

The R-Design story continues in the interior, starting with supportive sport seats in full leather or optional Nubuck textile and leather. Also included is an exclusive R-Design steering wheel as well as sport pedals. A gear shifter gaiter with contrasting stitching, our unique blue R-Design digital driver display, interior LED lighting and a striking charcoal headliner all add to the R-Design experience.

“Our R-Design Sport chassis has been lowered and stiffened for even better cornering – meaning you’ll enjoy the thrill of driving your Volvo S60 even more.”

Would you like to enhance the dynamic personality of your Volvo S60 even further? Well, then R-Design is for you, with a range of features to give your Volvo a sporty, unique profile. But R-Design is so much more than a cosmetic exercise – as with all the best Scandinavian design, form follows function. So, for example, our R-Design Sport chassis has been lowered and stiffened for even better cornering –

meaning you’ll enjoy the thrill of driving your Volvo S60 even more.

For an exterior with a more individual, sporty look, R-Design offers gorgeously sculpted alloy wheels and unique door mirror covers in silver metallic. At the back, a motorsport-style diffuser enhances your car’s dynamic presence, while the R-Design chrome dual exhaust pipes add the perfect finishing touch to the exterior of your Volvo S60.

The exterior colour you choose has a dramatic impact on the personality of your Volvo. But no matter which you choose, each one imbues the car with a sense of luxury and presence.

“Our colour palette is very Scandinavian,” says Ebba Maria Thunberg, who is responsible for colours and material. “When you look at

our palette, you'll find that it contains softer tones that are more connected with nature, with a few bold splashes.” Being Swedish, our designers are inspired by the ocean and the sky, as well as by the shore and the way the light changes throughout the seasons. Every tone speaks of uniqueness, quality and charisma.

From expressive to discreet, elegant to sporty, you can give your Volvo S60 a unique twist by the wheels you choose.

Would you like to make an entrance or do you prefer the charm of the understated? Are you going for a sporty persona or an intricate, refined look? Try different wheels on our online configurator and find the one that's right for you.

Ixion II, 8x19"
Diamond Cut/Matte Black
(R-Design)

Your Volvo S60 is your home away from home.
Give it your signature.

Choose a Volvo S60 and you'll enjoy an elegantly designed cabin as standard, with a superior finish in evidence everywhere you look – from the silk metal finish on our air vents to the fine cloth surfaces on the door pillars.

Our Comfort seats are upholstered in leather as standard, while our Sport seats in leather give you legendary Volvo

comfort while also keeping you firmly in place in those fast corners. And for added control, our gearshift paddles allow you to change gears with the flick of a finger whenever you have the automatic gearbox in manual mode – so you never have to take your hands off the steering wheel while driving. It's a great feature for added control.

You can go one better by choosing our heated steering wheel, which lets you gently warm your hands in cold conditions.

And with our heated windscreen, you'll never have to stand outside scraping ice off the glass in the freezing cold. Once you're in the driver's seat, you'll appreciate the easy-to-read digital driver display.

“Our Park Assist Camera Front Blind View allows you to ‘see around corners’ as you negotiate tight exits.”

NO TWO LIVES ARE THE SAME.

Make sure your Volvo matches yours.

The most pleasurable part of buying a new Volvo is putting your personal stamp on it. You can do that by choosing accessories that reflect your own taste and that cater to your particular lifestyle.

There's nothing more challenging than trying to negotiate tight exits and junctions

with restricted visibility. Our Park Assist Camera Front Blind View takes the stress out of these situations. It allows you to “see around corners” with a 180-degree field of vision in front of you. The image is projected onto your 7-inch centre display so you know exactly who, or what, is approaching.

To reinforce the dynamic stance of your Volvo S60, you can customise it with our Exterior Styling Accessories, which are available in matte Terra Bronze, matte Silver or matte Iron Stone.

Our eye-catching front skid plate gives your Volvo S60 an even more purposeful look, with a metallic finish that's beautifully accentuated as it catches the light. The side scuff plates emphasise the sleek, coupé-like lines, visually connecting it close to the road. The rear skid plates with beautifully sculpted double integrated tailpipes boldly underline the sporty character.

“Our Rear Seat Entertainment system with 8-inch touchscreens and integrated DVD players can operate independently.”

Since there can only be one driver at a time, the Volvo S60 also offers some premium amusements for your rear seat passengers. Our Rear Seat Entertainment system with 8-inch touchscreens and integrated DVD players can operate independently. Wireless headphones are standard (you can also plug in your own wired headphones), so one's game doesn't clash with another's movie.

And adding our illuminated instep plates, you'll enjoy a sophisticated welcome every time you open the front door and enter your Volvo S60 – the Volvo logo embedded in the brushed stainless-steel footstep lights up together with the interior lighting.

MY VOLVO

My Volvo is a personalised website that contains everything you need to really get to know – and get the most out of – your car. It gives you:

- A complete overview of your Volvo Car ownership
- Easy access to all facts relating to your car
- Helpful tips regarding your specific Volvo model
- Instructional films and owner's manuals
- Online Service Booking
- Reminders regarding important stages of your car ownership
- Exclusive articles, films and photographs

CONNECTED SERVICE BOOKING*

If your Volvo has Sensus Connect, it will remind you when it needs servicing and offer to contact your Volvo Car dealer for you. Booking proposals sent from your preferred dealer can easily be managed directly in the car or on your personal My Volvo website. When the time comes to drive to your workshop, your Volvo will remind you and even guide you there. And since your Volvo tells us what it needs, we can make sure it always receives the service it requires when it gets there.

*Available depending on introduction date. Please contact your Volvo Car dealer.
